1. Introduction

1.1 Overview

- 1.1.1 National Grid Electricity Transmission plc ('National Grid') owns and maintains the national high voltage electricity transmission network throughout England and Wales.
- 1.1.2 The transmission network connects the power from where it is generated to the regional Distribution Network Operators who then supply businesses and homes.
- 1.1.3 National Grid holds the transmission licence for England and Wales, and its duty is to develop and maintain an efficient, coordinated and economical system of electricity transmission and to facilitate competition in the generation and supply of electricity, as set out in the Electricity Act 1989.
- 1.1.4 National Grid has developed plans for Norwich to Tilbury (referred to as the 'Project' in this report). The Project would support the UK's net zero target through the connection of new low carbon energy generation in East Anglia and by reinforcing the transmission network
- 1.1.5 The Project comprises reinforcement of the transmission network between the existing Norwich Main Substation in Norfolk and Tilbury Substation in Essex, via Bramford Substation, the new East Anglia Connection Node (EACN) substation and the new Tilbury North substation.
- 1.1.6 The reinforcement is needed because the existing transmission network, even with current upgrading, will not have sufficient capacity for the new renewable energy (a substantial proportion of which would be generated by offshore wind) that is expected to connect to the network over the next 10 years and beyond. Completion of the Project, together with other new reinforcements across the country, will meet this future energy transmission demand both in East Anglia and across the UK.
- 1.1.7 The Project is a Nationally Significant Infrastructure Project (NSIP), and National Grid is seeking development consent under statutory procedures set by government. NSIPs are projects of certain types, over a certain size, which are considered by the government to be of national importance, hence permission to build them needs to be given at a national level, by the relevant Secretary of State (in this case the Secretary of State for Energy Security and Net Zero). Instead of applying to the local authority for planning permission, the developer must apply to the Planning Inspectorate for a Development Consent Order (DCO) that would grant development consent.
- 1.1.8 National Grid has submitted an application for development consent to the Planning Inspectorate. The Examining Authority (consisting of one or more examining inspectors), after a period of public examination, would make their recommendation to the Secretary of State for Energy Security and Net Zero, who in turn would decide on whether development consent should be granted for the Project.
- 1.1.9 The Project is identified as critical to delivering a network which supports the clean power pathways for 2030 delivery.

1.2 Purpose of this Document

- 1.2.1 This Guide to the Application summarises the structure of the Application for the Project. Its purpose is to provide an overview of the application structure and principal contents within each 'volume' of documents shown in Figure 1.1.
- 1.2.2 The Master Document List in Section 3 is intended to be updated as the examination of the application proceeds so any updates and revisions to application documents are captured in an easy-to-comprehend way.

1.3 Application Documentation

- 1.3.1 Due to the size and scale of the application, the supporting documentation has been grouped into volumes which correspond with the Planning Inspectorate's suggested categories for application documents. There are seven different volumes as shown in Table 1.1.

- 1.3.2 Each volume has been colour-coded for ease of reference. The corresponding colour is displayed on the cover of each document within this Application to convey the volume it forms part of. The content of each volume is described in Section 2 of this document.

1.4 Document Referencing

- 1.4.1 The structure of references and numbering within this Guide to the Application is based on the Planning Inspectorate's Nationally Significant Infrastructure Projects: Advice on the Preparation and Submission of Application Documents, specifically in Annex A, published in August 2024, and does not reflect all of the modifications or updates introduced in the January 2025 version. Due to the nature of the Project, there are a number of gaps in the sequencing where certain documents outlined in the guidance were not applicable to the Project. In these instances, '*document numbers not used*' is stated within this guidance document.
- 1.4.2 Each submission deliverable has its own individual document reference number to help the reader navigate the application documents. The documents submitted follow a consistent referencing format, e.g. 1.1, 1.2, 4.1, 4.2. A visual example of this referencing format is provided by Figure 1.1.
- 1.4.3 In some instances where a further level of distinction is required, an additional number may be used. For example, due to the number of Statements of Common Ground, an additional number is used. The numbers for the Statements of Common Ground range from 5.9.1. to 5.9.32. An example of this is represented visually by Figure 1.2.
- 1.4.4 Some documents, such as drawings, have a two-digit reference number but include multiple sections, for example the number 2.4 covers the 'Traffic Regulation Order Plans' but with each section assigned a letter A-H.
- 1.4.5 Each chapter of the Environmental Statement may have its own appendices or figures and these are allocated an 'A' or 'F' number. For example, Appendix 1.1: Competent Experts Evidence of Chapter 1 of the Environmental Statement is allocated the reference 6.1.A1. A visual example of this layout is shown by Figure 1.3.
- 1.4.6 All documents will be submitted as Revision (A), with updated documents identified as Revision (B), (C), (D) etc. and will supersede documents previously submitted by the Applicant.
- 1.4.7 Table 1.2 and Figure 1.1 to Figure 1.3 provide an example of the document referencing system.

Table 1.2 Document Referencing

Description	
Volume	Documents are grouped into a 'volume' of related documents with similar themes. The examples shown by Figure 1.1 and Figure 1.3 is Volume 6 covering the 'Environmental Statement'. Each Volume is colour coded for easy navigation. Figure 1.2 shows an example from Volume 5 'Reports and Statements'
Document Title	Each document has a document title that corresponds with a particular document reference number. The examples shown by Figure 1.1 and Figure 1.3 are taken from the Environmental Statement.

Description	
Document No.	Each document has a unique two-digit reference number for navigation, the example shown by Figure 1.1 is '6.1'. The first digit identifies the volume to which the document relates, the second to the document itself. In some instances where a further category is required, a third number may be used, shown by Figure 1.2.
Figures & Appendices	Some documents have additional appendices that accompany them, these are allocated a letter A, B, C etc. Figures and appendices that support the Environmental Statement are allocated an A or F number. An example of this is shown by Figure 1.3.

Master Document List and Revision History

Table A.1 below provides a full list of application documents submitted to date. The below table will be used as a 'living document' during examination, capturing all updates and revisions to the application documents. For ease of reference the documents are grouped by volumes and colour coded accordingly. The Planning Inspectorate (PINS) reference column in Table A.1. below will not be populated until this document is updated during examination, as these references only become known following submission of the Application. All application documents are revision number (A) at submission and will be updated accordingly if revisions are required during the examination. The document numbering has been prepared in accordance with the *Planning Inspectorate's Nationally Significant Infrastructure Projects: Advice on the Preparation and Submission of Application Documents*, specifically in Annex A, published in August 2024.

Documents not highlighted are the latest version.

Documents greyed out have been superseded.
