

NG have only ever presented one option that destroy wildlife habitats forever and ruin people's lives forever. No care has been given to people whose homes are unsalable now and if saleable at all in the future decreased in value. So many of the questions raised by Parish Councils remain unanswered. Including for instance where is the budget for repairing the roads that will be ruined by the proposed extra traffic. NG employees have been disgustingly proud of themselves for "delivering a project" - all over social media. Further highlighting it is just a project to them. Totally tone deaf that they laud the project milestones, ignoring that they have failed to reply to most objections.
