

This is in support of the PylonsEastAnglia submission of 21.07.26. We are attempting to avoid or mitigate very serious damage to the countryside, natural resources, historic environment, wildlife and inhabitants who will be affected by this inferior proposal. Alternatives by very capable professionals have been proposed and it is important that those in government consider them objectively, rationally and responsibly. To date, we can see no advantage and many, many pitfalls in the scheme being advanced for approval.
