

[REDACTED] is our family home and we would welcome our attendance in order to point out our issues with the proposed Morgan Project A Substation site and associated proposed permanent access road from Lower Lane. We also wish to be available to answer any questions or clarification that the ExA may have in this respect

We are a family farming business living at [REDACTED] which is our farm business and home. We would welcome a site inspection of [REDACTED] which is directly affected by the Morgan Substation site, mitigation areas, permanent access required from Lower Lane and A583, temporary working areas which is important to visualise the impact the Project will have to our property and business
