- Proposed cable sealing end compound (CSEC)
- Environmental area
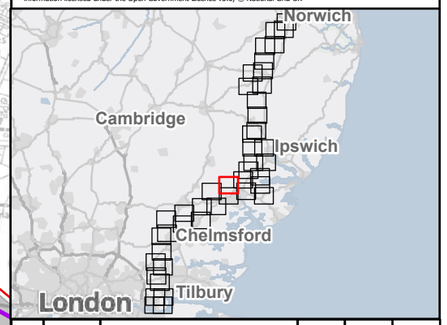
- Other temporary and permanent construction and operational works

Discipline specific constraints

- 2 km Study Area – Assessment of setting effects on all designated heritage assets
- 3 km Study Area – Assessment of setting effects on designated assets of the highest significance (Scheduled Monuments, Grade I & II* Listed Buildings, Grade I & II* Registered Parks and Gardens)

Designated assets

- Scheduled monuments
- Conservation areas



Listed buildings

- Grade I
- Grade II
- Grade II*
- Registered parks and gardens grade II

Grade I and II* listed buildings, scheduled monuments and registered parks and gardens are labelled with their National Heritage List Entry number.

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the alignment. For further details regarding the design, please refer to Figures 4.1 (document reference 6.4.F1) and 4.2 (document reference 6.4.F2).

Print Date: 04-30-26 17:30:43

- Order limits
- Sheet index cutline

Proposed project design details

- Proposed full line tension gantry
- Proposed low duty gantry
- Proposed low height pylon location
- Existing pylon (modify)
- Proposed standard lattice pylon location
- Proposed overhead line alignment
- Proposed underground cable alignment
- Proposed Tilbury North Substation
- Proposed cable sealing end compound (CSEC)
- Environmental area
- Environmental mitigation
- Other temporary and permanent construction and operational works

Discipline specific constraints

- 2 km Study Area – Assessment of setting effects on all designated heritage assets
- 3 km Study Area – Assessment of setting effects on designated assets of the highest significance (Scheduled Monuments, Grade I & II* Listed Buildings, Grade I & II* Registered Parks and Gardens)

Designated assets

- Scheduled monuments
- Conservation areas

Listed buildings

- Grade I
- Grade II
- Grade II*

Grade I and II* listed buildings, scheduled monuments and registered parks and gardens are labelled with their National Heritage List Entry number.

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the alignment. For further details regarding the design, please refer to Figures 4.1 (document reference 6.4.F1) and 4.2 (document reference 6.4.F2).

Doc Ref: 6.11.A3

Order limits
Sheet index cutline
Project section line

Proposed project design details

Proposed low duty gantry
Proposed low height pylon location
Proposed standard lattice pylon location
Proposed overhead line alignment
Proposed underground cable alignment
Proposed cable sealing end compound (CSEC)
Environmental area
Environmental mitigation
Other temporary and permanent construction and operational works

Discipline specific constraints

Accessed fields

Note: The proposed overhead line alignment and proposed underground cable alignment together comprise the alignment. For further details regarding the design, please refer to Figures 4.1 (document reference 6.4.F1) and 4.2 (document reference 6.4.F2).

1.5 Non-Designated Heritage Assets

Table A11.1.5 Non-designated heritage assets considered in Section A

Project ID	Source Reference[1]	Reported Period	Name
1000	MNF10015	Med, post medieval	Medieval and post medieval pottery
1001	MNF10020	Neolithic	Neolithic polished flint axehead
1002	South Norfolk Council	Medieval	The Heywood – Protected Lane
1003	MNF10024	Medieval	Bunwell Wood medieval moat
1004	South Norfolk Council	Medieval	Heywood Road – Protected Lane
1005	MNF10033	Palaeolithic, Neolithic, Bronze Age	Prehistoric worked flints and Bronze Age copper alloy socketed axehead
1006	MNF10044	Early Bronze Age to Roman	Bronze Age or Roman barrow and Roman coins found at Nunmete / Nonmete Hill
1007	MNF10045	Bronze Age	Possible Bronze Age barrow and possible undated gallows site
1008	South Norfolk Council	Medieval	Back Heywood Road – Protected Lane
1009	South Norfolk Council	Medieval	Darrow Road – Protected Lane
1010	MNF10106	Medieval	Kenningham deserted medieval village
1012	MNF1041	Medieval to 19th Century	Dairy Farm
1013	MNF10900	Medieval	Medieval moated site
1014	MNF10906	Medieval	Medieval moats
1015	MNF10908	Medieval	Medieval moated site
1016	MNF10923	Roman to post medieval	Roman and medieval to post medieval finds
1017	MNF70889	Early Neolithic to Early Bronze Age	Neolithic/Early Bronze Age polished flint axehead
1018	MNF10925	Medieval	Medieval pottery sherds, Low Farm
1019	MNF10926	Roman	Roman pottery sherds

[1] Note: where a hyphen is indicated, this means that the asset has been identified by the Project through either crop mark or historic map analysis

Project ID	Source Reference[1]	Reported Period	Name
1020	MNF10927	Prehistoric	Prehistoric pot boiler concentration
1021	MNF10035	Roman to 19th Century	Old Hall
1022	MNF9759	Mesolithic, Roman, early medieval, medieval, post medieval	Multi-period finds recovered from part of Roman settlement at Venta Icenorum
1023	MNF65846	Medieval	Medieval coin
1024	MNF10974	Medieval to post medieval	Possible medieval or post medieval moat
1025	MNF68005	Roman to Medieval	Roman and medieval finds
1026	MNF10987	Medieval	Medieval moat at Willow Farm
1027	MNF10988	Medieval	Medieval moat
1029	MNF9984	Medieval	Medieval strip fields
1030	MNF11679	Bronze Age	Cropmarks of a possible Bronze Age ring ditch
1032	MNF11903	Medieval	Earthworks of possible medieval manorial site and ridge and furrow
1034	MNF69394	Roman to Medieval	Roman and medieval finds
1035	MNF9962	Prehistoric	Potentially prehistoric flints
1037	MNF13628	World War One	World War One military airfield
1038	MNF71268	Medieval	Medieval coin
1039	MNF15313	Post medieval	Site of post medieval windmill
1040	MNF15316	Post medieval	Site of post medieval brick kiln
1044	MNF15465	Late Iron Age to medieval	Late Iron Age/Roman and medieval finds
1047	MNF16562	Post medieval	Timber framed barn
1048	MNF16661	Post medieval	Post medieval brickworks
1049	MNF17388	Neolithic/Bronze Age, Roman, early medieval, medieval, post medieval	Multi-period finds
1052	MNF17244	Early Neolithic to medieval	Multi-period finds scatter
1053	MNF17387	Roman to medieval	Roman and medieval finds

Project ID	Source Reference[1]	Reported Period	Name
1054	MNF17653	Roman to post medieval	Roman brooch and post medieval buckle
1055	MNF74157	Post medieval	Undated possible kilns, pits and ditches and post medieval field boundary
1056	MNF68794	Medieval	Banyard's Hall medieval moat
1057	MNF17474	Late Bronze Age to Roman	Bunwell Bronze Age hoard
1058	MNF17868	Mesolithic/Neolithic, Bronze Age, Iron Age, Roman, early medieval, medieval, post medieval	Multi-period finds
1059	MNF17828	Bronze Age	Middle Bronze Age socketed spearhead
1061	MNF17867	Roman to Middle Saxon	Roman coin and Middle Saxon pin
1062	MNF17869	Mesolithic/Neolithic, Roman, early medieval, medieval, post medieval	Multi-period finds including undatable furnace bottom
1063	MNF18011	Prehistoric, Roman, early medieval, medieval, post medieval	Multi-period finds scatter
1064	MNF17882	Medieval	Site of Winfarthing Great Park medieval deer park
1065	MNF17956	Early Neolithic, Medieval	Neolithic/Bronze Age and medieval finds
1066	MNF21959	Prehistoric, Mesolithic, Iron Age, Roman, early medieval, medieval, post medieval	Possible Roman settlement and multi-period finds
1067	MNF9765	Medieval	Site of Kenningham Church
1069	MNF19149	Neolithic	Neolithic flint core
1070	MNF19509	Early Mesolithic, medieval	Mesolithic flint tranchet axehead and medieval metal objects
1071	MNF9754	Medieval to 19th Century	Post medieval ditch

Project ID	Source Reference[1]	Reported Period	Name
1072	MNF19723	Medieval	Cropmarks of medieval strip fields
1074	MNF20494	Roman to medieval	Roman and medieval coins and multi-period pottery sherds
1075	MNF23002	Mesolithic/Neolithic, Iron Age, Roman, early medieval, medieval, post medieval	Possible Roman settlement and multi-period finds
1076	MNF21041	Medieval	Medieval pottery
1077	MNF21042	Medieval	Medieval pottery
1078	MNF21043	Prehistoric	Prehistoric flake
1079	MNF21048	Medieval	Medieval pottery
1080	MNF21052	Medieval to 16th Century	Late medieval/early post medieval finds
1081	MNF21053	Medieval	Medieval pottery
1082	MNF21585	Late Bronze Age to Roman	Late Bronze Age and Roman finds
1083	MNF21586	Mesolithic to Neolithic	Mesolithic and Neolithic worked flints and Bronze Age socketed point
1084	MNF21653	Prehistoric	Prehistoric burnt flint
1086	MNF21729	Roman	Former site of the Roydon Head Roman statue
1087	MNF23091	Prehistoric, Mesolithic/Neolithic, Bronze Age, Iron Age, Roman, early medieval, medieval, post medieval	Multi-period finds scatter
1088	MNF22875	Roman	Undated and Roman finds
1089	MNF23391	Early Neolithic to 19th Century	Deserted medieval/post medieval settlement and multi-period finds
1090	MNF23449	Medieval to 19th Century	Possible site of medieval house, lower slope of valley just above valley floor
1091	MNF23103	Prehistoric, medieval	Prehistoric flint artefacts and medieval pottery sherds
1092	MNF23272	Prehistoric	Prehistoric flint artefacts

Project ID	Source Reference[1]	Reported Period	Name
1093	MNF23844	Early Neolithic to 19th Century	Multi-period objects and pottery sherds
1094	MNF23448	Medieval	Possible site of medieval house, lower slope of valley just above valley floor
1095	MNF67730	Roman	Roman brooch
1096	MNF23450	Medieval	Possible site of medieval house, lower slope of valley just above valley floor
1097	MNF23452	Prehistoric, Roman	Prehistoric flint flakes and Roman Pottery
1098	MNF23457	Prehistoric, Iron Age, early medieval	Prehistoric flint artefacts and Iron Age/Early Saxon pottery sherds
1099	MNF23699	Roman to Medieval	Roman and medieval pottery sherds, east of Water Leydons
1100	MNF23802	Roman	Roman brooch
1101	MNF23842	Prehistoric	Prehistoric burnt flint
1102	MNF23846	Prehistoric, Roman, early medieval, medieval, post medieval	Multi-period finds scatter
1103	MNF24358	Neolithic, early medieval, medieval, post medieval	Multi-period objects and pottery sherds
1104	South Norfolk Council	Medieval	Heywood Road (2) – Protected Lane
1105	MNF23849	Medieval	Medieval metal finds
1106	MNF23989	Late Saxon	Late Saxon pendant
1107	MNF24664	Prehistoric, medieval, post medieval	Multi-period objects
1108	MNF24359	Early Neolithic, medieval	Neolithic and medieval finds
1109	MNF24744	Roman, medieval, post medieval	Multi-period finds
1110	MNF24794	Roman, medieval, post medieval	Roman, medieval and post medieval objects
1111	MNF25181	Prehistoric, Iron Age, Roman,	Multi-period finds

Project ID	Source Reference[1]	Reported Period	Name
		medieval, post medieval	
1112	MNF24459	Prehistoric, medieval	Prehistoric flint artefacts and medieval pottery sherds
1113	MNF24460	Prehistoric	Prehistoric flint flakes
1114	MNF24461	Prehistoric	Prehistoric pit
1115	MNF24535	Prehistoric	Prehistoric scraper and flake
1117	MNF28616	Prehistoric, medieval, post medieval	Multi-period finds
1118	MNF28632	Neolithic/Bronze Age, early medieval, medieval, post medieval	Multi-period findspot
1119	MNF28669	Medieval, post medieval	Medieval and post medieval metalwork
1120	MNF25179	Prehistoric	Prehistoric burnt mound
1121	MNF25180	Roman	Roman coin
1122	MNF9750	Medieval to post medieval	Site of Humbleyard Hundred moot, Swardeston
1123	MNF25250	Roman	The Roydon Head Roman statue (original site)
1124	MNF25415	Prehistoric	Prehistoric pot boiler concentration, field east of Vine Farm
1125	MNF25416	Roman	Roman horse-head copper alloy bowl escutcheon
1126	MNF25417	Medieval	Medieval metalwork
1127	MNF28319	Iron Age	Iron Age coin
1128	MNF29387	Roman, early medieval, medieval, post medieval	Roman, Early Saxon to Middle Saxon, and medieval to post medieval finds
1130	MNF30205	Early Mesolithic, Bronze Age, Iron Age, Roman, early medieval, medieval, post medieval	Roman settlement, Early Saxon cemetery and multi-period finds

Project ID	Source Reference[1]	Reported Period	Name
1131	MNF30395	Bronze Age, Roman, medieval, post medieval	Undated, Middle Bronze Age and Late Saxon to post medieval finds
1132	MNF31446	Roman, medieval, post medieval	Multi-period finds scatter
1133	MNF31447	Roman, medieval, post medieval	Multi-period finds scatter
1134	MNF31505	Early medieval, medieval, post medieval	Early Saxon to post medieval metal objects
1136	MNF31821	Bronze Age, Iron Age, Roman, early medieval	Bronze Age, Iron Age, Roman and possible Early Saxon features
1137	MNF31943	Iron Age, Roman, early medieval, medieval, post medieval	Iron Age to post medieval objects
1138	MNF31308	Medieval	Four medieval coins
1139	MNF31949	Prehistoric, Bronze Age, Iron Age, Roman, early medieval, medieval, post medieval	Early Roman coin hoard and multi-period finds
1141	MNF71037	Medieval, post medieval	Medieval to post medieval finds
1142	MNF9752	Medieval, post medieval	Cropmark of ring ditch
1143	MNF32919	Medieval, post medieval	Medieval and post medieval metalwork
1144	MNF31820	Prehistoric, Mesolithic, Neolithic, Iron Age, Roman, Medieval	Iron Age and Roman features and possible Roman building at Dunston Hall golf course
1146	MNF31856	Iron Age	Undated post hole, Iron Age pits and quarries at Dunston Hall Golf Course
1147	MNF31858	Bronze Age, Iron Age	Bronze Age and Iron Age features, Iron Age buildings
1148	MNF33829	Post medieval	Post medieval coin

Project ID	Source Reference[1]	Reported Period	Name
1149	MNF38341	Iron Age, Roman, medieval, post medieval	Medieval horse harness pendant and multi-period metal objects and coins
1151	MNF32306	Roman, early medieval, medieval	Multi-period finds scatter
1155	MNF39240	Iron Age/Roman, Roman, early medieval, medieval, post medieval	Late Iron Age to Roman and Late Saxon to post medieval finds
1156	MNF33192	Early medieval, medieval	Late Saxon and medieval finds

1160	MNF9751	Unknown	Undated and unidentified cropmark
1161	MNF39826	Late Iron Age to 19th Century	Late Iron Age to Roman and Saxon to post medieval finds
1162	MNF38733	Roman to 19th Century	Multi-period finds scatter
1164	MNF39828	Early Neolithic to 19th Century	Roman, Early Saxon and Late Saxon to post medieval finds
1166	MNF39099	Medieval	Medieval pendant
1167	MNF39999	Bronze Age, early medieval, post medieval	Bronze Age, Saxon and post medieval metal objects
1168	MNF40010	Early Iron Age to 19th Century	Roman metal-working site and Roman, Early Saxon and Late Saxon to post medieval finds
1169	MNF39262	Unknown	Earthworks of undated ditch, bank, trackway and enclosure
1170	MNF40086	Early Iron Age to 19th Century	Multi-period metal objects and pottery sherds
1171	MNF39635	Unknown	Possible Bronze Age ring ditch
1172	MNF9749	Unknown	Possible undated archaeological site

Project ID	Source Reference[1]	Reported Period	Name
1173	MNF40189	Medieval to 19th Century	Medieval and post medieval coins
1174	MNF40767	Post Medieval	Post medieval coins and metal objects
1175	MNF41015	Roman to 19th Century	Silver pilgrim badge and multi-period finds
1176	MNF39840	Medieval	Medieval finger ring
1177	MNF39843	Medieval to 19th Century	Medieval brooch and spur
1178	MNF9744	Unknown	'Money Close' placename
1179	MNF41236	Roman to 19th Century	Prehistoric worked flint and Roman to post medieval metal objects
1180	MNF41626	Roman to 19th Century	Roman, medieval and post medieval objects
1181	MNF9717	Medieval to 19th Century	Site of St James' Chapel, Gowthorpe, Swardeston
1182	MNF42102	Prehistoric to 19th Century	Iron Age pits, post medieval ditches and other, poorly-dated remains
1184	MNF42103	Prehistoric to 19th Century	Prehistoric, post medieval and undated remains
1185	MNF42104	Prehistoric to 19th Century	Prehistoric and post medieval finds
1186	MNF58669	Medieval to 19th Century	Probable post medieval boundary
1187	MNF42209	Iron Age to 19th Century	Early Saxon cemetery and Iron Age to post medieval finds
1188	MNF42262	Roman to 19th Century	Multi-period finds scatter
1189	MNF42480	Roman to 19th Century	Multi-period objects, coins and pottery sherds
1190	MNF4251	Mesolithic to 19th Century	Multi-period finds
1191	MNF42574	Medieval to 19th Century	Medieval strap end and post medieval spur
1192	MNF67418	Roman to 19th Century	Roman, Late Saxon, medieval and post medieval finds

Project ID	Source Reference[1]	Reported Period	Name
1194	MNF43766	Prehistoric to 19th Century	Multi-period finds scatter
1195	MNF44227	Prehistoric to 19th Century	Multi-period finds
1199	MNF46443	19th Century	Coin of George III
1200	MNF46444	Post Medieval	Coin of William III
1204	MNF54038	Late Bronze Age to 19th Century	Late Bronze Age, Roman, medieval and post medieval finds
1205	MNF54042	Medieval to 19th Century	Medieval and post medieval finds
1206	MNF54938	Post Roman	Roman, Early Saxon and Late Saxon to post medieval finds
1207	MNF44199	Medieval to 19th Century	Medieval and late medieval to post medieval pottery sherds
1208	MNF55000	Early Mesolithic to 19th Century	Mesolithic flint blade core, Roman coins and medieval to post medieval objects
1209	MNF58528	Post Medieval	Post medieval brick making and extraction site
1210	MNF67906	Post medieval, modern	The Coach House at Roydon Hall
1212	MNF58530	Post medieval	Possible undated enclosure and associated ditches
1213	MNF46495	Medieval to 19th Century	Medieval or post medieval weight
1214	MNF58670	Medieval to 19th Century	Post medieval field boundaries
1217	MNF66315	Roman to 19th Century	Roman and Middle/Late Saxon to post medieval finds
1218	MNF60099	Late Bronze Age to 19th Century	Multi-period findspot
1219	MNF54705	Middle Bronze Age to Late Bronze Age	Bronze Age rapier
1221	MNF60184	Medieval to 19th Century	Shallow earthworks of probable medieval to post medieval date, Swardeston Hill

Project ID	Source Reference[1]	Reported Period	Name
1222	MNF60186	Post Medieval, modern	Possible linear cropmarks of uncertain archaeological significance
1223	MNF60305	Medieval to 19th Century	Cropmarks of a series of post medieval field boundaries
1224	MNF60513	Middle Bronze Age to 19th Century	Middle/Late Bronze Age, Late Iron Age/Roman and medieval to post medieval finds
1225	MNF66314	Roman to 19th Century	Roman and Late Saxon to post medieval finds
1227	MNF74161	Medieval to 19th Century	Probable area of medieval settlement and undated field boundaries and possible ring-ditch
1228	MNF57726	Saxon	Late Saxon bridle fitting
1229	MNF61840	Prehistoric to 19th Century	Prehistoric and Early Neolithic worked flint and multi-period pottery
1230	MNF61841	Prehistoric to 21st Century	Multi-period finds
1232	MNF58527	Medieval to 19th Century	Probable site of medieval village of Gowthorpe
1233	MNF61842	Prehistoric to 19th Century	Prehistoric, Roman and Late Saxon to post medieval finds
1234	MNF61861	Prehistoric to 19th Century	Prehistoric worked flint, Roman, medieval and post medieval ceramic artefacts
1235	MNF61863	Prehistoric to 19th Century	Prehistoric and Neolithic worked flint, Roman, medieval and post medieval pottery, post medieval clay pipe
1236	MNF28668	Roman to 19th Century	Roman, medieval and post medieval finds
1237	MNF58532	Roman to 21st Century	Cropmarks of undated field boundaries
1238	MNF61931	Neolithic to 19th Century	Late prehistoric piercer, medieval and post medieval pottery, post medieval clay pipe
1239	MNF61933	Post medieval	Post medieval pottery and clay pipe
1240	MNF58671	Modern	Site of a probable World War Two searchlight battery

Project ID	Source Reference[1]	Reported Period	Name
1241	MNF58680	Medieval to 19th Century	Earthworks of medieval to post medieval enclosures and boundaries surrounding Mangreen Hall
1243	MNF58949	Unknown	Cropmarks of fragmentary undated ditches
1245	MNF59981	Medieval to 19th Century	Cropmarks of a series of boundary ditches, enclosures and ponds of probable medieval to post medieval date
1246	MNF66170	Early Neolithic to medieval	Multi-period finds
1247	MNF59984	Early Iron Age to Roman	Cropmarks of ditches, possibly relating to former field boundaries of possible Iron Age to Roman date
1249	MNF62951	18th Century to 21st Century	Former site of 18th century milestone marking Norwich 4 miles and Ipswich 39 miles
1250	MNF60072	Unknown	Cropmarks of fragmentary ditches of unknown date
1251	MNF63115	Early Iron Age to 19th Century	Iron Age/Roman to post medieval finds
1252	MNF63256	Roman to 19th Century	Medieval coin hoard (dispersed) and Roman, Late Saxon Anglo-Scandinavian, and post medieval coins
1254	MNF60187	Roman	Cropmarks of rectilinear enclosures, field boundaries and ditches of unknown, but possible Roman date
1255	MNF60188	Roman	Cropmarks of field boundaries and ditches of unknown, but possible Roman date
1256	MNF60189	Early Bronze Age to Roman	Cropmarks of possible enclosures, a ring ditch, field boundaries and ditches of unknown, but possible Roman date
1257	MNF60195	Early Iron Age to Roman	Cropmarks of fragmentary undated ditches, probably former field boundaries and trackways of unknown date

Project ID	Source Reference[1]	Reported Period	Name
1260	MNF60256	Early Iron Age to Late Saxon	Cropmarks of fragmentary enclosures and field boundaries of unknown but possible Iron Age to Roman or Saxon date
1261	MNF60257	Early Neolithic to Roman	Large area of dispersed cropmarks of fragmentary enclosures and field boundaries of possible prehistoric to Roman date, Dunston Park
1263	MNF63452	Roman to 19th Century	Multi-period finds
1264	MNF60306	Unknown	Cropmarks of undated ditches
1265	MNF63549	Roman to 19th Century	Roman, Early Saxon and Late Saxon to post medieval finds
1266	MNF63550	Roman to 19th Century	Roman and post medieval finds
1267	MNF61409	Roman	Roman coin
1268	MNF63551	Medieval to 19th Century	Medieval and post medieval finds
1269	MNF63552	Roman to 19th Century	Multi-period finds
1270	MNF73450	Prehistoric to 21st Century	Bronze Age enclosure and other prehistoric and undated remains
1271	MNF63783	Prehistoric to 19th Century	Roman, medieval and undated remains
1272	MNF63911	Post medieval	Possible Quaker burial ground at Quaker Farm
1273	MNF64533	Roman to 19th Century	Multi-period finds
1274	MNF61854	Early medieval	Late Saxon stirrup-strap mount
1275	MNF64778	Roman to 21st Century	Roman and medieval to modern finds
1277	MNF64779	Early Neolithic to 21st Century	Multi-period finds
1278	MNF64828	Roman to 21st Century	Multi-period finds
1279	MNF28732	Early Iron Age to 19th Century	Multi-period finds and possible Early Saxon inhumation cemetery

Project ID	Source Reference[1]	Reported Period	Name
1280	MNF65036	Late Bronze Age to 19th Century	Multi-period metal objects
1281	MNF65388	Medieval to 19th Century	Medieval and post medieval finds
1282	MNF65980	Late Bronze Age to 19th Century	Roman and Late Saxon to post medieval finds
1283	MNF65989	Late Bronze Age to 19th Century	Late Bronze Age, Roman to Middle Saxon and medieval to post medieval finds
1284	MNF66023	Medieval to 19th Century	Medieval to post medieval finds
1285	MNF66313	Medieval to 19th Century	Medieval and post medieval finds
1286	MNF66317	Roman to 19th Century	Roman and medieval to post medieval finds
1287	MNF74159	Post medieval	Undated possible kilns and extraction pits and post medieval field boundaries
1289	MNF67726	Late Mesolithic to 19th Century	Multi-period finds
1290	MNF73128	Roman	Roman folding knife handle
1291	MNF67757	Late Saxon to 19th Century	Late Saxon/medieval and post medieval finds
1293	MNF68768	Late Iron Age to 19th Century	Late Iron Age to Roman and medieval to post medieval finds
1294	MNF73116	Roman to medieval	Roman, Middle Saxon, and medieval coins
1297	MNF74158	Post medieval	Undated possible ditches and pits and post medieval field boundaries
1298	MNF70615	Late Bronze Age to 19th Century	Roman and Late Saxon to post medieval finds
1299	MNF70923	Roman to 19th Century	Roman, medieval and post medieval finds
1300	MNF65035	Medieval	Medieval lead pot mend and undatable copper alloy casting waste
1301	MNF71632	Roman to 19th Century	Multi-period finds

Project ID	Source Reference[1]	Reported Period	Name
1302	MNF65037	Middle Saxon to 19th Century	Medieval to post medieval finds
1303	MNF74155	Early Neolithic to Late 20th Century	Potentially prehistoric, Roman and undated remains
1304	MNF29306	Roman to 19th Century	Roman and Middle Saxon to post medieval finds
1305	MNF10940	Medieval to 19th Century	Heywood Manor
1306	MNF14129	16th Century to 21st Century	Barn at Church Farm
1307	MNF18532	17th Century to 21st Century	Brockswater
1310	MNF61827	Cold War	Cold War bunker at Quaker Farm
1311	MNF62851	Modern	Former Diss Heywood School
1312	MNF9770	Post medieval, modern	Former Henstead Union Workhouse and Vale Hospital, Swainsthorpe
1314	MNF10938	Medieval to 19th Century	Tibenham Farm
1315	MNF58915	Early Bronze Age to Roman	Cropmarks of a polygonal enclosure/ring ditch or possible Roman temple
1316	MNF58916	Roman	Cropmarks of double ditched trapezoidal enclosure
1317	MNF58937	Roman	Cropmarks of enclosures and boundaries to west of Venta Icenorum
1318	MNF58940	Early Bronze Age to Roman	Cropmarks of three ring ditches in a line, possible Bronze Age round barrows, or Iron Age roundhouses
1321	MNF58943	Roman to Late Saxon	Cropmarks of two sub-rectangular pit-like features
1322	MNF58947	Medieval to 19th Century	Cropmarks of medieval to post medieval boundary ditches and banks
1323	MNF58948	Roman to 19th Century	Cropmarks of boundaries of either Roman or medieval to post medieval date

Project ID	Source Reference[1]	Reported Period	Name
1324	MNF59024	Early Bronze Age to Late Iron Age	Cropmarks of possible pre-Roman boundary ditches and field boundaries
1325	MNF59025	Unknown	Parent record for complex area of phased cropmarks
1326	MNF9743	Roman to 19th Century	Roman to post medieval finds
1327	MNF29030	Roman to 19th Century	Roman, medieval and post medieval objects
1328	MNF40603	Bronze Age	Site of a possible Bronze Age barrow cemetery
1329	MNF74733	Early Bronze Age to 19th Century	Site of a probable Bronze Age ring ditch
1330	MNF74734	Early Bronze Age to 19th Century	Site of a probable Bronze Age ring ditch
1331	MNF74735	Bronze Age	Site of a possible Bronze Age ring ditch
1332	MNF74736	Bronze Age	Site of a possible Bronze Age ring ditch
1333	MNF74967	Roman to 19th Century	Roman enclosures and associated remains
1334	MNF10898	Neolithic	Neolithic flint find
1335	MNF30978	Prehistoric to 19th Century	Possible site of post medieval market and multi-period finds
1336	MNF29983	Post medieval	Hill Farm
1345	MNF30204	Late Bronze Age to 19th Century	Late Bronze Age, Roman to Middle Saxon and medieval to post medieval finds
1346	MNF30393	Roman to 19th Century	Roman to post medieval finds
1347	MNF30476	Roman	Roman coin of Lucius Verus
1348	MNF31283	Early Bronze Age to Roman	Bronze Age chain and Roman coins
1349	MNF31285	Roman	Roman finds
1350	MNF42071	Roman to 19th Century	Roman and medieval to post medieval finds
1351	MNF42097	Roman	Three Roman coins

Project ID	Source Reference[1]	Reported Period	Name
1353	MNF57116	Unknown	Possible discrete features of uncertain date and nature
1354	MNF58531	Roman to 21st Century	Possible pair of ring ditches
1357	MNF64540	Early Mesolithic to 19th Century	Multi-period finds
1358	MNF74560	Roman to medieval	Roman and medieval coins
1359	MNF74737	Bronze Age	Site of a probable Bronze Age ring ditch
1360	MNF74738	Bronze Age	Site of a possible Bronze Age ring ditch
1361	MNF74965	Middle Iron Age to 19th Century	Iron Age pit and post medieval ditch
1362	MNF74966	Unknown	Undated rectilinear enclosures
1363	MNF74968	Undated	Undated and post medieval ditches
1364	MNF75258	Prehistoric to 19th Century	Roman, medieval and undated remains
1365	MNF77379	Undated	incomplete record
1366	MNF77380	Undated	incomplete record
1367	MNF9985	Prehistoric	Prehistoric worked flints and antlers
1368	MNF77181	Medieval	Medieval coin
1369	MNF10901	Roman to medieval	Site of medieval chapel and medieval pottery finds
1370	MNF13741	Post medieval	Post medieval dovecote
1371	MNF19843	Early Mesolithic to Early Bronze Age	Mesolithic or later prehistoric partiall perforated pebble macehead
1373	MNF30203	Roman	Roman furniture fitting
1374	MNF39842	Iron Age	Iron Age gold stater coin
1375	MNF71630	Post Medieval	Post medieval pottery sherd
1376	MNF62381	18th Century to 21st Century	The Tabernacle, Tabernacle Lane
1377	MNF33529	Prehistoric	Prehistoric burnt mound
1378	MNF72376	Modern	World War One memorial with World War Two additions, Roydon

Project ID	Source Reference[1]	Reported Period	Name
1379	MNF62780	18th Century to 21st Century	19th century milestone marking Norwich 7 miles, New Buckenham 8 miles and London 102 miles
1380	MNF28735	Roman to 19th Century	Multi-period finds scatter
1381	MNF29304	Middle Saxon to Late Saxon	Middle/Late Saxon brooch
1382	MNF28442	Roman to 19th Century	Multi-period finds scatter
1383	MNF13578	19th Century to 21st Century	Eastern Union Railway Norwich Extension (Norwich to Diss)
1384	MNF13580	19th Century to 21st Century	Route of Wymondham to Forncett Railway Line
1500	Project Mapped Cropmarks	-	Cropmarks of field boundaries visible on first edition OS map S and SE of Forncett St Peter
1501	Project Mapped Cropmarks	-	Cropmarks of field boundary visible of first edition OS map E of Forncett St Peter
1502	Project Mapped Cropmarks	-	Cropmarks flanking Cheney's Lane visible on first edition OS map
1503	Project Mapped Cropmarks	-	Cropmarks flanking Stickfer Lane visible on first edition OS map
1504	Project Mapped Cropmarks	-	Cropmarks north of Hurn Lane visible on first edition OS map
1505	Project Mapped Cropmarks	-	Cropmarks west of Stickfer Lane visible on first edition OS map
1506	Project Mapped Cropmarks	-	Cropmarks south of Fundenhall Road some visible on first edition OS map
1507	Project Mapped Cropmarks	-	Cropmarks north of Fundenhall Road some visible on first edition OS map

2.2 Scheduled Monuments

Table A11.1.7 Scheduled monuments considered in Section B

List Entry	Name	Eastings	Northings
1003758	Wissington ring ditch cluster	595929	233352
1003759	Wenham Castle (Little Wenham Hall)	608078	239067

List Entry	Name	Eastings	Northings
1019537	Moated site at The Old Rectory, 150m north east of Malting Farm	605484	246691
1006000	Russell's Hill moated site	605827	264662
1006022	Site discovered by aerial photography S of King's Wood	605193	235679
1006030	Chantry (site of)	606097	255788
1006048	Great Bricett moated site	603682	250672
1006049	Offton Castle	606530	249150
1006050	Chapel Farm moated site	604730	251611
1016699	Medieval ringwork in Burgate Wood	607708	275547
1016700	Moated site at Stubbing's Entry	606308	274102
1017331	Burgate Hall moated site	607934	275642
1019815	Moated site and remains of demolished parts of Shelley Hall, a post-medieval great house	602872	238224
1019889	Moated site at Moat Farm, 450m south of Cobbler's Corner	607751	241839

2.3 Conservation Areas

Table A11.1.8 Conservation areas considered in Section B

Project	ID Name	Local Authority
CA43	Thrandeston	Mid Suffolk
CA44	Mendlesham	Mid Suffolk
CA45	Badley	Mid Suffolk
CA46	Palgrave	Mid Suffolk
CA47	Mellis	Mid Suffolk
CA48	Finningham	Mid Suffolk
CA49	Wickham Skeith	Mid Suffolk
CA50	Needham Market	Mid Suffolk

2.4 Registered Parks and Gardens

2.4.1 There are no Registered Parks and Gardens within Section B.

2.5 Non-designated Heritage Assets

Table A11.1.9 Non-designated heritage assets considered in Section B

Project ID	Source Reference	Reported Period	Name
2000	MSF782	Palaeolithic	Redeposited Palaeolithic flints recovered from a pit on East Side of Hascot Hill Valley, Battisford
2001	MSF22863	Palaeolithic - Late Prehistoric	Wortham Ling, (Terminal Palaeolithic-Later Prehistoric)
2002	MSF21996	Palaeolithic to Mesolithic	Wortham Ling, Wortham, (Terminal Palaeolithic-Mesolithic)
2003	MSF3942	Mesolithic	Old Bury Road, Palgrave (Mesolithic)
2004	SF-F69971	Mesolithic to Neolithic	A fragment flintworking debris of probable Mesolithic to Neolithic date.
2005	SF-D6D237	Mesolithic to Neolithic	A fragment of Mesolithic to early Neolithic flintworking debitage, or possibly a late Mesolithic microlith.
2006	SF-4AB911	Mesolithic to Neolithic	Two fragments of Mesolithic to Neolithic flint working debris.
2007	SF-A8C524	Mesolithic to Iron Age	46 flint lithic implements, a mixed date assemblage, with a Mesolithic/Neolithic content and probably a later Bronze Age or even Iron Age element
2008	MSF3482	Prehistoric	Causewayed ring ditch of unknown date
2009	MSF4506	Neolithic	Oval cropmark, Bullen Farm
2010	MSF5371	Neolithic	Possible Neolithic long barrow
2011	MSF8200	Modern	Old Rifle Range
2012	MSF21997	Late Prehistoric	Wortham Ling (Preh)
2013	MSF20178	Unknown	Ditch of unknown date, probably a tenement boundary
2014	MSF20500	Medieval	Stubbing's Green

Project ID	Source Reference	Reported Period	Name
2015	SF-BFE063	Medieval	Two complete copper alloy rings, possible harness rings of medieval date
2016	SF-66E0D7	Neolithic to Early Bronze Age	An assemblage of eight lithic implements
2017	SF-66F6A1	Neolithic	An unpatinated snapped flint long flake or blade
2018	SF-613695	Neolithic	An unpatinated flint flake or blade struck from a grey/black flint
2019	SF-CCDD1A	Neolithic	A complete flint Neolithic retouched flake
2020	SF-CC9537	Neolithic to Bronze Age	A complete flint Neolithic to early Bronze Age flint core
2021	SF-7CB84A	Neolithic to Bronze Age	27 worked flints and debitage, all of Neolithic to Early Bronze Age date
2022	SF-0351B9	Neolithic to Bronze Age	Eight flakes of flintworking debitage probably dating from the Neolithic to the Early Bronze Age
2023	MSF13539	Bronze Age	Findspot of a fragment of a Bronze-Age bronze blade
2024	MSF15524	Bronze Age	Rook Hill Farm (`Field 4')
2025	MSF18514	Bronze Age	Findspot of a Bronze-Age barbed and tanged flint arrowhead
2026	MSF43971	Post Medieval	Farmstead: Stowupland Hall. Associated with LB1182013
2027	MSF5584	Bronze Age	Findspot of a Bronze-Age barbed and tanged arrowhead found on a Prehistoric settlement site. (BA)
2028	MSZ27175	Bronze Age	Cropmark of two ring ditches
2029	MSZ27176	Bronze Age	Cropmark of a large ring ditch
2030	MSZ27165	Bronze Age	Cropmark of a concentric ring ditch
2031	MSZ27166	Bronze Age	Cropmark of a ring ditch

Project ID	Source Reference	Reported Period	Name
2032	MSF23027	Bronze Age	Cropmark of a small single ring ditch
2033	MSZ27170	Bronze Age	Cropmarks of a ring ditch
2034	MSZ27173	Bronze Age	Cropmark of a sub-circular ring ditch
2035	MSZ27154	Bronze Age	Cropmarks of a partial ring ditch
2036	MSZ27172	Bronze Age	Cropmark of an oval enclosure
2037	MSF8356	Bronze Age	Small mound or possible barrow of unknown date
2038	MSF8733	Bronze Age	Possible concentric ring ditch of unknown date traversed by an irregular enclosure
2039	MSF8734	Bronze Age	Ring ditch of unknown date, within an irregular enclosure
2040	MSZ27171	Bronze Age	Cropmarks of a partial ring ditch
2041	SF-7FCA75	Post Medieval	An incomplete silver button of post medieval date
2042	MSF21803	Bronze Age	Findspot Bronze Age Palstave
2043	MSF19872	Bronze Age, Iron Age, Roman, Saxon	Multi-period finds scatter
2044	MSF42550	Bronze Age	Copper alloy basal looped spearhead
2045	MSF44636	Bronze Age	Bronze Age Hoard
2046	MSF19916	Bronze Age	Findspot of a Bronze-Age socketed axe fragment
2047	MSF21654	Prehistoric	North of Ashburnham Farm, Barking, (Prehistoric)
2048	MSF27149	Modern	Sproughton/Burstal Patrol, Auxiliary Unit, Operational Base
2049	MSF15522	Bronze Age	Rook Hill Farm (`Field 2') (BA)
2050	SF-B61EC4	Bronze Age	Four worked flint implements of later Prehistoric date, probably Bronze Age
2051	SF-4ACB15	Bronze Age	Two small unpatinated fragments of flint flakes
2052	SF5104	Bronze Age	Incomplete copper-alloy razor

Project ID	Source Reference	Reported Period	Name
2053	SF-6ACE84	Bronze Age to Iron Age	A body sherd from a handmade pottery vessel of probable later Bronze Age to Iron Age date. It has a grey/brown fabric with many crushed white flint inclusions
2054	SF-1DA805	Bronze Age	A fragment from the tip of a spearhead of Bronze Age date. A short section from close to the tip survives intact with both ends terminating in old breaks
2055	SF-4514E3	Bronze Age	A flint flake, dorsal face is 80% cortex, one flake scar on this face. There in a notch in one edge and a hinge fracture at the distal end
2056	MSF22862	Later Prehistoric	Wortham Ling
2057	MSF15523	Roman	Rook Hill Farm (`Field 2') (Rom)
2058	SF-F59824	Bronze Age	An incomplete cast copper-alloy axe of Bronze Age date. Only the corner of the blade end survives intact, the remainder now missing due to old breaks. It is rectangular in form, triangular section with one side and part of the sharpened blade surviving
2059	MSF38187	Post Medieval	Outbuildings at Malting House
2060	SF-57C843	Bronze Age	An incomplete copper-alloy fragment, possibly from the tip of a blade, perhaps a sword or dagger
2061	SF-CF2139	Bronze Age	A fragment of a copper alloy Bronze Age socketed axe
2062	MSF13263	Iron Age	Large Park Field
2063	MSF14371	Iron Age	Findspot of an Iron-Age miniature terret ring
2064	MSF19647	Iron Age	Castle Road Offton (Preh)
2065	Mid-Suffolk District Council	Medieval	Millway Lane – Protected Lane
2066	MSF23108	Medieval	Little Green, Thrandeston

Project ID	Source Reference	Reported Period	Name
2067	MSF23361	Medieval to IPS: Post Medieval	Tree Tops
2068	MSF5585	Iron Age	Iron-Age settlement site
2069	MSF8275	Iron Age	Field E of Beans Lane (IA)
2070	MSF12595	Prehistoric	Substantial burnt flint patch with thousands of burnt flint fragments
2071	SF-F55093	Late Iron Age	A fragment of a probable knobbed terret which is heavily burnt and distorted, Late Iron Age in date
2072	SF-DABE83	Iron Age	Bronze unit, some wear and some recent damage on the edge.
2073	SF-FCD8E0	Iron Age	Silver Iron Age coin fragment, "Early Face Horse"
2074	SF9210	Late Iron Age	Copper alloy brooch, Colchester type
2075	SF-5F6E40	Late Iron Age	Bronze coin, Trinovantian, of Cunobelin
2076	SF-430688	Iron Age	A handmade body sherd from a pottery vessel of prehistoric date
2077	SF-3CBDE0	Iron Age	A cast copper-alloy object, possibly a mount, of probable Iron Age date
2078	SF-FB1A30	Iron Age	A body sherd from a handmade ceramic vessel of later Prehistoric date
2079	SF-89DC1D	Iron Age	A complete silver Iron Age half unit, dating to the period c.40 BC to AD 20. Unclear uninscribed East Anglian silver 'Boar/Horse'
2080	SF-86367F	Iron Age	A complete silver Iron Age East Anglian inscribed unit of Antedios, dating to c.AD 10-30
2081	SF-85B4C1	Iron Age	A fragment of a copper alloy Iron Age probable strap fitting
2082	PUBLIC-D9229C	Medieval	A very worn and clipped silver hammered penny struck for Edward III, post -treaty issue

Project ID	Source Reference	Reported Period	Name
			dating 1369-1377, minted at York
2083	SF-A94627	Iron Age	A copper-alloy Iron Age unit or a core for a plated silver unit of the North Thames region/uncertain tribe, dating to 60 BC- 20 BC
2084	MSF12820	Roman to Medieval	Roman artefact scatter of grey ware sherds and medieval finds
2085	SF-ACE684	Iron Age to Roman	An incomplete copper-alloy late Iron Age early Roman Nauheim derivative brooch
2086	SF-C45795	Iron Age to Roman	A fragment of a copper-alloy late Iron Age to early Roman Langton Down bow brooch
2087	SF-16E8E6	Iron Age to Roman	A cast copper alloy terminal or head, probably from a later Iron Age to Roman button
2088	SF-D97566	Iron Age	Copper alloy brooch fragment, Langton Down type
2089	SF-DF5957	Iron Age	Copper alloy brooch, Colchester type
2090	SF-82C006	Iron Age	This copper-alloy item is a broken portion of a larger object. It probably forms part of a closed ring or terret
2091	SF-61C9A7	Late Iron Age to Roman	The worn incomplete wings and upper bow fragment of a copper-alloy Late Iron Age to early Roman Langton Down type bow brooch
2092	SF-61E177	Late Iron Age to Roman	The worn incomplete wings and upper bow fragment of a copper-alloy Late Iron Age to Early Roman Langton Down type bow brooch
2093	SF4129	Late Iron Age to Roman	Copper-alloy brooch, Aucissa type
2094	SF-455124	Roman	1 prehistoric body sherd with flint temper, 1 rim fragment from a dish in greyware, 2nd century, 1 rim fragment of Oxfordware red

Project ID	Source Reference	Reported Period	Name
			colour coat, imitation of a Dressel 38, 4th century
2095	SF-56C387	Roman	A very worn and corroded fragment of a copper-alloy of a Roman bow brooch most similar to a rosette type, presumably a variant of this (Hattatt 1985, 44, fig 19, no. 286)
2096	SF-0FA451	Late Iron Age to Roman	A complete copper-alloy cosmetic mortar
2097	SF-1CC5B6	Late Iron Age to Roman	An incomplete cast copper-alloy Iron Age to Roman Rosette brooch
2098	SF-D24C51	Late Iron Age to Roman	An incomplete cast copper-alloy Colchester bow brooch of late Iron Age to Roman date
2099	SF-D25EF8	Late Iron Age to Roman	An incomplete cast copper-alloy Colchester bow brooch of late Iron Age to Roman date
2100	SF-3460B2	Late Iron Age to Roman	A body sherd from a Roman grey ware Belgic storage vessel. It has combed decoration on the exterior surface. This sherd is of Late Iron Age to Roman date, c.25-65
2101	SF-E18355	Late Iron Age to Roman	An incomplete copper-alloy Late Iron Age to Roman Langton Down brooch
2102	SF-2FA385	Late Iron Age to Roman	A worn and incomplete cast copper-alloy Rosette brooch of Iron Age to Roman date
2103	SF-083EE3	Late Iron Age to Roman	An incomplete copper-alloy zoomorphic vessel mount of Late Iron Age to Roman date
2104	SF-31A241	Late Iron Age to Roman	An incomplete copper-alloy centre-looped cosmetic mortar of late Iron Age to Roman date
2105	SF-4A287D	Iron Age to Early Medieval	An incomplete copper alloy Iron Age to early medieval Type C penannular brooch

Project ID	Source Reference	Reported Period	Name
2106	SF-76C196	Late Iron Age to Roman	An incomplete cast copper-alloy cosmetic mortar of Late Iron Age to Roman date
2107	SF-553A2F	Late Iron Age to Roman	An incomplete copper-alloy late Iron Age early Roman brooch of the Langton Down Type, dating to AD 25-60
2108	SF-E79FDD	Late Iron Age to Roman	An incomplete copper-alloy Iron Age to Roman brooch of the Colchester type
2109	SF-CCD124	Late Iron Age to Roman	A complete Iron Age to Roman copper-alloy penannular brooch dating to circa AD 1-100

3.5 Non-designated Heritage Assets

Table A11.1.14 Non-designated heritage assets considered in Section C

Project ID	Source Reference	Reported Period	Name
3000	MEX1039637	Modern	Langham Camp, Ipswich Road, Colchester - POW

Project ID	Source Reference	Reported Period	Name
3001	MSF11981	Unknown	Sub-square or circular ring ditch of unknown date
3002	MSF4526	Neolithic	Axe, found AD 1924 on Sir Arthur Churchman's estate about 8 chains south of Abbey Oaks Farm
3003	MSF18079	Bronze Age	Aerial photograph (S1) of possible ring ditch, circa 25m diameter, in field north of Lodge Cottages - may be modern
3004	MSF5133	Bronze Age	Ring ditch, circa 30m diameter
3005	MSZ27296	Bronze Age	Cropmark of a partial ring-ditch which probably represents a ploughed out Bronze Age round barrow
3006	MSZ27351	Bronze Age	Cropmarks of a series of boundaries, and a ring ditch
3007	MEX12579	Neolithic	East of Ardleigh, N of Frating Road and W of orchards flint Axe
3008	MEX8171	Neolithic	North of Fating Road, Ardleigh Flint Axe
3009	MEX12583	Neolithic	East of Ardleigh scheduled area Polished chisel, found 1959
3010	MEX36543	Neolithic	Dedham Neolithic stone axe
3011	MSF4528	Late Bronze Age	Valley Farm Sand Pit; Sproughton Sand Pit (BA)
3012	MSF4529	Iron Age	Valley Farm Sand Pit (IA)Two pits with IA pottery
3013	MEX36376	Bronze Age	East of Broomhouse Bronze La Tene terret
3014	MEX9775	Late Iron Age to Roman	Blackbrook Hill, Langham, Gold coin of Cunobelinus, a small, possibly iron age beaker and pottery dated 20-60 AD
3015	MEX9782	Late Iron Age to Roman	Blackbrook Hill, Langham pottery
3016	MEX1036590	Iron Age	Wick Farm, Ardleigh, Essex Excavation revealed 5 Late Iron Age sites
3017	MEX1036591	Late Iron Age to Roman	Wick Farm, Ardleigh, Essex Small quantities of Roman finds found during fieldwalking. Excavation revealed a small area of Late Iron Age/Roman activity
3018	MSZ27310	Post medieval	Earthworks of three parallel ditches

Project ID	Source Reference	Reported Period	Name
3019	MSF5074	Roman	Rom amphora
3021	MSF4527	Roman	Valley Farm Pottery scatter
3022	MSF4530	Roman	Valley Farm Sand Pit (Rom)Cremation in urn, other pot.
3023	MEX9880	Undated	West of Oak Tree corner Field boundaries.
3602	MSF16301	Roman	Findspot of a Roman bronze sestertius coin, possibly of M Aurelius. And a possible Donpondius. (ROM)
3025	MEX9881	Undated	West of Springfield Farm Linear features
3026	MSF18242	Post medieval	A1071; Hurdle Makers Hill milestone
3027	MEX12705	Prehistoric	North edge of Ardleigh Schedule area Belgic pottery associated with 'red clay' area.
3028	MEX36375	Roman	East of Broomhouse As/Dependius of Trajan found by Mr C. R. Behn of 193, Mersea Road, Colchester
3029	MEX36377	Roman	East of Broomhouse Sestertius of Trajan found by Mr C. R. Behn
3030	MEX36379	Roman	East of Langham Scatter of oystershell and brick
3031	MEX36572	Roman	West of Langham Hall Roman tiles scattered over three fields
3032	MEX9817	Roman	Perry Grove, Langham Tile scatter
3033	MEX11565	Roman	East-West alignment through Horsleycross Street, Course of possible Roman road
3034	MEX9887	Undated	North west of Rookery Farm 1 penannular ditched enclosure and linear features amongst many periglacial features
3035	MSF16302	Medieval	Findspot of a Medieval square, flat bronze mount with enamelled front. (Med)
3036	MEX9781	Roman	Blackbrook Hill, Langham, Pottery dated 20-60 AD

Project ID	Source Reference	Reported Period	Name
3037	MEX9784	Roman	Front garden of 'Purney Heath' Stone figure of infant, originally covered in gesso
3038	MEX1031552	Roman	North of Cottsgreen Farm Cropmarks of Linear features
3039	MEX43488	Roman	Grange Road Cropmarks of a double-ditched rectangular enclosure, with entrances, a curvilinear enclosure, trackways, linear features, a Roman road and field boundaries
3040	MEX8786	Roman	West of Pyghle Farm, Ardleigh Possible Roman pottery kiln
3041	SF-4745D6	Roman to Post medieval	A cast lead object of uncertain date or function. It is rectangular in form, square in section with a longitudinal central circular aperture. The aperture appears to have been created by being worked from both directions
3042	MSF4638	Medieval	Birch House Farm Moat
3043	SF-FC7AE4	Roman	A worn copper-alloy Roman sestertius of uncertain Antonine ruler, c.138-193 AD. Reverse: [], Uncertain figure standing left, uncertain object in left arm, right arm outstretched
3044	SF-B24BFF	Medieval	A copper-alloy Medieval composite strap end, dating to AD 1270-1450. It consists of two outer sheets and a forked spacer in between. The overall shape of the strap-end is sub-rectangular
3045	MEX9899	Undated	Glebe House Consisting of linear features, ditched trackways and an oval enclosure which may be a ploughed out stand of trees similar to those surrounding it
3046	MSF42547	Post medieval	Farmstead: Birch House Farm
3047	MSF4639	Medieval	Colesgreen Farm Moat
3048	MSF4642	Medieval	Pottery found 1973, note on IPSMG map
3049	MEX9908	Undated	Glebe Farm Linear features
3050	MSF45249	Roman	Roman road (part of), Long Melford to East Bergholt

Project ID	Source Reference	Reported Period	Name
3051	SF-B15E12	Post medieval	A copper-alloy Rose farthing of Charles I, c.1625-1649 AD
3052	MSF42446	Post medieval	Farmstead: Cane's Farm
3053	SF-33A873	Medieval	A silver medieval penny of Edward I, class 10cf, c.1302-1310 AD
3054	SF-33CF74	Medieval	A silver medieval penny of Edward III, Post-Treaty period, c.1369-1377 AD
3055	SF-33EEF7	Medieval	A very worn silver medieval penny, probably of Edward III, 4th coinage, c.1351-1377 AD
3056	SF-3424D3	Medieval	An incomplete silver medieval penny, possibly of Henry V, c.1413-1422 AD. Half of the coin is missing due to old breaks
3057	SF-062C84	Medieval	A complete cast copper-alloy bar mount with pendant loop of medieval date. It is a rectangular bar mount which is rectangular in section and is bevelled at the terminal end
3058	SF-0646D0	Medieval	An incomplete cast copper-alloy buckle frame of medieval date. It is a d-shaped frame which is oval in section. The bar is narrowed and offset for the pin which is present
3059	SF-066032	Medieval	A cast copper-alloy buckle frame of medieval date. It is an oval lipped frame with a plate and is d-shaped in section. The bar is narrowed and offset for the plate which is present
3060	SF-067394	Medieval	A cast copper-alloy buckle frame of medieval date. It is an oval frame with an integral plate which is rectangular in section
3061	SF-068AB4	Medieval	A cast copper-alloy strap of Medieval date. It is a sheet metal strap end which is folded, it is rectangular in shape and in section. The attachment end on one side is missing due to old breaks
3062	SF-079753	Post medieval	A fragment of a cast copper-alloy buckle frame of post medieval date. It is the outside edge of a buckle frame, the rest of which is missing due to old breaks

Project ID	Source Reference	Reported Period	Name
3063	SF-07C933	Medieval	An incomplete cast copper-alloy strap end of medieval date. It is circular in shape and rectangular in section
3064	SF-07F463	Medieval	An incomplete cast copper-alloy strap fitting of probable medieval date. It is rectangular in shape and in section
3065	SF-081067	Post medieval	An incomplete cast copper-alloy hooked tag of post medieval date. It is a Read Class E, type 3 tag but the attachment loop and hook are missing due to old breaks
3066	SF-0824C3	Medieval to post medieval	An incomplete cast copper-alloy possible buckle frame tag of medieval or post medieval date
3067	SF-08DE94	Medieval to post medieval	An incomplete cast copper-alloy buckle frame of medieval or post medieval date. It is a large double trapezoidal frame which is rectangular in section with a central bar for the pin which is missing
3068	SF-090306	Medieval to post medieval	A cast copper-alloy key of medieval or post medieval date. It is cast in a single piece and has a circular bow which is oval in section
3069	SF-17B8D3	Early medieval	A cast copper alloy strap fitting or swivel of medieval date. It consists of a pair of annular frames
3070	SF-17FC34	Medieval to post medieval	A cast copper-alloy tap handle of medieval or post medieval date. It comprises a tapering cylinder with a central circular perforation
3071	MEX9906	Undated	Near Langham Ditched trackway aligned N-S
3072	SF-186864	Post medieval	A copper-alloy jetton. Both faces are very worn but one is certainly an orb design and the other is probably a rose
3073	SF-1888A7	Post medieval	A copper-alloy rose and orb jetton of post medieval date by Nuremburg master Hans Schultes II AD 1586-1603. As Mitchiner no 1388. Obv: Three crowns alternating with three lis, arranged centrifugally

Project ID	Source Reference	Reported Period	Name
3074	SF-191856	Post medieval	A silver threepence of Elizabeth I c. AD 1570-1579
3075	SF-193A57	Post medieval	A very worn silver coin of Elizabeth I c. AD 1558-1603. Possibly a threepence
3076	SF-1A41B5	Post medieval	A Richmond round farthing of Charles I c. AD 1625-164
3077	SF-1B8808	Medieval to Post medieval	Two fragments of cast copper-alloy of uncertain date, most likely the result of metal working
3078	SF-1D41F1	Post medieval	An incomplete cast copper-alloy barrel tap spout of post medieval date. It is circular in shape and is broken at both end due to old breaks
3079	SF-1D6346	Medieval to Post medieval	A cast copper-alloy circular bar. It is probably an incomplete handle, possibly for a casket or drawer, most likely of medieval or post medieval date
3080	YORYM-59B7	Medieval to Post medieval	A cast copper alloy double looped buckle frame. The buckle frame and strap bar survive intact, but the pin is missing. Iron corrosion can be seen on the strap bar
3081	MSF5051	Undated	Rectilinear ditch systems, trackways and a ring ditch of unknown date, visible as cropmarks
3082	SF-E451A4	Medieval	A cast copper-alloy buckle of medieval date. It has an oval frame with offset and narroed cylindrical bar, and thickened outer edge. The outer edge is cylindrical in form and has a slightly curved profile
3083	SF-A2E9B6	Post medieval	Description: A fragment of a silver gilt finger ring, only the bezel now survives due to old breaks. The bezel is in the form of two clasped hands
3084	SF-4731E4	Post medieval	A copper-alloy Rose and Orb jetton of Nuremberg Master Hans Krauwinckel II, c.1586-1635 AD. As Mitchiner 1988: no. 1574. The jetton has a central circular aperture. Obverse: *HANNS. KRAVWINCKEL.IN N, Three crowns and three lis arranged centrifugally

Project ID	Source Reference	Reported Period	Name
3085	MEX9917	Undated	West of Hill House Part of an irregular shaped enclosure with an entrance on the west side
3086	SF-A231C0	Post medieval	A silver halfgroat of Charles II, c.1660-1662 AD. As North, 1975: no. 2772
3087	SF-595F1F	Medieval	A complete silver medieval penny of Edward I, dating to the period AD 1300-1302. Class 9a. Minted in Durham. The legend repeats on both faces due to an error at the striking stage
3088	MSF44937	Post medieval	Farmstead: Woodlands Farm
3089	SF-092E29	Medieval	An incomplete (cut half) silver medieval penny of Henry II to Henry III, dating to the period AD 1180-1247. Uncertain class. Minted in London by uncertain moneyer
3090	MEX1036593	Medieval to Post medieval	Wick Farm, Ardleigh, Essex
3091	MSF19319	Undated	Squares Grove Wood
3092	MCC9122	Undated	Undated cropmarks near Langham
3093	SF-B1D0BF	Early Medieval	A copper-alloy Early Medieval stirrup-strap mount, dating to AD 1000-1100. It is sub-pentagonal in plan and it has a slightly rolled flange protruding backwards from its base
3094	SUR-CF810A	Medieval to Post medieval	A fragment of a copper alloy purse frame of Late Medieval to Early Post Medieval date (1450 -1550) consisting of a curved length of the frame
3095	MEX8233	Medieval	Ardleigh Wick Moat
3096	MEX9878	Early Medieval to Post medieval	Ardleigh Heath Enclosure showing as a cropmark
3097	MEX1036592	Medieval to Post medieval	Wick Farm, Ardleigh, Essex Medieval finds were found during fieldwalking, later excavation revealed probable medieval/post medieval field ditches and trackway
3099	SF-42D903	Bronze Age	Description: A small socketed probable chisel or possible axe of late Bronze Age date with another fragment visible within it. Only the blade end of the probable

Project ID	Source Reference	Reported Period	Name
			chisel survives and the breaks are clearly hammered and appear old
3100	MEX9457	Prehistoric	East of Langham Pyroxene, jadeite axe
3101	MCC9168	Medieval to Post medieval	Dedham Heath
3102	MSF20060	Late Bronze Age	MD Findspot of the blade end of a Bronze-Age socketed axe
3103	MSF21136	Medieval to Post medieval	Burstall Hall Moat
3104	MSF4535	Neolithic	Fabricator found W of Valley Farm Holding in ploughed field
3105	MSF42545	Post medieval	Farmstead: Coles Green Farm
3106	MSF4536	Neolithic	Leaf shaped arrowhead and scraper
3107	MSF4541	Undated	Possible ring ditch, circa 25m diameter
3108	MSF4542	Undated	Rectilinear ditch system
3109	MSF26596	Undated	Anglia Water B1070 Replacement Scheme, East Bergholt Monitoring revealed two small undated pits that contain burnt flint
3110	MSF4544	Undated	Double ditch and traces of fields
3111	MSF5127	Medieval	Vauxhall, Moat
3112	MSF45157	Post medieval	Farmstead: Vauxhall
3113	MSF38087	Undated	Cropmarks of rectilinear ditch systems, trackways
3114	MSF26530	Post medieval	Farmstead: Burstall Hall
3115	MSZ27316	Later Prehistoric	Cropmarks of two ring-ditches
3116	MSF43888	Post medieval	Farmstead: Holton Hall
3117	MSF43889	Post medieval	Farmstead: Lower Farm
3118	MSF43893	Post medieval	Farmstead: Four Sisters Farm
3119	MSF44939	Post medieval	Farmstead: Raydon Hall
3120	MSF45034	Post medieval	Farmstead: Pryne's Lodge
3121	MSF45055	Post medieval	Farmstead: Wheatlands

Project ID	Source Reference	Reported Period	Name
3122	MSF44003	Post medieval	Farmstead: Unnamed Farmstead
3124	MSF45162	Post medieval	Outfarm: Unnamed outfarm
3125	MSF42546	Post medieval	Fieldbarn: Longlands Barn
3126	MSF42552	Post medieval	Farmstead: Rookery Farm
3127	MSF45248	Roman	Cropmark of Roman Road, section of the Pye Road, through East Bergholt
3128	MSF42558	Post medieval	Farmstead: Unnamed Farmstead
3129	SF4303	Medieval	Coin
3130	MSF5063	Roman	Findspot of a Roman pottery sherd
3131	MSF43788	Post medieval	Farmstead: Cherryground
3132	MSF43860	Post medieval	Farmstead: Noakes Barn
3133	MSF44940	Post medieval	Farmstead: Pipers Went (Pipers Vent Farm)
3134	MSF45026	Post medieval	Farmstead: Hill Farm
3134	MSF45026	Post medieval	Farmstead: Hill Farm
3135	MSF45027	Post medieval	Farmstead: Perry Barn
3136	MSF19265	Iron Age	Findspot of an Iron-Age lipped terret ring
3137	MSF45029	Post medieval	Farmstead: Ivywell Farm
3138	MSF45030	Post medieval	Farmstead: Sproughton Park (Villa Farm)
3139	MSF45039	Post medieval	Farmstead: Yewtree House
3140	SF-EDB90F	Roman	An incomplete copper alloy Roman nummus of Magnentius or Decentius, dating to the period AD 351-3 (Reece period 18). VICT(ORIAE) DD NN AVG ET CAE(S) reverse type, depicting Two Victories holding wreath inscribed Vot/ V / MVLT / X. Minted in Amiens
3141	MSF45056	Post medieval	Farmstead: Bobbitts Hall
3142	MSF4646	Roman	A1100 Length of road, Pye Road, Margary 3c.
3143	MSF46986	Roman	Roman road (part of), Long Melford to East Bergholt
3144	MSF46987	Roman	Roman road (part of), Long Melford to East Bergholt

Project ID	Source Reference	Reported Period	Name
3145	MSF15844	Post medieval	Burstall Bridge

3153	MSF42466	Post medieval	Farmstead: Church Farm
3154	MSF43778	Post medieval	Farmstead: Dewlands Farm
3155	MSF43861	Post medieval	Farmstead: Holton Place
3156	SF1293	Roman	Copper alloy brooch fragment, Colchester derivative rear hook type. Upper half only and missing spring, pin, rear hook; very corroded. 2 grooves at arm terminals
3157	MSF45038	Post medieval	Farmstead: Brook Farm
3158	SF-B3313A	Medieval	An incomplete (cut half) silver medieval penny of John, dating to the period AD 1205-17. Class 5 or 6. Minted by Nicole of London
3159	MSF16790	Post medieval	Old Mill House - A water mill and leat shown on map of 1595
3160	MSF16791	Post medieval	Washbrook Street Eight tenements with names of their occupiers are shown along the street line on 1595 map
3161	SF-B2D42F	Medieval to Post medieval	A complete copper alloy late medieval or early post medieval; inscribed finger ring. The band is rectangular in cross-section. The outer face is decorated with a fine groove along each outer edge with the letters +N/H O V E R A E R
3162	MSF42439	Post medieval	Farmstead: Fen Farm
3163	SF-B4A95E	Early medieval	Description: An incomplete early medieval (mid to late Anglo-Saxon) silver hooked tag. It appears to be circular in shape, although the upper edge is missing

Project ID	Source Reference	Reported Period	Name
3164	MEX1031551	Bronze Age	Harris' Farm Cropmarks of former field boundaries and ring ditch (possible barrow)
3165	MSF28976	Post medieval	Hadleigh Railway, disused branch line
3166	MSF10676	Undated	Ring ditch of unknown date
3167	MSF45159	Post medieval	Farmstead: Wenham Grange
3168	MSF5095	Undated	Mostly rectilinear field boundaries of unknown date
3169	MSF5609	Undated	Large concentric ring ditch or circular enclosure, diameters circa 50m and 30m
3170	MSF1822	Undated	Double ditched rectangular feature of unknown date, visible as a faint cropmark
3171	MSF29042	Undated	OUTLINE RECORD: prehistoric worked flints and multiperiod pottery fieldwalking march 2012
3172	MSF5096	Undated	Enclosures and ditches of unknown date
3173	MSF8459	Undated	Ring ditch of unknown date
3174	MSF8460	Undated	Ring ditch of unknown date
3175	MSF8461	Undated	Ring ditch of unknown date
3176	MSF8463	Undated	Rectilinear enclosure of unknown date
3177	MSF8464	Undated	Sub-rectangular enclosure of unknown date, traversed by another semi-circular enclosure
3178	MSF8581	Undated	Rectangular enclosure of unknown date
3179	MSF8582	Undated	Small rectangular enclosure with central feature, of unknown date
3180	MSF3721	Undated	Irregular field boundary
3181	MSF19327	Undated	Brimlin Wood
3182	MSF19328	Undated	Wenham Thicks Wood
3184	MSF11952	Undated	1880s: rectilinear sided earthwork bank shown in field (meadow) adjoining Belstead Brook
3185	MEX23699	Prehistoric	North west of Carringtons Farm Cropmarks of a rectangular enclosure of a later prehistoric along with numerous pits and ditches

Project ID	Source Reference	Reported Period	Name
3186	MSF5132	Undated	Kings Green Cottages Square enclosure, probably moat
3187	MEX9315	Undated	North west of Carringtons Farm Field boundaries overlying each other
3188	MSF8462	Undated	Semi circular enclosure of unknown date
3189	MSF27253	Modern	RAF Raydon: Notley Industrial Park
3190	MSZ27305	Undated	Earthworks of an extractive pit and a bank
3191	MSZ27306	Undated	Cropmarks of field boundaries
3192	MSZ27308	Undated	Cropmarks of field system
3193	MEX1040177	Undated	Calves Lane Possible enclosure
3194	MSF44821	Undated	River Stour Navigation
3195	MSF20278	Undated	Small ring ditch of unknown date with central feature, visible as a cropmark
3196	MSF25758	Modern	Raydon/ Stratford St Mary, Auxiliary Unit Observation Post
3197	MEX1031661	Prehistoric	Plumbs Farm Cropmarks of a sub-rectangular enclosure orientated SW NE
3198	MEX1033224	Post Medieval	Langham Church Three 19th century brick vaults exposed under rotten flooring
3199	MEX12160	Roman	East of Ardleigh Six C4 inhumations were discovered in the area of an EBA barrow during excavations in 1979
3200	MEX1041352	Undated	Chequers Farm Cropmark of an enclosure
3201	MEX9000	Palaeolithic	South East of Ardleigh Two hand-axes, one from catchpool
3202	MEX1049789	Modern	Pillbox, Tractor Depot, Ardleigh
3203	MEX1049792	Modern	Road Barrier (destroyed), Glebe Bridge, Little Bromley Rd, Ardleigh

3205	MEX1049797	Modern	Ammunition Shelter (destroyed), Ardleigh Court, Ardleigh
3206	MEX9534	Undated	Roman road

Project ID	Source Reference	Reported Period	Name
3207	MEX9020	Roman	Colchester heading north east through Ardleigh
3208	MEX1031545	Undated	North of Ardleigh village Cropmarks of a rectilinear feature which may represent part of an enclosure
3209	MEX1031611	Undated	Ardleigh Cropmarks of linear features, some of which represent former field boundaries
3210	MEX1031638	Undated	Ardleigh Heath Cropmarks of two former field boundaries, running parallel to Fan Lane
3211	MEX8935	Palaeolithic	East of Ardleigh Hand-axe
3212	MEX1031651	Undated	Kiddles Cottage
3213	MEX1031653	Undated	Kiddles Farm Cropmarks of various linear features possibly a sub-rectangular enclosure
3214	MEX1031659	Undated	Malting Farm Cropmarks of a number of parallel linear features
3215	MEX8472	Undated	East of Harris' Farm Wooden outfall pipe in pond, now a reservoir
3216	MEX1038487	Undated	Langham Hall Cropmarks of possible rectilinear enclosure and pit
3217	MEX1041356	Undated	Wormseywood Farm Cropmarks of enclosure
3218	MEX12738	Undated	Cropmark site south of Ardleigh
3219	MEX23705	Undated	North of Wick Farm, Ardleigh Cropmarks: linear features, field boundaries
3220	MEX43478	Undated	Rookery Bungalow Cropmarks of a curvilinear enclosure
3221	MEX43480	Undated	Rookery Farm Cropmarks of a sub-rectangular enclosure
3222	MEX43490	Undated	Grange Farm Cropmarks of a rectilinear enclosure
3223	MEX8241	Undated	North-east of Ardleigh reservoir cropmarks of field boundaries removed since the 1968 6" OS maps were produced

Project ID	Source Reference	Reported Period	Name
3224	MEX8101	Roman	Little Bromley Hall Gold coin commemorating Drusus senior, found on Little Bromley Farm
3225	MEX8391	Undated	Bounds Farm, Ardleigh Ring ditch, pits, linear features and a length of "road" running NW from Hungerdowns
3226	MEX8489	Undated	Near Riddlesdale Farm Cropmarks, comprising a complex of linear features, rectilinear enclosures and an oval enclosure: some marks may be geological
3227	MEX8620	Undated	South and West of Little Bromley Hall Cropmarks covering a large area, mainly linear features being part of field systems or trackways, but there are also many ring ditches and several enclosures, and what may be a henge
3228	MEX8664	Undated	Cattsgreen Farm Possible ring ditch
3229	MEX8700	Undated	East of Ardleigh village Cropmarks showing ring ditches, pits, trackways and linear features
3230	MEX12717	Roman	Hundred Acre Field Roman sherds evident amongst a plough scatter of Belgic material
3231	MEX8939	Late Iron Age	Cropmark of D-shaped enclosure north of Gatehouse Farm, Ardleigh reservoir
3232	MEX9188	Undated	Badley Hall Linear features at right angles to Roman road, probably field division
3233	MEX9352	Undated	Area to east of Ardleigh Three sides of a rectilinear enclosure with 2 entrances on the east side, one on the south, long side
3234	MEX9394	Undated	North of Norman's Farm 3 ring ditches, one with only half its circumference visible
3235	MEX9430	Undated	Grange Farm Double ring ditch, 'D' shaped enclosure, rectangular enclosure and a linear ditch
3236	MEX9535	Undated	Around Ducura's Farm Large cropmark complex on the south bank of the river Stour

Project ID	Source Reference	Reported Period	Name
3237	MEX9580	Undated	East of Broomhouse Rectilinear enclosure-paddock system situated on the bank of the Stour
3238	MEX9627	Undated	South of Hill House. Large sub-circular enclosure (c.105m in diameter) joined by a short ditched trackway to a smaller pear shaped enclosure
3239	MEX9754	Bronze Age	East of Broomhouse Cropmarks, comprising a group of approximately 12 ring ditches plus elements of a rectilinear field system
3240	MEX9773	Undated	Blackbrook Hill, Langham, Cropmarks, consisting of a possible enclosure and stretch of double-ditched trackway
3241	MEX1038343	Modern	7-18 Coggeshall Road
3242	MEX9825	Prehistoric	Alderson's Cottages Beaker
3243	MEX8398	Undated	Bounds Farm, Ardleigh Large lump of glass waste, found 1969
3244	MEX8278	Medieval	Saint Mary 16 encaustic tiles with impressed designs covered in black glaze, of a C15 date, were found in the churchyard
3246	MEX52134	Medieval	West of Purney Heath Bronze padlock, square section chamber with projecting area with a keyhole
3247	MEX11030	Prehistoric	Welhams Farm Leaf shaped arrowhead
3248	MEX8098	Medieval	Little Bromley Churchyard Silver brooch
3249	MEX8388	Undated	Old Shields Farm, Ardleigh Circular soil mark
3250	MEX8587	Lower Palaeolithic to Post medieval	Badley Hall Cropmarks show a group of at least 25 ring ditches plus other linear features

1. Introduction

1.1 Purpose of the EIA Methodology Document

1.1.1 This document sets out the scope and methodology for the Historic Environment Assessment for the Project.

1.1.2 This document was prepared for review and discussion with relevant statutory environmental bodies and local authorities in 2022. It was then reviewed following the receipt of the EIA Scoping Opinion (document reference 6.20) from the Planning Inspectorate, also in 2022, and minor updates have been made as a result on ongoing consultation and to align with the approach taken in this Historic Environment Baseline Report and Environmental Statement, Chapter 11: Historic Environment (document reference 6.11).

1.1.3 An initial proposed approach to EIA Scoping was outlined in terms of the methodology for survey and assessment in support of the Environmental Statement (ES) (Volume 6 of the Development Consent Order (DCO) application) for the Project.

1.1.4 This document was originally drafted based on the best information available at the time. It was drafted within and around the Order Limits presented at non-statutory consultation. This then formed the basis of the technical assessments for EIA Scoping[1]. However, all additional comments received as part of public engagement, including the non-statutory consultations and statutory consultation, have been considered. An update to this document was made in May 2025.

1.2 Project Background

1.2.1 The Project comprises reinforcement of the transmission network between the existing Norwich Main Substation in Norfolk and Tilbury Substation in Essex, via Bramford Substation, the new East Anglia Connection Node (EACN) Substation and the new Tilbury North Substation.

1.2.2 The reinforcement is needed because the existing transmission network, even with current upgrading, will not have sufficient capacity for the new renewable energy (a substantial proportion of which would be generated by offshore wind) that is expected to connect to the network over the next 10 years and beyond. Completion of the Project, together with other new reinforcements across the country, will meet this future energy transmission demand both in East Anglia and across the UK.

1.2.3 The Project is a proposal by National Grid to upgrade the electricity transmission system in East Anglia between Norwich and Tilbury, comprising:

- A new 400 kilovolt (kV) electricity transmission connection of approximately 180 km overall length from Norwich Main Substation to Tilbury Substation via

[1] The Project now has Order Limits and an alignment.

Bramford Substation, a new EACN Substation and a new Tilbury North Substation, including:

  - Approximately 159 km of new overhead line supported on approximately 509 pylons, either standard steel lattice pylons (approximately 50 m in height) or low height steel lattice pylons (approximately 40 m in height) and some of which would be gantries (typically up to 15 m in height) within proposed Cable Sealing End (CSE) compounds or existing or proposed substations
  - Approximately 21 km of 400 kV underground cabling, some of which would be located through the Dedham Vale National Landscape (an Area of Outstanding Natural Beauty (AONB[2])

- Up to seven new CSE compounds (with permanent access) to connect the overhead lines to the underground cables
- Modification works to connect into the existing Norwich Main Substation and a substation extension at the existing Bramford Substation
- A new 400 kV substation on the Tendring Peninsula, referred to as the EACN Substation (with a new permanent access). This is proposed to be an Air Insulated Switchgear (AIS) substation
- A new 400 kV substation to the south of Orsett Golf Course in Essex, referred to as the Tilbury North Substation (with a new permanent access). This is proposed to be a Gas Insulated Switchgear (GIS) substation
- Modifications to the existing National Grid Electricity Transmission overhead lines to facilitate the connection of the existing network into the new Tilbury North Substation to provide connection to the Tilbury Substation
- Ancillary and/or temporary works associated with the construction of the Project.

1.2.4 In addition, third party utilities diversions and/or modifications would be required to facilitate the construction of the Project. There would also be land required for environmental mitigation and Biodiversity Net Gain (BNG).

1.2.5 As well as the permanent infrastructure, land would also be required temporarily for construction activities including, for example, working areas for construction equipment and machinery, site offices, welfare, storage and temporary construction access.

1.2.6 Further details of the Project are included within Chapter 4: Project Description (document reference 6.4) and presented on Figures 4.1: Proposed Project Design (document reference 6.4.F1) and 4.2: Proposed Project Design – Permanent Features (document reference 6.4.F2).

[2] National Landscape is the rebranded name of an Area of Outstanding Natural Beauty (AONB) from 22 November 2023

2. Scope of the Assessment

2.1.1 Our proposed approach to scoping elements of the Historic Environment assessment is outlined in Table 2.1.

Table 2.1 Scoping of Historic Environment assessment

Matter	Phase	Scoped in	Scoped out	Justification
Terrestrial archaeology – physical effects	Construction	✓		There is known archaeology present within the Order Limits and the assessment includes a consideration of archaeological potential, and the consideration potential impacts to yet unknown archaeological remains of all archaeological periods.
	Operation (and maintenance)		✓	There is only a limited need for sub-surface works during operation, which would only affect ground that has previously been disturbed during the construction phase of the Project.
Terrestrial archaeology – setting and indirect effects	Construction and operation (and maintenance)	✓		The Project would introduce tall, permanent structures and associated infrastructure that would change the setting of archaeological assets and potentially affect their value during construction works and into operation. The potential for indirect effects to archaeology, for example through changes to groundwater, are included in the assessment. Such effects could affect the preservation of archaeology not directly physically impacted by the Project.
Built heritage – physical effects	Construction and operation (and maintenance)		✓	There are no anticipated likely impacts to the physical fabric of built heritage assets. The Project does not currently propose to remove or modify any built heritage assets and effects from vibration are scoped out of assessment for the Project during construction and operation. This was kept under review as the Project evolved.

Matter	Phase	Scoped in	Scoped out	Justification
Built heritage – setting and indirect effects	Construction and operation (and maintenance)	✓		The overhead line alignment would introduce tall permanent structures and associated infrastructure that have the potential to change the setting of a built heritage asset and therefore effect its value.
Historic landscape character	Construction and operation (and maintenance)	✓		The construction of the Project has the potential to physically impact features of the historic landscape, as well as changing the land use of historic landscape character areas during construction, both of which could affect the value of the historic landscape. The operation of the Project would introduce tall, permanent structures and associated infrastructure that have the potential to change the historic landscape character, and therefore, affect its value. This impact would commence during construction and continue into operation.
Inter-tidal and marine archaeology	Construction and operation (and maintenance)		✓	The Project would not interact with inter-tidal or marine areas and therefore there is no potential for impacts to this matter.
Archaeology, built heritage, historic landscape	Decommissioning		✓	The Project sought to scope out decommissioning from all assessment due to the length of time over which the Project is expected to operate and any future decommissioning would need to seek appropriate consent at that time.

2.1.2 The scope of assessment, outlined above in Table 2.1, has been reflected and carried through into subsequent documents of the DCO process, including the EIA Scoping Report (document reference 6.19), Preliminary Environmental Information Report submitted as part of the Projects statutory consultation, Baseline Report and ES.

3. Approach to Historic Environment Baseline

3.1 Introduction

3.1.1 This section discusses the approach to determining the Study Area and gathering data and information to inform the understanding of the Historic Environment Baseline. The baseline understanding is captured in this Baseline Report and is appended to Chapter 11: Historic Environment (document reference 6.11).

3.1.2 This section of the document also gives an overview of the methodology to determine the Historic Environment's character and extent, and the significance of the Historic Environment. This includes any contribution made to the significance of an asset by its setting.

3.1.3 This Baseline Report has been written based on a thematic landscape approach to identify relationships between assets, which contributes to their significance, and considers the overall evolution of the landscape narrative within the Project's Order Limits and Study Area footprint.

3.1.4 As a result of this information, scoping of heritage assets for impact assessment has been undertaken, depending on whether they are within the Order Limits or if the setting of the asset extends to the proposed Order Limits and the land within the Order Limits makes a positive contribution to the significance of the asset. This has captured any heritage assets that may experience a physical impact resulting from construction of the Project. Assets which may experience an impact due to a change to their setting that affects their significance during construction and or operation (and maintenance) have also been captured. The wider discussion in this Baseline Report has ensured that the context of the heritage assets assessed in the ES (Volume 6 of the DCO application) is fully understood.

3.1.5 This Baseline Report has adhered to the specification directed in the Chartered Institute for Archaeologists (CIFA) 'standard and guidance for historic environment desk-based assessment' (CIFA, 2014), with the exception that assessment of the impact of the Project and any proposed mitigation is captured in Chapter 11: Historic Environment (document reference 6.11).

3.1.6 This Baseline Report considers the terrestrial archaeology, built heritage, and historic landscapes set out in the EIA Scoping Report (document reference 6.19) and outlined in Table 2.1 Table 2.1of this document.

3.2 Study Area

3.2.1 The Project uses a 250 m Study Area from the Order Limits for data collection and assessment of non-designated heritage assets. Due to the linear nature of the Project and the likely construction related impacts, it was believed that 250 m would encompass heritage assets likely to be physically affected and provide adequate information to understand the archaeological potential of the Project whilst also characterising and contextualising the historic environment within the Project's wider

environs. This Study Area was consistent with one used on the Bramford to Twinstead overhead line project and was agreed to in the EIA Scoping Opinion (document reference 6.20). Non-designated data between 250 m and 500 m has been reviewed and assets of high importance have been included in this Baseline Report where they provide better understanding of the Historic Environment within the 250 m Study Area.

3.2.2 A 2 km Study Area for all designated heritage assets has been used for assessment of effects through change to setting. A 3 km Study Area was employed for designated heritage assets of the highest significance (scheduled monuments, grade I and II* listed buildings and grade I and II* registered parks and gardens). In certain locations, and in accordance with the approach for the LVIA, including the ZTV, designated assets beyond the 2 km and 3 km Study Areas have been included, for example where topography allows for more distant views. This is to ensure that heritage assets, where their setting could be affected, are included in assessment. The Study Areas are considered appropriate based on the potential effects of this Project on heritage assets, including consideration of physical impact and impacts arising through change to setting from tall infrastructure. The propriety of the Study Areas is also supported by the approach to the ZTV for the landscape and visual discipline, professional judgement and previous experience of similar projects.

3.3 Data Gathering

3.3.1 Data was drawn from a range of sources and was managed through a Project specific GIS system.

3.3.2 These reference sources included:

- Historic Environment Records (HER) data for known archaeological sites, monuments, findspots and events (most recently accessed November 2024 – April 2025)
- Local Planning Authority websites have been viewed for information on locally listed buildings (most recently accessed July 2025)
- Data sets of designations from Historic England's National Heritage List for England (most recently accessed July 2025)
- Archaeological reports (grey literature) on archaeological interventions within the Order Limits as the key consideration area for archaeological potential
- Published archaeological journals and monographs, local history books and pamphlets, including local history websites as appropriate
- Historic maps, including Ordnance Surveys (OS), estate maps, enclosure maps, tithe maps and military plans, all available scales of OS maps (most recently accessed November 2024)
- Aerial photography, including imagery taken for the Project in 2022
- Historic aerial photography (most recently accessed April 2025)
- LiDAR data (most recently accessed April 2025)
- Protected lanes data from relevant Local Authorities (most recently accessed July 2025)

- Conservation areas have recently become available as a data download from Historic England. Data for conservation areas were cross referenced with the Local Planning Authority websites to ensure accurate data was used (most recently accessed March 2025).

The results of the targeted walkover survey and setting assessment was used to supplement the existing baseline datasets.

3.4 Data Presentation

3.4.1 Known non-designated heritage assets and conservation areas identified from the sources listed above are referenced using a consistent Project specific identification number in this Baseline Report and Chapter 11: Historic Environment (document reference 6.11). The preferred identification number (e.g. Pref Ref) from the originating organisations is provided in a gazetteer that accompanies this Baseline Report for cross reference. Designated assets are referenced by their National Heritage List Entry numbers. Descriptions of the heritage assets are provided in this Baseline Report.

3.4.2 Presentation within this Baseline Report has been split based on Project Sections, which aids discussion and marks areas of relevant interest for heritage officers responsible for the stewardship of specific areas of the Project. Embedded within this is a further split in discussion based on archaeology, built heritage and historic landscape characterisation.

3.4.3 Individual IDs used are presented as shown in Table 3.1.

Table 3.1 Gazetteer headings

Project ID	Source Reference	Period	Name
1	HER ID	Roman	Coin
2	HER ID	Post Medieval	Farm 1
3	HER ID	Post Medieval	Outfarm to Farm 1
4	HER ID	Medieval	DMV

3.4.4 Heritage asset data sets have been illustrated on accompanying figures to this Baseline Report. The figures support the presentation of discussion thematically.

3.5 Aerial imagery for assessment and the scoping of walkover survey

3.5.1 The first use of the aerial imagery included the identification of potential heritage assets through an assessment of cropmarks and identification of earthwork features.

3.5.2 The aerial imagery was provided as a model, akin to a form of photogrammetry recording of the landscape. The models were used alongside other data sets to further understand any given asset's relationships within the landscape and aid the consideration of archaeological potential.

3.5.3 Areas of archaeological interest and identified heritage assets were mapped in GIS, against their location on the model and incorporated into the wider Project GIS data set and gazetteer to contribute to assessment. Identified areas of archaeological interest were further assessed during walkover survey, as discussed below.

3.6 Aerial Imagery Data Collection Methodology

3.6.1 In the first instance, the cropmark and earthwork data was obtained from HER supplied shapefiles and PDFs. The shapefiles comprised National Mapping Programme data for Norfolk and Suffolk, whilst this data was supplied in PDF form by the Essex HER. The PDFs were geolocated in ArcGIS Pro and the illustrated cropmarks were digitised. The HER data also included monument polygons for identified cropmark and earthwork complexes. Essex HER supplied aerial photographs for that county's portion of the Project, whilst Norfolk HER was visited to examine the aerial imagery held at the archive in Norwich. Arcadis were informed by the Suffolk and Colchester HERs that they did not hold any further aerial images than those available online (see below).

3.6.2 Other sources were also employed, comprising Historic England's online archive of aerial photos (Historic England (a), accessed 2023-2024) and the results of the NMP, also hosted online by Historic England (Historic England (b), accessed 2023-2024). Google Earth Pro, using the historic imagery function, and Bing Aerial were also viewed. Where cropmarks and/or earthworks were identified that did not correspond to NMP and HER data, or augmented known assets, the identified features were digitised and added to the Project data set.

3.7 Historic Mapping Assessment Methodology

3.7.1 The purpose of the historic mapping assessment was to identify landscape features of historical and evidential value that are not currently identified by Historic England, the applicable HERs or in HLC data. The classes of assets identified comprise:

- Unrecorded archaeology
- Buildings
- Structures (e.g. bridges)
- Infrastructure (e.g. milestones)
- Quarrying
- Estate grounds
- Woodland
- Orchards
- Historic parks
- Extant important hedgerows (following hedgerow regs. 1997)
- Old lanes (not already recorded as protected lanes)
- Old Railway lines
- Historic water meadows

- Ponds (no longer extant)
- Canals
- Historic parish/hundred boundaries.

3.7.2 The Ordnance Survey maps from the first edition through to the mid-20th century were assessed, along with tithe, enclosure and other historic maps available through the relevant archives to complete the Historic Mapping Assessment. Where landscape features were identified that did not correspond to NMP and HER data the identified features were digitised and added to the Project data set.

3.8 LiDAR

3.8.1 During the flight for aerial imagery, a Digital Terrain Model (DTM) and Digital Surface Model (DSM) of the flight corridors was collected. Both the DTM and DSM was processed in GIS to create hill shade models for the identification of archaeological features.

3.8.2 The DTM and DSM models are available at 25 cm resolution. Each DTM and DSM was processed into several hill shades with variation in either the Azimuth (Angle) and or the Altitude (Height). Processing of different hill shades was to allow for the best opportunity to identify archaeological features, which may show up in certain hill shade processes.

3.8.3 The LiDAR data was assessed to identify features of potential archaeological interest, as either new heritage assets for the baseline or to supplement knowledge of existing heritage assets.

3.9 Scoping of Walkover Survey

3.9.1 Walkover survey was targeted, with areas scoped in or out for site visits to aid a proportionate approach to assessment. Scoping of the targeted walkover focused on areas of perceived limited modern disturbance and areas not so densely vegetated as to obscure the ground surface and local topography. The scoping of areas visited was data led and where ground truthing of the conditions of heritage assets was perceived to be possible. The determination of areas for walkover was undertaken at the earliest opportunity to inform the assessment process.

3.9.2 The aerial imagery data was used to analyse where walkover survey provided value to the baseline understanding of the Project. The aerial imagery was useful as a reflection of the most up to date ground conditions within the Order Limits.

3.9.3 The scoping exercise used a holistic understanding of the current site conditions, driven by what is visible on the aerial imagery, and recorded heritage assets, along with professional judgement. The purpose of the walkover survey was to add to the understanding of the historic environment conditions for the baseline and not to catalogue existing conditions of modern farming practice on a field-by-field basis.

3.9.4 The following rationale was therefore applied to the process of scoping areas in or out of the walkover survey:

Areas Scoped Out of Walkover Survey

- Areas of existing infrastructure, industrial complexes, private gardens, or areas of hardstanding where only observations of modern disturbance would be available on site and the character of the area has been altered. It is unlikely that areas such as these would be physically affected by the Project, but even if they were, the walkover survey would not provide suitable information to inform impact assessment due to the previous changes to the land
- Areas of dense woodland or thick scrubland where identification of any potential earthworks would be difficult and where these areas would not be physically affected by the Project
- Fields which have been subject to previous archaeological investigations, such as geophysical survey or excavation – a walkover survey would not be able to supplement information on heritage assets supplied by intrusive fieldwork
- Fields in very close proximity to houses or surrounded by woodland for a similar proportionate approach that the Project will need to provide a suitable buffer for safety. The ES set out an approach which was taken on a case-by-case basis
- Areas removed from the Project, following consultation led changes and/or refinement of design, which were not yet surveyed.

Areas Scoped In for Walkover Survey:

- Fields with monument records to ground truth the condition of the asset
- Fields within the Order Limits in close proximity to a designated heritage asset for the purpose of supporting setting assessment
- Fields where potential assets or activity of interest have been identified through LiDAR or the aerial imagery
- Grassland, identified through the aerial survey, where there is a greater potential to identify any earthworks through probable limited disturbance from agricultural activity.

3.9.5 Where a field does not meet any of the above, the field was scoped out for walkover survey. The Order Limits is principally arable fields and it is acknowledged that there are limitations in identifying features of archaeological interest within ploughed fields due to modern agricultural practices, which are likely to have truncated or removed above ground earthworks or other evidence of heritage assets. While it is acknowledged that artefacts brought to the surface from ploughing have the potential to provide evidence for the location of archaeological sites, the purpose of the walkover survey was to ground truth site conditions and not to conduct a systematic fieldwalking exercise.

3.9.6 The final data set of assets identified and ground truthed through walkover was incorporated in the main baseline and gazetteer.

3.9.7 Access was requested at least once for all scoped in fields and approximately 97% of the scoped in fields were surveyed.

3.10 Walkover Survey Methodology

3.10.1 The walkover survey involved visiting scoped in areas, to assess the presence of any visible areas of past human activity.

3.10.2 The analysed data that was used to scope areas into assessment was available to surveyors in the field, including the original aerial imagery. Surveyors used an iPad that had a GIS app installed, where up to date baseline data was available and the latest Project information was also displayed for the consideration of all elements of the assessment together in the field.

3.10.3 The GIS allowed surveyors to make accurate digitised records of observations, as well as taking geo-referenced photos for later use in the office. The information recorded using the GIS platform on the iPad could be easily pulled from the platform and integrated into the main GIS data set for use in the remaining assessment and presentation.

3.10.4 Any observations of perceived archaeological interest by surveyors, in addition to the already known assets from other sources, has been added to the Project gazetteer and reported in this Baseline Report. The principal detail of observations from the walkover survey has formed an annex to this Baseline Report, with appropriate, proportionate supplementary information to the main narrative included in the main body of this Baseline Report.

3.11 Scoping of Historic Buildings

3.11.1 In order to provide a proportionate assessment and due to the large number of listed buildings and non-designated historic buildings within the Study Areas, a scoping method was applied to determine which listed buildings were taken forward for assessment. Listed buildings were identified from the National Heritage List for England, as for other designated heritage assets. Non-designated historic buildings were identified from Local Lists produced by Local Authorities, from HER data or other sources as listed in section 3.3, and from walkover survey within the Order Limits. Any historic buildings where the vibration assessment for construction and operation (and maintenance) (see Chapter 14: Noise and Vibration (document reference 6.14)) indicates that there is potential for impacts due to construction vibration are scoped into assessment. However, for the majority of historic buildings within the Study Areas there is no potential for this type of impact and therefore, the scoping exercise was based on which buildings are likely to experience any change to their settings resulting from the Project, during either construction or operation.

3.11.2 The following principles were applied to scope listed buildings and non-designated historic buildings into or out of assessment. Any listed buildings and non-designated historic buildings identified as having relevant historic interest within the Project Order Limits were automatically scoped into assessment.

3.11.3 Scoped out were:

- Listed buildings and non-designated historic buildings beyond the 250 m Study Area that are outside the ZTV, as at this distance from the Project the only change to setting was likely to be visual and therefore a lack of visibility of the Project would mean that no change to setting would occur

- Listed buildings and non-designated historic buildings that are of a type that have a restricted setting due to their inherent characteristics. This group included but was not limited to, milestones, signposts or way makers, drinking fountains, pump heads, icehouses and gravestones/markers/tombs within churchyards
- Listed buildings and non-designated historic buildings that are located within settlements and do not have settings that extend beyond the urban area and where the Project would not introduce new infrastructure into this setting. This required assessment to check that any listed buildings in this category with settings that extend to the Project were included in assessment. This has been undertaken based on a building's location (supported by review of current mapping and aerial imagery). It was assumed that domestic buildings, shops, and public houses have settings that are informed by their settlement location and did not extend beyond this, except those that were demonstrated otherwise by location information. This also included buildings located within conservation areas
- Listed buildings and non-designated historic buildings that were separated from the Project by other major infrastructure (e.g., motorways, major dual carriageways active mainline railways) where it can be reasonably concluded that this infrastructure is a pre-existing barrier that the setting of a building will not extend beyond
- Listed buildings and non-designated historic buildings that were separated from the Project by the Bramford, Norwich Main and Tilbury Substations as these structures represented a significant visual impact within the setting of assets that the addition of overhead lines beyond would not create appreciable change. Cumulative likely significant environmental effects are assessed in Chapter 17: Cumulative Effects Assessment (document reference 6.17).

3.11.4 The above assumptions were kept under review throughout the assessment process to determine whether any revisions to the scoping criteria or approach were necessary. Following this review, the list of scoped-out assets has now been confirmed as appropriate and final, having been established through a reasonable and proportionate methodology.

3.11.5 The buildings within the 2 km and 3 km Study Areas that are scoped out are listed in Annex E. Any buildings that are not scoped out for the above reasons are included in assessment.

3.11.6 There were situations in which buildings outside the 2 km or 3 km Study Areas were scoped in, specifically those of high significance (scheduled monuments, grade I and II* listed buildings and grade I and II* registered parks and gardens), and where they have a historical and/or functional relationship with a scoped in building within the 2 km Study Area or where landscape and visual assessment indicated that the Project would be a prominent visual feature. Listed buildings located immediately adjacent to the temporary haul roads have been included in the assessment. It has been assumed that construction access routes would not be routed through conservation areas.

3.12 Settings Assessment

3.12.1 The site visit included a settings assessment. The following criteria for settings assessment were used for visiting assets:

- Designated heritage assets (scheduled monuments, registered parks and gardens, listed buildings and conservation areas) located within the Study Areas, and any variation to this, defined for their assessment.

3.12.2 Recording of observations for the settings assessment, including a photograph record, were undertaken using the same GIS application outlined in Section 3.10. Access to undertake the setting assessment was principally from publicly accessible areas/paths. In cases where this access did not allow appropriate assessment, access to private land was requested.

3.12.3 The contribution that the setting made to significance was determined with reference to Historic England's guidance. The assessment of setting utilised the 'five-step' approach given in part 2 of the good practice advice (GPA3) note (Historic England, 2017).

3.12.4 Assessment considered the setting of both built heritage and buried archaeology. This assessment was principally carried out on site, whilst experiencing the setting, and reported on in this Baseline Report, where appropriate.

3.12.5 The assessment of curtilage was not a standard consideration alongside setting, and therefore not applied across the Study Area. Design principles to avoid physical impacts to listed buildings and built structures resulted in the avoidance of any land immediately surrounding buildings. Therefore, curtilage was not a relevant factor during assessment.

3.13 Assigning value to Heritage Assets

3.13.1 Based on the understanding of heritage assets, including their group context within the landscape, an assessment of value was provided within this Baseline Report.

3.13.2 Value was provided for individual assets, not groups, but the value accounted for the contribution the asset makes to the group and vice versa for the contextualisation of the asset in relation to others.

3.13.3 The value of a heritage asset was derived from the asset's ability to illustrate one or more of the Conservation Principles, described in the 2008 Historic England document, 'Conservation Principles, Policies and Guidance for the Sustainable Management of the Historic Environment' (Historic England , 2008).

3.13.4 Use of the conservation principles also met emerging recent guidance for historic environment impact assessment, which advocates for:

'A separate description stage that should ensure that the analysis of cultural significance, which follows, actually articulates the key cultural heritage values that are recognised in the asset and is not simply a description of all of the components of the asset' (CIFA; IEMA; IHBC, 2021).

3.13.5 As discussed in section 3.1112, the contribution of setting to the significance of a heritage asset was also considered as part of the assessment of value within this Baseline Report.

3.13.6 Accounting for the value of a heritage asset through their ability to demonstrate one or more conservation principles, the contribution of setting, and professional judgement, the following examples were used as the guidelines for assigning value:

Table 3.2 Heritage value assessment criteria

Value	Examples
Very High	World Heritage Sites (including nominated sites) inscribed for their cultural heritage importance Assets that can contribute significantly to acknowledged international research objectives Assets of acknowledged international importance
High	Scheduled Monuments (including proposed sites) Grade I and II* Listed Buildings Grade I and II* Registered Parks and Gardens Registered Battlefields Protected Wrecks Conservation Areas containing buildings of predominantly high value Non-designated assets of the quality and importance to be designated Assets that can contribute significantly to acknowledged national research objectives
Medium	Grade II listed buildings Grade II Registered Parks and Gardens Conservation Areas containing buildings of predominantly medium value Assets that contribute to regional research objectives and/or have exceptional quality in their fabric or historical associations
Low	Locally listed buildings, or those of equivalent quality in their fabric or historical associations Assets of local importance Assets compromised by poor preservation and/or poor survival of contextual associations Assets of limited value, but with potential to contribute to local research objectives
Negligible	Assets with very little or no surviving archaeological/historical interest Buildings of no architectural or historical note Buildings of an intrusive character
Unknown	The importance of the resource has not been ascertained/is inaccessible

3.13.7 The value of the heritage asset, assigned in this Baseline Report, has been carried into the ES for discussion of impact and proportionate mitigatory measures, discussed further in Section 4 of this document.

3.14 Archaeological Potential

3.14.1 Using the baseline thus determined, this Baseline Report presents an understanding of the likelihood for hitherto undiscovered archaeological remains to be present within the Order Limits. Historic and modern impacts that might potentially have degraded the archaeological resource have been examined to assist in this process.

3.14.2 The assessment of archaeological potential identified the likelihood of the presence of unidentified archaeological remains based on an analysis of the available data sets, previous archaeological findings within the Study Area and professional judgement. This was supplemented with reference to geological and topographical landscape features/zones. Discussion of archaeological potential required a holistic approach from baseline assessment to predicting patterns of past activity.

3.14.3 The baseline narrative includes discussion about the nature of the archaeological resource along the route by location and period. This is essential in aiding the understanding of the nature of human activity since the prehistoric period, the evolving nature of settlement and exploitation of the landscape, the way in which past communities have harnessed local resources and consequently the way in which surviving archaeological remains reflect these activities.

3.14.4 As part of the staged approach to assessment, the baseline presented in the Baseline Report, has been used to discuss potential further fieldwork assessment. The results from this further assessment are presented in the ES Chapter baseline and/or the mitigation strategy, dependent on the programme of this work.

3.15 Archaeological Fieldwork

3.15.1 The understanding gained from this Baseline Report is used to inform further discussion between the Project and heritage consultees with regards to the requirement for potential further fieldwork to inform the baseline understanding and assessment.

3.15.2 The overriding aim of all fieldwork was to target insufficient information within the baseline, as outlined in EN-1, paragraph 5.9.11 in locations that would be physically affected by the Project.

3.15.3 Due to the scale of the Project, initial discussion with statutory heritage consultees was sought to agree parameters for prioritising archaeological fieldwork. It was agreed with relevant stakeholders that those areas of the Project that would experience the greatest impact, including the section of underground cable, the new EACN Substation and new Tilbury North Substation and Cable Sealing End compounds, would be prioritised.

3.15.4 Archaeological and built heritage mitigation, including protection measures for built heritage assets and preservation in situ of archaeological remains, non-intrusive archaeological fieldwork and intrusive archaeological fieldwork would be undertaken during pre-construction works or prior to the aspects of construction that would affect the heritage asset. These mitigation works would be monitored to ensure compliance with the AMS-OWSI (document reference 7.5) and relevant WSI to ensure works would be undertaken to appropriate standards.

4. Approach to Impact Assessment

4.1.1 In establishing impact, the Overarching National Policy Statement for Energy (EN-1) (Department for Energy Security and Net Zero, 2024, paragraph 5.9.24) presents the following discussion:

'In considering the impact of a proposed development on any heritage assets, the Secretary of State should consider the particular nature of the significance of the heritage assets and the value that they hold for this and future generations. This understanding should be used to avoid or minimise conflict between their conservation and any aspects of the proposal'.

4.1.2 There is no consistent methodology adopted for historic environment for assessing impacts on historic environment assets as part of an EIA particularly for energy proposals. However, the International Council on Monuments and Sites (ICOMOS) have published guidance on Heritage Impact Assessments for Cultural World Heritage Properties (ICOMOS, 2011).

4.1.3 There is also recent guidance from CIFA, Institute of Historic Building Conservation (IHBC) and Institute of Environmental Management and Assessment (IEMA), through the July 2021 document 'Principles of Cultural Heritage Impact in the UK' paragraph B.9. The guidance notes that:

'The magnitude of the impact on cultural significance needs to be assessed. A distinction needs to be drawn as to whether the change will result in only a 'small' impact on, say just one component of cultural significance or whether the change would have a greater impact on the totality of cultural significance. The terms 'large' 'medium' or 'small' are acceptable or any other simple scale that offers a form of gradation easily articulated in a written report' (CIFA; IEMA; IHBC, 2021).

'A simple graded scale of effects should be defined and applied. However, decisions regarding the acceptability of the proposal will often require the effect to also be articulated within the parameters of the relevant legislative or policy tests that use their own specific language and terminology. For instance, in Environmental Impact Assessment, an impact can result in a significant or non-significant effect' (CIFA; IEMA; IHBC, 2021).

4.1.4 Although no fixed assessment methodology was provided in the National Policy Statement for Energy (EN-1) (Department for Energy Security and Net Zero, 2024) the ES was carried out in line with the direction of the document that underpins the Planning Act 2008. The NPS (EN-1) and NPPF refer to 'harm' to heritage assets. In order to ensure the Project's compliance with policy Appendix 11.7: Assessment of Harm to Designated Heritage Assets (document reference 6.11.A7) presents impact assessment in terms of harm, rather than the EIA terminology used in the ES chapter.

4.1.5 Where there is any potential for an impact to a heritage asset resulting from the Project, these assets have been assessed in full in the ES. This assessment utilised the assessment of value assigned to heritage assets in this Baseline Report and assigned a magnitude of impact in line with the most up to date design information for the Project.

4.1.6 Potential impacts to heritage assets could arise from construction activity, including creation and the use of access routes and traffic management, site compounds and working/storage areas, and the operational presence of the overhead line and associated infrastructure. In addition, the potential impact of other environmental mitigation, such as ecological habitat creation or landscape planting, was assessed for any impact to heritage assets.

4.1.7 Accounting for the above discussion, the following terminology for describing the magnitude of impact, is presented in Table 4.1.

Table 4.1 Criteria for quantifying the magnitude of impact to heritage assets

Magnitude of Impact (term)	Criteria of Impact
High	Change to most or all key archaeological materials, such that the resource is totally altered Comprehensive changes to setting of archaeology or built heritage Change to key historic building elements, such that the resource is totally altered
Medium	Changes to many key archaeological materials, such that the resource is clearly modified Considerable changes to setting that affect the character of the asset Change to many key historic building elements, such that the resource is significantly modified Changes to the setting of an historic building, such that it is significantly modified
Low	Changes to key archaeological materials, such that the asset is slightly altered Slight changes to setting Change to key historic building elements, such that the asset is slightly different Change to setting of an historic building, such that it is noticeably changed
Negligible	Very minor changes to archaeological materials, or setting Slight changes to historic building elements or setting that hardly affect it
No change	No change

4.1.8 Following an assessment of the magnitude of impact, mitigation measures may be proposed (discussed further in Section 5).

4.1.9 The significance of effect is expressed as a result of the value of the heritage asset and the magnitude of impact it would experience as a result of the Project. The significance is expressed as major, moderate, minor, negligible or neutral and can be adverse or beneficial. The matrix for reporting of significance of effect is outlined in Table 4.2, adapted from '*Heritage Impact Assessments for Cultural World Heritage Properties'* (ICOMOS, 2011).

Table 4.2 Significance of effects matrix

		Value of Heritage Asset				
		Very High	**High**	**Medium**	**Low**	**Negligible**
Magnitude of impact	**High**	Major	Major	Major to moderate	Moderate to Minor	Minor
	Medium	Major to Moderate	Major to Moderate	Moderate	Minor	Negligible
	Low	Major to Moderate	Moderate to Minor	Minor	Negligible	Negligible
	Negligible	Minor	Minor	Negligible	Negligible	Neutral
	No Change	Neutral	Neutral	Neutral	Neutral	Neutral

4.1.10 The matrix has been used as a check to ensure that judgements on value, magnitude of impact and significance of effect are balanced. In all cases professional judgement was used and the value and impact judgements revisited if the significance of effect is unreasonable.

5. Mitigation

5.1.1 Proposed mitigation measures would be proportionate to the level of impact and the value of the heritage asset. The need for a proportionate approach is outlined in the 2021 CIFA/IEMA/IHBC document paragraph 3.4 which states:

'The CHIA process should be proportionate to the importance of the cultural heritage assets being assessed. It should recognise the scale of the proposal and the potential magnitude of the impact' (CIFA; IEMA; IHBC, 2021).

5.1.2 The Outline Archaeological Mitigation Strategy and Outline Written Scheme of Investigation (WSI) (AMS-OWSI) (document reference 7.5) has been produced to support the DCO application which sets out the required mitigation measures.

5.1.3 Additional heritage input was also made to central Project documents such as the Outline Code of Construction Practice (CoCP) (document reference 7.2), where both standard and additional mitigation measures for archaeology and the built historic environment are included, to ensure appropriate mitigation is secured in the DCO.

6. Summary

6.1.1 This document presents the methodology for the historic environment baseline and assessment for the Norwich to Tilbury Project.

6.1.2 The document sets out the methodology for baseline data gathering, including sources of information used to inform the desk-based assessment. In addition, methods of capturing and presenting the data in Appendix 11.1: Historic Environment Baseline Report (document reference A11.1) have been presented.

6.1.3 The approach to the historic environment assessment for the Project has been undertaken as a staged approach. The Historic Environment Baseline Report has informed understanding of the historic environment, the identification of areas to be targeted for further information and the need for this further information.

1. Introduction

1.1.1 This Annex presents the write up of the cultural heritage walkover survey for the Project. The walkover survey has been conducted to aid the baseline understanding of the historic environment, within the Order Limits.

1.1.2 The aims of the walkover survey were to:

- Ground truth the current conditions of the land within the Order Limits
- Where possible, identify the rate of survival of heritage assets
- Identify any previously unrecorded heritage assets within the Order Limits
- Identify areas of modern disturbance which may have impacted the survival rate of any known and/or yet unidentified archaeological remains.

1.1.3 The survey was conducted on a field-by-field basis; however, a targeted approach has been adopted to support a proportionate level of assessment. Details of the scoping mechanism used to determine which fields were targeted, are presented in Annex C of this Baseline Report. The walkover survey was supported by an aerial survey of the Project alignment, including the production of 3D models.

1.1.4 Figure A11.1.3: Walkover – Accessed Fields in Annex A of this report presents the coverage of the walkover survey, including fields scoped in and accessed; fields scoped in which the Project was not able to access; and fields scoped out of walkover survey. Access was requested at least once for all scoped in fields and approximately 97% of the scoped in fields were surveyed.

1.1.5 The walkover to date was conducted over 22 weeks between 15 May 2023 and 28 March 2025.

1.1.6 During this time, weather conditions varied. Consequently, ground conditions were also variable with saturated fields following heavy rain, including some areas of land which held large bodies of water.

1.1.7 Access across the survey area was principally on foot. Private land access was agreed through the Project Team, with some observations made from roads or through the use of public rights of way.

1.1.8 Setting assessment has also been undertaken, and discussion of the setting of heritage assets is located within the main structure of this Historic Environment Baseline Report.

1.1.9 The following section of the Annex presents the results of the walkover survey. The Project has also been sub-divided into eight geographical sections for reader accessibility, based largely on Local Planning Authority boundaries.

- Section A: South Norfolk Council
- Section B: Mid Suffolk District Council
- Section C: Babergh District Council, Colchester City Council and Tendring District Council

- Section D: Colchester City Council
- Section E: Braintree District Council
- Section F: Chelmsford City Council
- Section G: Brentwood Borough Council and Basildon Borough Council
- Section H: Thurrock Council.

1.1.10 Each of the eight Project Sections are broken down further into smaller geographical sections. Reporting of observations is based on the general land formation, any observations of known heritage assets, discussion of previously unidentified heritage assets and identified areas of modern disturbance.

1.1.11 Where appropriate, observations from the walkover survey have been drawn into the baseline section of the principal section of this report. Heritage assets identified during the production of the baseline report have been given Project I.D. numbers and these are presented in bold type within parenthesises e.g. (**101**) for non-designated assets. Listed buildings, scheduled monuments and registered parks and gardens are referred to by their National Heritage List Entry numbers. Conservation areas are identified by their name.

2. Results

2.1 Section A: South Norfolk

2.1.1 This Section of the Project is approximately 29 km in length. From its northern limit, Section A heads in a generally south-south-west direction, by-passing the settlements of Mulbarton, Tacolneston, Shelfanger and Bressingham before passing across the county border with Suffolk in the Waveney river valley, approximately 2.4 km west of the market town of Diss.

2.1.2 The land in this Section of the Order Limits is largely rural with most of the fields used for arable production. The land is mostly flat with some minor undulation. Field sizes vary and are mostly rectangular or square. There is a mix of field boundaries in the area, with the majority being drainage ditches, but there are also hedgerows, treelines and permissive boundaries marked only by a change of crop.

2.1.3 Outside the boundary of the Order Limits, the wider landscape is of a similar agricultural nature with scattered settlements and farmsteads. The larger settlements near the Order Limits include Roydon (as part of Diss), Tacolneston and Mulbarton. The landscape also includes travel, and telecommunication infrastructure, some of which transect the Order Limits.

2.1.4 Key aspects of Section A are:

- Widespread arable crop fields, with occasional pastoral fields for grazing livestock
- Transport infrastructure routes including A140, A1066, B1113, B1077, water navigation routes (river Tas), National Rail infrastructure (the Order Limits runs along the railway line), and public rights of way (footpaths and bridleways).

2.1.5 To aid discussion, Section A is split into eight sub-sections:

- Sub-section A1: Dunston to Long Lane (south of Mulbarton) – RG1 to RG17
- Sub-section A2: Long Lane (south of Mulbarton) to Hapton Road (Hapton) – RG17 to
- Sub-section A3: Hapton Road (Hapton) to Northfield Road (east of Tacolneston) – RG to RG38
- Sub-section A4: Northfield Road (east of Tacolneston) to the River Tas/Fen Road – RG38 to RG49
- Sub-section A5: River Tas/ Fen Road to Long Row – RG49 to RG57
- Sub-section A6: Long Row to Heywood Road (Shelfanger) RG58 to RG70
- Sub-section A7: Heywood Road (Shelfanger) to Darrow Lane (Bressingham) – RG70 to RG80
- Sub-section A8: Darrow Lane (Bressingham) to The Doit Lane/River Waveney – RG80 to RG85.

Sub-section A1: Dunston to Long Lane (south of Mulbarton)

Description of Landform

2.1.6 This sub-section begins east of the existing Norwich Main Substation, west of Ipswich Road and the railway line which links Norwich to London, and heads in a southerly direction, comprising of the first 5 km of the Order Limits.

2.1.7 The landscape here is generally flat with minimal undulation (Plate 1), which allows for good visibility. The fields themselves are mostly a mix of crop and ploughed fields, with some grasslands, scrub fields, and horse paddocks. The field boundaries consist of treelines, ditches, hedgerows, and occasional instances of banks, and wooden and electrical fencing (Plate 2 to Plate 6).

Archaeological Features

Known Heritage Assets

2.1.8 A probable World War Two searchlight battery site (**1240**) can be identified on aerial photographs on a field situated to the west of the railway line and located adjacent to the National Grid Transformer Station. It encompasses an ovoid emplacement, believed to have been used for a searchlight, as well as a pillbox and several other military operational structures and huts. Although significant dismantling had occurred by April 1946, with only the pillbox and three small structures remaining, the site's historical significance remains noteworthy.

2.1.9 The Grade II Kenningham Hall (**1373056,** Plate 7), located north of Brick kiln Lane is visible from the Order Limits.

2.1.10 The site of the Humbleyard Hundred Moot, c. 330 m east of Gowthorpe Lane, now a high point in the landscape and within arable fields. The site of the Humbleyard Hundred Moot (**1122,** Plate 8), c. 330 m east of Gowthorpe Lane, now a high point in the landscape and within arable fields. It is situated where an ‘arm’ off the western side of the main route is proposed.

2.1.11 To the south of Brickkiln Lane, to the east of the solar farm, are the possible remains of Kenningham Deserted Medieval Village (DMV) (**1010,** Plate 9). The walkover survey identified an area of lower ground partially filled with water and surrounded by significant undulation.

2.1.12 The site of a workhouse which is noted on the OS One Inch, 1885-1900 map is visible from a crop field within the proposed route, and an 'arm' off to the west of the proposed route cuts into the northern side of this group of buildings.

2.1.13 No other known heritage assets were visible during the walkover of Sub-section A1 of the Order Limits.

Plate 8 Views to the west from the Humbleyard Hundred Moot Point (1122), looking west

Plate 9 Possible remains of Kenningham DMV (1010), looking north-east

Unrecorded Heritage Assets

2.1.14 There is a wetland surrounded by humps with undulations as well, in a field belonging to Kenningham Hall (**1373056**) (Plate 10, Plate 11). It is located c. 150 m north-east from a solar panel farm/area and east side of a private track. On the other side of this track, to the west, is a pond. This wetland may be a continuation of this pond, and the track in the middle would have been created subsequently.

2.1.15 Three ditches were witnessed to the north and south of the public footpath that cuts west to east beneath the existing Norwich Main Substation, c. 350 m east of the proposed route. These ditches are probable Medieval to post Medieval fishponds and are noted on an 1846 map of the Dunton Estate (Plate 12, Plate 13).

2.1.16 There was a north-east to south-west linear depression within a pasture field c. 250 m south of Brickkiln Lane which could indicate modern enclosure as the field is seen on the historic maps as one large one until modern day (Plate 14).

2.1.17 There is a raised copse in a paddock field which is the site of a historic pond, as seen on the OS Six Inch map 1888-1913 (Plate 15).

2.1.18 No further unrecorded heritage assets were identified during walkover of Sub-section A1. Some minor undulations were observed, believed to be either geological or associated with the farming practice of the area.

Plate 15 Filled in pond, looking south-east

Modern Disturbance

2.1.19 In a field south of Brickkiln Lane, south of a solar farm, open archaeological evaluations undertaken by a third party were recorded (Plate 16).

Plate 16 Open archaeological evaluation on a field south of Brickkiln Lane, looking south

Sub-section A2: Long Lane (south of Mulbarton) to Hapton Road (Hapton)

Description of Landform

2.1.20 Sub-section A2 starts c. 700 m south of Mulbarton, west of Long Lane and east of Bracon Ash. This sub-section runs north-east/south-west to Hapton Road and covers c. 4 km of the Order Limits.

2.1.21 The land within this part of the Order Limits is rural in character consisting mainly of fields with scattered farmsteads. The topography of the Order Limits in this sub-section is predominantly flat with a natural rise to the north. It is also characterised by large fields of arable monoculture with long views and slopes and undulations.

2.1.22 The land within Sub-section A2 is largely under agricultural production with the occasional animal pasture field. The field boundaries vary, with drainage ditches, trackways, established treelines, and wire fences being employed (Plate 17 to Plate 21).

Archaeological Features

Known Heritage Assets

2.1.23 The farmyard, where are located the Grade II barn to Flordon Hall (**1050698**) and the Grade II Piggery 60 yards south of Flordon Hall (**1172231**), is visible from the Order Limits (Plate 22). As for the Flordon Hall (**1050698**), it is not visible due to a tree line to its west.

2.1.24 A possible circular ditch is visible as crop marks on aerial photographs (Plate 23), in a field along Flordon Road and Norwich Road (**1038**). It is possible that it could be the remnants of a Bronze Age barrow. This could be a depressed area noted on the walkover survey. In the same field a line of undulations was visible.

2.1.25 During the walkover, an old railway line (**1617**) was observed west of Hapton. This old line is apparent on the First Edition Ordnance Survey of 1884 (Norfolk Sheet LXXXVI.SE).

2.1.26 There were no further known heritage assets observed in Sub-section A2 during the walkover survey.

Plate 22 Farmyard with the Barn to Flordon Hall and Piggery 60 yards south of Flordon Hall, looking east

Plate 23 Possible circular ditch (1038, circled in red) is visible as a depression along Flordon Road and Norwich Road, looking south

Plate 24 Undulations visible in a field along Flordon Road and Norwich Road, looking west

Unrecorded Heritage Assets

2.1.27 There are several depressions within this sub-section of the Project (Plate 24). One was seen in a field on the north of Flordon Hall (**1050698**) (Plate 25). In another area, directly in a field north of Fundenhall Road, was observed a north-south aligned ridge and furrow (Plate 26).

2.1.28 There was a north-east to south-west linear depression in a ploughed field, c. 100 m south-west of Wymondham Road/Flordon Road (Plate 27).

2.1.29 No other unrecorded heritage assets were witnessed during the walkover survey.

Plate 25 Depression in a field north of Flordon Hall, looking east

Plate 26 Possible ridge and furrow in a field north of Fundenhall Road, looking south

Plate 27 North-east to south-west linear depression in ploughed field, looking south

Modern Disturbance

2.1.30 A top-soil pile was witnessed during the walkover survey. The pile looked to be the soil from a hole which had been intentionally dug in the area next to the field entrance along Wymondham Road (Plate 28).

2.1.31 The area is principally agricultural in use and is subject to modern farming practices including large drainage ditches.

Plate 28 A topsoil pile along Wymondham Road, looking north-east

Sub-section A3: Hapton Road (Hapton) to Northfield Road (east of Tacolneston)

Description of Landform

2.1.32 Sub-section A3 begins south of Hapton Road and goes south until Northfield Road. This area covers c. 4 km of the Order Limits. North-east of this section is Hapton and the south is between Forncett St Mary (south-east) and Tacolneston (south-west).

2.1.33 The topography in the northern part of this sub-section features gentle undulations, gradually sloping from north to south before ascending again (Plate 29). The southern portion similarly exhibits undulations and occasional depressions.

2.1.34 The land use in this area is mostly crop fields with one instance of a recently ploughed field recorded at the time of the walkover survey for this sub-section. The field boundaries in this sub-section of the route are ditches, change of fields, hedges, roads, tree lines, and shrub lines/borders (Plate 29 to Plate 34).

Plate 33 Ploughed field west of Hurn Lane, looking north-east towards Order Limits

Plate 34 Ploughed field west of Hurn Lane, looking west towards Order Limits

Archaeological Features

Known Heritage Assets

2.1.35 Mary's Farmhouse (**1050076**) and its barn immediately north-west (**1302309**) are visible from the Order Limits (Plate 35).

2.1.36 St Mary's Cottage (**1178686**), Grade II, is visible from the Order Limits (Plate 36).

2.1.37 No further known heritage assets were observed in Sub-section A3 during the walkover survey.

Plate 35 Mary's Farmhouse and Barn Immediately North-West of Mary's Farmhouse, looking south

Plate 36 St Mary's Cottage, looking north-west

Unrecorded Heritage Assets

2.1.38 A large circular depression was recorded in a field along Stickfer Lane (Plate 37). This feature is apparent on aerial imagery.

2.1.39 A linear undulation area was observed on a field along Cheneys Lane, north of Mary's Farmhouse (across the road) and its barn as well as east of St Mary's cottage (Plate 38).

2.1.40 No further unrecorded heritage assets were observed within Sub-section A3 during the walkover survey.

Plate 37 Depression in ploughed field west of Stickfer Lane, looking north

Plate 38 Undulation line on a field along Cheneys Lane, looking north-west

Modern Disturbance

2.1.41 No instances of modern disturbance were witnessed during the walkover survey.

Sub-section A4: Northfield Road (east of Tacolneston) to River Tas/Fen Road

Description of Landform

2.1.42 Sub-section A4 begins from the south of Northfield Road and runs in a north-east/south-west direction until the Tas river crossing Diss/Fen Road. This area covers approximately 4 km of the Order Limits.

2.1.43 The land within the Order Limits in this sub-section is rural, there is no close village or town. The topography of the northern part of this sub-section is predominantly undulating (Plate 39), while the middle and southern parts are much flatter (Plate 40).

2.1.44 The field types are mostly a mix of crop, some are rapeseed, and meadow. The field boundaries consist of treelines, ditches, hedgerows, roads, with occasional banks (Plate 41 to Plate 57).

Plate 39 Undulating general landscape in the northern part of sub-section A4, looking south

Plate 57 Grazing field c. 420 m north-east of Diss Road, views to Order Limits, looking east

Archaeological Features

Known Heritage Assets

2.1.45 The yard of the Grade II Banyard's Hall (**1373609**) is visible from the Order Limits, from a field south of this listed building. This listed building is standing on a moat site which can also be seen from the Order Limits (Plate 58). The listed building and the moat site are apparent on the 1884 Norfolk Sheet XCVI.NE.

2.1.46 The Quakers Farmhouse, Grade II listed building (**1373606**), is visible from the Order Limits, from a field north of low common (Plate 59).

2.1.47 There were four to six small circular depressions within the north-eastern part of a paddock field c. 300 m north-east of Fen Road, Cargate Common (Plate 60 Paddock c. 300 m north-east of Fen Road which had 4-6 small circular depressions grouped in the north-east part of a paddock, looking west).

Plate 58 Yard of Banyard's Hall (1373609), looking north

Plate 59 Quakers Farmhouse (1373606), looking south-west

Plate 60 Paddock c. 300 m north-east of Fen Road which had 4-6 small circular depressions grouped in the north-east part of a paddock, looking west

Unrecorded Heritage Assets

2.1.48 The old avenue to the moat site, where the Banyard's Hall (**1373609**) is located, was visible during the walkover (Plate 61).

2.1.49 An unmaintained field boundary ditch was observed off Long Stratton Road (Plate 62). This ditch is visible on the 1884, Norfolk Sheet XCVI.NE with a small area with water at the east end of the ditch.

Plate 61 A tree lined avenue leading to Banyard's Hall (1373609), north of Prince of Wales Road, looking south

Plate 62 An unmaintained field boundary ditch off Long Stratton Road, looking east

Modern Disturbance

2.1.50 There was a shed or barn on the edge of an overgrown grass field c. 500 m south of Bunwell Hill (Plate 63).

2.1.51 No other modern disturbances were noted during the walkover survey.

Plate 63 Shed/barn structure on edge of overgrown grass field, looking north

Sub-section A5: River Tas/Fen Road to Long Row

Description of Landform

2.1.52 This sub-section begins at the River Tas, east of Diss Road/Fen Road in a mostly linear north to south direction to Long Row, covering c. 3 km of the Order Limits. This part of the Order Limits is very rural, with the nearest settlement, Tibenham, being c. 1.2 km east of the Order Limits at its closest point.

2.1.53 The landscape within this sub-section of the proposed route is flat with minimal undulations. The land use is for crop production or grassland, with one instance of a meadow, with fields being a mix of regular and irregular shapes. The field boundaries in this section are ditches, hedgerows, tracks, occasional banks, (Plate 64 to Plate 66) and the River Tas in the northern-most field of this sub-section.

Plate 64 Grass field, looking west

Plate 65 Grass field, looking east

Plate 66 Crop field, looking north-east

Archaeological features

Known Heritage Assets

2.1.54 The Old Hall, Grade II* listed building (**1050563**), is 50 m east to the northernmost field of this sub-section but a line of trees is limiting the view from the field.

Unrecorded Heritage Assets

2.1.55 There was a west to east linear undulation observed in the northernmost field of this sub-section, c. 50 m south of the River Tas (Plate 67).

2.1.56 A potential partially extant lined avenue that once led from a curving route way and headed south to the Grade II listed Old Hall (**1272400**) can be seen. The route way is severely overgrown and two parallel ditches can just be seen either side of the track way. A ditch can also be seen bisecting the western ditch, this is a much later feature and is potentially associated with modern drainage.

2.1.57 The ruins of a building (Plate 68, Plate 69, Plate 70) were noted during the walkover, in the field entrance of a crop field, on the corner of Diss Road/Mill Road, c. 920 m north of Black Barn Road. An L shaped building appears on the OS One Inch, 1885-1900 map and is still on the map by 1972 (OS 1:10,000/1:10,560, 1949-1972), and on Bing Maps as a building part of Manor Farm as of August 2023. The building is visible on Google Earth Pro from 1982 as ruins, and is at its clearest in 1999 and 2006, with much of the building covered with vegetation by 2022. The building foundations and the L shape is visible from aerial imagery as of August 2023. The building remains may be of significance with its association with the Manor House (**1179387**) and Low Farmhouse (**1373399**).

2.1.58 No other unrecorded heritage assets were discovered during the walkover.

Plate 67 Undulation line across the northernmost field of this sub-section looking east

Plate 68 Remains of building, looking north-west

Plate 69 Remains of building, looking east

Plate 70 Building foundations

Modern disturbance

2.1.59 To the west of the overgrown trackway that potentially once let to Old Hall (**1272400**), is a mound in the north-eastern corner of a field. This mound is overgrown with vegetation and has several trees planted in it. It is though that this could be an overgrown spoil heap and not archaeological in nature as it does not appear in the HER or any other sourced interrogated for this Project.

2.1.60 No other modern disturbance was observed within the Order Limits, other than the current agricultural activity such as ploughing and harvesting.

Sub-section A6: Long Row to Heywood Road (Shelfanger)

Description of Landform

2.1.61 This sub-section of the walkover survey begins on the southern side of Long Row, c. 2.5 km north-east of Winfarthing, to Heywood Road c. 1 km south-east of Shelfanger, and follows a mostly-linear north to south route to towards the land to the east of Shelfanger. This sub-section is c. 4.5 km of the Order Limits.

2.1.62 The topography in this sub-section is flat with gentle undulations. Fields are large and regular shaped, and are used for arable crop production, with some ploughed fields. Field boundaries in this section are hedge, ditch, and treelines (Plate 71 to Plate 75).

Plate 71 Crop field, looking north

Plate 72 Crop field, looking west

Plate 73 Crop field, looking north-east

Plate 74 Ploughed field, looking north-east

Plate 75 Grassland adjacent to the Moated Site (1024), looking west

Archaeological Features

Known Heritage Assets

2.1.63 There is a possible medieval or post medieval moat (**1024**) c. 360 m north of Heywood Road, and c. 1 km east of Shelfanger within arable and grassland fields. The moat is very prominent in the landscape and has very deep ditches with established vegetation in and around it (Plate 76, Plate 77). The Order Limits pass through this moat.

2.1.64 The Winfarthing Great Park Medieval deer park (**1064**) (Plate 78, Plate 79) is intersected by the Order Limits, which extend through the park for approximately 2 km from north to south.

2.1.65 No other known heritage assets were recorded during the walkover survey.

Plate 76 Moat ditch (1024) with established vegetation, looking west

Plate 77 Moated site (1024), looking north-west

Plate 78 Site of Winfarthing Great Park Medieval deer park (**1064**), now a grass/crop field, looking north-east

Plate 79 Site of Winfarthing Great Park Medieval deer park (**1064**), looking north-east from Heywood Road

Unrecorded Heritage Assets

2.1.66 No unrecorded heritage assets were discovered during the walkover.

Modern Disturbance

2.1.67 No modern disturbances were discovered.

Sub-section A7: Heywood Road (Shelfanger) to Darrow Lane (Bressingham)

Description of Landform

2.1.68 This sub-section begins in the field directly south of Heywood Road, c. 800 m south-east of Shelfanger, and ends at the fields to the east of Darrow Road, c. 700 m north-east of Bressingham. This part of the route makes up c. 3.5 km of the Order Limits and follows a north to south-west-ward curving route to Bressingham.

2.1.69 The land use in this sub-section is predominantly crop with one instance of a meadow, with varying size and shaped fields, with field boundaries consisting of a mix of treeline and hedges (Plate 80 to Plate 85). The topography in this area varies from flat, undualting, and sloping upwards to the south-east in some fields.

Plate 80 Crop field with gentle rise to south-east, looking south

Plate 81 Crop field, looking north-west

Plate 82 Crop field, looking north

Plate 83 Crop field, looking west

Plate 84 Wheat field, looking west

Plate 85 Grass land looking south-west

Archaeological Features

Known Heritage Assets

2.1.70 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.1.71 There was a circular depression following by a linear one observed in a field located in the middle of this sub-section, c. 350 m east of Shelfanger Road (Plate 86). It might be an old pond.

2.1.72 A pond and a small mound were observed in a field located in the middle of this sub-section, c. 335 m east of Shelfanger Road (Plate 87).

2.1.73 No other unrecorded heritage assets were discovered during the walkover.

Plate 86 Depression observed in the middle of a field

Plate 87 A pond and a small mound in a field

Modern Disturbance

2.1.74 Modern debris including pottery was witnessed during the walkover in an entrance to a crop field c. 1 km east of Shelfanger Road (Plate 88).

2.1.75 There was concrete debris noted in a crop field entrance c. 1.1 km east of the B1077 (Plate 89).

2.1.76 There was a mess heap noted in the eastern side of an arable field c. 600 m west of Shelfanger Road within the Order Limits.

2.1.77 No other modern disturbances were witnessed during the walkover survey.

Plate 88 Pottery and modern debris in an entrance to a crop field

Plate 89 Concrete debris in field entrance

Sub-section A8: Darrow Lane, Bressingham to The Doit Lane/River Waveney

Description of Landform

2.1.78 This sub-section begins in the fields to the west of Darrow Lane, c. 620 m east of Bressingham and follows a curvilinear route to the River Waveney off Doit Lane c. 760 m south-west of Roydon. The route here follows the landscape between the settlements of Bressingham to the west and Roydon to the south-east. It makes up c. 2.6 km of the Order Limits at the southern end of the Norfolk part of the Project.

2.1.79 The landscape in this section is flat with occasional minor undulations which are geological rather than archaeological. The field uses are crop, meadow, possible water meadow (in the southern-most end), and recently ploughed. Field sizes and shapes vary, and their boundaries are hedge, ditch, treeline, or track (Plate 90 to Plate 94).

Plate 90 Grassland, looking north-east

Plate 91 Paddock and meadow, looking west

Plate 92 Grassland, looking north-west

Plate 93 Scrub field, looking north-east

Plate 94 Raised bank as a border for a crop field, looking north-east

Archaeological Features

Known Heritage Assets

2.1.80 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.1.81 An area of potential east to west aligned Medieval to Post Medieval ridge and furrow was located to the north of Bressingham Road (Plate 95). The potential assets are faint to see.

2.1.82 At the very end of this sub-section are a series of potential non-extant field boundaries, platforms and depressed areas (Plate 96, Plate 97, Plate 98). It is not clear what these areas are, but they have archaeological potential but have not been recognised by the HER or other data sources integrated by this Project.

Plate 95 Potential, faint, ridge and furrow looking east

Plate 96 Area of undulations at the southern extent of this sub-section, looking south

Plate 97 Raised area at southern extend of sub-section looking west

Plate 98 Large depressed are at southern extend of sub-section, looking south

Modern Disturbance

2.1.83 No modern disturbances were witnessed during this sub-section of the route.

2.2 Section B: Mid Suffolk and Babergh

2.2.1 This section of the Project is approximately 42 km in length and covers the area from the south of Diss to Finningham. The A1066 bounds the Order Limits to the north, the A143 cuts through east to west, and the north-east to south-west railway line bounds the Order Limits to the east, cutting through the Order Limits between Gislingham and Finningham in the southern-most part of this section.

2.2.2 The land within the Order Limits and Study Area is mostly rural and agricultural land which is flat with minimal undulation. This allows for good visual access to the fields within the Order Limits. Field sizes vary and many of the field shapes are irregular. The field types are varied: crop, ploughed field, Meadow, and scrubland were recorded. The field boundaries consist of ditches, hedgerows, occasional instances of a change of crop, fencing, and/or trackways.

2.2.3 Outside of the Order Limits, the landscape is rural with scattered settlements and farmsteads. The largest settlement in this section, Diss, and its associated Conservation area, are, at its closest, c. 700 m north-east of the Order Limits. Wortham Ling, a Site of Special Scientific Interest, which is an expansive area of flat scrubland, is to the west of sub-section B1. The landscape is mostly flat, with occasional gentle hills and slopes, and travel infrastructure including the railway line, the A143, and many B roads are in the wider area.

2.2.4 The walkover survey was conducted in bright, warm, and occasional overcast weather.

2.2.5 For ease of understanding, this section has been divided into 14 sub-sections:

- Sub-section B1: River Waveney/The Doit to Old Bury Road (Wortham) – RG85 to RG95
- Sub-section B2: Wortham to Mellis Road – RG95 to RG103
- Sub-section B3: Mellis Road to Gislingham – RG103 to RG118
- Sub-section B4: Gislingham to Wickham Road. – RG118 to RG125
- Sub-section B5: Wickham Road to Mendlesham Road (north) – RG125 to RG134
- Sub-section B6: Mendlesham Road (south) to Cay Hill – RG134 to RG143
- Sub-section B7: Cay Hill (south) to Bells Lane – RG143 to RG154
- Sub-section B8: Bells Lane (south-west) to A14. – RG154 to RG161
- Sub-section B9: A14 to Hascott Hill. – RG161 to RG175
- Sub-section B10: Hascott Hill (south) to Ipswich Road, Ringshall Stocks – RG175 to RG183
- Sub-section B11: Ipswich Road, Ringshall Stocks (south) to Castle Road, Offton – RG183 to RG190
- Sub-section B12: Castle Road, Offton (south) to Blood Hill – RG 191 to RG198
- Sub-section B13: Blood Hill (east) to Tye Lane RG 198 to RG205
- Sub-section B14: Tye Lane (south) to Burstall Lane (North) – RG205 to JC11.

Sub-section B1: River Waveney/The Doit to Old Bury Road (Wortham)

Description of Landform

2.2.6 This sub-section of the walkover survey report begins on the southern side of High Road, Roydon along the north to south Doit Lane. Here, the Order Limits curve to the east in a half-moon shape to the east of Wortham Ling and straighten out at the bottom of the sub-section on the northern side of Old Bury Road, east of Wortham. This sub-section covers c. 4 km of the Order Limits.

2.2.7 The Order Limits and the wider landscape is mostly flat with minimal undulation or hills, this has allowed for good visual inspection. Land use in this sub-section is crop, grassland, and there is one instance of a meadow and another one of a garden with paths. The field sizes vary in shape and size, with many being large and irregularly shaped. The field boundaries in this sub-section are hedgerow, ditch, treeline, and fencing (Plate 99 to Plate 104).

Plate 99 Grass field, looking south-west

Plate 100 Paddock, looking north-west

Plate 101 Crop field, looking south

Plate 102 Crop field, looking west

Plate 103 Crop field with east-to-west rise in landscape

Plate 104 Field used as a garden with paths

Archaeological Features

Known Heritage Assets

2.2.8 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.2.9 A raised linear north-east to south-west ridge was noted during the walkover survey, in a crop field c. 25 m east of Marsh Lane (Plate 105).

2.2.10 A ridge in the middle of a field, south of the River Waveney and north of Ling Road, was observed (Plate 106).

2.2.11 A depression in the ground in the north-east corner of a field was observed between the River Waveney and Ling Road (Plate 107).

2.2.12 A large area of potential north-north-west to south-south-east aligned Medieval to Post Medieval ridge and furrow could faintly be seen to the north of Old Bury Road. This is not recorded on the HER now seen during interrogation of other data sources for this Project (Plate 108).

2.2.13 No other unrecorded heritage assets were witnessed during the walkover survey.

Plate 105 Raised linear ridge in crop field, looking south-east

Plate 106 Raised linear ridge in a grass field, looking north

Plate 107 A depression observed in a field, looking north-east

Plate 108 Potential, faint, ridge and furrow, looking south-east

Modern Disturbance

2.2.14 A wooden gazebo has been built in a field/garden located between the River Waveney and Ling Road (Plate 109).

2.2.15 No modern disturbance was recorded during the walkover survey.

Plate 109 A wooden gazebo in a field

Sub-section B2: Wortham to Mellis Road

Description of Landform

2.2.16 This sub-section begins on the southern side of Old Bury Road, c. 500 m east of Wortham Conservation Area to the northern edge of Mellis Conservation Area along Mellis Road. This sub-section begins on the southern side of Old Bury Road, c. 500 m east of Wortham Conservation Area to the northern edge of Mellis Conservation Area along Mellis Road. The Order Limits are slightly curved to the east between the settlements of The Brook, Burgate, Thrandeston, and Mellis. This sub-section is c. 2.5 km of the Order Limits.

2.2.17 The land in this sub-section consists of crop fields of varying sizes and shapes, with the land being used primarily for arable crop, and occasionally meadows. The field boundaries used in this area are hedgerow, ditch, trackways, and in two instances, Mellis Road (Plate 110 to Plate 115).

Plate 110 Meadow, looking north

Plate 111 Crop in field, looking south-east

Plate 112 Crop in field, looking south

Plate 113 Crop field with scrub border, looking south-west

Plate 114 Crop field, looking north

Plate 115 Crop field with meadow border, looking south

Archaeological Features

Known Heritage Assets

2.2.18 There is a medieval moat in a grass field c. 800 m east of Mellis Road, and c. 1.6 km south-east of Wortham (Plate 116). There is a medieval moat (**2260**) in a grass field c. 800 m east of Mellis Road, and c. 1.6 km south-east of Wortham. There were undulations in this field which may be indicative of the moat and were seen during the walkover survey.

2.2.19 The possible Roman Road (**2113**), which runs north-west to south-east, transects through a large, rectilinear crop field which had an undulating topography (Plate 117). This field is adjacent to Dam Lane, north-west of Mellis Conservation Area.

Plate 116 Field in which there is a moat (2260), looking east

Plate 117 Field with Roman Road (2113) running north-westerly through (circled), looking north

2.2.20 No other known heritage assets were recorded during the walkover survey.

Unrecorded Heritage Assets

2.2.21 There was a raised mound in a grass field c. 200 m south of Bury Road, due east of Rookery Farm (Plate 118).

2.2.22 There were possible ridge and furrow undulations c. 300 m south of Bury Road, due south of Rookery Farm (Plate 119).

2.2.23 There were circular and linear depressions in a grass field c. 200 m south of Bury Road (Plate 120).

2.2.24 There was a circular depression in crop field c. 1.1 km south of Bury Road (Plate 121).

2.2.25 A landowner suggested there was a former Second World War dummy airfield in a field along Burgate Road. Former underground pipes or electric wires were discovered (Plate 122).

2.2.26 There was a circular depression in crop field along Burgate Road (Plate 123).

2.2.27 No other unrecorded heritage assets were witnessed during the walkover survey.

Plate 118 Raised mound in grass field south of Bury Road, looking north

Plate 120 Circular and linear depressions in grass field, looking east

Plate 121 Circular depression, looking south

Plate 122 Potential archaeological finding of piping and wire system forming part of a former airfield

Plate 123 Circular depression in crop field, looking north

Modern Disturbance

2.2.28 No modern disturbances were recorded during the walkover survey.

Sub-section B3: Mellis Road to Gislingham

Description of Landform

2.2.29 This sub-section of the walkover survey report begins west of Mellis Road and Mellis Conservation Area, and heads south to Gislingham, to major Lane. This section of the Order Limits is c. 4 km of the proposed route.

2.2.30 The land use in this section is mostly for arable crop production with many of the fields in crop at the time of the survey. There was one instance of a mixed crop and ploughed field in the southern end of this sub-section. The fields themselves are varied in size and shape. The field boundaries used are hedge, ditch, woodland, road, trackways, permissive areas of crop change, the north-east to south-west railway line, and a farmyard (Plate 124 to Plate 128).

Plate 124 Crop field with slope to west, looking west

Plate 125 Crop field, looking east

Plate 126 Crop in field, looking north

Plate 128 Ploughed field, looking north-east

Archaeological Features

Known Heritage Assets

2.2.31 Undated cropmarks (**2719)** in a crop field c. 280 m north-east of Gislingham were possibly witnessed during the walkover survey as the surveyors' noted undulations in the field(Plate 129).

2.2.32 No other known heritage assets were noted during the walkover survey for this sub-section.

Plate 129 Undulations in a crop field where cropmarks (2719) are noted in the HER, looking south-east

Unrecorded Heritage Assets

2.2.33 No unrecorded heritage assets were noted during the walkover survey.

Modern Disturbance

2.2.34 No modern disturbances were recorded during the walkover survey.

Sub-section B4: Gislingham to Wickham Road.

Description of Landform

2.2.35 This sub-section begins at the southern part of Major Lane on the eastern side of Gislingham and heads in a southerly direction to the northern side of Wickham Road, west of Wickham Street settlement and comprises c. 2.4 km of the Order Limits.

2.2.36 The landscape here is mostly flat with minor undulation and the land use is for the growing of arable crop, grasslands, and ploughed fields. Field boundaries in this sub-section consist of trees and hedgerows, fencing, tracks, and woodland areas (Plate 130 to Plate 134).

Plate 130 Crop in field, looking east

Plate 131 Grassland field, looking north-east

Plate 132 Meadow field, looking north-east

Plate 133 Arable crop in field, looking south

Plate 134 Harvested crop, looking north-west

Archaeological Features

Known Heritage Assets

2.2.37 Spring Farmhouse (**1180592**) is visible between large gaps of established vegetation from Coldham Lane which is an access route to the main Order Limits (Plate 135).

2.2.38 No other Known Heritage Assets were noted during the walkover survey.

Plate 135 Spring Farmhouse (1180592), looking west

Unrecorded Heritage Assets

2.2.39 A large circular depression was noted on the western edge of a rapeseed field c. 330 m north of Wickham Road within the Order Limits (Plate 136).

2.2.40 No other Unrecorded Heritage Assets were witnessed during the walkover survey.

Plate 136 Large circular depression, looking east

Modern disturbance

2.2.41 No instances of modern disturbance were noted during the walkover survey.

Sub-section B5: Wickham Road to Mendlesham Road (north)

Description of Landform

2.2.42 This sub-section begins on the southern side of Wickham Road and heads in a southerly direction, curving around the eastern side of Dandy Corner Settlement to the northern side of Mendlesham Road. It makes up c. 3.2 km of the Order Limits.

2.2.43 The landscape in this sub-section is predominantly flat with its use being for the production of arable crop. The field boundaries in this sub-section are treelines, hedgerows, and grass verges (Plate 137 to Plate 141).

Plate 137 Crop in field, looking north-east

Plate 138 Crop in field, looking west

Plate 139 Two types of crop in large arable field, looking south-west

Plate 140 Arable crop looking north within Order Limits c. 380 m west of Willow Lane

Plate 141 Arable crop looking north within Order Limits from Mendlesham Road

Archaeological Features

Known Heritage Assets

2.2.44 According to the HER, there is a causewayed ring ditch of an unknown date sitting centrally within an arable field to the west of Abbey Farm, but this was not witnessed during the walkover survey.

2.2.45 There are barn remains of chase Farmstead which are noted on the HER but were not seen during the walkover survey.

2.2.46 The Grade II Listed Building Abbey Farmhouse (**1182599**) was seen from the eastern edge of an arable field to the west of the farm (Plate 142).

Plate 142 Abbey Farmhouse (1182599)

Unrecorded Heritage Assets

2.2.47 No unrecorded heritage assets were noted during the walkover survey.

Modern Disturbance

2.2.48 No modern disturbance was seen during the walkover survey.

Sub-section B6: Mendlesham Road (south) to Cay Hill

Description of Landform

2.2.49 This sub-section begins on the southern side of Mendlesham Road and heads in a southerly direction towards the northern bank of the river gipping to the west of Cay Hill settlement. It makes up c. 3.4 km of the Order Limits.

2.2.50 The landscape in this sub-section is predominantly that of gentle slopes, gentle undulations and is being utilised as arable crop land. The field boundaries in this sub-section are those of treelines, hedgerows, and ditches (Plate 143 to Plate 159).

Plate 143 Arable crop looking south within Order Limits from Mendlesham Road

Plate 144 Arable crop looking south within Order Limits c. 145 m east of Potter's Lane.

Plate 158 Ploughed field east of Lambert's Lane, looking west to the Order Limits

Plate 159 Ploughed field east of Lambert's Lane, looking north to the Order Limits

Archaeological Features

Known Heritage Assets

2.2.51 There were no known heritage assets noted during the walkover survey.

Unrecorded Heritage Assets

2.2.52 There was a large circular depression noted in the central part of a crop field west of Elden's Lane (Plate 160).

Plate 160 Circular depression in field west of Elden's Way, looking west

2.2.53 No other unrecorded heritage assets were noted during the walkover survey.

Modern Disturbance

2.2.54 No modern disturbance was seen during the walkover survey.

Sub-section B7: Cay Hill (south) to Bells Lane

Description of Landform

2.2.55 This sub-section begins on the southern banks of the River Gipping to the west of Cay Hill settlement and curves in a southerly direction passing through the settlement of Saxham Street towards Bells Lane (A1220) which joins the settlements of Stowupland and Forward Green together. It makes up c. 3.5 km of the Order Limits.

2.2.56 The landscape in this sub-section is predominantly that of gentle undulations and flat areas and is being utilised as arable crop and grass meadow land. The field boundaries in this sub-section are those of treelines, hedgerows, and ditches (Plate 161 to Plate 166).

Plate 161 Arable crop looking north within Order Limits c. 250 m east of Saxham Street

Plate 162 Arable crop looking south within Order Limits c. 250 m east of Saxham Street

Plate 163 Arable crop looking north within Order Limits c. 400 m east of Saxham Street

Plate 164 Arable crop looking south within Order Limits c. 400 m east of Saxham Street

Plate 165 Arable crop looking north-east within Order Limits c. 180 m north-east of Bell's Lane

Plate 166 Arable crop looking north-east within Order Limits from Bell's Lane

Archaeological Features

Known Heritage Assets

2.2.57 There were no known heritage assets noted during the walkover survey.

Unrecorded Heritage Assets

2.2.58 A pond (**2844**), recorded by this Project, was observed amidst trees which obscured its shape approximately 150 m north-east of Bell's Lane (Plate 167).

2.2.59 No other unrecorded heritage assets were noted during the walkover survey.

Plate 167 Pond (2488) c. 150 m north-east of Bell's Lane

Modern Disturbance

2.2.60 No modern disturbance was seen during the walkover survey.

Sub-section B8: Bells Lane (south-west) to A14.

Description of Landform

2.2.61 This sub-section begins on the southern side of Bell's Lane (A1120) and heads south in a 'S' curve to the northern side of the A14 to the east of Creeting Saint Peter. It makes up c. 2.5 km of the Order Limits.

2.2.62 The landscape in this sub-section is rural and varies from gentle undulations in the landform to steeper slopes. Land use in this sub-section is arable and grass fields, and the field boundaries are ditches, hedges, and treelines (Plate 168 to Plate 172).

Plate 168 Grass field with slope to the south-east, looking south-east

Plate 169 Grass field, looking north-west

Plate 170 Crop field, looking south-east

Plate 171 Crop field showing the sloping landscape in background, looking south

Plate 172 Crop field, looking south-east

Archaeological Features

Known Heritage Assets

2.2.63 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.2.64 A linear north-south depression was noted in the northern part of an arable field to the east of Creeting Lane (Plate 173).

Plate 173 Depression in grass/crop field, looking north-east

Modern Disturbance

2.2.65 No modern disturbance was seen during the walkover survey.

Sub-section B9: A14 to Hascott Hill (north)

Description of Landform

2.2.66 This sub-section of the walkover survey report begins on the southern side of the A14 and heads in a southerly direction towards Hascott Hill to the north of Barking and consists of c. 4.3 km of the Order Limits. The sub-section is intersected by a railway running south-east to north-west. In proximity to the Order Limits are the conservation areas of Needham Market and Badley.

2.2.67 The landscape in this area is characterized by a mix of flat and sloping terrains with noticeable variations in elevation. Many fields exhibit gentle to moderate slopes, often descending from east to west, or towards the north-west and south-west. There are also undulating sections and occasional depressions, creating a bumpy and varied topography. Some areas have small hills or plateaus, particularly where the land rises before sloping down again. While some fields are largely flat, the presence of undulations and vegetation contribute to the overall uneven terrain. This diverse landscape is typical of the region's natural features. The land use consists of grassland meadows or crop fields. The field boundaries in this sub-section are treelines, hedgerows, lanes as well as ditches, bushes and open fields (Plate 174 to Plate 182).

Plate 174 Grass meadow, looking north

Plate 181 Grass field c. 500 m north of Hascott Hill, looking north-east

Plate 182 Grass field c. 500 m north of Hascott Hill, looking east

Archaeological Features

Known Heritage Assets

2.2.68 Between the River Gipping and Mill Lane, south-east of Creeping Saint Peter, a complex of fields presents several notable archaeological features observed through aerial imagery. Undated cropmarks reveal a large pit and a sub-rectangular enclosure, suggesting possible past human activity. Additionally, a ring ditch cropmark and two Bronze Age ringed cropmarks have been identified, potentially indicating the presence of a Bronze Age barrow. A post-medieval pond is also visible in the landscape, along with undated cropmarks showing a series of field boundaries and ditches, reflecting the evolving use of the area over time.

Unrecorded Heritage Assets

2.2.69 A depressed area where former ponds (**2347**) was observed in a field south of Mill Lane (Plate 183).

2.2.70 In a field, north of the River Gipping, were observed some undulations running from north to south, these may be archaeological in origin (Plate 184).

2.2.71 A faint former track leading to a pond was observed crossing a field alongside the River Gipping. It could potentially have been used for agricultural access or as a natural feature formed over time (Plate 185).

2.2.72 Ridge and furrow aligned in an east-west formation were witnessed centrally in a sloping crop field c. 1.2 km north-east of Hascott Hill (Plate 186).

Plate 183 A depression, remnant of ponds (2347), looking north, to the south of Mill Lane

Plate 184 Undulations running north to south in a crop field, looking south

Plate 185 A track leading to a pond in the middle of a grass field

Plate 186 Ridge and furrow, looking south-east

Modern Disturbance

2.2.73 No modern disturbances were seen during the walkover survey.

Sub-section B10: Hascott Hill (south) to Ipswich Road, Ringshall Stocks

Description of Landform

2.2.74 This sub-section begins on the southern side of Hascott Hill and heads south in a gentle ‘s’ curve towards the B1078 east of Ringshall settlement.

2.2.75 The landform in this section has gentle undulations and slopes, and the land use was for crop, grassland, and ploughed fields. The field boundaries in this sub-section are ditches, treelines, wire fences, and change of crop (Plate 187 to Plate 190).

Plate 187 Crop field within the Order Limits, looking south

Plate 188 Grassland and crop fields, looking north-east

Plate 189 Ploughed field with north-west to south-east overhead lines and pylons in background, looking north

Plate 190 Crop field, looking north

Archaeological Features

Known Heritage Assets

2.2.76 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.2.77 To the west of Middle Farm is field in which a series of undulation and raised areas was encountered (Plate 191). These could be archaeological in nature.

2.2.78 No other unrecorded assets were witnessed during the walkover survey.

Plate 191 Series of undulations and raised area in field to west of Middle Farm, looking south-west

Modern Disturbance

2.2.79 A large mud bund was recorded within a crop field (Plate 192).

Plate 192 A mud bund in a crop field, looking north-west

Sub-section B11: Ipswich Road, Ringshall Stocks (south) to Castle Road, Offton

Description of Landform

2.2.80 This subsection begins on the southern side of the B1078 and heads in a southerly direction towards Castle Road to the west of Offton, passing over The Channel along Bildeston Road. It makes up c. 2.4 km of the Order Limits.

2.2.81 The land here is rural and consists of fields dedicated for arable production and the land is mostly flat with some gentle slopes and undulations. The field boundaries in this sub-section are hedgerows, treelines, tracks and riverbanks (Plate 193 to Plate 195).

Plate 193 Crop field with pylons and overhead lines, looking north-west

Plate 194 Burnt crops, looking south-west

Plate 195 Burnt crop, east to west slope, and pylons and overhead lines in background, looking south

Archaeological features

Known heritage assets

2.2.82 No known heritage assets were seen during the walkover survey.

Unrecorded heritage assets

2.2.83 A large depression was noted in the eastern side of a crop field north of Offton Road/Holly Road (Plate 196).

2.2.84 Depressions and undulations were noted within a crop field north of Holly Road (Plate 197).

Plate 196 Depressions and undulations, looking east

Plate 197 Depression, looking north

Sub-section B12: Castle Road, Offton (south) to Blood Hill

Description of Landform

2.2.85 This sub-section of the walkover report begins on the southern side of Castle Road, Offton leading south-east towards Offton Road along three Order Limit corridors. Corridors to meet the west of Blood Hill. This sub-section covers c. 2.3 km of the Order Limits.

2.2.86 The Order Limits appear to broadly follow a ridge of high ground to the south-west of Offton and Somersham, with a gradual slope broadly descending from the north-west to the south-east along the Order Limits and to the north-east and south-west into surrounding valleys. There is broadly minimal undulation within the land parcels generally allowing for good visual inspection. Land use in this sub-section is broadly a mix of crop, grassland, and meadow. The field sizes also vary in shape and size, with many being large and irregularly shaped. The field boundaries in this sub-section generally comprise of hedgerows, ditches, treelines, and fencing (Plate 198 to Plate 209).

Plate 198 Arable crop field, looking north-east

Plate 208 Crop field on south-west side of Blood Hill, looking south-west to Order Limits

Plate 209 Crop field on south-west side of Blood Hill, looking south to Order Limits

Archaeological Features

Known Heritage Assets

2.2.87 The Grade II listed Court Farmhouse (**1251595**, Plate 210) was viewed during the walkover survey from the public footpath to the east of the building. Any intervisibility between the asset and the Order Limits is likely to be highly restricted as the house is surrounded by established trees and hedges and located within a geographical dip in the landscape (Plate 211).

Plate 210 Court Farmhouse (1251595), looking north-west

Plate 211 View from field boundary adjacent to Court Farmhouse (1251595), looking west

Unrecorded Heritage Assets

2.2.88 No unrecorded heritage assets were witnessed during the walkover survey for this sub-section.

Modern Disturbance

2.2.89 No modern disturbance was encountered during the walkover survey for this sub-section.

Sub-section B13: Blood Hill (east) to Tye Lane

Description of Landform

2.2.90 This sub-section of the walkover report begins on the eastern side of Blood Hill, where three Order Limit corridors merge from the north-west. This sub-section heads from the north-west and begins to curve towards the south to Tye Lane. This sub-section covers c. 2.26 km of the Order Limits.

2.2.91 The Order Limits appear to broadly follow a ridge of high ground to the north-east of Flowton, with a gradual slope broadly descending from the north-west to the south-east and south along the Order Limits, and to the north-east and south-west into surrounding valleys. There is broadly minimal undulation within the land parcels generally allowing for good visual inspection. Land use in this sub-section is broadly a mix of arable crop, grassland, and meadow. The field sizes also vary in shape and size, with many being large and irregularly shaped. The field boundaries in this sub-section generally comprise of hedgerows, ditches, treelines, and fencing (Plate 212 to Plate 223).

Plate 212 Arable crop field, looking north-west towards Bleak Hall (1251669)

Plate 217 Harvested crop field, looking north-west

Plate 218 Crop field, views to Order Limits, looking north-east

Plate 219 Crop field, looking north

Plate 220 Ploughed field, looking north

Plate 221 Arable field with pylons, looking south-east

Plate 222 Crop field with pylons, looking north-east

Plate 223 Edge of crop field, looking north

Archaeological features

Known Heritage Assets

2.2.92 The Grade II listed Bleak Hall (**1251669**) was viewed during the walkover survey from Flowton Road to the south-east of the asset. Any intervisibility between the asset and the Order Limits is clear as the house appears to have an open vista towards the Order Limits to the east, south-east and south.

Unrecorded Heritage Assets

2.2.93 A series of former field boundary ditches (Plate 224) can be observed within a small field approximately 385 m north-east of Tye Lane and 380 m east of Lovetofts Farmhouse (**1250929**).

2.2.94 No other unrecorded assets were witnessed during the walkover survey.

Plate 224 Former field boundaries observed from within the field, looking west

Modern Disturbance

2.2.95 No modern disturbances were noted during the walkover survey.

Sub-section B14: Tye Lane (south) to Burstall Lane (North)

Description of Landform

2.2.96 This sub-section of the walkover survey begins at the fields to the south of Tye Lane, c. 1 km east of Flowton, and curves in an ‘s’ shape south to the fields between Burstall and Sproughton.

2.2.97 The land use in this sub-section is crop and the fields vary in size and shape with many irregular in shape. The topography in this section is mostly flat with minor undulations and some instances of gentle sloping. Field boundaries in this section consist of ditches, treeline, hedge, verge, and one instance of a trackway (Plate 225 to Plate 230).

Plate 225 Crop field with pylons along the southern border, looking south

Plate 226 Crop field with wooden utility poles, looking south-west

Plate 227 Crop in field with gentle sloping, looking south-east

Plate 228 Crop in field with pylon along the north-western border, looking north

Plate 229 Arable field with telegraph poles, looking north-east

Plate 230 Crop field with pylon in background, looking north

Archaeological Features

Known Heritage Assets

2.2.98 No known heritage assets were noted during the walkover survey.

Unrecorded Heritage Assets

2.2.99 No unrecorded heritage assets were noted during the walkover survey.

Modern Disturbance

2.2.100 There was a possible back-filled trench noted in the centre of a crop field, c. 400 m south of Bullen Lane (Plate 231).

2.2.101 No other modern disturbances were noted during the walkover survey.

Plate 231 Possible back-filed trial trench, looking south-west

2.3 Section C: Babergh, Colchester and Tendring

2.3.1 From its northern limit, Section C heads generally south-south-west, by-passing the settlements of Burstall, Chattisham, Capel St Mary, Higham, Dedham, Langham and Ardleigh before arriving at the proposed East Anglia Connection Node (EACN) Substation 2 km east of Ardleigh. From here the Project heads west before Section C terminates at Old Ipswich Road 5 km to the west. Section C of the Project accounts for approximately 29 km of its overall length.

2.3.2 Towards the northern limit of Section C, the Bullen Lane Substation, situated between Flowton and Burstall, marks a notable elevation point. As we progress southward to the A1071, the terrain exhibits gentle undulations. Section C traverses the Belstead Brook Valley, a tributary of the Orwell situated south of the A1071 and then ascends through a gently undulating landscape varying in elevation. Continuing its journey, the section proceeds through undulating terrain enroute to the B1068 to the south-south-west, where it crosses the Stour Valley. Subsequently, it moves through undulating land on its way to its southern boundary to the north of Little Bentley.

2.3.3 For ease of understanding, this section has been divided into seven sub-sections:

- Sub-section C1: Burstall Lane (south) to Chattisham Road – JC11 to JC22
- Sub-section C2: Chattisham Road (south) to Coopers Corner, Raydon Road (north) – JC22 to JC35
- Sub-section C3: Coopers Corner, Raydon Road (south) to Sandpits Lane (B1070) – UGC 100 to 4100
- Sub-section C4: Sandpits Lane (south) to Higham Road (north) – UGC 4100 to 6360
- Sub-section C5: Higham Road (north) to Ipswich Road (A12) – UGC 6360 to UGC 11300
- Sub-section C6: Ipswich Road (A12) to Dedham Road and the railway line (north of Ardleigh settlement) – UGC 11300 to UGC 13100
- Sub-section C7: East of Railway/Little Bromley Road to A120 – UGC 13200 to 4.7km southeast from TB1
- Sub-section C8: Dedham Road (south) to Old Ipswich Road (east) – TB12 to TB21.

Sub-section C1: Burstall Lane (south) to Chattisham Road

Description of Landform

2.3.4 This sub-section begins on the southern side of Burstall Lane to the west of the settlement of Sproughton, and heads in a westerly curved direction to Chattisham Road, c. 3.5 km from the sub-sections starting point.

2.3.5 In Sub-section C1, the landscape showcases a blend of undulating fields and woodlands along the A1071. The terrain varies, with gentle slopes, plateaus, valleys, and natural dips scattered throughout, resulting in an overall uneven and undulating topography (Plate 232 to Plate 234).

Plate 232 Undulating field along Pigeons Lane, looking north-west

Plate 233 Crop field with pylons in the back, looking north-west

Plate 234 Grazing field with overhead lines, looking north-west

Archaeological Features

Known Heritage Assets

2.3.6 No unrecorded heritage assets were identified during walkover of Sub-section C1.

Unrecorded Heritage Assets

2.3.7 No unrecorded assets were witnessed during the walkover survey. Some minor undulations and depressions were observed along the A1071 believed to be associated with the farming practice of the area (Plate 235).

Plate 235 Some undulation within a field along the A1071, looking north-west

Modern Disturbance

2.3.8 No modern disturbance was observed during the walkover.

Sub-section C2: Chattisham Road (south) to Coopers Corner, Raydon Road (north)

Description of Landform

2.3.9 This sub-section begins on the south-western side of Chattisham Road to the south-east of the settlement of Chattisham. It then heads in a south-western direction before heading in a western direction, to the west of Washbrook. To the west of Wenham Grange, the Sub-section heads in a more south-western direction until it reaches Sandpits Lane.

2.3.10 In Sub-section C2, the landscape is primarily flat with slight undulations in the middle, particularly close to the extant railway and around the partially extant RAF Raydon (**3189**). The land use is primarily agricultural in nature with a mix of rapeseed, grassland and other crops (Plate 236 to Plate 240).

Plate 236 Cropped field at northern end of Sub-section, looking north-east

Plate 237 Rapeseed crop, looking south-east

Plate 238 Crop in field, to the west of Washbrook, looking north-west

Plate 239 Flat cropped field, to the north-east of Raydon, looking south-east

Plate 240 Ploughed field at the southern extent of Sub-section, looking west

Archaeological Features

Known Archaeological Features

2.3.11 A raised area (Plate 241) was noted to the north of Wenham Road, to the west of Wenham Grange, this is the location of Kings Green Cottages (**3186**) a known moat site.

2.3.12 Several raised and depressed areas (Plate 242, Plate 243, Plate 244) were noted around the partially extant RAF Raydon (**3189**). These undulations could be geological in origin or related to the construction or use of the air base in World War II. The air base itself retains its route ways, concrete, which were used by the staff and planes of the air base (Plate 245).

Plate 241 Raised area known as Kings Green Cottage (3186), a moat, looking north

Plate 242 Undulations potentially associated with RAF Raydon (3186), located to the north-west of the asset, looking north-west

Plate 243 Raised ridge within the airfield of RAF Raydon (3186), looking north-west

Plate 244 Depressed area at the southern extant of RAF Raydon (3186) airfield, looking north-east

Plate 245 RAF Raydon (3186), extant concrete route ways looking north-east

Unrecorded Archaeological Features

2.3.13 A linear ridge was located to the east of RAF Raydon (**3186**) at the southern extant of the Sub-Section. This could relate to the airfield or was part of cropmarks of former field boundaries (**3336**).

2.3.14 No other unrecorded assets were witnessed during the walkover survey

Modern Disturbance

2.3.15 No modern disturbance was observed during the walkover.

Sub-section C3: Coopers Corner, Raydon Road (south) to Sandpits Lane (B1070)

Description of Landform

2.3.16 Sub-section C3 runs over 5.5 km and offers a diverse landscape within its fields. Some fields remain relatively flat with subtle undulations, while others feature small depressions and gentle rises. Additionally, several fields showcase a combination of rises and depressions, contributing to an overall undulating character. (Plate 246, Plate 247).

2.3.17 Fields within this sub-section serve varying agricultural purposes, either dedicated to crop cultivation, hosting meadows, or designated as grasslands. Throughout the walkover, the observed field boundaries encompassed a combination of natural elements such as tree lines and hedges, alongside man-made features like roads, tracks, shrubbery, and open fields (Plate 246 to Plate 248).

Plate 248 Crop field, looking south-west

Archaeological Features

Known Heritage Assets

2.3.18 No known heritage assets were observed during the walkover.

Unrecorded Heritage Assets

2.3.19 Some depressions within mostly flat fields were observed during the walkover along Acacia Road (Plate 249) and north of Holton Saint Mary (Plate 250 and Plate 251).

2.3.20 Some shallow undulations are also observed during the walkover, north of Holton Saint Mary (Plate 252).

Plate 250 A shallow depression in centre of a field north of Holton Saint Mary, looking east

Plate 251 Another shallow depression by the edge of a field, north of Holton Saint Mary, looking east

Plate 252 Superficial undulation in a rising field north of Holton Saint Mary, looking north

Modern Disturbance

2.3.21 No modern disturbance was observed during the walkover.

Sub-section C4: Sandpits Lane (south) to River Stour.

Description of Landform

2.3.22 This sub-section of the walkover begins at the fields south of Sandpits Lane and covers c. 3 km of the route, in a mostly straight linear route to the south-west to the northern bank of the river Stour. This sub-section of the route is in the landscape between Holton St Mary in the north-east and Higham to the south-west.

2.3.23 The landscape in this sub-section is mostly flat, with some gentle slopes, and some minor undulations. The land use here varies, and features, crop fields, meadows, and water meadows, grassland, and sheep pastureland. The boundaries are ditch, hedge, treeline, bank, road, or change of crop (Plate 253 to Plate 259). The field sizes and shapes vary but are for the most part regular, particularly in the northern part of this sub-section.

Plate 255 Undulating grassland, looking south

Plate 256 Grassland or pasture, looking south-east

Plate 257 Recently cropped field, looking east

Plate 258 Water meadow, looking south-east

Plate 259 Water meadow, looking south

Archaeological Features

Known Heritage Assets

2.3.24 No known heritage assets were witnessed during the walkover survey for this sub-section.

Unrecorded Heritage Assets

2.3.25 An old boundary (Plate 260, Plate 261) was brought to our attention by the owner within the field along the B1068, encompassed by the Order Limit. This old boundary is visible on the OS six inch, 1842-1952 map. The owner also gave access to a map from 1936 where the boundary can be observed. Today, this boundary is still in use. There is a wire and wooden fence on it.

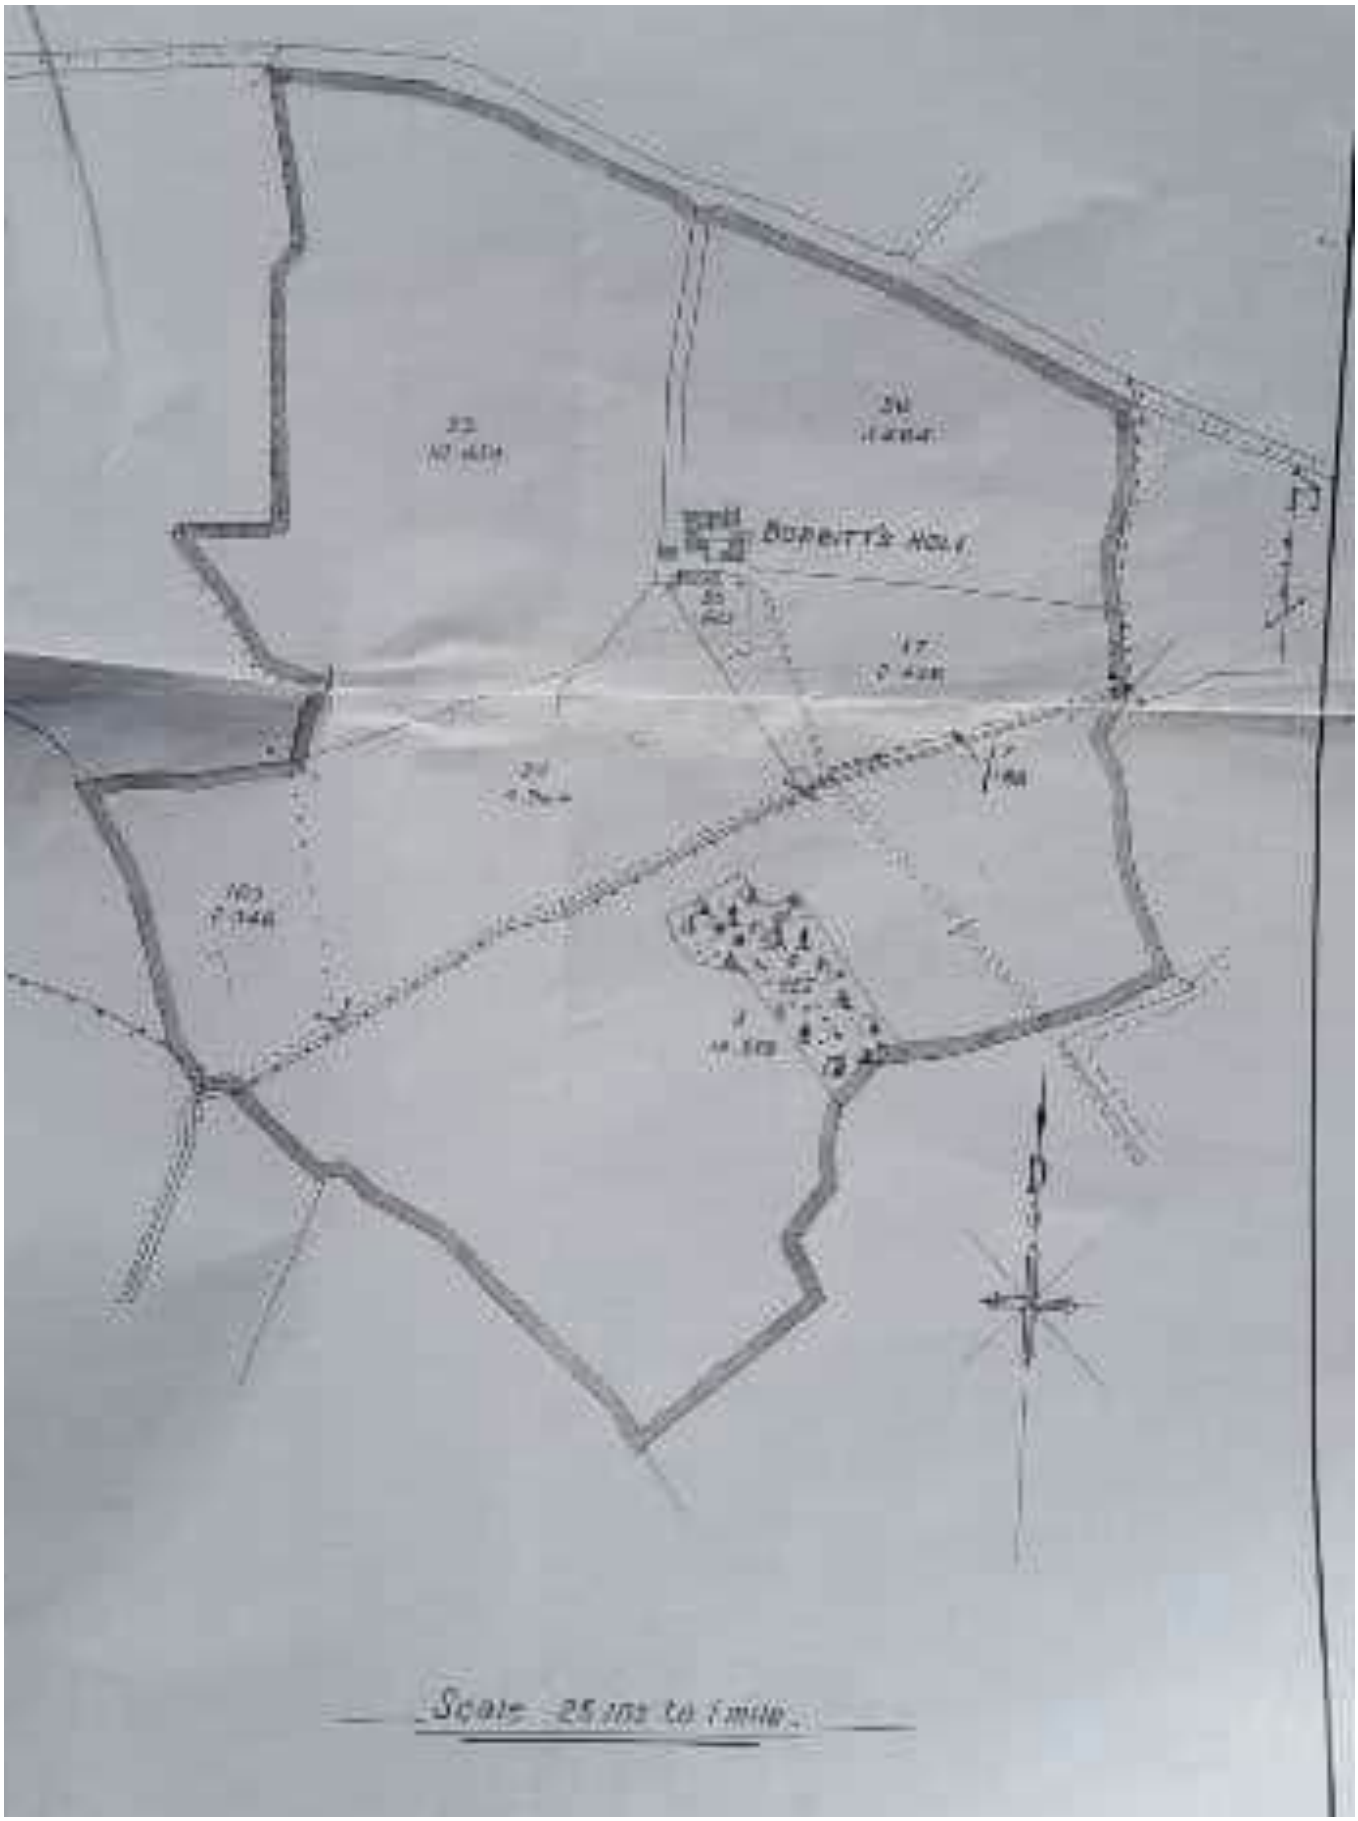

Plate 260 An old boundary within a field along the B1068, looking south

Plate 261 The old boundary within a field along the B1068, looking south

Plate 262 A 1936 map showing the old boundary along the B1068

2.3.26 There was a linear depression in water meadow, c. 125 m north-east of river Stour (Plate 263).

2.3.27 There was a water-filled depression in water meadow, c. 90 m north-east of river Stour (Plate 264).

2.3.28 There was a mounded former boundary noted in between crop field directly south of Holly Bush Corner (Plate 265).

2.3.29 There was a large oval depression noted in a recently ploughed field directly south of Sandpits Lane (Plate 266).

2.3.30 No other unrecorded archaeology was noted during the walkover survey for this sub-section.

Plate 264 Water filled depression in water meadow, looking east

Plate 265 Linear depression in recently harvested field, looking east

Plate 266 Large oval depression noted in a field along Sandpits Lane, looking south-east

Modern Disturbance

2.3.31 There were two mounds built by Natural England in order to save animals from drowning in wet weather and floods in the water meadow directly north of the river Stour (Plate 267).

2.3.32 No other modern disturbances were noted during the walkover for this sub-section.

Plate 267 Mound built by Natural England, looking south-west

Sub-section C4: Sandpits Lane (south) to Higham Road (north)

Description of Landform

2.3.33 Sub-section 5C begins on the southern side of Sandpits Lane and heads in a south-westerly direction to the northern side of Higham Road, comprising of c. 2.2 km of the Order Limits. This part of the route is to the south of the settlement of Bacon's Green, and east of the settlement of Higham.

2.3.34 The landform in this section is mostly flat with occasional sloping fields. The fields are used for the following purposes in this sub-section: paddocks, arable crop, bushland, and grassland/meadows. The boundaries in this sub-section are treelines, hedgerows, metal and wooden fencing, a river, and trackways (Plate 268 to Plate 276).

Plate 274 Arable field, looking north-east

Plate 275 Grass field, looking north

Plate 276 Meadow, looking east

Archaeological Features

Known Heritage Assets

2.3.35 No known archaeological features within this sub-section.

Unrecorded Heritage Assets

2.3.36 No unrecorded archaeological features noted within this section.

Modern Disturbance

2.3.37 A possible bank (Plate 277), ditch was observed during the walkover, in the south of Nightingale Hill, north of Black Brook. However, it could be geological in nature.

2.3.38 An undated large sub-circular enclosure and joining trackway were possible seen during the walkover survey in a ploughed field just south of Birchwood Road.

2.3.39 A collapsed building was identified along Furze Lodge (Plate 278).

2.3.40 A shed, partly ruined, was found c. 140 m west to the River Stour (Plate 279).

2.3.41 No other Modern Disturbances were observed during the walkover survey.

Plate 277 A possible bank, looking west

Plate 278 A collapsed building along Furze Lodge, looking south-west

Plate 279 A shed found c. 140 m west to the River Stour, looking south-west

Sub-section C5: Higham Road (south) to Ipswich Road (west)

Description of Landform

2.3.42 This sub-section begins on the southern side of Higham Road and heads in a south-easterly direction to the western side of the A12, Ipswich Road. This section of the Order Limits passes the settlements of Stratford-Saint-Mary on the western side, Hornestreet on the eastern side, and Langham on the northern side.

2.3.43 The landform in this sub-section is mostly flat with some fields having minor undulations, and some fields with gentle slopes. The land use here is mainly to produce arable crops, but there were also grassland areas, paddocks, and meadows. Field boundaries in this sub-section were the following: hedgerows and treelines, trackways, wooden fencing, and a gate (Plate 280 to Plate 311).

Plate 311 Field north of Water Lane, views to Order Limits looking north

Archaeological Features

Known Heritage Assets

2.3.44 Undulations (Plate 312) in the field just south of Higham Road were noted by surveyors during the walkover survey. These undulations were aligned north-west to south-east and feature in a field where undated enclosures were noted in the HER.

2.3.45 A possible bank, ditch was observed during the walkover, in the south of Nightingale Hill, north of Black Brook. However, it could be geological in nature (Plate 313).

2.3.46 Two small circular depressions (Plate 314) were noted by surveyors in the southern part of a crop field between Dedham Road and Ipswich Road. An east to west linear ridge was also noted in the same field, c. 90 m from the pair of circular depressions. These unrecorded features were noted in a field that was noted on the HER to contain undated linear features, ditched trackways, and an oval enclosure.

2.3.47 No other known heritage assets were witnessed during the walkover survey.

Plate 312 Undulations to the south of Higham Road, looking south-west

Plate 313 Possible natural bank and ditch, looking west

Plate 314 Two depressed areas, looking north-east

Unrecorded Heritage Assets

2.3.48 A depression filled with water was noted in a grass field adjacent to the river Stour (Plate 315).

2.3.49 No other unrecorded heritage assets were noted during the walkover survey.

Plate 315 Oval depression filled with water, looking north-west

Modern Disturbance

2.3.50 In a grass field adjacent to the river Stour there was a raised area of land which Natural England use to prevent flooding and to help animals stay above water.

2.3.51 In a large grass field c. 400 m north of the area of Langham Hall and on the northern side of Water Lane, there was a large construction compound with various fencing, bunds, and plant for works undergoing at the time of the survey (Plate 317, Plate 318, Plate 319).

2.3.52 No other modern disturbances were noted during the walkover survey.

Plate 319 View to fields within Order Limits to the north of Water Lane with construction compounds, looking north

Sub-section C6: Ipswich Road A12 (east) to Dedham Road and the railway line (north of Ardleigh settlement)

Description of Landform

2.3.53 This sub-section of the walkover survey begins on the eastern side of the A12 and bends in a south-eastern direction towards the western side of Dedham Road. The Order Limits here make up c. 2 km of the overall route. The Order Limits here pass through the settlements of Parney Heath, Ardleigh Heath, and Foxash Estate, and end above Ardleigh.

2.3.54 The landscape varies, with the fields closest to the A12 being steep with sloping gradients, compared to the flatter and gently undulating fields to the east of this sub-section.

2.3.55 The land use here is for meadow land, arable crop, with some fields being ploughed at the time of the walkover survey, and in one instance a willow crop field. The field boundaries are hedgerow, treeline, pockets of woodland, ditches, and one instance of a stream (Plate 320 to Plate 328).

Archaeological Features

Known Heritage Assets

2.3.56 No known heritage assets were observed during the walkover.

Unrecorded Heritage Assets

2.3.57 An undated large sub-circular enclosure and joining trackway were possible seen during the walkover survey in a ploughed field just south of Birchwood Road.

2.3.58 In the field to the west of the railway line, there was a linear ridge in a west-east alignment in the centre of the field (Plate 329), as well as a small bump along the crop boundary on the western side, possible ridge and furrow and a bump in the north-western corner.

2.3.59 No other unrecorded heritage assets were observed during the walkover.

Plate 329 North to south linear ridge before electric line, looking west

Modern Disturbance

2.3.60 No modern disturbances were observed during the walkover survey.

Sub-section C7: East of Railway/Little Bromley Road to A120

Description of Landform

2.3.61 This subsection begins on the eastern side of the north-east to south-west railway line on the eastern side of Ardleigh settlement and heads in an easterly direction to the A120. This sub-section makes up c. 6 km of the Order Limits.

2.3.62 The landscape in this area is mostly flat with pockets of minor undulation. The land is used for arable and/or fruit production and the field boundaries are treelines, hedgerows, tracks, and change of crop (Plate 330 to Plate 347).

Plate 330 Crop field, looking north-west

Plate 347 Ploughed field c. 220 m south of Ardleigh Road, looking north-west to Order Limits

Archaeological Features

Known Heritage Assets

2.3.63 Further information to follow in next iteration

Unrecorded Heritage Assets

2.3.64 There were west to east undulations in a crop field c. 230 m north of Little Bromley Road (Plate 348).

2.3.65 In the field north of Little Bromley Road and west of Home Farm Lane, there was a depression with a circular ridge around it noted in the area in the north of the field (Plate 351), as well as a slight raised area to the west of the other possible features. In the south-east end of the same field, there was a north-south aligned ridge (Plate 348).

2.3.66 In the field east of Home Farm Lane, there were two linear ridges in an east-west alignment, as well as a linear depression (Plate 349, Plate 350).

2.3.67 In the field north of Little Bromley Road on the western side of the reservoir, there was a large square enclosure which was slightly raised from the internal space (Plate 352). There were also north-south aligned possible ridge and furrow (Plate 353).

2.3.68 A linear west-east depression (Plate 354) was seen in the southern end of a crop field c. 230 m north of Little Bromley Road. The same field featured a rippling effect in its topography which was noted by the surveyors.

2.3.69 Undulations were noted in the north-west part of a ploughed and crop field on the east side of Grange Road and the north of Ardleigh Road (Plate 355).

2.3.70 A circular depression was noted in the central northern part of a crop field directly south of Ardleigh Road (Plate 356).

2.3.71 There were undulations in the northern part of a crop field south of Spratts Lane (Plate 357) noted by the surveyors during the walkover survey.

2.3.72 There was a linear depression in the southern part of a crop field just north of Hilliards Road (Plate 358).

Plate 356 Circular depression, looking south

Plate 357 Undulations, looking south-east

Plate 358 Linear depression in crop field, looking north-east

Modern Disturbance

2.3.73 During the walkover, the surveyors witnessed a group of people metal detecting in a ploughed field on the eastern side of Spratts Lane.

2.3.74 There was a mess heap with sod piles in the entrance of a crop field directly north of Little Bromley Road (Plate 359).

2.3.75 No other modern disturbances were observed for this sub-section.

Plate 359 Mess heap with sods, looking west

Sub-section C8: Dedham Road (south) to Old Ipswich Road (east)

Description of Landform

2.3.76 This sub-section begins on the southern side of Dedham Road and heads in a westerly direction towards the A12, where it ends on the eastern side of the Old Ipswich Road. This sub-section makes up c. 2.7 km of the Order Limits.

2.3.77 The landform in this area varies, with the fields closest to Dedham Road with sloping gradients, compared to the flatter and gently undulating fields to the west of this sub-section towards Ipswich Road.

2.3.78 The land use here is a mix of arable crops, pastoral land, with some fields being close to being harvested at the time of the walkover survey. The field boundaries are of hedgerow, treeline, pockets of woodland and ditches (Plate 360 to Plate 368).

Plate 360 Grass enclosure, looking north-east

Archaeological Features

Known Heritage Assets

2.3.79 Known heritage assets in the form of cropmark locations were witnessed during the walkover survey as raised linear bumps in the centre of a field approximately 130 m north of the junction between Wick Lane and Lodge Lane, possibly indicating historic field boundaries.

Unrecorded Heritage Assets

2.3.80 There were several potential archaeological features noted in a field behind Fountain Farmhouse (**1253912**) including raised linear bumps in the centre of the field, possibly indicating historic field boundaries (Plate 369, Plate 370, Plate 371).

Plate 369 Possible field boundaries, looking north-east

Plate 370 Raised linear ridges, looking north-east

Plate 371 Raised linear ridge, looking south

2.4 Section D: Colchester

2.4.1 Section D of the Project is entirely situated within Essex County and the Colchester District. Commencing at Old Ipswich Road, Section D proceeds in a westerly direction, skirting the communities of Highwoods and Horkesley Heath to the south. It then takes a south-western turn, bypassing the settlements of West Bergholt, Eight Ash Green, and Marks Tey. The culmination of Section D is at the border between the Colchester and Braintree Districts, approximately 2 km south-west of Marks Tey. This segment of the Project accounts for approximately 19 km of its total length.

2.4.2 Starting from the Old Ipswich Road, the Order Limits traverse a gently undulating landscape. The landscape gradually rises as the Order Limits cross London Road, located west of Great Horkesley. Moving north, the terrain slopes down as the Order Limits cross a tributary valley of the Stour Valley. The landscape then climbs again before the Order Limits turn south-west near the B1508. Following this path, the Order Limits run along the eastern side of a north-south aligned tributary valley. The Order Limits cross this tributary valley, and the terrain gradually rises again. The landscape then descends into the Stour Valley, where the Order Limits cross the river. After leaving the valley, the Order Limits pass through gently undulating terrain as they continue south-east to their southern boundary near the Colchester (B)/Braintree District border.

2.4.3 Beyond the boundaries of the Order Limits, the region maintains its rural character, featuring settlements of different sizes based on their proximity to major towns like Colchester. The landscape retains its rural quality, dotted with dispersed farmsteads. Additionally, the area encompasses transportation networks like the A134, A12, A129, A414, and a railway line stretching from north-east to south-west.

2.4.4 This sub-section is split into seven sub-sections for ease of understanding. They are:

- Sub-section D1: Old Ipswich Road (west) to Straight Road (east) – TB21 to TB29
- Sub-section D2: Straight Road (west) to London Road (east) – TB30 to UGC 2300
- Sub-section D3: London Road (west) to Colchester Road B1508 (north) – UGC 2300 to TB37
- Sub-section D4: Colchester Road B1508 (north) to Fossetts Lane, Fordham (north) – TB38 to TB43
- Sub-section D5: Fossetts Lane, Fordham (north) to Ford Street Hill (A1124) – TB44 to TB46
- Sub-section D6: (South) Ford Street Hill (A1124) to the railway crossing the Roman River – TB46 to TB60
- Sub-section D7: The railway crossing the Roman River to Colchester Road (A120) – TB60 to TB71.

Sub-section D1: Old Ipswich Road (west) to Straight Road (east)

Description of Landform

2.4.5 Sub-section D1 begins east of the A12, north-east of Highwoods and south-west of Langham. This area covers approximately 3 km of the Order Limits.

2.4.6 The Order Limits and the surrounding landscape exhibit a predominantly flat terrain (Plate 372), although occasional rises and slopes create gentle undulations (Plate 373). While some variations in ground elevation exist, the overall landscape is characterized by its flatness, providing favourable conditions for effective visual inspection.

2.4.7 The fields encompass a variety of types, primarily a blend of cultivated (cereals) and ploughed fields (Plate 572). The demarcations between fields are defined by a combination of treelines, ditches, hedgerows, occasional banks, and a mix of wooden and electric fencing (Plate 372 to Plate 396).

Archaeological Features

Known Heritage Assets

2.4.8 There were no further known heritage assets observed in Sub-section D1 during the walkover survey.

Unrecorded Heritage Assets

2.4.9 Several linear undulations were observed in fields along Long Lane and near Langham Lane (Plate 397).

2.4.10 A south-west to north-east linear depression was observed in a ploughed field to the west of the A12 (Plate 3980). This potentially relates to crop mark field boundaries (**4107**).

2.4.11 There were no further unrecorded heritage assets observed in Sub-section D1 during the walkover survey.

Plate 397 Linear undulation along Lodge Lane, looking north-west

Plate 398 South-west to north-east linear depression

Modern Disturbance

2.4.12 A below-ground water tank was observed on the southern side of a hedgerow c. 250 m north of Langham Road.

2.4.13 There was no other modern disturbance observed in Sub-section D1 during the walkover survey.

Plate 399 Below-ground water tank

Sub-section D2: Straight Road (west) to London Road (east)

Description of Landform

2.4.14 Sub-section D2 commences east of Straight Road and extends horizontally towards the west of London Road. This segment encompasses an approximate distance of 3.5 kilometres within the Order Limits.

2.4.15 In Sub-section D2, the landscape presents a diverse topography, featuring elements of depression, undulation with rises and slopes, but mainly stretches of flat terrain (Plate 400, Plate 401). This varied landscape provides a dynamic backdrop for the surrounding environment.

2.4.16 Within this sub-section, the fields showcase an assortment of agricultural activities. Some are dedicated to cereal crops, while others host the growth of onions. Additionally, ploughed fields contribute to the agricultural mosaic (Plate 402, Plate 403, Plate 404).

2.4.17 The boundaries between fields in this sub-section are delineated by a medley of natural and man-made features. Tree lines, serving as natural dividers, intermingle with the occasional presence of public footpaths and roads, while areas of scrub and hedges contribute to the field demarcations. Additionally, ditches play a role in separating these agricultural plots, creating a harmonious blend of boundaries within the landscape (Plate 400 to Plate 423).

Archaeological Features

Known Heritage Assets

2.4.18 Rose Cottage (**1110883**), a grade II listed building, is facing one surveyed field along Redhouse Lane. However, a high tree line is limited the visibility of this field from the listed building.

2.4.19 One field along the A134 is facing four listed buildings in Great Horkesley: Village Hall (**1267662**), Danbury Cottage (**1267675**), Messrs Peatling And Cawdron (**1222667**) and House Adjoining And To The North Of Peatling And Cawdron (**1222668**). A low height hedge along the A134 limits the view of the field from these buildings (Plate 424).

2.4.20 Another listed building Chapel Cottage (**1222607**) is near a field along the A134. Here again a medium height hedge limits the view of the field from this building. Just like the listed buildings Barn To South Of New Barn House (**1222924**), Highlands

(**1222981**) and School House (**1222923**) which are facing a field along School Lane. However, for the latter, the field is visible from the buildings (Plate 425).

Plate 424 Village Hall (1267662), grade II listed building, near the Order Limit, facing a surveyed field along the A134, looking north

Plate 425 Barn To South Of New Barn House (1222924) in front of a surveyed field, looking east

Unrecorded Heritage Assets

2.4.21 During the walkover of Sub-section D2, several notable landscape features were observed. Numerous depressions were noticed across the fields, and, at times, the ground dipped and then rose within the fields, forming lines of depression in their midst (Plate 427).

2.4.22 In this section, the walkover revealed the presence of undulations in the landscape (Plate 426, Plate 428, Plate 429). These subtle rises and falls in the terrain contribute to the varied topography within Sub-section D2.

Plate 426 Undulations in crop field along Redhouse Lane, looking north

Plate 427 Line of depressions in a crop field along Broad Lane, looking south

Plate 428 Undulation within the east part of a surveyed field along Broad Lane, looking south

Plate 429 North to south aligned undulations south of School Lane

Modern Disturbance

2.4.23 A borehole was noted in the south-eastern corner of a scrub and paddock field west of Straight Road (Plate 430).

2.4.24 There was no other modern disturbance observed in Sub-section during the walkover survey.

Plate 430 Bore hole in field, to the west of Straight Lane, looking north-west

Sub-section D3: London Road (west) to Colchester Road B1508 (north)

Description of Landform

2.4.25 Sub-section D3 begins on the western side of London Road and heads in a westerly direction through the rural landscape and ends on the eastern side Colchester Road, B1508.

2.4.26 The landform in this sub-section varies from steep slopes, gentle undulations, and flat areas of land. The wider landscape in this sub-section is rural and the fields are used as paddocks, arable crop fields, meadows, with field boundaries consisting of hedgerows, a road, a track, change of crops, treelines, wood and metal fencing, and scrub borders (Plate 431 to Plate 444).

Plate 431 Horse paddocks west of London Road, looking west

Archaeological Features

Known Heritage Assets

2.4.27 No known heritage assets seen during the walkover survey.

Unrecorded Heritage Assets

2.4.28 A large stone water trough was observed c. 300 m west of London Road. It was sat on a stone pediment and was aligned facing the east (Plate 445).

2.4.29 A slight west to east linear depression was observed in a crop field west of Vinesse Road (Plate 446).

2.4.30 No other heritage assets were observed during the walkover survey.

Plate 445 Stone water trough, looking west

Plate 446 West to east linear depression in crop field west of Vinesse Road, looking north

Modern Disturbance

2.4.31 No modern disturbances were observed during the walkover survey.

Sub-section D4: Colchester Road B1508 (south) to Fossetts Lane, Fordham (north)

Description of Landform

2.4.32 This sub-section begins on the western side of Colchester Road and heads in a mostly regular south-western direction until it ends on the eastern side of Fossets Lane, Fordham. The route here makes up c. 2.6 km of the Order Limits.

2.4.33 The landscape in this sub-section varies. Near Colchester Road and Holt's Road towards the west, undulations and depressions become more prominent. Further south-west in this sub-section, steep slopes characterize certain areas within the fields, creating a varied and dynamic landscape.

2.4.34 The fields vary within this sub-section; some are dedicated to arable crops, while others are meadows or scrubland. The boundaries delineating the fields within this sub-section are defined by a combination of natural and man-made features. Roads, hedges, treelines, and open fields play their role in separating the agricultural plots. Tracks and shrubs also contribute to demarcating the field boundaries, creating a blend of distinct characteristics within the landscape (Plate 447 to Plate 458).

Archaeological Features

Known Heritage Assets

2.4.35 The listed building grade II, Barn To North Of Knowles Farmhouse (**1267632**) is adjacent to a surveyed field west of London Road. The field is visible from the listed building. Only a wooden fence is between the field and the building (Plate 459).

2.4.36 In one of the fields within Sub-section D3, a noteworthy discovery was made when a Roman tile, potentially associated with a building or kiln (**4074**), was previously recorded. During our recent walkover survey, we had the opportunity to collaborate with the landowner, and it was during this survey that we came across additional Roman tiles strewn across the terrain. These finds seemed to cluster around the vicinity of what appeared to be a potential kiln or building site. Interestingly, on the same survey day, local residents in the neighbouring fields also stumbled upon Roman tiles and bricks, sparking their interest in preserving these historical artifacts. The locals were keen on recording these Roman findspots with the HER to document their historical significance. These intriguing discoveries were made in fields characterized by a highly undulating landscape, marked by deep depressions and significant variations in elevation, which added an element of complexity and intrigue to the archaeological findings in Sub-section D3 (Plate 460 to Plate 463).

Plate 459 Barn To North Of Knowles Farmhouse (1267632) adjacent to a surveyed field west of London Road, looking north

Plate 460 Tiles, bricks and other finds in fields not far from Colchester Road. Some are potentially from the Roman era

Plate 461 Tiles, bricks and other finds in fields not far from Colchester Road. Some are potentially from the Roman era

Plate 463 Tiles, bricks and other finds in fields not far from Colchester Road. Some are potentially from the Roman era

Plate 464 Area of 4074 (Roman tile found, possibly a building or a kiln), where other potential Roman finds were noticed during the walkover, looking east

Unrecorded Heritage Assets

2.4.37 Modest depressions and subtle undulations were noted in predominantly flat fields adjacent to Vinesse Road (Plate 465).

2.4.38 In the fields adjacent to Colchester Road, where potential Roman artifacts were unearthed (Plate 460 to Plate 464) the landscape displayed a range of features, including pronounced rises and slopes, as well as notable undulations and depressions (Plate 465, Plate 466).

Plate 465 Gentle undulations running north-south across a flat field near Vinesse Road, looking north

Plate 466 The fields in the Order Limits near Colchester Road exhibit variations in elevation, creating a pattern of rolling topography

Plate 467 Agricultural field with undulating landscape near Colchester Road

Plate 468 Undulating agricultural field near Colchester Road

Plate 469 Undulating agricultural field near Colchester Road

Modern Disturbance

2.4.39 No modern disturbance was observed during the walkover.

Sub-section D5: Fossetts lane, Fordham (South) to Ford Street Hill (A1124)

Description of Landform

2.4.40 This sub-section begins on the southern side of Fossets Lane and passes the settlement of Fordham on the south-eastern side, curving in an ‘s’ shape, passing Fordsteet on the eastern side, and ending on the east side of Fordstreet Hill. This sub-section makes up c. 2 km of the Order Limits.

2.4.41 The landscape here is rural with a variation of landform including flat areas, steep hills, and gentle slopes and undulations. The land here features fields used for arable production, grass fields, scrub, and livestock fields. The field boundaries include hedgerows, ditches, treelines, fencing, and a road (Plate 470 to Plate 490).

Plate 489 Crop field east of Fordstreet Hill, looking south-east from north-west corner

Plate 490 Crop field c. 500 m north of Halstead Road, looking south towards Order Limits

Archaeological Features

Known Heritage Assets

2.4.42 A World War Two pillbox (**4123**) was observed in a crop field west of Fiddlers Hill. The pillbox was on the eastern field boundary and can be seen from the road (Plate 491).

Plate 491 Pillbox (4123) along Fiddlers Hill, looking south-east

2.4.43 No other known heritage assets were observed during the walkover survey.

Unrecorded Heritage Assets

2.4.44 A pillbox was observed in the north-eastern corner of an arable field c. 80 m south-west of the River Colne. This one had significant damage.

Modern Disturbance

2.4.45 No modern disturbance were noted during the walkover survey.

Sub-section D6: (South) Ford Street Hill (A1124) to the railway crossing the Roman River

Description of Landform

2.4.46 In Sub-section D5, the predominant topographical feature is a mostly flat landscape, with occasional gentle rises, particularly noticeable in the northern vicinity near the railway line. This sub-section is approximately 3 km long.

2.4.47 Here, the fields primarily serve agricultural purposes, predominantly cultivated for crops. The demarcations defining these fields are a diverse combination of natural and man-made features. They include hedges, ditches, grass verges, shrubs, and open fields (Plate 492 to Plate 510).

Plate 492 Flat field in Sub-section D5, along Brook Road, looking south-east

Archaeological Features

Known Heritage Assets

2.4.48 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.4.49 Some minor undulations and depressions were observed along Brook Road believed to be either geological or associated with the farming practice of the area.

2.4.50 A World War Two pillbox (Plate 511) was observed in the southern boundary of a crop field c. 190 m west of Fordstreet Hill.

2.4.51 No unrecorded heritage assets were identified during walkover of Sub-section D5.

Plate 511 Pillbox c. 190 m west of Fordstreet Hill

Modern Disturbance

2.4.52 No other modern disturbances were observed during the walkover survey.

Sub-section D7: The railway crossing the Roman River to Colchester Road (A120)

Description of Landform

2.4.53 In the sub-section D6, the topography predominantly presents a flat profile, intermingled with subtle undulations and occasional rising terrain features near the Roman River (Plate 512, Plate 513). This sub-section runs over c. 5 km.

2.4.54 Regarding land use, the sub-section D6 encompasses a diverse array of agricultural activities. It encompasses meadows or cattle fields, areas with shrub vegetation, plots dedicated to cereal cultivation, and sections recently subjected to ploughing for agricultural purposes. The boundaries that segregate these fields are defined by a combination of natural elements such as hedges, tracks, tree lines, and ditches, alongside the presence of shrubbery, collectively forming the distinct boundaries within this sub-section (Plate 512 to Plate 533).

Plate 532 Ploughed field north of Colchester Road, looking south

Plate 533 Ploughed field east of Houchin's Lane/north of Colchester Road, looking south-east

Archaeological Features

Known Heritage Assets

2.4.55 No known heritage assets were observed during walkover within Sub-section D6.

Unrecorded Heritage Assets

2.4.56 In proximity to the railway line, two fields within the vicinity exhibit some bumps/ elevations. These topographical features introduce a distinctive undulating characteristic to the landscape, forming a notable presence in the area adjacent to the railway (Plate 534, Plate 535). These could relate to Colliers Brick Works (**4197**).

2.4.57 No more unrecorded heritage assets were identified during walkover of Sub-section D5. Some minor undulations were observed through the sub-section believed to be either geological or associated with the farming practice of the area (i.e. Plate 536).

2.4.58 A north-south aligned undulation was noted in a ploughed field north of Colchester Road (Plate 537).

2.4.59 Undulations were noted in a crop field c. 330 m north of Colchester Road (Plate 538).

2.4.60 A depression was noted in a crop field c. 320 m north of Bracks Lane (Plate 539). In the same field, undulations aligned in a north-east to south-west direction were also observed (Plate 540).

2.4.61 A gentle raised area was noted in the south-eastern part of a crop field to the west of Great Tey Road (Plate 541).

2.4.62 West to east undulations were noted in the central part of a ploughed field c. 730 m north of Marks Tey (Plate 542)

2.4.63 No other unrecorded heritage assets were noted during the walkover survey.

Plate 542 West to east undulations in a ploughed field c. 750 m north of Marks Tey

Modern Disturbance

2.4.64 A spoil heap (Plate 543), and a construction or equipment storage area (Plate 544, Plate 545) was noted to the south of Houchin's Farmhouse (**1123187**).

Plate 543 Spoil heap

Plate 544 Agricultural building, construction vehicles and related infrastructure to the north-east of a field near Houchin's Lane

Plate 545 Plant equipment within complex for agricultural building under construction

2.5 Section E: Braintree

2.5.1 Section E of the Project is located wholly within the County of Essex and the District of Braintree. Section E begins at the Colchester/Braintree District border c. 2 km south-west of Marks Tey and heads generally west-south-west bypassing the settlements of Coggeshall, Kelvedon, Silver End, Faulkbourne and Fairstead. Section E terminates at Fuller Street that marks the Braintree/Chelmsford District border. Section E of the Project accounts for approximately 16 km of its overall length.

2.5.2 The land in this section of the Order Limits is largely rural with the land used for arable production or animal grazing. The land is mostly flat with some pockets of undulations and slopes. Field sizes and shaped vary but are mostly regular in shape. There is a mix of field boundaries in this sub-section, with the majority being hedgerow and ditch, but roads, trackways, and fencing are also used.

2.5.3 Outside of the Order Limits, the area remains rural, with settlements that vary in size which depends on their proximity to a larger town such as Chelmsford, Billericay, Braintree, and Colchester. The landscape remains rural with scattered farmsteads. The landscape also includes travel infrastructure such as the A120, A12, A129, A414, and the north-east to south-west railway line.

2.5.4 This sub-section is split into five sub-sections for ease of understanding. They are:

- Sub-section E1: Colchester Road (A120) south to Pantlings Lane – TB72 to TB84
- Sub-section E2: Pantlings Lane to Park Gate Road/ Church Road – TB84 to TB94
- Sub-section E3: Park Road/Church Lane to the railway south of Cressing Road (north) – TB94 to TB100
- Sub-section E4: Railway south of Cressing Road (south) to Fairstead Road – TB100 to TB115
- Sub-section E5: Fairstead Road to Boreham Road (east) – TB116 to TB124.

Sub-section E1: Colchester Road (A120) south to Pantlings Lane.

Description of Landform

2.5.5 This sub-section begins at the fields to the west of the Roman River to the north of Colchester Road, A120, c. 400 m west of Broad Green. The land in this section is rural and mostly used for arable crop production, with some fields in crop, and others recently ploughed at the time of the survey. Field sizes and shapes vary, and their borders consist of tracks, hedges, ditches, permissive change of crop boundaries, treeline, and scrub.

2.5.6 This sub-section begins on the southern side of the A120 and heads c. 3.5 km south to Pantlings Lane. The Order Limits here pass between Coggeshall in the west, Surrex in the north, and Stocks Green and Feering in the east. The river Blackwater flows through this sub-section in a north-west to south-east direction from Coggeshall to Feering.

2.5.7 The landform in this sub-section is flat with minor undulations and the land use is dedicated mostly to the production of arable crop with some field being recently harvested and ploughed during the time of the survey. The field sizes and shapes vary, and the boundaries consist of tracks, ditches, change of crops, treelines, scrub, and riverbank (Plate 546 to Plate 570).

Archaeological Features

Known Heritage Assets

2.5.8 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.5.9 There was a linear undulation noted in crop field c. 1 km east of Great Tey Road (Plate 571).

2.5.10 Undulations were recorded in crop field, c. 500 m east of Great Tey Road (Plate 572).

2.5.11 A north-east to south-west Linear depression was recorded in ploughed field, c. 350 m east of Great Tey Road (Plate 573).

2.5.12 A depression south to north was observed in a field along Coggeshall Road (Plate 574) and on the same road was recorded another large depression (Plate 575).

2.5.13 A small mound is in a middle of a field near river Blackwater (Plate 576)

2.5.14 Linear undulations were recorded in a ploughed field, c. 300 m north of Colchester Road/Coggeshall Road (Plate 577).

2.5.15 The surveyors noted the possibility that Old Mill Lane, which comes off Coggeshall Road towards the south-west, could be a historic Holloway due to the nature of the high banked sides and established vegetation.

2.5.16 Irregular topography in the south-western area of a crop field, c. 150 m north of Pantlings Lane was recorded. This could be an area of archaeological potential (Plate 578, Plate 579).

Plate 571 Linear undulation in ploughed field, looking east

Plate 578 Irregular topography which maybe archaeological in origin, c. 150 m north of Pantlings Lane, looking north

Plate 579 Irregular topography which maybe archaeological in origin, c. 150 m north of Pantlings Lane, looking north-east

Modern Disturbance

2.5.17 A group of agricultural buildings were in the process of being erected along the northern edge of a recently harvested field c. 300 m north of Colchester Road, A120. The associated debris, plant, and fencing were also within the vicinity.

2.5.18 A water tank was noted in the north-western corner of a fruit bush field south of the river Blackwater.

Sub-section E2: Pantlings Lane to Park Road/ Church Road

Description of Landform

2.5.19 This sub-section of the walkover report begins at Pantlings Lane, and heads in a south-western direction to Park Gate Road which is north of Rivenhall. This sub-section transects the two Conservation Areas, Silver End and Kelvedon, to the west and east respectively. The landscape in this area is mostly flat with some areas where there are gentle slopes.

2.5.20 This sub-section of the walkover report begins at Pantlings Lane, and heads in a south-westerly direction towards Park Gate Road, north of Rivenhall settlement. The Order Limits within this sub-section are c. 3.2 km in length. This sub-section transects the two Conservation Areas of Silver End and Kelvedon, to the west and east respectively. The landscape in this area is mostly flat with some areas of gentle sloping landform.

2.5.21 The fields within this section were predominantly dedication to the production of arable crop with some of the fields having been recently ploughed at the time of the walkover survey. The field boundaries in this sub-section were the following: hedgerow, ditches, tracks, and treelines (Plate 580 to Plate 598).

2.5.22 Between the two Conservation Areas Silver End to the west and Kelvedon to the east and their associated settlement areas.

2.5.23 Large fields of regular shape, which are mostly flat with gentle undulations. Deep ditches between fields, established hedgerows.

Archaeological Features

Known Heritage Assets

2.5.24 There were no known heritage assets recorded during the walkover survey.

Unrecorded Heritage Assets

2.5.25 There was a circular depression noted in a harvested crop field c. 400 m north of Church Road (Plate 599).

2.5.26 There were no other unrecorded heritage assets recorded while on walkover survey.

Plate 599 Circular depression in a harvested crop field c. 400 m north of Church Road, looking west

Modern Disturbance

2.5.27 A treehouse was noted within one of the trees in the boundary c. 330 m north of Church Road.

2.5.28 No other modern disturbances were recorded during the walkover survey.

Plate 600 A treehouse in one of the trees within the field boundary, looking south

Sub-section E3: Park Road/Church Lane to the railway south of Cressing Road (north)

Description of Landform

2.5.29 Sub-section E3 begins at the south-western side of Park Gate Road and ends at the railway line to the south-west of Cressing Road. This covers a distance of c. 3.5 km, aligned north-east to south-west, along the Order Limits.

2.5.30 The land here includes large, flat agricultural fields with crop. The land connected to Rivenhall Palace (**1122598**) contain a few paddocks or grassland fields. This land undulates with the natural topography and slopes gently up to the north-west. Other paddocks were noted at the northern end of the Sub-section, at Ford Farm and towards the southern end of the Sub-section at Whiteheads Farm.

2.5.31 The field boundaries along the Order Limits includes well established and well-maintained hedges which either sit alongside or within ditches. The paddocks or grassland fields at Rivenhall Palace and Whiteheads Farm were enclosed by wooden fences (Plate 601 to Plate 611).

Plate 601 Alpaca paddock c. 160 m west of Park Road, looking west

Plate 611 Crop field north of Cressing Road, looking south-west towards Order Limits

Archaeological Features

Known Heritage Assets

2.5.32 No known heritage assets were recorded during the walkover survey.

Unrecorded Heritage Assets

2.5.33 There was a circular depression with a linear channel-like depression coming off it in the direction of the lake in the Rivenhall Place Estate. Within this paddock, there were at least two other instances of circular depressions along the lake boundary (Plate 612). These depressions are possibly the same circular areas which are shown on the Rivenhall Place and Mundon Hall estate maps from 1716-17. These circular areas would correlate in the same area prior to the development of the man-made lake and are not shown on later maps in the early 19th century.

Plate 612 Circular depression, to the south of Rivenhall Place Estate, looking south-east

Modern Disturbance

2.5.34 Litter and debris was observed on the western boundary of a ploughed field south of Church Road, Rivenhall (Plate 613).

2.5.35 No other modern disturbances were recorded during the walkover survey.

Plate 613 Litter and debris along the field boundary, looking north-east

Sub-section E4: Railway south of Cressing Road (south) to Fairstead Road

Description of Landform

2.5.36 This sub-section runs over c. 4 km from the southern side of the Railway near Cressing Road to Fairstead Road, Fairstead and passes through the rural landscape at Faulkbourne. It presents a landscape characterized by a blend of gently sloping fields and predominantly flat expanses. The landscape is further enriched by the presence of natural features such as hedges, trees, and tree lines, contributing to its visual diversity. Additionally, tracks and farm buildings are interspersed across the terrain, augmenting the overall rural ambiance.

2.5.37 The fields within this sub-section are predominantly dedicated to crop cultivation, indicating agricultural productivity in the region. The alterations in crop types in certain fields reflect the seasonal dynamics of farming practices.

2.5.38 Field boundaries within Sub-section E4 exhibit a combination of features, encompassing hedges, ditches, tracks, and tree lines. These elements serve functional and aesthetic purposes, delineating field boundaries while enhancing the visual allure of the countryside (Plate 614 to Plate 637).

Plate 637 Crop field east of Fairstead Road, looking south-east

Archaeological Features

Known Heritage Assets

2.5.39 No known heritage assets were observed during the walkover.

Unrecorded Heritage Assets

2.5.40 A circular depression (Plate 638) was noted in the south-eastern corner of a crop field c. 560 m north-east of Troys Hall (**1123457**).

Plate 638 A circular depression c. 560 m north-east of Troys Hall (1123457), looking north-east

2.5.41 No other unrecorded heritage assets were noted during the walkover survey.

Modern Disturbance

2.5.42 Football pitches are located within the Order Limits, in a field along Church Hill (Plate 639).

2.5.43 No other modern disturbances were noted during the walkover survey.

Plate 639 Football pitches within a field along Church Hill

Sub-section E5: Fairstead Road to Boreham Road (east)

Description of Landform

2.5.44 The sub-section E5 runs over c. 3 km. it encompasses a diverse landscape characterized by varying topography and land use. The fields in this area exhibit gentle slopes, flat expanses, and undulating terrain, contributing to the visual diversity of the surroundings. These fields primarily serve agricultural purposes, with crop cultivation being a predominant activity. The changing patterns of crops across the landscape reflect the seasonal nature of farming in this region. Additionally, woodlands, scrub, and tree lines punctuate the fields, adding natural elements to the landscape.

2.5.45 The boundaries of these fields present an amalgamation of features, including hedges, ditches, tracks, and roadways. These elements serve the dual purpose of delineating field limits while enhancing the visual appeal of the countryside. In certain areas, the boundary is characterized by hard standings and open fields, providing a mix of natural and man-made delineations (Plate 640 to Plate 655).

Plate 640 Harvested crop field c. 450 m west of Fairstead Road, looking north-east

Plate 654 Crop fields south of Fuller Street, looking north-east

Plate 655 Crop field east of Cole Hill, looking north

Archaeological Features

Known Heritage Assets

2.5.46 No known Heritage Assets were observed during the walkover.

Unrecorded Heritage Assets

2.5.47 A circular depression was observed in the middle of this sub-section, south to Ranks Green Road. However, it might be associated with the farming practice of the area (Plate 656).

2.5.48 A small depression was noted in the central part of a crop field c. 850 m south of Ranks Green (Plate 657).

2.5.49 Linear undulations in a west-east alignment were noted in the northern part of a crop field c. 900 m south of Rank's Green (Plate 658).

2.5.50 A depression was noted in the eastern-central part of a crop field c. 800 m north-east of Fuller Street (Plate 659). Undulations in a north-south alignment were noted in the same field along the eastern border. A large depression was observed in the same field, but in the southern central part (Plate 660).

2.5.51 A long ditch was observed in the middle of a field north of the river Ter, south of Fuller Street (Plate 661).

Plate 656 A circular depression in a field south to Ranks Green Road, looking south-east

Modern Disturbance

2.5.52 An electric fenced area with barrels were found south to Ranks Green Road (Plate 662).

2.5.53 A spoil heap was noted to the north of Fuller Street, in a corner of a field (Plate 663).

Plate 662 A fenced area and barrels south to Ranks Green Road, looking west

Plate 663 A large spoil heap in a field north of Fuller Street, looking west

2.6 Section F: Chelmsford

2.6.1 Section F of the Project is located wholly within the County of Essex and the District of Chelmsford. Section F begins at the Braintree/Chelmsford District border c. 2 km south-west of Marks Tey and heads generally south-south-west bypassing the settlements of Chatham Green, Little Waltham, Roxwell, Writtle and Margaretting. Section F terminates between Little Hyde Farm and Margaretting Hall Cottages on the Chelmsford/Brentwood District border. Section F of the Project accounts for approximately 21 km of its overall length.

2.6.2 This sub-section is split into six sub-sections for ease of understanding. They are:

- Sub-section F1: Boreham Road (west) to Braintree Lane (east) – TB124 to TB134
- Sub-section F2: Braintree Lane (west) to Chelmsford Road (east) – TB135 to TB141
- Sub-section F3: Chelmsford Road (west) to Woodhall Hill (east) – TB141 to TB152
- Sub-section F4: Woodhall Hill (west) to Roxwell Road, A1060 (north) – TB152 to TB161
- Sub-section F5: Roxwell Road (A1060) (south) to Nathans Lane, Edney Common (north) – TB162 to TB174
- Sub-section F6: Nathans Lane, Edney Common (south) to A12 (north) – TB175 to TB185.

Sub-section F1: Boreham Road to Braintree Road (east)

Description of Landform

2.6.3 This sub-section of the walkover report begins on the western side of Boreham Road. This sub-section heads from the north-east and broadly heads south-west towards the east of Braintree Road. This sub-section covers c. 3.55 km of the Order Limits.

2.6.4 The Order Limits appear to gently rise towards high ground to the east of Little Waltham, with a gradual slope broadly descending to the north-west, north, and north-east of the high ground into surrounding valleys. There is broadly minimal undulation within the land parcels generally allowing for good visual inspection. Land use in this sub-section is broadly a mix of crop, grassland, and meadow. The field sizes also vary in shape and size, with many being large and irregularly shaped. The field boundaries in this sub-section generally comprise of hedgerows, ditches, treelines, and fencing (Plate 664 to Plate 666).

Plate 664 Grass field, looking north-west

Plate 665 Arable crop field looking, looking south-west

Plate 666 Arable crop field looking north-west towards Order Limits

Archaeological Features

Known Heritage Assets

2.6.5 No known Heritage Assets were observed during the walkover.

Unrecorded Heritage Assets

2.6.6 A partially backfilled open area excavation area with surrounding topsoil bunds (Plate 667) still remaining to the east, south and west has been observed within the north of a field approximately 260 m south of Goodmans Lane and 700 m south-east of Strawbrook Hill. Modern artefacts were also observed throughout the visible subsoil. It is currently unknown if this area is the former location of an archaeological investigation.

2.6.7 A large dip can be observed within an arable crop field surrounded by and including multiple trees and bushes approximately 200 m south-west of Goodmans Lane and 220 m south of Straw Brook (Plate 668). It is unknown if this feature is of archaeological origin.

2.6.8 A small ditch/ furrow was observed in the middle of a field, end of Daisleys Lane, south of south-east of Chatham Green (Plate 669).

Plate 667 Topsoil bund in arable crop field, looking east

Plate 668 Dip within arable crop field, looking east

Plate 669 A ditch in the middle of a field, looking east

Modern Disturbance

2.6.9 There are no areas of modern disturbance noted within this Sub-section.

Sub-section F2: Braintree Road (west) to Chelmsford Road (east)

Description of Landform

2.6.10 The sub-section F2 runs over c. 1.7 km and encompasses fairly consistent landscape characterized of flat to slightly undulating topography that slopes down to river courses. The land use is arable with crop within fields. The open nature of the fields gives excellent views to known designated heritage assets.

2.6.11 The fields at the northern end of this sub-section are generally flat and slope gently to the south-west. As the section moves to the south the land slopes down on either side of River Chelmer which forms the western border of the Grade II Langleys Registered Park and Garden (**1000241**) and Great Waltham Conservation Area (**CA55**). The land remains fairly flat with slight undulations until it reaches the southern end of this sub-section. These fields are arable in nature and at the time of survey, contained crop (Plate 670 to Plate 675).

Plate 670 Northern end of sub-section F2 looking south-east

Plate 671 Field to the north of Essex Regiment Way looking south-east

Plate 672 Field to the south of Essex Regiment Way looking south-east

Plate 673 Field to the west of Braintree Road, looking north-east

Plate 674 Field to the north-east of Chelmsford Road, looking north-west

Plate 675 Field to the north of Chelmsford Road, looking west towards River Chelmer

2.6.12 Fields boundaries within sub-section F2 are primarily hedges, with the occasional tree, along with ditches. The vegetation is well established and contributes to the character of the area.

Archaeological Features

Known Heritage Assets

2.6.13 The Scheduled Monument, Settlement site at Ash Tree Corner (**1002140**), is located with the southernmost field of this sub-section. The asset is located within an open, flat, grass field right next to the busy Main Road E1008 to the east. There is no evidence for the Scheduled Monument in field i.e. not raised or depressed areas. Over the road is the settlement of Little Waltham, the majority of which is a Conservation Area (**CA56**). The settlement and road affect the setting of the rural nature of the asset by introducing noise and visual intrusion.

Plate 676 Scheduled Monument (1002140) looking east

2.6.14 The Order Limits are partly located within Little Waltham (**CA56**). The settlement is surrounded with countryside and fields. Along its western side is the busy Main Road E1008, the noise from this road disrupts the quite rural nature of the asset. The Conservation Area itself is full of characterful buildings, several are listed. The asset contains open grassland and parkland which is encompassed with hedges. The main road through the Conservation Area, Brook Hill, is busy with local traffic. The noise from the traffic adds to the disruption of the peaceful nature of the asset.

Plate 677 Characterful properties within Little Waltham (CA56)

Plate 678 Parkland and grassland within Little Waltham (CA56)

2.6.15 To the west of the Order Limits is Grade II Langleys Registered Park and Garden (**1000241**) and Great Waltham Conservation Area (**CA55**). They both have rural village setting and are surrounded by large open fields. To the east is the busy Main Road E1008. The noise from this road impacts the quite rural setting of the assets.

2.6.16 The Conservation Area contains many characterful properties, some of which are listed. To the south and west are later modern housing which impacts negatively to the historical charter of the assets. The main road, Chelmsford Road, can be busy and noisy which effects the quiet rural nature of the assets.

Plate 679 Character properties and open nature of Great Waltham (CA55)

2.6.17 Langleys consists of large open grassland and parkland with trees which surround the Grade I listed Langleys (**1305533**), and other listed and non-listed buildings associated with the estate. The main building is on a slightly higher piece of land within the Registered Park and Garden with good views to the south-west.

Plate 680 Langleys Registered Park and Garden (1000241) looking north-east

Plate 681 Grade I listed Langleys (1305533) looking north-east

Unrecorded Heritage Assets

2.6.18 There are no unrecorded archaeological assets noted within this sub-section.

Sub-section F3: Chelmsford Road (west) to Woodhall Hill (east)

Description of Landform

2.6.19 The sub-section F3 runs over c. 4 km and encompasses a diverse landscape characterized by varying topography and land use, offering a visually dynamic and agriculturally significant region within the Study Area.

2.6.20 The fields in this sub-section display a range of features, including rises, slopes, and flat areas. These fields have been utilized for various purposes, from crop cultivation to meadows. Some areas bear the traces of ploughing, while others showcase the natural beauty of grassy school fields.

2.6.21 Field boundaries in sub-section F3 are delineated by a mix of elements, including roads, hedges, tracks, ditches, tree lines, and banks. These features define the limits of the fields and contribute to the character of the landscape (Plate 682 to Plate 687).

Plate 682 Crop in field to the south-west of Chelmsford Road, looking south-west

Plate 687 Harvested crop field, west of Woodhall Hill, looking north

Archaeological Features

Known Heritage Assets

2.6.22 No known heritage assets were observed during the walkover.

Unrecorded Heritage Assets

2.6.23 There is a series of raised and depressed area north of Larks Lane (Plate 688).

2.6.24 Some undulations were observed within fields through this sub-section, especially north and south-west of Partridge Green (Plate 689, Plate 690).

Plate 688 Series of raised and depressed area north of Larks Lane, looking west

Plate 689 Undulations in crop field

Plate 690 undulations in crop field

Modern Disturbance

2.6.25 Concrete pillar with manhole cover (Plate 691) as well as a visible pipeline mark (Plate 692) leading to the concrete manhole cover was visible during the walkover north of Larks Lane.

Plate 691 Concrete pillar with manhole cover area within a field north Larks Lane, looking north

Plate 692 Visible pipeline mark in a field north Larks Lane, looking south

Sub-section F4: Woodhall Hill (west) to Roxwell Road, A1060 (north)

Description of Landform

2.6.26 This sub-section runs over c. 3 km and encompasses a diverse landscape characterized by varying topography and land use. Overall, this area exhibits a gentle undulating terrain with occasional rises, offering a visually dynamic and agriculturally significant region.

2.6.27 The fields within this sub-section have primarily served agricultural purposes, with varying patterns of crop cultivation and meadows. These fields may display traces of ridge and furrow, reflecting historical farming practices. The combination of crop fields and meadows contributes to the agricultural diversity of the landscape.

2.6.28 Field boundaries in Sub-section F4 are delineated by a mix of features, including hedges, shrubs, ditches, tree lines, and open fields. These natural and man-made elements define field limits while enhancing the visual appeal of the countryside (Plate 693 to Plate 704).

Plate 693 Field with rise along River Cam, looking north-west

Plate 704 Grass crop field c. 200 m west of Woodhall Road, looking south-west

Archaeological Features

Known Heritage Assets

2.6.29 No known heritage assets were observed during the walkover.

Unrecorded Heritage Assets

2.6.30 Some undulations (Plate 706, Plate 707) and depressions (Plate 705) were observed during the walkover within field in the Order Limits. They might be associated with the farming practice of the area or be geological.

Plate 705 Depression within a field south to Chignal St James, looking south

Plate 706 Undulations in harvested crop field

Plate 707 Undulations in harvested crop field

Modern Disturbance

2.6.31 A water pipe is found on the east part of a field near Mashbury Road (Plate 708).

2.6.32 A wooden fence enclosure is found in a field along River Can (Plate 709).

Plate 708 A water pipe in a field along River Can, looking south

Plate 709 A wooden fence enclosure in a field along River Can, looking east

Sub-section F5: Roxwell Road (A1060) (south) to Nathans Lane, Edney Common (north)

Description of Landform

2.6.33 This sub-section of the proposed route begins at the land south Roxwell Road, c. 1.6 km north-east of Newney Green to the land north of Nathans Lane, c. 1 km east of Edney Common. The A414, Ongar Road West, transects the route east to west through the Order Limits.

2.6.34 The landform in this section was mostly flat with instances of undulation in some fields, however, this could have been due to ploughing and the presence of crop. Land use in this section were arable crop and recently ploughed fields, and the field boundaries were hedgerow and ditches (Plate 710 to Plate 716).

Plate 710 Ploughed field at the northern end of Sub-section, looking south-east

Plate 711 Fairly flat cropped field to the north-west of Cow Watering Lane and farm, looking north

Plate 715 Cropped field to the west of Ropers Chase, looking west

Plate 716 Overgrown field to the north of Nathan's Lane, looking north-east

Archaeological Features

Known Heritage Assets

2.6.35 No known heritage assets were observed during the walkover.

Unrecorded Heritage Assets

2.6.36 There was a circular depression recorded in the eastern edge of a crop field c. 400 m south-east of The Causeway (Plate 717).

2.6.37 A circular depression was noted in the central-eastern section of a crop field, c. 800 m north-west of Nathans Lane (Plate 718).

Plate 717 Circular depression in crop field, looking south

Plate 718 Circular depression in crop field, looking west

Modern Disturbance

2.6.38 There were several gas pipeline markers noted in the fields between Nathan's Lane, Hoe Street, and Roxwell Road:

- There was one long the northern boundary of a ploughed field c. 70 m south of Roxwell Road.
- Another was noted c. 500 m south-west within the same field.
- A third was noted along the top north-western boundary of another crop field c. 455 m south-east of Hoe Street.
- A fourth along the same alignment c. 160 m south-west.

- Two others were noted along the field boundary of the same crop field c. 340 m north of Nathan's Lane.
- A seventh was noted along the southern boundary of a crop field c. 115 m north-east of Nathan's Lane.

2.6.39 A large manure heap was noted in the western edge of a crop field c. 65 m east of Hoe Street.

2.6.40 A manure heap was noted in the north-eastern edge of a crop field c. 340 m north of Nathan's Lane.

2.6.41 No other modern disturbances were witnessed during the walkover survey.

Sub-section F6: Nathans Lane, Edney Common (south) to A12 (north)

Description of Landform

2.6.42 This part of the walkover survey begins at the land south of Nathans Lane, Edney Common, to the land north of the A12, and is c. 4 km of the route.

2.6.43 The landform in this section is mostly flat with limited undulation, though there are instances of gentle slopes in the landscape, especially south to this sub-section. The fields themselves are large and irregular shaped and are used for arable crop and wildflower meadows (Plate 719 to Plate 724).

Plate 719 Slightly undulating cropped field, to the south of Nathans Lane, looking south-west

Plate 720 Ploughed field to the west of Margaretting Road, looking north-east

Plate 721 Cropped field, sloping down to the north-west, to the west of listed barn (1247784) at Coptfoldhall Farmhouse, looking north-west

Plate 722 Scrubland to the south-west of listed barn (1247784) at Coptfoldhall Farmhouse, looking south-west

Plate 723 Cropped field, gently sloping down to the north-east, located to the north of Handley Green, looking north-east

Plate 724 Ploughed field to the north of Little Hyde Lane, looking north

Archaeological Features

Known Heritage Assets

2.6.44 No known heritage assets were visible during the walkover survey.

Unrecorded Heritage Assets

2.6.45 Some undulations and rises were identified during walkover of Sub-section F6. However, they may be geological or linked to farming practices in the region.

Plate 725 A field rising to east, south to Nathans Lane, looking east

Plate 726 Rising field with undulations west to Writtle Road, looking north

Plate 727 Undulations in crop field west of Writtle Road, looking north

Plate 728 Undulations in field west of Writtle Road, looking south

Plate 729 Undulations in field north of Ivy Barn Lane, looking north

Modern Disturbance

2.6.46 No instances of modern disturbance noted during the walkover survey.

2.7 Section G: Basildon and Brentwood

2.7.1 This section of the Project is approximately 14 km in length. The northern end of section G begins south-east of the A12, at the land c. 1.5 km north-east of Ingatestone to the Railway, west of Basildon and the southern end is located at the Brentwood/Basildon/Thurrock District border on the railway line between West Horndon to the west and Basildon to the east.

2.7.2 The land types at this section vary as the more northern fields and their wider areas are more rural than the rural and industrial nature of the land to the south of the Stanford le Hope bypass.

2.7.3 This section of the walkover report has been divided into two sections for ease of understanding. They are:

- Sub-section G1: A12 (south) to Railway Line north-east of Hutton (north) – TB186 to TB204
- Sub-section G2: Railway line north-east of Hutton (south) to Sudbury's Farm Road (north) – TB205 to TB213
- Sub-section G3: Sudbury's Farm Road (south) to Southend Arterial Road (north) – TB214 to TB224.

Sub-section G1: A12 (south) to Railway line north-east of Hutton (north)

Description of Landform

2.7.4 This sub-section begins Limits from the land south of the A12 to the land north of the Railway line c. 2.3 km north-west of Billericay and covers c. 5 km of the proposed route.

2.7.5 The land in this section was mostly flat with occasional pockets of undulations and gentle slopes. The flatness of the landscape allowed for good visual access of the Order Limits.

2.7.6 The field types are mostly a mix of arable crop, grassland and meadow with hedgerows, ditches, trees, and fences used as field boundaries (Plate 730 to Plate 736).

Plate 730 Cow pasture, looking west

Plate 731 Crop field, looking north

Plate 732 Crop field, looking west

Plate 733 Crop field, looking south

Plate 734 Ploughed field, looking north-west

Plate 736 Arable crop field looking north-west within Order Limits c. 90 m east of Ingatestone Road

Archaeological Features

Known Heritage Assets

2.7.7 No other known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.7.8 A north to south rectilinear raised area was recorded in the south-west corner of a crop field adjacent to Old Church Road, c. 1 km south-east of Padham's Green (Plate 737).

2.7.9 There was a circular depression in the north-east part of a ploughed field c. 215 m south of Old Church Road, Padhams Green (Plate 738).

2.7.10 There was a circular depression in the southern section of a ploughed field, c. 250 m of the railway line east of Shenfield (Plate 739).

2.7.11 No other unrecorded heritage assets were witnessed during the walkover survey.

Plate 737 North to south linear raised area, looking north

Plate 738 Circular depression in ploughed field, looking north-west

Plate 739 Circular depression in ploughed field, looking south-west

Modern Disturbance

2.7.12 There was a circular concrete slab raised slightly up from the ground in the southern section of a ploughed field, c. 115 m north of the railway line east of Shenfield (Plate 740).

2.7.13 A topsoil bund has been recorded within the cow pasture fields c. 800 m south-east of Ingatestone Bypass and c. 570 m north-east of Stock Lane.

2.7.14 No other modern disturbances were witnessed during the walkover survey.

Plate 740 Low concrete slab circled in red, looking south-west

Plate 741 Topsoil bunds within cow pasture, looking west

Sub-section G2: Railway line north-east of Hutton (south) to Sudbury's Farm Road (north)

Description of Landform

2.7.15 This sub-section begins at the land to the south of the west-east railway line c. 2.5 km west of Billericay and east of the small settlement of Hutton. The Order Limits here make up c. 3 km of the wider route.

2.7.16 The landform in this sub-section varied with flat to gently undulating areas, to pockets of rolling hills. At the time of the walkover surveys, the fields were either in crop or had been recently harvested, so are assumed to be dedicated to the production of arable crop. There was one meadow noted during the walkover. The field boundaries in this sub-section were the following: hedgerow, treelines, ditches, the railway line, change of crop, and the boundary of a farmyard (Plate 742 to Plate 749).

Plate 742 Crop field south of the railway, looking north-east

Plate 749 Grassy crop field north of Sudbury Farm Road, looking north-west

Archaeological Features

Known Heritage Assets

2.7.17 No known heritage assets were seen during the walkover survey.

Unrecorded Heritage Assets

2.7.18 A mound or large rise was observed in a field, west of Blind Lane. However, it could be geological in nature (Plate 750).

Plate 750 A mound or large rise was observed in a field, looking north

Modern Disturbance

2.7.19 No other modern disturbances were witnessed during the walkover survey.

Sub-section G3: Sudbury's Farm Road (south) to Southend Arterial Road (north)

Description of Landform

2.7.20 This sub-section begins at the land south of the west-east railway line, c. 2.5 km north-west of Billericay, and is c. 6.5 km of the proposed route.

2.7.21 The land in this sub-section was varied, with flat to gently undulating areas, to pockets of rolling hills. Land use was for arable crop production in fields in varying sizes and shapes. Field boundaries in this sub-section of the proposed route were hedges, ditches, a farmyard, change of crop (Plate 751 to Plate 760).

Plate 759 Grass field west of Dunton Road, looking north-west to Order Limits

Plate 760 Pasture field west of Dunton Road, looking south-west towards Order Limits

Archaeological Features

Known Heritage Assets

2.7.22 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.7.23 A c. 3 m wide circular raised mound was recorded in the south-western area of a pasture field with grazing sheep c. 25 m north-east of Dunton Road (Plate 761).

2.7.24 An isolated tree within a field to the south of Dunton Road (Plate 762), could relate to non-extant field boundaries, possibly associated with crop marks (7075).

2.7.25 No other unrecorded heritage assets were noted during the walkover survey.

Plate 761 Raised circular depression in pasture field, looking north-east

Plate 762 An isolated tree could relate to non-extant field boundaries, possibly associated with crop marks (7075), looking north-east

Modern Disturbance

2.7.26 A solar farm has recently been constructed in field to the north of Southend Arterial Road (Plate 763).

2.7.27 No other modern disturbances were witnessed during the walkover survey.

Plate 763 Solar farm to the north of Southend Arterial Rad, looking south

2.8 Section H: Thurrock

2.8.1 Section H, the final Section of the Project, is located wholly within the County of Essex and the District of Thurrock. Section H begins at the Brentwood/Basildon/ Thurrock District border on the railway line between West Horndon to the west and Basildon to the east. From its northern limit, Section H heads south bypassing the settlements of Bulpham, Horndon on the Hill, Stanford le Hope, Chadwell St Mary and Linford. Between Linford to the east and Chadwell St Mary to the west, the Order splits with a north/south aligned section terminating at Low Street to the south and an east/west aligned section terminating at Long Lane on the north-east outskirts on Little Thurrock. Section H accounts for approximately 10 km of its overall length.

2.8.2 This section of the walkover report has been divided into two sections for ease of understanding. They are:

- Sub-section H1: Southend Arterial Road (south) to Doesgate Lane (north) – TB225 to TB236
- Sub-Section H2: Doesgate Lane (south) to Stanford le Hope Bypass (north) – TB237 to TB255
- Sub-section H3: Stanford le Hope Bypass (south) to Church Road, Low Street – TB255 to YYJ130.

Sub-section H1: Southend Arterial Road (south) to Doesgate Lane (north)

Description of Landform

2.8.3 This sub-section of the walkover survey is c. 3.5 km of the proposed route from the south-side of the A127 Southend Arterial Road, north-west of Basildon, to the north of Doesgate lane. The route follows a mostly straight north to south direction.

2.8.4 The fields in this sub-section for the walkover were arable crop which were either under crop or recently harvested at the time of the walkover survey, but there was also grass fields, a cow pasture field, and a Golf Course (Dunton Golf Course). The fields were for the most part regular shaped with field boundaries that were hedge, ditch, fences, track, and change of crop (Plate 764 to Plate 784).

2.8.5 The landscape in this part of the proposed route is mostly flat with some instances of upward sloping to the south, until the landscape gets to its highest point in the area around Horndon on the Hill in the southern-most area of this sub-section.

Plate 784 Harvested crop field north of Doesgate Lane, looking northwards towards Order Limits

Archaeological Features

Known Heritage Assets

2.8.6 No known heritage assets were seen during the walkover survey.

Unrecorded Heritage Assets

2.8.7 A north-west to south-east ditch was observed in a field c. 475 m west of Lower Dunton Road (Plate 785).

2.8.8 A small depression was recorded in a grass field c. 745 m south of the Southend Arterial Road (Plate 786).

2.8.9 No other unrecorded heritage assets were witnessed during the walkover survey.

Plate 785 North-west to south-east ditch in crop field, looking south-west

Plate 786 Depression in grass field, looking south

Modern Disturbance

2.8.10 A gas pipeline marker was noted in the western boundary of a crop field c. 590 m west of Lower Dunton Road.

2.8.11 No other modern disturbances were witnessed during the walkover survey.

Sub-section H2: Doesgate Lane (south) to Stanford le Hope Bypass (north)

Description of Landform

2.8.12 This sub-section begins on the southern side of Doesgate Lane and passes the Langdon Hills golf course on the western side, bending in an 'S' shape towards the Stanford le hope Bypass, passing the settlement of Horndon on the Hill on the western side.

2.8.13 The landform in this area varies: the fields in the northern part of the sub-section adjacent to the gold course slope both north and south creating a landscape of gentle rolling hills, some of which have far-reaching vistas when observed from the top, such as approximately 1 km north of the junction between Robinson Road and Black Bush Lane where the high rise buildings of the central City of London can be observed to the west, and Dartford bridge and Tilbury docks to the south-west. Fields in the southern-most part of the sub-section are flat. The land in this sub-section is mixed use, predominantly comprising of arable crops, pasture and paddocks. The field boundaries in this sub-section are hedgerows, treelines, change of crop, public footpaths, ditch and banks (Plate 787 to Plate 796).

Archaeological Features

Known Heritage Assets

2.8.14 The non-extant remains of pond (**8232**) could be seen as a depression (Plate 797) in a field to the south-west of Ongar Hall (**1337060**) complex.

2.8.15 Cholleys Farmhouse (**1111647**, Plate 798) was seen during the walkover as the site access road stops just short of the north-western boundary of the property.

2.8.16 No other known heritage assets were witnessed during the walkover.

Plate 797 Depressed remains of pond (8232), looking south-east

Plate 798 Cholleys Farmhouse (1111647)

Unrecorded Heritage Assets

2.8.17 An area of possible Medieval to Post medieval ridge and furrow (Plate 799), aligned north-west to south-east, was located to the south-east of Ongar Hall (**1337060**) complex. To the south the complex is a potential non-extant field boundary or drain (Plate 800).

2.8.18 No other unrecorded heritage assets were noted during the walkover survey.

Plate 799 Possible ridge and furrow, located to the south-east of Ongar Hall (1337060) complex, looking north-west

Plate 800 Possible drainage ditch or old field boundary, south-0east of Ongar Hall (1337060) complex, looking east

Modern disturbance

2.8.19 A gas main sign was witnessed along the southern border of a crop field c. 220 m east of Cholleys Farmhouse (**1111647**) where the track meets the crop field.

2.8.20 No other modern disturbance were observed during the walkover survey.

Sub-section H3: Stanford le Hope Bypass (south) to Low Street

Description of Landform

2.8.21 The sub-section begins on the southern side of the Stanford le Hope Bypass and passes the settlement of Southfields on the eastern side, curving in an ‘s’ shape between Orsett Golf course in the west and Linford in the east before ending on the northern side of Church Road, Low Street.

2.8.22 The Order Limits head in a westerly direction from High House Lane to the north-west of Long Lane. This area was not surveyed as part of this Project as it had been extensively surveyed (geophysical and archaeological trial trenched) for the Lower Thames Crossing project.

2.8.23 The landform here is mixed, with Orsett Golf Club in the northern part of this sub-section featuring within the Order Limits, with the remaining fields dedicated to the growing of arable crops. The field boundaries here are the following: hedgerows, treelines, ditches, roads, shrub, fencing, various parts of golf club infrastructure, and park land at Maple Park (Plate 801 to Plate 816).

Plate 801 Arable crop field south of Stanford Road, looking south-west

Archaeological Features

Known Heritage Assets

2.8.24 No known heritage assets were witnessed during the walkover survey.

Unrecorded Heritage Assets

2.8.25 There was a linear depression in a north-west to south-east alignment (Plate 817) in an arable field west of Buckingham Hill Road. This was seen in a field which was noted in the HER to have undated linear and undated features.

2.8.26 No other unrecorded heritage assets were noted during the walkover survey.

Plate 817 North-west to south-east linear depression, looking south

Modern Disturbance

2.8.27 Possible boreholes were seen in an arable field north of Muckingford Road (Plate 818).

2.8.28 No other modern disturbances were observed during the walkover survey.

Plate 818 Possible boreholes

1 Scoped Out Listed Buildings

1.1.1 In accordance with the methodology presented in the EIA Scoping Report (document reference 6.19) and agreed through the EIA Scoping Opinion (document reference 6.20, with relevant updates following consultation with stakeholders, listed buildings have been scoped out if:

- The buildings are beyond the 250 m Study Area and are outside the ZTV. at this distance from the Project the only change to setting is likely to be visual and therefore a lack of visibility of the Project would mean that it can be reasonably concluded that no change to setting would occur
  - These are identified in the table below
- Buildings that are of a type that have a restricted setting due to their inherent characteristics. This group includes, but may not be limited to milestones, signposts or way makers, drinking fountains, pump heads, icehouses, and gravestones /markers/ tombs within churchyards
  - These are identified by their building type in the table below
- Buildings that are located within settlements and do not have settings that extend beyond the urban area and where the Project does not introduce new infrastructure into this setting. This requires a rapid assessment to check that any buildings in this category with settings that extend to the Project are included in assessment. This has been undertaken based on a building's location (supported by review of current mapping and aerial imagery). It was assumed that domestic buildings, shops, public houses have settings that are informed by their settlement location and do not extend beyond this, except were demonstrated otherwise by location information. This also includes buildings located within conservation areas
  - These are identified by the name of the settlement in which they are located in the table below
- Buildings that are separated from the Project by other major infrastructure (e.g., motorways, major dual carriageways, active mainline railways, major urban areas) where it can be reasonably concluded that the infrastructure was a pre-existing barrier that the setting of a building would not extend beyond
- Buildings that are separated from the Project by the existing Bramford, Norwich Main and Tilbury Substations as these structures already have a notable influence on the setting of assets that the addition of overhead lines beyond does not create appreciable change. Cumulative likely significant environmental effects are assessed in Chapter 17: Cumulative Effects Assessment (document reference 6.17).

2 Listed Buildings Included in the Baseline Report but Scoped Out of Assessment in the ES

2.1.1 In accordance with the methodology presented in the EIA Scoping Report (document reference 6.19) and agreed through the EIA Scoping Opinion (document reference 6.20) for the Project, any other listed buildings (not already scoped out for one of the above reasons) would be scoped out of assessment in the Environmental Statement (ES) (Volume 6 of the Development Consent Order (DCO) application) where it has been identified that their settings do not extend to the Project and therefore there would be no potential for impact. This is identified through the assessment of setting and value in this Historic Environment Baseline Report, and where identified, these buildings are not taken forward for impact assessment in Chapter 11: Historic Environment (document reference 6.11).

Table A11.1.9 Listed buildings included in the baseline report but scoped out of assessment in the ES – Section A
