Dear Ms Hunt

National Grid Electricity Transmission plc
The proposed Norwich to Tilbury Development Consent Order
Applicant's Deadline 5 submission

Introduction

This letter sets out the Applicant's submissions into the examination at Deadline 5.

The Rule 8 letter **[PD-011]** requires the submission of:

- Responses to ExQ2.
- The applicant's updated documents and application guide.
- Comments on any further information or submissions received by Deadline 4.
- Any further information requested under rule 17.

A full list of all documents and a note on whether the document supersedes a previous version of the document is attached at Appendix 1.

Responses to ExQ2

The Applicant has responded to all of the ExA's second written questions in a single document.

- 8.9.2 Applicant's Responses to Second Written Questions

The responses to the questions have also led to amendments to some documents submitted at this deadline.

The Applicant's updated documents and application guide

At this deadline we are supplying a number of updated documents. The table in Appendix 2 sets out the document to be updated and a brief explanation on why it is being updated at this deadline. All updated documents supersede the previous version.

Track Change versions of these documents are supplied. As requested in the Rule 17 letter issued on 22 May 2026 [PD-022] track change versions of the plans are also shown with the changes highlighted by clouds. As with all track change documents they do not amend the original documents and are intended to illustrate the area of change.

Where the given reason in this table relates to Scenarios 11, 18 or 19, the Deadline 4 document **8.11 Approach to Scenarios [REP4-310]**, explained on page 6 that certain plans in respect of those scenarios would be submitted at deadline 4 with the remainder at this deadline; deadline 5. It should be noted that scenario 11 relates to the Lower Thames Crossing (LTC) south of the proposed new Tilbury North Substation, scenario 18 relates to land south of the new Tilbury North Substation and scenario 19 relates to The Walthams and standard height pylons to the south of the River Chelmer.

It should also be noted that the Applicant's Lands team have undertaken a route wide data refresh and this is reflected in a number of documents.

Finally, in order to limit the length of the table, track change versions of submitted documents are not listed. Where a document, for example 3.1 draft DCO, is supplied in an editable format, that is also not listed in the table.

The Application is also submitting a small number of new documents at this deadline. These are set out in the table at Appendix 3.

Comments on any further information or submissions received by Deadline 4

The Applicant responds to the further submissions received by Deadline 4 in the following documents:

- 8.4.11 Applicant's Comments on any Further Information or Submissions Received by Deadline 4
- 8.4.11.1 Applicant Response to ARU Writtle [REP4-348] and ExQ2 CA 2.1 and HW 2.2
- 8.4.12 Applicant's Comments on Post-Hearing Submissions and Interested Party Action Points
- 8.4.13 Applicant's Response to Comments on its ExQ1 Responses
- 8.4.13.1 Applicant's Response to Pylons East Anglia's Comments on its ExQ1 Responses

Any further information requested under rule 17

Since Deadline 4 the ExA have issued 3 information requests under rule 17. These were issued on 22 May 2026 [PD-022], 1 June 2026 [PD-024] and 5 June 2026 [PD-027].

Rule 17 letter issued on 22 May 2026

On 22 May 2026 a letter was issued **[PD-022]** which included a Rule 17 request. That request was for a cloud outline to be provided for all plans/figures submitted at deadline 4 and for all plans/figures submitted at deadline 5 onwards. These cloud outlines have been added onto the original drawings without updating anything else on the drawing, including the revision number in a similar way to track changes on a written document. This means that the clouding does not appear in the key to the drawing. The clouds indicate the broad area of change.

The relevant documents from deadline 4 are listed in Appendix 4.

Rule 17 Letter issued on 1 June 2026

The Rule 17 letter issued on 1 June 2026 **[PD-024]** was not addressed to the Applicant and no response is required.

Rule 17 Letter issued on 5 June 2026

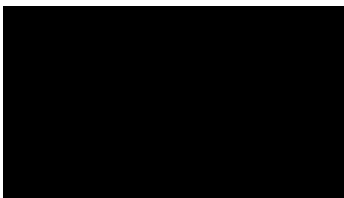

The Rule 17 letter issued on 5 June 2026 **[PD-027]** has set a response deadline of 17 June 2026 (Deadline 5a) so no further action is required at this time.

Next Steps

We trust all is in order. If you have any queries about the content of this letter, please contact Ian Fletcher.

Please acknowledge safe receipt of this letter.

Yours sincerely,

Project Director
