

My suggested locations are as follows:-

1. Hillhouse Enterprise Zone at Stanah. The justification for a site inspection here is to enable the inspectors to assess the size and suitability of the site together with the much shorter cable route.
2. Hillock Lane, Freckleton. Due to its unsuitability to take the increased traffic, specifically HGVs. Also the impact on businesses, i.e. Rowan Vets, Margaret Mason and Helical Technology
3. Lower Lane, Freckleton. Again due to its unsuitability to take increased traffic, specifically HGVs and being used by parents during school run times. Also the cumulative impact of construction of the proposed solar farm at Newton.
4. All three local schools - Strike Lane, Carr Hill and Newton Bluecoats because of the impact on schoolchildren and local traffic.
