

My final comments on this application leave me feeling very despondent with how my husband and I have been totally ignored. No points raised have been answered constructively with any suggestions raised by us listened too at any point. Our family farm is going to be cut straight through the middle with the proposed route and you are taking out our main growing field, our income and even through our home driveway and financially ruining us. We have tried to ask you to move the said line to make it more manageable yet you've never listened, we've asked to mitigate problems with having to underground existing lines and have not wanted you taking access to our HOME driveway for 7 years yet you've done nothing but literally bully us and then say we may help you with what you've asked but basically you will have to sign and then we have rights to change our mind and not help at all. You lied about intrusive survey access and tried to pay us and carry on regardless and when we spent days chasing and sending emails to you we were just ignored. You have no regard for the 3 YEARS of stress you've given us and [REDACTED] from that. You literally DO NOT CARE! We have begged to be listened to REALLY listened too and for you to choose undergrounding especially in our area as Tibenham airfield and Priory Farm fly over our farm too yet you have no regard to ruining our livelihood, home and income and no regard to put lives at risk from flying so closely to the giant pylons, you really could not care less. PLEASE inspectorate there has to be a better way than literally destroying so many people's lives, how can this be allowed to happen and for people to be left with destroyed businesses, homes and lives.
