1. Long List of other Developments for East Riding of Yorkshire Council

1.1 Overview

1.1.1 This Appendix presents an overview of the long list of planning applications for East Riding of Yorkshire Council within the Zone of Influence (ZoI) identified for inter-project cumulative effects. The long list is shown in Tables 21.2 and is illustrated in **Application Document 6.21.F1 Figure 21.1**.

1.1.2 During Scoping an overall cumulative assessment ZoI of 20 km was proposed. This was based upon the largest topic study area, ecology and biodiversity, being identified as 10 km; therefore, a ZoI of 20 km from the draft Order Limits was established to identify the initial long list of other developments. This ZoI has been identified during Environmental Impact Assessment scoping and has been reviewed as part of the development of the Preliminary Environmental Information Report and Environmental Statement to take account of any changes in the draft Order Limits since Scoping. The list has a cut-off date of 01 August 2026 to allow assessment to be undertaken.

1.1.3 The establishment of the long list of other existing and, or approved development has been based on the best available information at the time of authoring. The level of information available for the other developments varies in detail from Tier 1 (most certain) to Tier 3 (least certain). As a result, for some developments (typically Tier 1 and 2) it has been possible to accurately measure the distance from their proposed planning application boundary to the Project's Order Limits, but for some others (typically Tier 3) there has not been a proposed project application boundary, meaning it has been necessary to use a centre point to measure distance from the Project Order Limits.

1.1.4 The Long list is categorised into the three tiers that assign certainty to other existing and/or approved developments following the Planning Inspectorate's Nationally Significant Infrastructure Projects - Cumulative effects (HM Government, 2026) which provides guidance for NSIPs.

1.1.5 The Long list of developments for East Riding of Yorkshire Council is provided below:

1.2 Other Developments for East Riding of Yorkshire Council

Table 21.1 – Other Developments for East Riding of Yorkshire Council considered in Stage 1 and Stage 2 inter-project Cumulative Effects Assessment

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
18	22/02569/EIASCO	**EIA Scoping Opinion Proposed Residential development. HU15 1EN** Proposed four planning applications comprising residential development with associated access and development infrastructure as well as new recreation space.	2.5	Pre-application	2	Landscape	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative landscape effects.	N/A	No
						Visual	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative visual effects.	N/A	No
						Ecology	Yes	Yes	Unclear	No- The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Ornithology	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Cultural Heritage	Yes	Yes	N/A	Development would not result in impacts to common heritage assets. No potential for significant cumulative effects.	N/A	No
						Water Environment	No	No	N/A	This development is located outside the ZOI for the Water Environment, therefore there is unlikely to be any significant cumulative effects	N/A	No
						Geology and Hydrogeology	No	No	N/A	This development is located outside the ZOI for Geology and Hydrogeology, therefore there is unlikely to be significant cumulative effects.	N/A	No
						Agriculture and Soils	No	No	N/A	This development is located outside of the ZOI for Agriculture and Soils, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Traffic and Transport	Yes	Yes	No	The scheme does not have a temporal overlap with the peak construction year, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Air Quality	Yes	Yes	No	This development is located outside of the ZOI for construction dust and Non-	N/A	No

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										Road Mobile Machinery (NRMM) emissions. In terms of construction vehicle emissions, the development does not have a temporal overlap with the peak construction year for the Project, therefore there are unlikely to be significant cumulative effects.		
						Noise and Vibration	No	No	N/A	This development is located outside of the ZOI for Noise and Vibration, and therefore there are unlikely to be significant cumulative effects.	N/A	No
						Socio-economics, Recreation and Tourism	No	No	N/A	The development is located outside of the ZOI for socio-economics, recreation and tourism therefore there are unlikely to be significant cumulative effects.	N/A	No
						Health and Wellbeing	No	No	N/A	The potential for health and wellbeing effects depends on whether each determinant relevant to health and wellbeing has the potential for significant cumulative effects, including landscape and visual amenity, traffic and transport, air quality, noise and vibration, the water environment, climate change, and socio-economics, recreation, and tourism.	N/A	No
24	22/03070/EIASCR	**White Hall Solar farm with battery storage, HU17 0RN** EIA Screening Opinion for a proposed ground mounted solar photovoltaic development and battery storage development, associated infrastructure and landscaping (non EIA)	1.4	Pre-application (Not EIA Development)	3	Landscape	Yes	Yes	Unclear	This development has the potential for cumulative landscape effects on shared receptors such as landscape character areas.	N/A	Yes
						Visual	Yes	Yes	Unclear	This development has the potential for cumulative visual effects on shared receptors such as community areas and views from recreational routes.	N/A	Yes
						Ecology	Yes	Yes	Unclear	Due to the location of the Project there is potential for cumulative effects on shared ecological receptors	N/A	Yes
						Ornithology	Yes	Yes	Unclear	This development overlaps habitat suitable for breeding and non-breeding birds and therefore cumulative effects	N/A	Yes

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										cannot be ruled out at the screening stage		
						Cultural Heritage	Yes	Yes	Yes	Potential for setting change to shared receptors	N/A	Yes
						Water Environment	No	No	N/A	This development is located outside the ZOI for the Water Environment, therefore there is unlikely to be any significant cumulative effects	N/A	No
						Geology and Hydrogeology	No	No	N/A	This development is located outside the ZOI for Geology and Hydrogeology, therefore there is unlikely to be significant cumulative effects.	N/A	No
						Agriculture and Soils	Yes	Yes	Yes	This development has the potential for cumulative impacts on agriculture and soils as it is within the ZOI and could result in the temporary and/or permanent loss/disturbance of Best and Most Versatile land and/or soil ecosystem functions.	N/A	Yes
						Traffic and Transport	Yes	Yes	No	The scheme does not have a temporal overlap with the peak construction year, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Air Quality	Yes	Yes	No	This development is located outside of the ZOI for construction dust and NRMM emissions. In terms of construction vehicle emissions, the development does not have a temporal overlap with the peak construction year for the Project, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Noise and Vibration	No	No	N/A	This development is located outside of the ZOI for Noise and Vibration, and therefore there are unlikely to be significant cumulative effects.	N/A	No
						Socio-economics, Recreation and Tourism	No	No	N/A	The development is located outside of the ZOI for socio-economics, recreation and tourism therefore there are unlikely to be significant cumulative	N/A	No

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										effects.		
						Health and Wellbeing	Yes	Yes	Unclear	The potential for health and wellbeing effects depends on whether each determinant relevant to health and wellbeing has the potential for significant cumulative effects, including landscape and visual amenity, traffic and transport, air quality, noise and vibration, the water environment, climate change, and socio-economics, recreation, and tourism.	N/A	Yes
36	21/01875/EIASCR	**Solar Farm, Cottingham Water Pumping Station Mill House Woods Lane Cottingham East Riding Of Yorkshire** Screening request -The development of a solar farm as part of the pre-existing and operational Cottingham Water Pumping Station. Screening opinion confirmed non EIA development.	0.2	Pre-application	3	Landscape	Yes	Yes	Unclear	No - Although the ZTV for indicates some theoretical intervisibility, the scale of the development and location within an existing operational site means there is unlikely to be significant cumulative landscape effects.	N/A	No
						Visual	Yes	Yes	Unclear	No - Although the ZTV for indicates some theoretical intervisibility, the scale of the development and lack of common visual receptors means there is unlikely to be significant cumulative effects.	N/A	No
						Ecology	Yes	Yes	Unclear	Yes potential for shared ecological receptors	N/A	Yes
						Ornithology	Yes	Yes	Unclear	The proximity of this development within the ZoI and land take required for it mean that cumulative effect of construction disturbance and habitat losses cannot be ruled out at this stage. Shared receptors are breeding birds	N/A	Yes
						Cultural Heritage	Yes	Yes	N/A	Due to nature of existing site, development is unlikely to result in additional impacts to buried cultural heritage. Development would not affect setting of shared heritage receptors. No potential for cumulative effects.	N/A	No
						Water Environment	Yes	Yes	Yes	Whilst there are shared receptors, the development was screened as not EIA development, therefore significant effects on water environment receptors are not likely. Consequently, significant	N/A	No

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										cumulative effects on common receptors are not anticipated.		
						Geology and Hydrogeology	Yes	Yes	Yes	Whilst the historical land use within the development is such that there is potential for sources of contamination to be present and there are likely to be shared receptors with the Project – significant effects on geology and hydrogeology receptors are not anticipated. Both the development and the Project will be required to comply with legislation and planning requirements for new developments so that risks associated with potential contamination and disturbance or damage to designated sites are appropriately mitigated. In addition, each development will have its own Code of Construction Practice (CoCP), or Construction Environmental management Plan (CEMP) or similar, as appropriate, and it is assumed will apply best practice construction methods. Therefore cumulative adverse effects in relation to geology and hydrogeology are unlikely.	N/A	No
						Agriculture and Soils	Yes	Yes	Yes	This development has the potential for cumulative impacts on agriculture and soils as it is within the ZOI and could result in the temporary and/or permanent loss/disturbance of Best and Most Versatile land and/or soil ecosystem functions.	N/A	Yes
						Traffic and Transport	No	No	No	This development is located outside of the ZOI for Traffic and Transport, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Air Quality	Yes	Yes	Yes	Whilst the development is located within the air quality ZOI and there may be an overlap in construction activities, the Project's construction traffic emissions have been assessed as resulting in negligible effects, whilst effects	N/A	No

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										associated with construction dust and NRMM emissions are predicted to be not significant. It is also assumed that the development would be constructed in accordance with an appropriate CEMP, CoCP or equivalent good practice measures. As such, significant cumulative air quality effects are considered unlikely.		
						Noise and Vibration	Yes	Yes	Yes	Although the site is located within 300m of the Project Order Limits, the scale and nature of the development is such that significant cumulative effects are not expected where both projects employ appropriate noise and vibration control measures.	N/A	No
						Socio-economics, Recreation and Tourism	Yes	Yes	Yes	Potential for cumulative socio-economic, tourism and recreation effects on local communities affected by severance, residential receptors, business premises, visitor attractions, community facilities, open space, development land and PRoW and recreational routes.	N/A	Yes
						Health and Wellbeing	Yes	Yes	Yes	The potential for health and wellbeing effects depends on whether each determinant relevant to health and wellbeing has the potential for significant cumulative effects.	N/A	Yes
38	21/01520/EIASCR	**Proposal for a site compound in association with the recently consented Energy from Waste (EfW) Facility, Land South Of Whinny Clump Gibson Lane South Melton East Riding Of Yorkshire HU14 3HN** Screening request-Proposal for a site compound in association with the recently consented Energy from Waste (EfW)	5.4	Enquiry answered	3	Landscape	Yes	Yes	Yes	No - Although the ZTV indicates some theoretical intervisibility, the distance between the developments and lack of common landscape receptors means there is unlikely to be significant cumulative effects.	N/A	No
						Visual	Yes	Yes	Yes	No – Although the ZTV indicates some theoretical intervisibility, the distance between the developments and lack of common visual receptors means there is unlikely to be significant cumulative effects.	N/A	No

										areas of land occupied by this project and the Project. In addition, legislation and planning requires that for new development, risks to human health and controlled waters from potential contamination are appropriately mitigated. Therefore, cumulative adverse effects in relation to geology and hydrogeology are unlikely. Furthermore, each development will be bound by its own CoCP and / or a CEMP. It is assumed each development will apply best practice construction methods so as to minimise impacts from contamination on ground conditions and groundwater.		
						Agriculture and Soils	Yes	Yes	Yes	This development has the potential for cumulative impacts on agriculture and soils as it is within the ZOI and could result in the temporary and/or permanent loss/disturbance of Best and Most Versatile land and/or soil ecosystem functions.	N/A	Yes
						Traffic and Transport	Yes	Yes	No	The scheme does not have a temporal overlap with the peak construction year, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Air Quality	Yes	Yes	Yes	Whilst the development is located within the air quality ZOI, it is anticipated that the peak construction year would not overlap with the Project's. In addition, it is assumed that the development would be constructed in accordance with an appropriate CEMP, CoCP or equivalent good practice measures. As such, significant cumulative air quality effects are considered unlikely.	N/A	No
						Noise and Vibration	Yes	Yes	Yes	Although the site is located within 300m of the Project Order Limits, the scale and nature of the development is such that significant cumulative effects are not expected where both projects employ	N/A	No

						Health and Wellbeing	Yes	Yes	No	The potential for health and wellbeing effects depends on whether each determinant relevant to health and wellbeing has the potential for significant cumulative effects.	N/A	No
534	24/02946/PLF	**Tongue Lane Solar** **Land Northwest Of Newton Farm Tongue Lane Gilberdyke East Riding Of Yorkshire HU15 2UY** Installation of ground mounted solar photovoltaic farm, construction of battery storage and substation with associated infrastructure	0.2	Approved	1	Landscape	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Visual	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Ecology	Yes	Yes	Unclear	No- although the Tongue Lane solar development is approximately 0.2 km from the NHHM Project, it is contained within a single modified grassland field with boundary habitats retained. Due to the nature and scale of the development no significant cumulative effects are anticipated.	N/A	No
						Ornithology	Yes	Yes	Unclear	No- although the Tongue Lane solar development is approximately 0.2 km from the NHHM Project, it is contained	N/A	No

Other Development details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										within a single modified grassland field with boundary habitats retained and offers little to no suitable habitat for Humber Estuary SPA qualifying species; it is also of very limited value to breeding and non-breeding birds. Due to the nature and scale of the development no significant cumulative effects are anticipated.		
						Cultural Heritage	Yes	Yes	N/A	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Water Environment	Yes	Yes	Yes	The nature of this development is such that significant effects on the water environment are not anticipated. While the development shares water environment receptors with the Project, the scale and location of the development mean it is unlikely to result in significant cumulative effects on the water environment.	N/A	No
						Geology and Hydrogeology	Yes	Yes	Yes	The nature of this development is such that significant effects on geology and hydrogeology are not anticipated and significant contamination sources have not been identified within the relevant areas of land occupied by this project and the Project. In addition, legislation and planning requires that for new development, risks to human health and controlled waters from potential contamination are appropriately mitigated. Therefore, cumulative adverse effects in relation to geology and hydrogeology are unlikely. Furthermore the Project will be bound by its own Code of Construction Practice (CoCP). A review of the decision notice for planning application 24/02946/PLF shows that this development has no planning conditions relating to land contamination. It is assumed each development will apply best practice construction methods so as		No

N/A	No
						Visual	Yes	Yes	Yes	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Ecology	Yes	Yes	Yes	Yes – likely shared receptors, including protected species due to the spatial overlap of this development and the Project.	N/A	Yes
						Ornithology	Yes	Yes	Yes	Yes – likely shared receptors, including birds, due to the spatial overlap of this development and the Project.	N/A	Yes
						Cultural Heritage	Yes	Yes	Yes	Potential for impacts to shared receptors - buried archaeological assets.	N/A	Yes
						Water Environment	Yes	Yes	Yes	This development shares receptors with the Project within the ZOI however the scale and nature of the development mean that significant cumulative effects are not anticipated.	N/A	No
						Geology and Hydrogeology	Yes	Yes	Yes	The nature of this development is such that significant effects on geology and hydrogeology are not anticipated and significant contamination sources have not been identified within the relevant areas of land occupied by this project and by the Project. In addition, legislation and planning requires that for new development, risks to human health and controlled waters from potential contamination are appropriately mitigated. Therefore, cumulative adverse effects in relation to geology and hydrogeology are unlikely. Furthermore, each development will be bound by its own Code of Construction Practice (CoCP). It is assumed each development will apply best practice construction methods so as to minimise impacts from contamination on ground conditions and groundwater.	N/A	No

ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
										cumulative adverse effects in relation to the water environment are unlikely.		
						Geology and Hydrogeology	Yes	Yes	Yes	The nature of this development is such that significant effects on geology and hydrogeology are not anticipated and significant contamination sources have not been identified within the relevant areas of land occupied by this project and by the Project. In addition, legislation and planning requires that for new development, risks to human health and controlled waters from potential contamination are appropriately mitigated. Therefore, cumulative adverse effects in relation to geology and hydrogeology are unlikely. Furthermore, each development will be bound by its own CoCP and / or a CEMP. It is assumed each development will apply best practice construction methods so as to minimise impacts from contamination on ground conditions and groundwater.	N/A	No
						Agriculture and Soils	Yes	Yes	Yes	This development has the potential for cumulative impacts on agriculture and soils as it is within the ZOI and could result in the temporary and/or permanent loss/disturbance of Best and Most Versatile land and/or soil ecosystem functions.	N/A	Yes
						Traffic and Transport	Yes	Yes	Yes	The scale of the development is unlikely to cause any significant cumulative effects for traffic and transport.	N/A	No
						Air Quality	Yes	Yes	Yes	Whilst the development is located within the air quality ZOI and there may be an overlap in construction activities, the Project's construction traffic emissions have been assessed as resulting in negligible effects, whilst effects associated with construction dust and NRMM emissions are predicted to be not significant. It is also assumed that the development would be constructed in	N/A	No

Scale and nature of development likely to have a significant cumulative effect? Relevant Shared receptors and/or pathways?	Other factors	Progress to Stage 3/4
										overlap of this development and the Project.		
						Ornithology	Yes	Yes	Yes	Yes – Shared receptors, including birds due to the spatial overlap of this development and the Project.	N/A	Yes
						Cultural Heritage	Yes	Yes	Yes	Yes – Potential for permanent impacts to shared receptors, buried archaeological remains.	N/A	Yes
						Water Environment	Yes	Yes	Yes	The scale and nature of this development is such that significant effects on the water environment are not anticipated, despite shared receptors within the ZOI.	N/A	No
						Geology and Hydrogeology	Yes	Yes	Yes	The nature of this development (extraction of clay and incidental sand) is such that significant effects on geology and hydrogeology are not anticipated and significant contamination sources have not been identified within the Project. In addition, legislation and planning requires that risks to human health and controlled waters from potential contamination are appropriately mitigated. Therefore, cumulative adverse effects in relation to geology and hydrogeology are unlikely. It is assumed each development will apply best practice construction methods so as to minimise impacts from contamination on ground conditions and groundwater.	N/A	No
						Agriculture and Soils	Yes	Yes	Yes	This development has the potential for cumulative impacts on agriculture and soils as it is within the ZOI and could result in the temporary and/or permanent loss/disturbance of Best and Most Versatile land and/or soil ecosystem functions.	N/A	Yes

Other Development details						Stage 1			Stage 2

										construction year for the Project, therefore there are unlikely to be significant cumulative effects.		
						Noise and Vibration	No	No	N/A	This development is located outside of the ZOI for Noise and Vibration, and therefore there are unlikely to be significant cumulative effects.	N/A	No
						Socio-economics, Recreation and Tourism	No	No	N/A	The development is located outside of the ZOI for socio-economics, recreation and tourism therefore there are unlikely to be significant cumulative effects.	N/A	No
						Health and Wellbeing	Yes	Yes	No	The potential for health and wellbeing effects depends on whether each determinant relevant to health and wellbeing has the potential for significant cumulative effects.	N/A	No
734	25/03386/STPLF	**Land South Of Yew Tree Park Voase Way Beverley East Riding Of Yorkshire HU17 0RN** Erection of 110 dwellings with associated landscaping, open space and highways and drainage infrastructure	3	Pending Consideration	2	Landscape	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Visual	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Ecology	Yes	Yes	Unclear	No- The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Ornithology	Yes	Yes	Unclear	Yes- The potential effects of this proposal on European (habitats) sites have not been addressed adequately to determine that there could be no cumulative effects.	N/A	No
						Cultural Heritage	No	No	N/A	This development is located outside cultural heritage ZoI	N/A	No
						Water Environment	No	No	N/A	This development is located outside the ZOI for the Water Environment, therefore there is unlikely to be any significant cumulative effects	N/A	No

ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Topic**	**Within ZOI?**	**Progress to Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
						Geology and Hydrogeology	No	No	N/A	This development is located outside the ZOI for Geology and Hydrogeology, therefore there is unlikely to be significant cumulative effects.	N/A	No
						Agriculture and Soils	No	No	N/A	This development is located outside of the ZOI for Agriculture and Soils, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Traffic and Transport	Yes	Yes	No	The scheme does not have a temporal overlap with the peak construction year, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Air Quality	Yes	Yes	Yes	This development is located outside of the ZOI for construction dust and NRMM emissions. In terms of construction vehicle emissions, the development does not have a temporal overlap with the peak construction year for the Project, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Noise and Vibration	No	No	N/A	This development is located outside of the ZOI for Noise and Vibration, and therefore there are unlikely to be significant cumulative effects.	N/A	No
						Socio-economics, Recreation and Tourism	No	No	N/A	The development is located outside of the ZOI for socio-economics, recreation and tourism therefore there are unlikely to be significant cumulative effects.	N/A	No
						Health and Wellbeing	Yes	Yes	No	The potential for health and wellbeing effects depends on whether each determinant relevant to health and wellbeing has the potential for significant cumulative effects.	N/A	No
745	26/00775/PLF	**Erection of 47 dwellings with associated garages, parking and infrastructure**	2.2 km	5.3 km		Landscape	Yes	Yes	Unclear	No - The scale, nature and location of this development is unlikely to result in significant cumulative effects.	N/A	No
