Hello

I am all in favour of green and renewable energy but shocked in the decision to potentially allow a cable corridor from Blackpool Airport all the way through Lancashire into Penwortham. It is not just the damage to local areas and wildlife that would be imposed upon people in and around this route, but also the damage you inflict on local businesses and residents if you grant consent.

Traffic is congested at the best of times around Blackpool Airport where I live due to the housing and business estate, and this for me will cause years of misery, noise pollution, and have my part of the local beach closed for several years which many families utilise and enjoy. There has to be a better route that could be taken even if it meant more money being spent in not piling on misery for so many people of Lancashire. And this is just one small piece of the proposed cabling route, I dread to think the thousands upon thousands of people who will have their lives impacted for the worse.

I am also shocked that you would allow cabling to be run under both Lytham St Annes sand dunes as well as under Lytham St Annes nature reserve which is an area of SSSI. Surely local politicians for Lancashire should make decisions for their area and not have these decisions imposed upon us by politicians in Westminster who will never be impacted by decisions they make.

If this cabling corridor is given consent to proceed, I will have really lost faith in our country and the politicians who make these decisions as this is not about green energy, it will be about money.

I hope you do the right and honourable decision in not allowing this cabling corridor to proceed and look at an alternative route which would cause less damage and inflict less misery on so many people for so many years.

With best wishes,

David Morris
