

Submission ID: SC5A5DBA8

I am writing as the MP for South Suffolk to support Burstall Parish Council's request for a Planning Inspectorate site visit to the Bramford Substation.

This should consider all existing, approved, and proposed developments, including BESS. As the closest village to the Bramford Substation, I would urge you to consider Burstall's considerable concerns about the physical resilience of the Norwich to Tilbury project with regards to the resilience, continuity and security of Bramford Substation.
