The Waltham Gap is far too narrow for the amount of pylons proposed. It will totally ruin the natural landscape of our historic village of Great Waltham and industrialise it. The whole aspect of the village will be changed and destroyed forever. Whilst offshore is the only sensible logical solution as has been used from Scotland to Norfolk why not do the same from Norwich to Tilbury around the coast?

Undergrounding along the Waltham Gap is second preferable option. Please don't destroy what has taken centuries to build. Our community our heritage and wildlife
