Eden Renewables (Cressing Sheepcote Solar Farm)

Draft-Statement of Common Ground

1. Purpose of the Statement of Common Ground

This Statement of Common Ground (SoCG) has been prepared to ~~outline the areas of~~ confirm to the Examining Authority where agreement ~~and any remaining points of discussion has been reached and where agreement has not been reached~~ between National Grid and Eden Renewables regarding specific issues arising during construction and/or operation from the interface between the proposed Norwich to Tilbury Project (the Project) and Cressing Sheepcote Solar Farm.

~~The aim is to clarify the shared understanding of any issues and facilitate an efficient resolution process.~~

It should be noted that the Sheepcote Solar Farm is being progressed by Eden CF Solar Limited which is a subsidiary company of Eden Renewables. Where Eden or Eden Renewables are referred to in this SoCG it should be read as reference to Eden CF Solar Limited unless otherwise stated.

This final version of the SoCG has been submitted at Examination Deadline 7.

2. Parties to the SoCG

This SoCG ~~is agreed between~~ has been prepared by National Grid (the Applicant) and Eden Renewables.

3. Summary of ~~matters under discussion~~ Matters

This final SoCG deals with 11 matters in total, of which 7 are agreed and 4 are not agreed.

Any matters raised in this SoCG, whether agreed or not agreed, does not preclude Eden Renewables from their rights under the Compensation Code or relevant statutory provisions.

~~As requested by the Examining Authority, the below table provides an 'at a glance' summary of matters which are under discussion, together with a deadline by which such matters are expected to be resolved.~~

SoCG ID	Summary of matter under discussion	Deadline for resolution
(31	Eden Renewables are seeking a side-	Will likely be resolved-

~~agreement to capture protection measures and —after deadline 7 compensation~~

4. Background

4.1 Description of the Project/Development

National Grid Electricity Transmission pic ('National Grid') owns and maintains the national high voltage electricity transmission network throughout England and Wales. The transmission network connects the power from where it is generated to the regional Distribution Network Operators who then supply businesses and homes.

National Grid holds the Transmission Licence for England and Wales, and its statutory duty is to develop and maintain an efficient, coordinated and economical system of electricity transmission and to facilitate competition in the generation and supply of electricity, as set out in the Electricity Act 1989.

National Grid has developed plans for Norwich to Tilbury (referred to as the 'Project'). The Project would support the UK's net zero target through the connection of new low carbon energy generation in East Anglia and by reinforcing the transmission network.

The Project comprises reinforcement of the transmission network between the existing Norwich Main Substation in Norfolk and Tilbury Substation in Essex, via Bramford Substation, the new East Anglia Connection Node (EACN) Substation and the new Tilbury North Substation.

The reinforcement is needed because the existing transmission network, even with current upgrading, will not have sufficient capacity for the new renewable energy (a substantial proportion of which would be generated by offshore wind) that is expected to connect to the network over the next 10 years and beyond. Completion of the Project, together with other new reinforcements across the country, will meet this future energy transmission demand both in East Anglia and across the UK.

The Project is a Nationally Significant Infrastructure Project (NSIP), and National Grid is seeking development consent under statutory procedures set by government. NSIPs are projects of certain types, over a certain size, which are considered by the government to be of national importance, hence permission to build them needs to be given at a national level, by the relevant Secretary of State (in this case the Secretary of State for Energy Security and Net Zero). Instead of applying to the local authority for planning permission, the developer must apply to the Planning Inspectorate for a Development Consent Order (DCO) that would grant development consent.

National Grid has submitted an application for development consent to the Planning Inspectorate. The Examining Authority (consisting of five examining inspectors), after a period of public examination, will make their recommendation to the Secretary of State for Energy Security and Net Zero, who in turn will decide on whether development consent should be granted for the Project.

The Project is identified as critical to delivering a network which supports the clean power pathways for 2030 delivery.

www.nationalgrid.com

nationalgrid

The Planning Act 2008 places duties on National Grid as the DCO applicant to consult with prescribed or affected persons as well as to take account of responses to consultation and publicity. In accordance with these statutory requirements, National Grid has undertaken two non-statutory and one statutory consultation to inform its proposals, with further targeted consultations.

~~Further details of the Norwich to Tilbury proposed DCO can be found on our project website.~~

5. Stakeholder Interests

Eden Renewables has ~~been in correspondence with National Grid over~~confirmed the potential interaction with the ~~Norwich to Tilbury proposals~~Project. This has been identified as the ~~Cressing Sheepcote~~ Solar Farm, southwest of Cressing Temple, Witham Road, Cressing. The ~~proposals understood~~proposal was described in planning application 24/02673/FUL as: *Solar Farm with up to 13.8MWac of export capacity, comprising the installation of solar photovoltaic panels and associated infrastructure including customer substation, DNO substation, inverter and transformer substations, customer cabin, spare parts container, storage containers, maintenance tracks, fencing, security cameras, landscape planting, swales and associated works including grid connection.* The site secured planning permission from Braintree District Council in ~~January~~June 2025 ~~via application 24/02673/FUL~~. The connection date for the project is ~~not yet confirmed~~30 June 2027.

~~National Grid is seeking to ensure that the interests of both parties and how they may be affected by the interaction are understood. From this position the aim is for the parties to agree actions to avoid or reduce the implications and for any remedial measures to be agreed. On this basis we seek the input from Eden Renewables to demonstrate how their interests may be affected, how Eden Renewables or National Grid and its contractors can collectively reduce those effects and input to agree the implementation of such measures.~~

6. Engagement History

The chronology of ~~National Grid's~~the Applicant's engagement with ~~the~~Eden Renewables to date, and the evolution of the Project's design is summarised as follows:

- Non-statutory consultation: April - June 2022 (graduated swathe)
- Non-statutory consultation; June - August 2023 (draft alignment)
- Statutory consultation: April - July 2024
- Landowner consultation; June - July 2025

~~Teams Meeting Date: 2 December 2024, 24th February 2025, 6th May 2025~~

- Teams Meeting Dates:
 - 2 December 2024
 - 24 February 2025
 - 6 May 2025

- 6 March 2026

- 24 April 2026

<—The parties ~~continue~~continued to engage during the examination through regular email correspondence in relation to the matters described in this Statement of Common Ground.

7. S Matters Agreed

ID	Issue	Agreement reached	Date agreed	Relevant documentation
<u>6r4-7</u> <u>1</u>	Permanent loss of development footprint	The Applicant has re-confirmed in the meeting held 6th 6 March 2026 that there is no perceived loss of <u>will be no need to remove</u> PV panels at <u>Sheepcote Solar Farm</u> as part of the Norwich to Tilbury Project upon <u>Cressing Solar Farm</u> . Therefore, the PV arrangement will remain unaffected with no loss of generation by <u>the Project</u> . Eden Renewables understand that no permanent loss of footprint will arise from the Applicant's asset placement on current design.	6 ^m 6 March 2026	2'1/02673/FUL- planning- application with- Braintree District- Council on- behalf of Eden- CF Solar <u>UdvFigure 1</u>
6.27. <u>2</u>	Temporary Removal <u>removal</u> of Raaels <u>panels</u> to create space for construction works	Both parties understand and agree that there will be no need for removal of PV panels during construction <u>of the Project.</u> <u>The Applicant has confirmed that its construction haul road will be on land to the southeast of Sheepcote Solar Farm.</u>	6 ^m 6 March 2026	
6.3	Modifications to Existing Equipment	The Applicant recognises Eden Renewables' concerns in relation to potential earthing implications of the Project on the stakeholder's solar development. Where additional earthing is required as a result of the project, the Applicant will work with stakeholders to ensure sites are protected. The Applicant has commissioned a report to screen the site for impact from the OHL. It won't be possible to finalise assessment of earthing requirements until the detailed design is further progressed. Any earthing interaction and coupling studies will be compliant with BS-	6th March 2026

nationalgrid

ID	Issue	Agreement reached	Date agreed	Relevant documentation
EN 50522, ENA TS 11-21 and the relevant national and NG OHL design standards IEC 61936-1 and IEEE 80.-				
6r4L 2	Temporary Construction Effects	Both parties agree that as the tower will be located in the far south away from and PV panels and the haul road comes from the same direction- that there will be no interaction during construction there will likely be <u>limited interaction between the solar PV site and the Applicant's construction area. This is because the Applicant's construction haul road will be on land to the southeast of Sheepcote Solar Farm.</u>	6 ^m 6 March 2026	
6.57. 4	Permanent OHL Access Route	The Applicant has confirmed this route is for small (<u>from the solar farm site access off the B1018 Witham Road, around the Cressing Farm Equestrian Centre, along the track initially through the tunnel under the railway line and then adjacent to the southern field of the Sheepcote Solar Farm on its east side</u>) will be used to reach the pylon and the overhead line, and will be for <u>small maintenance</u> vehicles and personnel and not for large scale <u>any</u> construction vehicles. Both parties agree not to block the others access and acknowledge each will need access 24/7 through the tunnel, subject to having easements from Network Rail.	6th 6 March 2026	
<u>7.5</u>	<u>Construction Working Group</u>	<u>Both parties agree that ongoing coordination during the construction phase will be required. A construction-phase coordination mechanism, such as a working group, will be established to facilitate communication and to manage interactions between the Project and the solar PV facility, including matters such as access, outages, and maintenance activities. The Applicant will provide a named point of contact for the construction contractor.</u> <u>The scope and operation of this coordination mechanism will be agreed between the parties ahead of construction as part of an interface</u>	<u>July 2026</u>

		<u>agreement.</u>		
<u>L 6</u>	<u>Continued engagement and collaboration to minimise impacts</u>	<u>The parties acknowledge the interfaces between their projects. The parties will continue to engage to coordinate these interfaces, minimise impacts where reasonably practicable, and ensure appropriate mitigation, protection measures, and reinstatement are secured through detailed design and construction.</u>	<u>July 2026</u>	
<u>7.7</u>	<u>Heads of Terms leading to a legal agreement</u>	<u>The parties will be negotiating Heads of Terms as the basis of a legal agreement. The legal agreement will secure the commitments and arrangements both parties are agreeing to manage interfaces.</u>	<u>July 2026</u>	

8. T Matters ~~Currently Under Discussion~~ Not Agreed

ID	Issue	National Grid Position	Stakeholder Eden <u>Renewables</u> Position	Status	Relevant- documentati on
<u>A48</u>	Securing Mitigation Measures and Compensation Arrangements	The Applicant notes Eden Renewables' request for a side agreement to address compensation and the delivery of any required protection measures. The Applicant has confirmed within the SoCG that it will compensate for reasonable associated costs where mitigation is required. The Applicant will continue discussions with Eden Renewables regarding the scope of any additional agreement, including the circumstances under which a side-agreement may be appropriate <u>subject to the compensation code. See matter 7.7 above regarding a legal agreement.</u>	Eden Renewables response taken from Email received 30th April: Although it is positive that NG has confirmed in the draft <u>this</u> SoCG that it will "compensate for reasonable associated costs" if there is a need for additional protection at the Sheepcote Solar Farm, this document <u>the SoCG</u> on its own would not secure the provision and installation of the protection measures nor compensation for the potential loss of income from the generation and sale of electricity and any associated costs during any modification works. I have therefore spoken to our solicitor (Stephen-Hiimhrp/Q of A^ghforlQ - who 1 h.o/v/p coped into this email) since our call last Friday and he has advised that we should progress a s de agreement on this matter before we progress the	To be- Discussed <u>Sub</u> <u>feet to</u> <u>ongoing</u> <u>discussion</u>

			SoCG. We are aware of the final deadline in July and consider there is sufficient time between now and then to agree such a document. <u>This requires a separate legal agreement between the Applicant and Eden which the Applicant has stated it will progress with Eden-</u>		
8.2	<u>Earthing implications of the Project on Eden's solar development.</u>	<u>The Applicant's specialist consultants have completed an initial earthing screening study. The conclusion of this early screening assessment was that earthing protection may be required at the Eden Renewables site, but this would need confirmation through more detailed information that would be subject to more detailed review. To progress this more detailed review, the Applicant requests detailed information of the earthing arrangements at the Eden Renewables site, including earthing layout drawings, any existing earthing study report and the earthing model file (if available). This will allow</u>	<u>Eden needs more clarity on this issue as, to date, it does not have a complete picture on the potential impacts from the earthing works required and how these might affect its site. Eden is content to explore these impacts further subject to the Applicant providing sufficient clarification.</u>	<u>Subject to ongoing discussion</u>
