Dear «Salutation»

EN020028 – Morgan and Morecambe Offshore Wind Farms: Transmission Assets

Morgan and Morecambe Offshore Wind Farms: Transmission Assets project: Change Request consultation closing soon

We are writing to notify you, in your capacity as a person with an interest in land, of the proposed changes to the Order Limits for the Morgan and Morecambe Offshore Wind Farms: Transmission Assets Project which are referred to as the Change Request.

If you have already taken part in this Change Request consultation for the Morgan and Morecambe Offshore Wind Farms: Transmission Assets project, we would like to take this opportunity to thank you for your feedback.

If you are planning to take part in this consultation, this is a reminder that the consultation will be closing at **5pm on Friday 12 September 2025**.

Visit our website: <https://morecambeandmorgan.com/transmission>

Within the [information hub](#), you can find more information and access all of the materials as part of this Change Request consultation. This includes the [Change Request Report](#), which contains detailed plans and information on the proposed changes.

How to respond

There are several ways you can provide feedback:

- Send an email to info@morecambeandmorgan.com
- Write to FREEPOST MORECAMBE AND MORGAN

If you have any questions regarding the consultation, the information contained within this email or if you have any issues viewing any of the materials or information online, please contact us by calling 0800 915 2493 (option 3) and we would be happy to assist. The project team are also available to discuss the proposed changes with you in more detail upon request.

If you wish to discuss your land interest/s more specifically, then please contact our land agent team, Dalcour Maclaren, by email at: morecambeandmorgan@dalcourmaclaren.com or by calling: 0333 188 5374.

Yours faithfully

Morgan and Morecambe Offshore Wind Farms: Transmission Assets project

Morgan and Morecambe Offshore Wind Farms: Transmission Assets

Notification of changes to the Morgan and Morecambe Offshore Wind Farms: Transmission Assets

We emailed on Monday 11 August to notify you, as an interested party, of the proposed changes to the Order Limits for the Morgan and Morecambe Offshore Wind Farms: Transmission Assets Project, which are referred to as the Change Request.

Unfortunately, it has since come to our attention that the email address we used to contact you was no longer valid.

We are therefore re-sending this email with our apologies for the error. To ensure you are given sufficient time to respond to the Change Request consultation, we are extending the deadline for the North West Ambulance Service NHS Trust to 5pm on **Friday 19 September**.

Background to Change Request

Throughout the Examination we have continued to refine our proposals, and this has resulted in the need for some small and localised changes.

Attached to this email is a [copy of the notice](#) that includes a summary of the proposed changes and how you can have your say.

This notice, as well as further information and documentation can be viewed and downloaded free of charge from the Project website: www.morecambeandmorgan.com/transmission.

Within the [information hub](#), you can find more information and access all of the materials as part of this Change Request consultation. This includes the [Change Request Report](#), which contains detailed plans and information on the proposed changes.

You may also access the documents online at accessible venues in the vicinity of the proposed changes. Please refer to the notice for more information.

Updates Made

In summary the proposed changes are shown on the plan [here](#), and include:

1. a change in the B5410 road alignment affecting a proposed construction access and a proposed operational access; and
2. a reduction in the Order Limits as part of ongoing engagement with Blackpool Airport Operations Limited ('BAOL') and Blackpool Airport Properties Limited ('BAPL') (through Blackpool Borough Council as the main shareholder of BAPL) and with Lytham Town Trust, Fylde Borough Council and St Annes Football Club in relation to the use of Blackpool Road

Recreation Ground.

How to respond

We are welcoming comments on the changes as part of this consultation which is now open and for the North West Ambulance Service NHS Trust will close at the revised time of 5pm on Friday 19

Please ensure that responses are submitted on or before this time and, if using the freepost option, leave time for the response to arrive by this date.

You can submit your comments by:

Email: info@morecambeandmorgan.com

Post: FREEPOST MORECAMBE AND MORGAN

If you have any questions regarding the information contained within this email or if you have any issues viewing the notice or information online, please contact us by calling 0800 915 2493 (option 3) and we would be happy to assist. The project team are also available to discuss the proposed changes with you in more detail upon request.

Kind regards

Please can you advise of vehicle & public footpath for all residents of The Hawthorns, Whitethorn Mews & Linden Mews should proposal go ahead. It is not clear on your correspondence - also please advise of vehicle access should the emergency services be required. If you could resubmit plan drawing to residents highlighting the said asked.

Thank you.

[REDACTED]

Appendix B.2

Response issued by Phil Morgan

(on behalf of Newton with Clifton and Freckleton Parish Councils)

Dear Morgan and Morecambe

On Wednesday 20th August I sent the below email on behalf of TASC, a group of 8 Town and Parish Councils and the Newton Residents Association. This was picked up by your team working with us on the Statement of Common Ground and discussed at our last meeting. At that meeting they said all was made clear in their Change Request Report. They also said people could email or ring with any queries.

The Change Request Report is 76 pages long. It is neither simple nor accessible, and doesn't offer a plain English straightforward summary of what is proposed. In fact it is one of 26 documents prepared by M&M, none of which are comprehensible to the public, and offer no information by which the public could engage with the proposed changes.

We have discussed the situation with St Annes Town Council who share our concerns.

Therefore TASC are formally objecting to the proposed changes on the grounds that the consultation was not accessible and didn't allow meaningful understanding or informed engagement with the proposed changes. Because M&M have failed to heed our concerns there is now insufficient time to consult on these changes properly before the end of the examination and so the project should remain as it is or be resubmitted in its entirety.

During that discussion I did ask about the proposed partial closure of Leach Lane. M&M now say that Liz Dunn, for M&M, made a mistake and instead there will be some traffic control measures, such as traffic lights, in place for the duration of the works. It is unclear if local residents have been made aware of this and we ask that the Town Council be consulted before any measures were implemented.

Phil Morgan

Chair TASC

Vice Chair Newton with Clifton Parish Council

On Behalf of Newton with Clifton and Freckleton Parish Councils

Email sent 20th August

During the last set of hearings I raised concerns about the proposed changes from the applicant. This was captured in the below extract from our submission for Deadline 4:

"The proposed changes to the application, which themselves seemed subject to further change, would not be ready until near the end of the examination and there would not be time for proper consideration of them within the examination. This is unacceptable. It is clear that the application was made prematurely before many significant issues had been tackled, never mind resolved, including bird strike risk in particular.

In particular we noted that changes involving Leach Lane have been proposed in advance of any consultation with local residents and the documents concerning the changes were incomprehensible. We are pleased that the ExA agreed with our points that the consultation should be meaningful and allow local residents to engage on an informed basis, and their recent direction that consultation take place over 32 days."

The proposed changes have now been submitted for consultation. However the concerns we raised at the hearing, namely that the documents shared were incomprehensible, have not been addressed. What we have does not make any sense to local residents and seems designed to minimise responses by not explaining the impact of these changes (including on the proposed partial closure of Leach Lane shared by the applicant at the last Open Floor Hearing). These concerns are shared by St Annes Town Council, a TASC member.

Therefore this is a complaint about your approach to the consultation. We would ask you to review the consultation documents and ask for any changes required to enable a fair and informed consultation over 32 days with local residents and stakeholders in line with the Examining Authority's direction.

Best wishes

Phil Morgan

Chair TASC

Vice Chair Newton with Clifton Parish Council

On Behalf of Newton with Clifton and Freckleton Parish Councils

Dear Morecambe and Morgan,

I am resident of [REDACTED] and have concerns regarding your proposed construction works relating to the Morgan and Morecambe Offshore Wind Farms Transmission Project. I am specifically concerned about The Hamlet (being the only access road to my residence), the road junction at Leach Lane and Blackpool Road North (being the only route into St Annes or towards the M55), and the impact of noise pollution and environmental pollution on Blackpool Road Recreation Ground.

I would be grateful if you could please address the following points:

Throughout the works, will I be able to drive through The Hamlet onto both Leach Lane and Blackpool Road North? What traffic measures will be in place - for example will there be any temporary traffic lights?

When is work anticipated to commence on: a) The Hamlet; b) Leach Road; c) Blackpool Road North and d) Blackpool Road Recreation Ground? How long is work anticipated to take?

In plain English, what will these works consist of?

Will Blackpool Road Recreation Ground be accessible on foot during the works, for its usual use as a Recreation Ground?

I note the development consent order would also authorise the compulsory acquisition of land - will you look to exercise these rights over my property at 17 Linden Mews, or any neighbouring properties?

I look forward to hearing from you.

Kind regards,

Laura Else

Dear Morgan and Morecambe

Your recent Change Request Report published here:

[S MMCR 3 MMTA Change+Request+Report F01.pdf](#) is 74 pages long.

It is neither simple nor accessible, and doesn't offer a plain English straightforward summary of what is proposed and how these vary from the original proposals. The document makes no sense to me what so ever.

I have family who live in the St Annes area and none of the documents are comprehensible to me or my family and they offer no information by which we can engage with the proposed changes.

The end of the consultation period (12 September) is not made clear either, as it is hidden on page 34.

Please consult with the community on what you plan to do more clearly and tell us how access to our homes and businesses will be impacted by your revised proposals

.

Kind regards

Angela Esslinger

Subject: Response to recent proposed changes re M&M wind farm cable route

For the attention of Morecambe and Morgan.

I would like to comment on the proposed changes to the Morecambe wind farm cable transmission route that have recently been submitted.

I have, as an older resident with a range of disabilities not had sufficient time to adequately examine and respond to these proposed changes. The extensive documents that have been shared in relation to these are long, inaccessible and not written in plain English.

This repeated habit of sharing long incomprehensible documents to be responded to in a ridiculously short timescale once again demonstrates that this entire consultation process is being conducted in a discriminatory and unlawful manner.

All the submissions and the process being used to share, exam and consult on them, both on paper and in real life, have taken no account of the needs of local people and stakeholders with protected characteristics under the 2010 Equality Act, including those protected specifically because of their age, disability and/or sex.

I am therefore requesting that a full Equality Impact Assessment be carried out immediately to identify and remedy the extensive discrimination that has already occurred thus far and to create an action plan to eliminate any further discriminatory and negative impacts going forwards.

I'm additionally requesting that this consultation deadline be extended to allow for ALL local residents and stakeholders to examine these extensive materials, and draft informed responses within a reasonable timeframe.

Specifically, my request in this regard is that this particular phase of the consultation, relating to these additional changes, be extended from 12th September 2025 to 13th October 2025 and that the entire consultation be extended from the end of October 2025 to the end of January 2026.

I'm sharing this with the National Planning Inspectorate too.

Yours etc.

Dear Sirs/Madam,

I request that the proposed position of the cables be moved further over to the left of my land, closer to the small dirt road. This would allow me the possibility of a larger section of my land for future development.

The most common sense thing to do would be to use the small dirt road for the cables, which would then give me the majority of my land.

Subject: Objection to consultation document

Dear Morecambe and Morgan,

I wish to make an objection to the recent Change Request Report (document reference: S_MMCR_3) which was published on your website on 8th August. The fact that the document itself is 78 pages long is the first issue as most people do not have the time to properly read through this and understand it. The wording used in the document is not simple and straightforward, and in my opinion is designed in order to confuse anyone who is trying to read it. How on earth you expect to engage meaningfully with the people who are going to be affected by this is a mystery. To my knowledge most of the members of the local public are not even aware of the scale of the project in the first place and so expecting to have a meaningful consultation with anyone when faced with documents like this is going to be very difficult.

Regards

Michelle Fare

Appendix B.21

Response issued by Fylde Council

Morgan & Morecambe Transmission Cables Examination

IP Reference-20053931

September 2025

Response to Change Request Consultation

Introduction

Fylde Council [FBC] is a statutory consultee and Interested Party for the proposed Morgan and Morecambe Offshore Wind Farms Transmission Cables proposal.

This response has been prepared in response to the Applicants' consultation on the Change Request, for submission to the Applicants.

FBC has referred to the relevant Planning Inspectorate advice in preparing this response, the most pertinent being "Nationally Significant Infrastructure Projects: Changes to an application after it has been accepted for examination" (published on 8 August 2024 and last updated 24 March 2025) [the Advice].

FBC notes that the Examination Library has not been updated with the Change Request documents and therefore has been unable to use Examiner-defined references. Instead, FBC has used the numerical part of the Applicants' file name – e.g. the document "S_MMCR_17 Change Request Statement of Reasons - Rev F01" is referred to as [CR-17]. Whilst this could relate to either the tracked or clean version, this distinction is not relevant to this submission.

The Proposed Changes

FBC acknowledges that the proposed changes are as follows:

1. Relocation of Access TAT_MGMC_9 for both Morgan OWL and Morecambe OWL and Relocation of access OAR_MGMC_10 for Morgan OWL; and the provision of an additional construction access TAT_MGMC_9B for both Morgan OWL and Morecambe OWL;
2. Identification of Blackpool Airport operational access alignment through Work Nos. 10A10B, 12A12B and 14A14B;
3. Removal of operational access OAR_MGMC_3 from Squires Gate Lane into Blackpool Airport; and,

4. Reduction to Order limits within Blackpool Airport (Work No. 13A13B), Blackpool Road Recreation Ground (Work Nos. 15A15B, 53A53B and 54A54B) and to the east of the Queensway (Work Nos. 16A16B), and the relocation of Access TAT_MGMC_7 for both Morgan OWL and Morecambe OWL, and the removal of operational access OAR_MGMC_6.

Numbers one, three and four in the list are partly or wholly within the FBC area, with number two being within the Blackpool Borough Council [BBC] area. However, Strategic Policies EC4 and T3 of the Fylde Local Plan to 2032 (Incorporating Partial Review) [FLP] are relevant to the operation of Blackpool Airport and the associated Enterprise Zone, in turn meaning that altered access through that area is potentially of relevance to FBC.

On this basis, FBC provide comments in response to each of the proposed changes.

Description and Rationale

Section 1.2 of the Applicants' Change Request Report [CR-3] sets out the detailed description and rationale for each change.

Change 1 comprises the removal of two construction accesses and relocation of each to be up to 200m further north along Lytham St Annes Way, in order to align with the amended Order Limits. The new accesses would be within the cable corridors, whereas the original accesses would have been outside.

FBC accepts the rationale for Change 1.

Change 2 comprises the specification of the route for operational access taken from Leach Lane, with the access point onto Leach Lane and the work order limit being unchanged. FBC notes the Applicants' statement in Section 1.2.1.15 [CR-3] that these changes have been made in agreement with Blackpool Airport.

FBC accepts the rationale for Change 2.

Change 3 comprises the removal of an operational access from Squires Gate Lane into Blackpool Airport, on the basis that the access associated with Change 2 will be relied upon to deliver the relevant access instead.

FBC accepts the rationale for Change 3.

Change 4 comprises the reduction in the order limits both within Blackpool Airport and Blackpool Road Recreation Ground [BRRG]. Negotiations between the applicant and Blackpool Airport have resulted in agreement that the runway would be removed from the order limits, which has in turn limited the options for the alignment of the proposed cables in the nearby area, meaning that parts of BRRG do not need to be kept as an option for works. The Applicants also set out in Section 1.2.3.6 [CR-3] that the changes

have also been made following feedback received from FBC and St Annes Football Club.

FBC accepts the rationale for Change 4 only in relation to the Applicants' explanation of their interaction with Blackpool Airport. The implication that this change also positively responds to feedback received in terms of the impacts on BRRG is not accepted – this is discussed further below.

Impact

The Applicants' state and imply certain impacts and benefits which would arise from the proposed changes. These primarily relate to:

1. The reduction in the work order limits;
2. The removal of the runway at Blackpool Airport from the work order limits; and,
3. Positive response to feedback from FBC with regards to impacts upon BRRG.

FBC agrees with the first two points above. However, FBC does not agree with point three and the associated implications set out in Section 1.2.3.6 [CR-3].

FBC has made representations in each written submission and hearing session with regards to likely impacts at BRRG, notably raising serious concerns about the likely harmful impacts to human health. These would primarily arise from reduction of the availability and quality of sport facilities and activities, due to parts of BRRG being sterilised for construction activities.

The implication from the Applicants is that a reduction in the work order limits at BRRG would reduce the impacts on the operation of BRRG as a sport facility but this is not evidenced.

FBC considers it likely that the impacts of closure of parts of BRRG would go beyond the extent of the work order limit, due to operational and safety requirements on site.

FBC acknowledges that this issue is not directly relevant to the overall suitability of the Change Request but considers it is appropriate to respond to the content of the Applicants' Change Request Report [CR-3].

Relatedly, FBC notes that the Applicants do not anticipate any material change to the Environmental Statement, positive or negative, as set out in more detail below. Presumably this indicates that the Applicants' do not actually consider their suggested response to feedback is material or evidenced.

Environmental Impact Assessment

Based on the understanding of the proposed changes as summarised above and set out in detail within the Applicants' submission [CR-3], FBC accepts the Applicants'

position that the proposed changes would not result in any new or different likely significant environmental effects.

As such, it is accepted that changes would have no effect on the conclusions set out within the Environmental Statement and no additional mitigation measures will be required as a result of the proposed changes.

This position is made without prejudice to previous, ongoing and future submissions made by FBC with regards to the suitability of the Environment Statement and its conclusions.

Compulsory Acquisition

FBC notes Section 1.3.1.3 [CR-3] which sets out that the changes:

- Would not require any additional land;
- Would secure overall reductions in the work order limits; and,
- Would not introduce any new landowners or interests.

As such, the Applicants have explained that The Infrastructure Planning (Compulsory Acquisition) Regulations 2010 (CA Regulations) are not engaged.

FBC therefore has no comments to make with regards to Compulsory Acquisition.

Consultation

FBC acknowledges the Applicants' request for comments on the proposed consultation and a positive response to the response provided.

FBC considers that the consultation was suitable.

Conclusion

For the reasons set out above, FBC accepts that:

- The proposed changes are unlikely to give rise to material impacts on the Environmental Statement; and,
- The proposed changes would not engage the Compulsory Acquisition Regulations.

Therefore, FBC raises no objection to the content of the proposed Change Request.
