

I would like to endorse the submission made this week by Offton & Willisham Parish Council together with the presentations made by Jane Lushington and Trevor Seddon at the open floor meeting held in Ipswich.

This project is not fit for purpose. NG have failed to consider alternative technology with no explanation as to why, their own costings are lacking in both transparency and scope and no meaningful assessment of economy damage has been conducted.

The consultations have been meaningless

Offton has been highlighted along with Dedham Vale as an area where the proposal will have a significant impact but whereas under grounding will take place in Dedham Vale no such mitigation of the impact has been offered for Offton. The economic impact for households, businesses and the environment has not been addressed especially important in Offton where the village will be cut in three.

I would request a PIN's visit to Offton as soon as possible
