

**Written Representations by Network Rail Infrastructure Limited in relation to the Norwich to
Tilbury Project (“DCO”)**

Planning Inspectorate Reference Number: EN020027

Registration Identification Number: [REDACTED]

Applicant: National Grid Energy Transmission

Application: The Norwich to Tilbury Order 202*

Introduction

We write further to Network Rail Infrastructure Limited's (Network Rail/NR) Section 56 Representation (submitted on 27 November 2025) which confirmed that Network Rail requires its standard protective provisions to be included in the draft Development Consent Order (**Order**).

The draft DCO submitted with the Application includes powers which would, if granted, authorise the Applicant and UKPN respectively to carry out works on, under and in close proximity to operational railway land in the control of Network Rail, to use such land temporarily, and permanently acquire new rights over such land.

As currently drafted, the Draft Order (document reference number 4.1) does **not** contain any protective provisions for the benefit of NR to sufficiently protect its assets and to ensure the safe and efficient operation of the railway (**Protective Provisions**). As such, Network Rail's required form of protective provisions are not included in Order and crucially there is no restriction on the compulsory acquisition of permanent rights over NR's operational land unless NR's prior consent is obtained.

The content and format of the protective provisions required by NR to be included in the Order are contained within Appendix 1 of the NR's relevant representations submit on the 27 November 2025.

Proposed Compulsory Acquisition of Rights and Temporary Possession

The Book of Reference (document reference number 4.3) identifies a significant number of plots of land over Network Rail have own, occupy or have rights over. The relevant plots and interests are identified at Appendix 1 to this representation, together the **Plots**. For clarity, the total number of affected plots is over 200 as set out in Appendix 1 to this representation, rather than the 400 referenced in our s.56 Representation.

As set out in NR's Relevant Representation, the Promoter is seeking powers to acquire permanent rights over land owned NR land, for example (these being a few non-exhaustive examples):

- Plot B-6/76 - Compulsory Acquisition of Rights – Overhead Line over 2,287 square metres, or thereabouts, of railway works and land situated to the south east of Spring Farm, Mid Suffolk
- Plot B-6/87 - Compulsory Acquisition of Rights – Overhead Line over 455 square metres, or thereabouts, of railway works and land (London to Norwich) situated to the north west of Coldham Grove, Mid Suffolk
- Plot B-6/103 - Compulsory Acquisition of Rights – Overhead line and underground cabling system over 104 square metres, or thereabouts, of railway works and land (London to Norwich) and overhead electricity distribution lines situated to the south west of Coldham Grove, Mid Suffolk

- Plot B-12/86 - Compulsory Acquisition of Rights – Overhead Line over 1,788 square metres, or thereabouts, of situated to the south west of Tudor Barn, Mid Suffolk.
- Plot C-13/68 - Compulsory Acquisition of Rights – Overhead line and underground cabling system over 4,068 square metres, or thereabouts, of railway works and land (Great Eastern Main Line) situated to the south west of Home Farm Cottages, Tendring.
- Plot D-8/6 - Compulsory Acquisition of Rights – Overhead Line - 2,203 square metres, or thereabouts, of railway, works and land (Sudbury Branch Line) situated to the south of Church House Wood, Colchester.

These non-exhaustive examples above all comprise operational railway track, which the Applicant is proposing to permanently acquire rights over. NR objects to the use of compulsory powers to acquire permanent rights over the Plots, including but not limited to those identified above, on the ground that such rights need to be subject to NR's prior consent.

NR must maintain its objection to the DCO unless and until its required form of Protective Provisions (as per those appended to NR's Relevant Representation) are included in the Order (if granted) on the basis that the proposed compulsory acquisition of rights over railway property does not satisfy the test in section 127 of the Planning Act 2008 in that:

- a) the rights cannot be acquired without serious detriment to the carrying on of the undertaking; and
- b) such detriment cannot be made good by Network Rail by use of other railway property.

The reason for this is that:

- 1) many of the plots (over which rights are proposed to be compulsorily acquired and or temporarily possessed) comprise operational railway line;
- 2) unless NR has the ability to require its prior consent and require the Applicant to enter into an easement containing the rights, restrictions and obligations necessary to properly regulate access to operational railway land for the purposes of constructing and maintaining the authorised development, it gives rise to a risk that NR will breach its obligations to maintain standards of safety required by the Network Licence granted to it by the Office of Rail and Road. It is inconceivable that a third party should have compulsory powers to acquire rights to access railway land without first seeking NR's consent as it introduces a risk to public safety which cannot be accepted under any circumstances; and
- 3) as this involves operational railway line and assets such detriment cannot be made good as the line cannot be relocated to other land in the possession of NR (and not least to say requiring NR to relocate its operational railway to facilitate such rights would be entirely disproportionate both in cost and nature).

Accordingly, the section 127 test is failed on the basis of the current form of the Order, with an absence of protective provisions.

Proposed Interference with NR's rights

The Promoter is seeking powers in the Order to compulsory acquire rights over and/or temporarily possess third party land over which NR owns rights. This will have the effect of impeding NR's exercise of those rights.

NR's rights over the plots set out in Appendix 1 below are required for the purposes of carrying on NR's railway undertaking and so must not be extinguished or impeded (as applicable) by the Promoter through powers granted under the Order. Accordingly, NR objects to the granting of the Order on the

basis that in absence of protective provisions for NR's benefit, this does not ensure that NR's ability to exercise the rights are not impeded without its prior consent.

NR's required form of Protective Provisions contain the necessary safeguards to ensure that this does not happen and so must be included on the Order in order to preserve NR's ability to carry on its statutory undertaking.

NR submits that the proposed extinguishment and impediment of its rights over the Plots will cause a serious detriment to NR's statutory undertaking and so do not satisfy the test in section 138 of the Planning Act 2008.

Network Rail continues to investigate the extent of the risk to its assets and is liaising with the Promoter with regards to the form of Protective Provisions to be included in the Order. Until satisfactory agreement has been reached with the Promoter on the form of Protective Provisions, Network Rail will not be in a position to withdraw its objection to the granting of the DCO and hereby respectfully requests that should the Inspector and Secretary of State determine to grant the DCO that NR's required form of Protective Provisions are included.
