

I wish to raise an objection due to the following :

-The proposal confirms to me that there is nothing green about green energy

The proposal will result in countryside and green belt land being lost forever

Wildlife and habitats being destroyed

Sabic high pressure ethylene pipeline in danger

1 area to be destroyed is a triple SSSI

Noise and air pollution

Light pollution

-profit before safety

There are alternatives but this option has the highest potential of profit so no consideration is given to the safety of the residents of the Fylde

Bae Systems warn of aviation safety due to increased possibility of bird strikes

St Annes sand dunes beach closed and as a result sea defences breached

-destruction of livelihoods

Businesses and tourism destroyed

Farmers put out of business

-The Mona project cable route is built in the middle of nowhere with no airfield near by

Why is it ok to position this project near an airfield and amongst thousand and thousand of Fylde residents
