Subject: Wildlife near bore hole

Interested party number [REDACTED]

Name: Catherine Hill
Address : [REDACTED]

I am adding to my objections for the overhead Pylon proposal close to my home and Remus Animal Sanctuary.

Last night my partner was walking our dog and right next to the NG bore hole he saw a badger, we are going to monitor this as not only are NG causing stress to animals in the Remus animal sanctuary, they are threatening the surrounding nature.

We have tried to talk to them and get a meeting with Remus Animal Sanctuary but have had no response.

We were not informed they were doing bore holes with access down our private track until they left their cones out.

NG do not interact , their sub contractors turn up and have to take the brunt of unhappy residents and landowners.

Please will you look into this for me, I am happy to present my case at any hearing.

Jonathan and I are just looking to protect the nature around , whilst we realise the need for more electricity , underground or in an ideal world offshore would be far more friendly.

Kind regards

Catherine
