

Submission ID: 36840

Response to REP2-059 Lancashire Association of Local councils Energy Committee lines 17-18. When I requested information from NGET under an FOI I did not ask for any detail and was satisfied with a speedy response (see REP1-117).

The assertion that "NGET was unable or unwilling to show any complete and consistent comparative assessment against relevant criteria" is an unfair retrospective one, and a mischaracterisation of what they were asked to provide. I am a lay resident - technical aspects are for the professionals.
