

The Parish Council of Holton St Mary (HSM) has made several attempts to have meetings with National Grid (NG) about moving the proposed haul road from the Four Sisters junction with the A12 further north with detailed reasons for it to be done. It also has made detailed representations to the Inspectorate through the Examination process. [REDACTED], the project director was sent a copy of the Parish Council request to his email address at NG as was the Chief Executive of NG.

No consultation or any other response to these requests has occurred.

This must be addressed by both the Examiner and NG. HSM is severely affected by this project and the Parish Council has proposed a plan that would greatly mitigate the impact of it on the environment and on the wellbeing of the residents of the village.
