

With reference to the fyle m and m project.

Access routes chosen are inappropriate and dangerous. The roads are narrow without footpath used by pedestrians and especially school children

The project is going to obliterate wildlife. Given the project is meant to be environmentally. Sound. It will destroy landscape and farming for decades to come.

Tourism which is the life blood of this area will be destroyed and may never recover.

Most importantantly the substations are enormous and located extremely close to residential properties and schools. The noise that these 'factories' will emit will have a detrimental effect on their physical emotional psychological and educational development and this will be an issue which will impact them for generations.
