

I feel totally let down by the process. Living in Ardleigh as one of, if not the most impacted villages along the route, I do not feel we have been heard or had the opportunity to discuss alternatives. Being told there was no suitable premises to hold consultation meeting in the village was simply scandalous. Our property values will be decimated, the landscape scarred and left with much of the village encircled by enormous pylons. I personally will have pylons on two sides as the route diverts nearby. Pylons higher than the village church they run alongside and close to a primary school. These structures are dated. We've not been listened to and NG have not looked at better options.
