Executive Summary

This Statement of Reasons (this Statement) relates to the North Humber to High Marnham Project (the Project) and has been submitted by National Grid Electricity Transmission plc (National Grid) (the Applicant) to the Planning Inspectorate acting on behalf of the Secretary of State. It relates to an application for development consent to permit and enable implementation of the Project made under s37 of the Planning Act 2008 (as amended) (PA 2008) (HM Government, 2008).

This Statement has been prepared in accordance with the requirements of paragraph 5(2)(h) of the Infrastructure Planning (Applications: Prescribed Forms and Procedure) Regulations 2009 (as amended) (the APFP Regulations) (HM Government, 2009), and the PA 2008: Guidance related to procedures for the compulsory acquisition of land (Department for Communities and Local Government, 2013) (the Guidance).

This Statement is required because the draft Development Consent Order (**Application Document 3.1 Draft Development Consent Order**) includes powers for the compulsory acquisition of land and/or rights in land as described in Chapter 5.

Paragraphs 31 and 32 of the Guidance acknowledge that the APFP Regulations requires a statement of reasons and paragraph 32 advises that: '*The statement of reasons should seek to justify the compulsory acquisition sought, and explain in particular why in the applicant's opinion there is a compelling case in the public interest for it. This includes reasons for the creation of new rights*.'

This Statement sets out the reasons for seeking powers for the compulsory acquisition of land and/or rights in the land. It also explains the extent of and reasons for the temporary use of land. These powers are being sought to ensure that National Grid has the requisite powers to construct, operate and maintain the Project. References in this Statement to 'compulsory acquisition' include both permanent land acquisition, and the acquisition of rights in land.

This Statement shows that there is a compelling case in the public interest for the relevant land to be subject to powers of compulsory acquisition.

This Statement explains why the use of powers of compulsory acquisition in these circumstances is legitimate and proportionate, and why any interference with the human rights of those with interests in the land proposed to be acquired is justified.

This Statement forms part of a suite of documents accompanying the application submitted in accordance with s55 of the PA 2008 and Regulation 5 of the APFP Regulations 2009. It should be read alongside the other DCO application documents that relate to the compulsory acquisition powers sought by the Applicant and the need for the Project, including:

- **Application Document 1.3 Guide to the Application**;
- **Application Document 2.3 Land Plans**;
- **Application Document 2.4 Works Plans**;
- **Application Document 2.14 Special Category Land Plans**;
- **Application Document 2.15 Crown Land Plans**;
- **Application Document 3.1 Draft Development Consent Order**;

- **Application Document 3.2 Explanatory Memorandum**;
- **Application Document 4.2 Funding Statement**;
- **Application Document 4.3 Book of Reference**;
- **Application Document 5.5 Planning Statement**;
- **Application Document 6.1 to 6.21 Environmental Statement**; and
- **Application Document 7.21 Equality Impact Assessment**.

1. Introduction

1.1 The Applicant

1.1.1 National Grid Electricity Transmission plc (the Applicant) sits within the wider National Grid Group; within the Group there are distinctly separate legal entities, each with their individual responsibilities and roles. National Grid Group sits at the heart of Great Britain's energy system, connecting millions of people and businesses to the energy they use every day. The Project is being promoted by National Grid Electricity Transmission plc.

1.1.2 Note that in this Statement, except when referring specifically to other National Grid Group entities below, the term 'National Grid' is used to refer to National Grid Electricity Transmission plc.

1.1.3 National Grid holds the Transmission Licence for England and Wales, and its statutory duty is to develop and maintain an efficient, coordinated and economical system of electricity transmission and to facilitate competition in the generation and supply of electricity, as set out in the Electricity Act 1989 (HM Government, 1989).

1.1.4 National Grid, as the regulated provider of electricity transmission services in England and Wales, is regulated by the Office of Gas and Electricity Markets (Ofgem). Transmission services include maintaining reliable electricity supplies and offering to construct new transmission system assets for new connections to the National Electricity Transmission System.

1.1.5 In accordance with Transmission Licence requirements, National Grid ensures that the transmission system in England and Wales meets the requirements in respect of transmission system security and quality of service at all times. As part of this requirement, National Grid must ensure that sufficient transmission system capability is provided to meet demand and generator customer requirements and wider transmission system needs that exist and/or are expected.

1.1.6 When planning changes to the transmission system, National Grid must be efficient, coordinated and economical and have regard to the desirability of preserving amenity, in line with the duties under s9 and s38 of the Electricity Act 1989.

1.1.7 This Statement relates to the Project and has been submitted by National Grid to the Planning Inspectorate acting on behalf of the Secretary of State. It relates to an application for development consent to permit and enable implementation of the Project made under s37 of the PA 2008 (as amended).

1.1.8 This Statement explains why the powers of compulsory acquisition and other statutory powers sought in the **Application Document 3.1 Draft Development Consent Order** (draft DCO) are necessary to enable the Project to proceed and why there is a compelling case in the public interest for those powers to be granted.

1.2 The Project

1.2.1 The North Humber to High Marnham Project (the Project) is a new 400 kilovolt (kV) electricity transmission connection of approximately 90 kilometres (km) in overall length between two proposed new substations: the 400 kV Birkhill Wood Substation and 400 kV High Marnham Substation.

1.2.2 The proposed new substations are subject to separate planning applications, which were granted by the relevant local planning authorities in February 2026 (Birkhill Wood) and June 2026 (High Marnham) respectively. Alongside these planning permissions, a Compulsory Purchase Order (CPO) for acquisition of land at Birkhill Wood was confirmed in April 2026, to enable delivery. National Grid will be seeking compulsory purchase powers to assemble the site at High Marnham, with a CPO due to be submitted to the Secretary of State for confirmation in late 2026. For more information, see **Application Document 5.4 Consents and Licences Required Under Other Legislation**.

1.2.3 The Project is defined as a Nationally Significant Infrastructure Project (NSIP) under s14(1)(b) and s16 of the PA 2008 (HM Government, 2008) and the Planning Act 2008 (Nationally Significant Infrastructure Projects) (Electric Lines) Order 2013 (HM Government, 2013), as it involves the installation of an electric line above ground of more than 2 km, which will operate at 400 kV in England.

1.2.4 A full description of the Project is provided in **Application Document 6.4 Environmental Statement Chapter 4 Description of the Project**.

1.3 Compulsory Acquisition

1.3.1 In its application for the Project, National Grid seeks compulsory acquisition powers both in respect of freehold land and in respect of new rights as well as temporary possession powers in respect of certain land interests. A detailed description of the extent and nature of the powers sought is set out by reference to the application documents in Chapter 5 of this Statement.

1.4 Land Interests

1.4.1 A general description of the Project by section and the extent of the land interests affected by the compulsory acquisition and temporary possession powers sought by National Grid is included in Chapter 6 of this Statement.

1.4.2 The Order Limits of the draft DCO as shown on the **Application Document 2.3 Land Plans** establish the total extent of the land affected by the Project. Within the Order Limits and where there are Limits of Deviation (LoD), these represent the maximum locational flexibility for permanent infrastructure such as the overhead lines, pylons and underground cables. This allows for adjustment to the final positioning of the Project features to avoid localised constraints or unknown or unforeseeable issues that may arise. Permanent rights would only be acquired over the area within the Order Limits where the infrastructure has been installed within the LoD.

1.4.3 National Grid is not seeking to compulsorily acquire interests in the full extent of land that falls within the Order Limits. National Grid is instead seeking temporary powers over an area greater than that proposed for permanent acquisition or acquisition of rights, which is identified through the Class of Rights shown on the **Application**

Document 2.3 Land Plans. Once the Project is constructed and in respect of the overhead line, National Grid would only require permanent rights to operate, access and maintain the development and any third-party access routes within the Order Limits needed for its continued operation (including any rights for the benefit of statutory undertakers). If National Grid has been unable to secure the permanent land or rights acquisition required via a voluntary agreement, it would rely on exercising powers of compulsory acquisition to secure such land or rights on a permanent basis.

1.4.4 Further detail is shown on the **Application Document 2.4 Works Plans**.

1.4.5 Powers are also sought to allow National Grid to extinguish where necessary some rights where it is found that they are incompatible or rendered incapable of use by the Project.

1.4.6 National Grid will continue to demonstrate its ongoing commitment to seek to acquire all land and rights required for the Project through private treaty agreements. However, it is necessary to seek powers of compulsory acquisition (and temporary possession) in the DCO application in order to ensure that the Project is not precluded from being delivered or indeed from being delivered in a manner which is consistent with National Grid's statutory and regulatory duties.

1.4.7 National Grid is satisfied that all of the land interests identified for compulsory acquisition (and temporary possession) are required to enable the Project to proceed.

1.5 The Case for Compulsory Acquisition

1.5.1 This Statement sets out the reasons for seeking powers for the compulsory acquisition of land and/or rights in the land. It also explains the extent of and reasons for the temporary use of land. These powers are being sought to ensure that National Grid has the requisite powers to construct, operate and maintain the Project.

1.5.2 National Grid is satisfied that the powers of compulsory acquisition and temporary possession sought in the **Application Document 3.1 Draft Development Consent Order** are necessary, proportionate and justified. National Grid is further satisfied that the powers sought are in accordance with all relevant statutory requirements and policy guidance.

1.5.3 National Grid strongly considers that there is a compelling case in the public interest for the compulsory acquisition and temporary possession powers sought as set out in Chapter 7 of this Statement.

1.6 Human Rights and Equalities

1.6.1 This Statement explains why the use of powers of compulsory acquisition in these circumstances is legitimate and proportionate, and why any interference with the human rights of those with interests in the land proposed to be acquired (or where rights are to be acquired) is justified.

1.6.2 National Grid has had regard to the European Convention on Human Rights (the Convention) and the Human Rights Act 1998 (HM Government, 1998). It has also taken into account the duties contained in the Equality Act 2010 (HM Government, 2010), including the needs of protected characteristic groups, with an **Application Document 7.21 Equality Impact Assessment** submitted as part of

this application for development consent. The Equality Impact Assessment provides the Secretary of State with the necessary information to have regard to the requirements of the Equality Act 2010 and the public sector equality duty when determining the application for development consent.

1.6.3 Chapter 9 of this Statement considers how the Project complies with the Convention and with this legislation.

2. The Proposed Project

2.1 National Planning Policy

National Policy Statements

2.1.1 National Policy Statements (NPSs) are produced by the government through a parliamentary approval process, and they present the planning policy framework for all decision making for NSIPs. They also include the government's objectives for the development of NSIPs and are produced for different types of infrastructure development.

2.1.2 In deciding an application for development consent, s104 of the Planning Act 2008 requires the Secretary of State for Energy Security and Net Zero to determine the application in accordance with any relevant NPS. The following NPSs which came into force on 6 January 2026 are relevant to the Project:

- Overarching National Policy Statement for Energy (EN-1) (Department for Energy Security and Net Zero, 2025);
- National Policy Statement for Electricity Networks Infrastructure (EN-5) (Department for Energy Security and Net Zero, 2025); and
- National Policy Statement for Renewable Energy Infrastructure (EN-3) (Department for Energy Security and Net Zero, 2025).

2.2 National Planning Policy Framework

2.2.1 The National Planning Policy Framework (NPPF, published in August 2026) sets out the government's national planning policies for England and how these should be applied in the development plan system and in the management of development. While the overall strategic aims of the NPPF and the NPSs are consistent, the NPPF is an important and relevant consideration in decisions on NSIPs, but only to the extent relevant to that project. In this regard, the NPPF does not contain policies specifically relating to NSIPs. The application for the Project was prepared in the context of the previous iteration of the NPPF, but has been reviewed in the light of the current iteration published in August 2026. The Project is consistent with that policy guidance.

2.3 Regional and Local Planning Policies

2.3.1 As set out above, the NPSs are the primary basis for decision making, but the Secretary of State for Energy Security and Net Zero must also have regard to any other matters which they think are both important and relevant to the decision and this could include regional and local planning policies.

2.3.2 Current and emerging local and regional planning policy documents relevant to the Project which are likely to inform the local impact reports prepared by the local planning authorities, and which may be relevant and important in their own right, are detailed in **Application Document 5.5 Planning Statement**.

2.4 The Need Case

2.4.1 With growing renewables integration into the National Electricity Transmission System, such as offshore wind and interconnectors[1], an anticipated tripling of wind generation connected across the Scottish networks by 2030 and the government's increased ambition to connect 50 GW of offshore wind by 2030, north–south power flows are set to increase.

2.4.2 The existing electricity transmission network in the Yorkshire and Humber region was initially developed in the 1960s and has historically been able to meet demand. It was designed to connect the inland large coal fired power stations in the region, with changes occurring in the later parts of the century in order to connect gas fired power stations and offshore wind.

2.4.3 However, due to the changes noted above in terms of delivering net zero emissions, the existing network in this area does not have the capability to reliably and securely transport all the energy that will be connected by 2030, whilst operating to the standards it is required to.

2.4.4 The existing transmission infrastructure in this area requires reinforcement for the following main reasons:

- The existing transmission network was not designed to transport electricity from where it is increasingly now being generated (largely offshore).
- The growth in offshore wind, interconnectors and onshore generation such as battery and solar means that more electricity will be generated in the years ahead than the current network is able to securely and reliably transport.
- In the UK, electricity demand is forecasted to at least double by 2050, increasing the amount of energy we need to transport to homes and businesses.
- Upgrading the existing network as it is today (such as through replacing cables to carry more power) will not be enough to carry the amount of future power whilst operating to required standards.
- The need to increase boundary transfer capability in order to reduce wider network generator constraint costs.

2.4.5 The Project would support the UK's net zero target by reinforcing the electricity transmission network between the North of England and the Midlands and facilitate the connection of planned renewable energy projects such as offshore wind generation and interconnectors and increase boundary transfer capability. The Project would help meet future energy requirements.

2.4.6 For further information please refer to the 'Needs Case' section contained within **Application Document 7.17 Strategic Options Report Including Needs Case**.

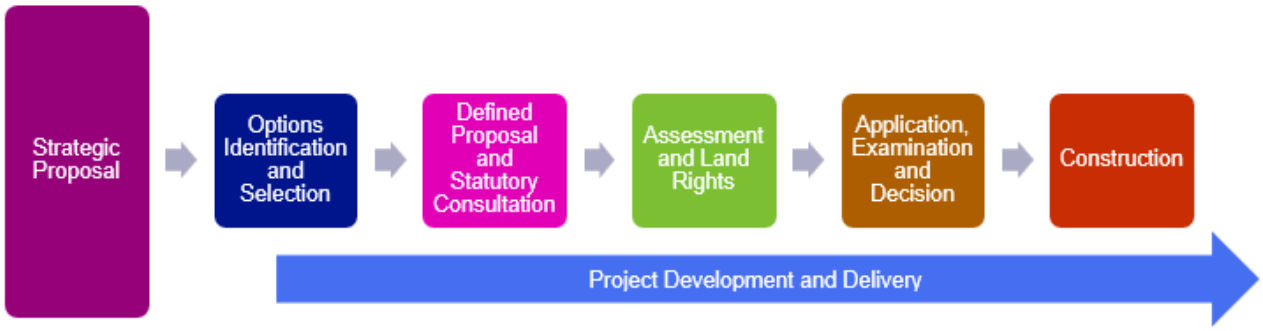

[1] Interconnectors are high voltage cables that are often used to connect the electricity systems of neighbouring countries.

3. Project Development

3.1 Strategic Proposal to Assessment and Land Rights

3.1.1 The design of the Project has followed a structured project development process that has integrated technical and environmental assessment with consultation feedback and stakeholder engagement. Further detail can be found in Our Approach to Consenting (National Grid, 2022). The key stages of project development are set out in Image 3.1.

Image 3.1 – National Grid's approach to project development and delivery

3.1.2 Alternative options were considered and appraised throughout the evolution of the Project. The approach to options appraisal is a robust and transparent process that is used to compare options and to record the positive and negative effects they may have in meeting the identified need, across a wide range of criteria including environmental, socio-economic, technical, and cost factors. Feedback received through consultation also informs this process. The aim is to find a balanced outcome to meet the identified need while meeting National Grid's statutory duties.

3.1.3 **Application Document 5.10 Design Approach Document** outlines the Project's design options and process. Detail on the alternatives considered at each stage can be found in **Application Document 6.3 Environmental Statement Chapter 3 Main Alternatives Considered**.

3.2 Project Description

3.2.1 The Project is a new 400 kV electricity transmission connection of approximately 90 km in overall length between two proposed new substations: the 400 kV Birkhill Wood Substation and 400 kV High Marnham Substation.

3.2.2 The proposed new substations are subject to separate planning applications, in respect of which planning permission has been granted by the relevant local planning authorities. For more information, see **Application Document 5.4 Consents and Licences Required Under Other Legislation**.

3.2.3 The Project comprises:

- Approximately 90 km of new overhead line (Route Code 4AF) between the proposed new 400 kV Birkhill Wood Substation and 400 kV High Marnham Substation;
- Replacement and re-alignment of a section of the existing 400 kV overhead line (Route Code 4ZQ) between Brantingham and east of Broomfleet;
- Replacement and re-alignment of a section of the existing 400 kV overhead line (Route Code ZDA) between Ealand and west of Keadby;
- Line entry connections to a proposed new 400 kV Birkhill Wood Substation;
- Line entry connections to a proposed new 400 kV High Marnham Substation; and
- The Project would include other required works, for example, temporary diversions for works on existing overhead line routes, temporary access roads, highway works, temporary works compounds, work sites and ancillary works. The Project would also include utility diversions and drainage works. There would also be land required for environmental mitigation, offsetting, compensation and Biodiversity Net Gain (BNG). Compulsory acquisition powers are not intended to be used for the purchase of land to be used for BNG purposes.

3.2.4 A full description of the Project is provided in **Application Document 6.4 Environmental Statement Chapter 4 Description of the Project**.

4. Environmental Mitigation Measures

4.1 Introduction

4.1.1 The mitigation hierarchy is a stepped process that helps development projects to address potentially adverse effects on the environment. The mitigation hierarchy has been applied to the Project throughout the iterative design process, with the following considered:

- Avoid – the first step of the mitigation hierarchy comprises mitigation measures taken to avoid creating effects from the outset, such as careful spatial placement of infrastructure away from receptors, or timing construction sensitively to avoid their disturbance.
- Prevent – these include measures to remove the effect at source or disrupt the impact pathway, such as adopting standard pollution prevention techniques in line with good practice to prevent watercourses becoming polluted.
- Reduce – these are measures taken to reduce the duration, intensity and/or extent of effects that cannot be completely avoided.
- Offset (sometimes referred to as compensate) – where relevant and appropriate to the specific effect, these measures aim to compensate for any residual, adverse effects after full implementation of the previous three steps of the mitigation hierarchy; an example is individual tree replacement at a 3:1 ratio with some inside the Order Limits where space allows and some outside of the Order Limits.

4.1.2 Environmental mitigation measures (which could fall under 'Avoid', 'Prevent' or 'Reduce') required to address potential significant adverse effects of the Project, following the mitigation hierarchy have been categorised as follows:

- Embedded Mitigation Measures;
- Standard Mitigation Measures; and
- Additional Mitigation Measures.

4.1.3 Environmental mitigation measures have been defined within the Environmental Statement and where relevant to construction (and operation in some instances) are presented in the following documents and secured by Requirements 4, 5 and 6 in the **Application Document 3.1 Draft Development Consent Order**:

- **Application Document 7.2 Outline Code of Construction Practice**;
- **Application Document 7.4 Outline Construction Traffic Management Plan**;
- **Application Document 7.6 Outline Public Rights of Way Management Plan**; and
- **Application Document 7.9 Outline Archaeological Written Scheme of Investigation**.

4.1.4 Environmental mitigation that relates to the permanent assets is outlined in the **Application Document 7.8 Outline Landscape and Ecology Management Plan** and secured by Requirement 4 of the **Application Document 3.1 Draft Development Consent Order** submitted as part of the application for development consent.

5. Compulsory Acquisition

5.1 Scope of Compulsory Acquisition and Temporary Possession Powers Sought

5.1.1 In the event that voluntary agreements are not reached, the compulsory acquisition of land and rights in land will be necessary to deliver the Project.

5.1.2 The scope of the compulsory acquisition powers sought by National Grid is set out in full in the **Application Document 3.1 Draft Development Consent Order**.

5.1.3 National Grid seeks to acquire only such land and rights which are necessary to ensure securing the long-term placement of electricity transmission apparatus. It is in the public interest to obtain the appropriate security for the electricity supply network through the grant of permanent land rights and not temporary land rights. For major infrastructure projects undertaken by National Grid, longevity and security of rights is essential in the context of National Grid's ability to create new and upgrade existing infrastructure networks and to support major power generation infrastructure projects. Therefore, National Grid considers it essential to secure the grant of permanent easements rather than wayleaves whether by negotiation or through powers of compulsion.

5.1.4 However, where it is necessary to use and occupy land only during the construction and commissioning of the Project, then the powers sought by National Grid are limited to temporary use only.

5.1.5 Alongside the permanent and temporary rights sought, National Grid's own land has been included within the land to which the compulsory acquisition powers sought will apply. This reflects the fact that where National Grid holds an interest in land, that land may be subject to the rights of others which are incompatible with the construction and operation of the Project. In order to ensure that any such interests can be removed (and the persons benefitting from them are compensated for such removal), the powers of compulsory acquisition sought in the DCO are expressed to apply to all interests in such land other than those already held by National Grid.

5.1.6 The combination of both land and rights required for permanent acquisition and land required for temporary use resides within the 'Limits of Land to be Acquired and Used' or 'LLAU' and captures all the land required by the Project. In establishing the LLAU, National Grid has sought to avoid any unnecessary interference with third-party land and has, therefore, taken a proportionate approach to the proposed acquisition, mindful of the impact on affected landowners.

5.1.7 The **Application Document 2.3 Land Plans** show the Order land and the numbered plots within the Order Limits as listed in each of the chapters of the **Application Document 4.3 Book of Reference**. Each plot of land is coloured. The colouring serves to differentiate the type of rights or powers sought by National Grid for each given plot within the Order Limits which corresponds to the respective interest, right or power to be acquired or used.

5.1.8 There are instances where a plot may have more than one type of interest, right or powers sought. Where two types of interest, rights or powers are sought over a given

plot (such as temporary use during construction, as well as permanent rights to operate and maintain the works), the plot is coloured according to the more extensive power required. This includes instances where National Grid is seeking rights to facilitate the diversion of existing apparatus belonging to another statutory undertaker (such as Distribution Network Operators).

5.1.9 Classes of rights are subordinate to one another in accordance with the numerical hierarchy as shown in Table 5.1, save for Class 4 (Compulsory Acquisition of Rights – Environmental Mitigation) which is not subordinate to the higher classes. To allow for the construction of environmental mitigation, Class 4 benefits from the lower classes only. Where there is a requirement to place environmental mitigation on a higher class of right within the same plot, both colours are applied with the higher class being shaded and Class 4 being hatched. Class 4 is set out differently to the rest of the classes as the nature of the works are specific to environmental mitigation purposes only; this ensures a clear understanding of the use of the land while preventing unnecessary burden on the rest of the Order land.

5.1.10 Appendix A of this document explains the purpose for which compulsory acquisition and temporary possession powers are sought.

5.1.11 Table 5.1 sets out the powers related to land acquisition and use being sought by the Project.

Table 5.1 – Powers related to land acquisition and use being sought by the Project

Colour of plot on Land Plans	Land use power sought	Principal relevant DCO article
Brown	Class 1 – Compulsory Acquisition of land	Article 23
Green	Class 2 – Compulsory Acquisition of Rights – Overhead Line	Article 24
Blue	Class 3 – Compulsory Acquisition of Rights – Access	Article 24
Orange	Class 4 – Compulsory Acquisition of Rights – Environmental Mitigation	Article 24
Pink	Class 5 – Temporary Use of Land for Construction, Maintenance, Dismantling and/or Decommissioning of Redundant Infrastructure	Article 27, 28, 29, 30 and 31
Yellow	Class 6 – Temporary Use of Land for Access	Article 27, 28, 29, 30 and 31

5.2 Compulsory Acquisition and Temporary Use Powers

5.2.1 The main powers authorising the compulsory acquisition of land, or interests in, or new rights over land, are contained in Articles 23 (Compulsory acquisition of land) and 24 (Compulsory acquisition of rights) of the **Application Document 3.1 Draft Development Consent Order**.

5.2.2 Other compulsory acquisition powers are sought in the **Application Document 3.1 Draft Development Consent Order** and identified in section 5.3 of this Statement,

and these similarly relate to land and would, or may, interfere with property, rights, and interests.

5.2.3 In addition, powers are sought in the **Application Document 3.1 Draft Development Consent Order** to enable the temporary possession and use of land to carry out and maintain the Project.

5.2.4 In each case, the owner of the land, or the interest or right in the land, may be entitled to compensation.

5.3 Compulsory Acquisition Powers

5.3.1 The compulsory acquisition powers sought by National Grid in the **Application Document 3.1 Draft Development Consent Order** include the power to acquire existing private rights over land and extinguish existing private rights within land and are defined within the following draft DCO articles.

5.3.2 Article 23 (Compulsory acquisition of land): This article would allow National Grid to acquire compulsorily so much of the land within the Order Limits described in the **Application Document 4.3 Book of Reference** as is required for the construction, operation and maintenance of the authorised development or is incidental to it or required to facilitate it.

5.3.3 Article 24 (Compulsory acquisition of rights): This article would allow National Grid (and NPG in respect of the NPG works, NGED in respect of the NGED works and BT in respect of the BT works) to compulsorily acquire rights and impose restrictions over the Order land by creating them as well as by acquiring existing rights and the benefits of restrictions for the purposes of the authorised project.

5.3.4 Article 25 (Acquisition of subsoil or airspace only): This article would allow the acquisition of subsoil and airspace only. The undertaker may compulsorily acquire so much of, or such rights in, the subsoil of, or the airspace of, the land referred to in Articles 23 and 24.

5.3.5 Article 26 (Use of subsoil under or airspace over streets): This article states that the undertaker may enter on and use so much of the subsoil of, or airspace over, any street within the Order Limits as may be required for the purposes of the authorised development.

5.3.6 Article 32 (Disregard of certain interests and improvements): This article states that in assessing compensation payable to any person on the acquisition from that person of any land or right over any land under this Order, the Tribunal must not take into account any interest in land, or any enhancement of the value of any interest in the land by reason of any building erected, works executed or improvement or alteration made on relevant land if the Tribunal is satisfied that the creation of the interest, erection of the building, execution of the works or the making of the improvement or alteration as part of the authorised project was not reasonably necessary and was undertaken with a view to obtaining compensation or increased compensation.

5.3.7 Article 33 (Set-off for enhancement in value of retained land): This article states that in assessing compensation payable to any person on the acquisition from that person of any land (including any subsoil), the Tribunal must set off against the value of the acquired land any increase in value of any contiguous or adjacent land belonging to that person which will accrue to that person as a result of construction of the authorised project. In addition, in assessing compensation payable to any person on

the acquisition from that person of any new rights over land (including subsoil), the Tribunal must set off against the value of the rights, any increase in the value of the land over which the new rights are required, and any increase in value of any contiguous or adjacent land belonging to that person, which will accrue to that person as a result of the construction of the authorised project.

5.3.8 Article 34 (Compulsory acquisition of land – incorporation of the mineral code): This article incorporates both Parts 2 and 3 of Schedule 2 of the Acquisition of Land Act 1981 (HM Government, 1981) (with modifications) rather than just Part 2. Part 3 provides the procedure for the owner wishing to work the mines or minerals. By incorporating the two parts of the named Schedule, this article exempts existing rights in minerals from the scope of compulsory acquisition and deals with the situation where the owner of mines or minerals wishes to work them.

5.3.9 Article 35 (Time limit for exercise of authority to acquire land and rights compulsorily): The time period stated is after the end of the period of seven years beginning with the day on which the Order comes into force.

5.3.10 Article 36 (Application of the 1981 Act): This allows the undertaker to use the Compulsory Purchase (Vesting Declarations) Act 1981 (HM Government, 1981) to acquire land or rights by way of a General Vesting Declaration.

5.3.11 Article 37 (Application of Part 1 of the 1965 Act). This article provides for the application, with modifications, of Part 1 of the Compulsory Purchase Act 1965 (HM Government, 1965). The modifications are necessary to ensure that there is clarity, given the Order provisions.

5.3.12 Article 38 (Extinguishment and suspension of private rights): This article provides for the extinguishment or suspension of all private rights and restrictive covenants over land subject to compulsory acquisition from the earlier of the date of the acquisition of the land by the undertaker (whether by private agreement or compulsorily), or on the date of entry by the undertaker. It also provides for the extinguishment or suspension of all private rights and restrictive covenants over land owned by the undertaker within the Order Limits from the commencement of any authorised activity by the Order which interferes with or breaches such rights or restrictive covenants.

5.3.13 Article 39 (Power to override easements and other rights): This article provides that any authorised activity within the Order Limits is authorised if it is in accordance with the Order, notwithstanding that it involves an interference with a relevant interest or right, or a breach of a restriction.

5.4 Temporary Possession Powers

5.4.1 National Grid is seeking, for itself, NPG, NGED and for BT, temporary powers over an area greater than that proposed for permanent acquisition or acquisition of rights, which is identified through the Class of Rights shown on the **Application Document 2.3 Land Plans**.

5.4.2 The **Application Document 3.1 Draft Development Consent Order**, therefore, contains the following powers.

5.4.3 Article 27 (Temporary use of land by National Grid): National Grid may in connection with the carrying out of the authorised development, enter on and take temporary possession of: land designated for temporary possession within column (1) of Schedule 9 to the draft DCO; or land where no notice of entry has been served. It

allows National Grid to remove any electric line, electrical plant, buildings, structures, pylons, apparatus, equipment, vegetation or any other thing from that land; construct temporary or permanent works (including the provision of means of access and buildings or structures on that land); and construct any works specified in relation to that land in column (2) of Schedule 9 or any other mitigation works.

5.4.4 Article 28 (Temporary use of land by NGED): In connection with the carrying out of the works, NGED may enter on and take possession of: land designated for temporary possession within column (1) of Schedule 9 to the draft DCO; or any other land in respect of the works where no notice of entry has been served. It allows: the removal of any electric line, electrical plant, buildings, structures, pylons, apparatus, equipment, vegetation or any other thing from that land; the construction of temporary or permanent works (including the provision of means of access and buildings or structures on that land); and the construction of any works specified in relation to that land in column (2) of Schedule 9 or any other mitigation works.

5.4.5 Article 29 (Temporary use of land by NPG): In connection with the carrying out of the works, NPG may enter on and take possession of: land designated for temporary possession within column (1) of Schedule 9 to the draft DCO; or any other land in respect of the works where no notice of entry has been served. It allows: the removal of any electric line, electrical plant, buildings, structures, pylons, apparatus, equipment, vegetation or any other thing from that land; the construction of temporary or permanent works (including the provision of means of access and buildings or structures on that land); and the construction of any works specified in relation to that land in column (2) of Schedule 9 or any other mitigation works.

5.4.6 Article 30 (Temporary use of land by BT): In connection with the carrying out of the BT works, BT may enter on and take temporary possession of Order land in respect of BT Works where no notice of entry has been served. This includes the removal of any electric line, electrical plant, buildings, structures, pylons, apparatus, equipment, vegetation or any other thing from that land; the construction of temporary or permanent works (including the provision of means of access and buildings or structures on that land); and the construction of any works specified in relation to that land in column (2) of Schedule 9 or any other mitigation works.

5.4.7 Article 31 (Temporary use of land for maintaining the authorised development): This article allows the entry on and the taking of temporary possession of land within the Order Limits except for houses, gardens and any other building for the time being occupied, which is reasonably required to be maintained by the authorised development. The article also provides for the construction of such temporary works (including access) and buildings on the land as may be reasonably necessary, and for entrance onto the land for the purpose of gaining access for maintenance of the authorised project.

5.4.8 Article 32 (Disregard of certain interests and improvements): This article states that in assessing compensation payable to any person on the acquisition from that person of any land or right over any land under this Order, the Tribunal must not take into account: any interest in land; or any enhancement of the value of any interest in the land by reason of any building erected, works executed or improvement or alteration made on relevant land, if the Tribunal is satisfied that the creation of the interest, erection of the building, execution of the works or the making of the improvement or alteration as part of the authorised project was not reasonably necessary and was undertaken with a view to obtaining compensation or increased compensation.

5.4.9 Article 33 (Set-off for enhancement in value of retained land): This article states that in assessing compensation payable to any person on the acquisition from that person of any land (including any subsoil), the Tribunal must set off against the value of the acquired land any increase in value of any contiguous or adjacent land belonging to that person which will accrue to that person as a result of construction of the authorised project. In addition, in assessing compensation payable to any person on the acquisition from that person of any new rights over land (including subsoil), the Tribunal must set off against the value of the rights, any increase in the value of the land over which the new rights are required, and any increase in value of any contiguous or adjacent land belonging to that person, which will accrue to that person as a result of the construction of the authorised project.

5.4.10 Article 40 (Statutory authority to override easements and other rights): This article provides authority to carry out authorised development, even where it interferes with an interest or right or breach of restriction. Where any person's land is injuriously affected by the interference with that right or interest or by breach of the relevant restriction, compensation is payable.

5.4.11 Article 41 (Extinguishment of private rights and restrictive covenants relating to apparatus belonging to National Grid, NGED, NPG or BT removed from land subject to temporary possession): This article extinguishes the private rights and restrictive covenants relating to apparatus belonging to National Grid, NGED or NPG removed from land subject to temporary possession.

5.5 Other Powers of Note

5.5.1 Additional powers contained within the **Application Document 3.1 Draft Development Consent Order** which relate to land and which would or may interfere with property rights and interests are as follows.

5.5.2 Article 12 (Street works): The undertaker may, for the purposes of the authorised development, or for purposes ancillary to it, enter upon so much of any of the streets specified in column (2) of Schedule 4 (streets subject to street works) in order to carry out works in that street.

5.5.3 Article 15 (Power to alter, layout, etc. of streets): The undertaker may, for the purposes of carrying out the authorised development, permanently or temporarily alter the layout of, or carry out any works in, a street specified in column (1) of Part 1 or 2 of Schedule 5 (streets subject to alteration of layout) in the manner specified in relation to that street in column (2).

5.5.4 Article 16 (Temporary closure of streets and public rights of way): This article, which must be read alongside Schedule 6 (Streets or public rights of way to be temporarily closed) to the draft Order, allows for the temporary closure of streets and public rights of way. During and for the purposes of carrying out the authorised development, the undertaker may temporarily close, alter or divert any street or public right of way shown on the **Application Document 2.6 Access Rights of Way and Public Rights of Navigation Plans** or within the Order Limits and may for any reasonable time: divert the traffic from the street or public right of way; and subject to paragraph (3), prevent all persons from passing along the street or public right of way.

5.5.5 Article 17 (Access to works): The undertaker may for the purposes of the authorised development form and lay out means of access or improve the existing means of access, in locations shown on the **Application Document 2.6 Access Rights of**

Way and Public Rights of Navigation Plans and specified in the draft DCO, namely column (2) of Schedule 7 (Access to works). The consent of the relevant street authority is required in respect of the formation and laying out of any other means of access.

5.5.6 Article 18 (Construction, alteration and maintenance of streets and other structures): Any street (other than any private streets) to be constructed under the Order must be completed to the reasonable satisfaction of the street authority and must, unless otherwise agreed with the street authority, be maintained (including any culverts or other structures laid under that part of the highway) by the street authority.

5.5.7 Article 20 (Discharge of water): The undertaker may use any watercourse or any public sewer or drain for the drainage of water in connection with the carrying out or maintenance of the authorised development, and for that purpose may lay down, take up and alter pipes and may, on any land within the Order Limits, make openings into, and connections with, the watercourse, public sewer or drain.

5.5.8 Article 21 (Protective works): At the undertaker's own expense they are permitted to carry out such protective works to any land, buildings, structure, apparatus or equipment, lying within the Order Limits or which may be affected by the authorised development.

5.5.9 Article 22 (Authority to survey and investigate the land): The undertaker may for the purposes of the Order enter onto the land shown within the Order Limits or land which may be affected by the authorised development to survey, monitor or investigate land and to place, leave on and remove from the land apparatus in connection with surveys, monitoring and investigation.

5.5.10 Article 42 (Crown rights): Nothing in the Order affects prejudicially any estate, right, power, privilege, authority or exemption of the Crown and, in particular, nothing in this Order authorises the undertaker or any licensee to take, use, enter on or in any manner interfere with any land or rights of any description (including any part of the shore or bed of the sea or any river, channel, creek, bay or estuary) belonging to the Crown and forming part of the Crown Estate (without the written consent of the Crown Estate Commissioners), belonging to the Crown but not forming part of the Crown Estate (without the written consent of the government department that manages that land), or belonging to a government department or held in trust for the Crown for the purposes of a government department (without the written consent of that government department).

5.5.11 Article 43 (Special category land): This article provides that the Special Category Land (i.e. land forming part of a common, open space or fuel or field allotment) required for the authorised development will be discharged from all rights, trusts and incidents so far as their continuance would be inconsistent with the exercise of the Order rights.

5.5.12 Article 44 (statutory undertakers): Subject to protective provisions, the undertaker may: acquire compulsorily the Order land belonging to statutory undertakers; and as described in the **Application Document 4.3 Book of Reference**, extinguish or suspend the rights of, remove or reposition apparatus belonging to a statutory undertaker; acquire existing rights; create and acquire new rights and impose restrictive covenants over statutory undertakers' land; construct the authorised development in such a way as to cross underneath or over apparatus belonging to a statutory undertaker and construct over existing apparatus belonging to the

statutory undertaker any temporary or permanent track or roadway, with the right to maintain or remove the same.

5.5.13 Article 48 (Traffic regulation): This allows the undertaker to regulate traffic on specified roads in accordance with the details set out in Schedule 11 (Traffic regulation orders) to the draft Order and on the **Application Document 2.5 Traffic Regulation Order Plans** or on other roads with the consent of the traffic authority, for the construction of the authorised Development.

5.5.14 Article 49 (Felling or lopping of trees and removal of hedgerows): This allows any tree, shrub, hedgerow or important hedgerow that is near the authorised development to be felled, lopped or coppiced, or have its roots cut back, if it is considered necessary to prevent it from obstructing or interfering with the construction, operation or maintenance of the proposed project or from constituting a danger to anyone constructing, operating, maintaining or decommissioning it.

5.5.15 Article 50 (Trees subject to Tree Preservation Orders): This allows the undertaker to fell or lop trees which are subject to a Tree Preservation Order.

5.5.16 Article 51 (Temporary suspension of navigation in connection with the authorised development): This allows the undertaker to temporarily interfere with and close the relevant part of the watercourses (as well as use vessels and moorings) shown on the **Application Document 2.6 Access Rights of Way and Public Rights of Navigation Plans** during construction and maintenance of the authorised development. It is necessary so works adjacent to, above and beneath can be completed safely.

5.6 Conclusions

5.6.1 National Grid considers that the powers sought in the draft DCO as set out in this chapter are reasonable, proportionate (i.e. nothing greater than needed), and necessary to deliver and thereafter maintain the Project.

6. The Order Limits and Persons with an Interest in Land

6.1 The Extent of the Land Subject To Compulsory Acquisition Powers

6.1.1 The full extent of the land subject to powers of compulsory acquisition and required for National Grid to construct and maintain the Project as described in Chapters 2 and 3 of this Statement is shown on the **Application Document 2.3 Land Plans** and the **Application Document 2.4 Works Plans**. It is further described in the **Application Document 4.3 Book of Reference** and in the **Application Document 6.4 Environmental Statement Chapter 4 Description of the Project**.

6.2 Location

6.2.1 The Project has been sub-divided into six geographical sections for reader accessibility. These are shown on **Application Document 6.1.F1 Environmental Statement Figure 1.1 Project Location and Route Sections**. It should be noted that these differ to the 11 Route Sections the Project presented during non-statutory and statutory consultations which were presented to aid consultees in providing feedback.

6.2.2 The Route Sections are illustrated on Application Document 6.1.F1 Environmental Statement Figure 1.1 Project Location and Route Sections and comprise:

- Route Section A between the proposed Birkhill Wood Substation and the River Ouse;
- Route Section B between the River Ouse and Crowle;
- Route Section C between Crowle and North Moor (M180);
- Route Section D between North Moor (M180) and the River Idle;
- Route Section E between the River Idle and Darlton; and
- Route Section F between Darlton and the proposed High Marnham Substation.

6.3 Identifying Persons with an Interest in Land

6.3.1 In preparing the DCO application, National Grid has carried out diligent inquiry through the land referencing process (described in section 6.6 below), to identify all persons who fall within the categories set out in s44 and s57 of the PA 2008 (HM Government, 2008). Such persons are listed in the **Application Document 4.3 Book of Reference** and have been consulted about the DCO application in accordance with s42 of the PA 2008 as described in the **Application Document 5.1 Consultation Report**.

6.3.2 Diligent inquiry to identify affected landowners, those with interests in land and those with a potential claim, has been undertaken for this Project. The categories of

persons identified and the methods used to identify the persons with an interest in the land are described in the **Application Document 5.1 Consultation Report Appendix I Land Referencing Methodology** and summarised below.

6.3.3 Land referencing has been undertaken throughout the pre-application period to ensure that any changes in ownership or new interests have been identified, consulted and are subject to engagement. Any changes in ownership that may occur will be identified and the **Application Document 4.3 Book of Reference** will be updated accordingly.

6.3.4 National Grid is satisfied that all of the land interests identified for compulsory acquisition are required to enable the Project to proceed.

6.4 Category 1 and 2 Persons

6.4.1 Category 1 comprises owners, lessees, tenants (whatever the tenancy period) and occupiers of the land.

6.4.2 Category 2 comprises persons who are interested in the land or have the power to sell and convey, or to release, the land.

6.5 Category 3 Persons

6.5.1 Category 3, as prescribed by s44 and s57 of the PA 2008 (HM Government, 2008), comprises persons who the applicant thinks would or might be entitled to make a 'relevant claim' for compensation, if the order sought by the application were to be made and fully implemented. A 'relevant claim' is defined in the PA 2008 as meaning a claim under s10 of the Compulsory Purchase Act 1965 (HM Government, 1965), under Part 1 of the Land Compensation Act 1973 (HM Government, 1973) or under s152(3) of the PA 2008.

6.6 Land Referencing and Considered Interests Identification

6.6.1 Identification of Category 1, 2 and 3 interests was undertaken during the initial stages of the Project, in order to inform the design, consultation and preparation of the DCO application.

6.6.2 Interests were identified through a land referencing methodology incorporating publicly available desktop sources (including Land Registry updates, checks of Companies House, checks of local authority information and other online data) and contact with land interests. This included correspondence using Land Interest Questionnaires to request information on land holdings and other legal interests in land, followed up with further inquiries and site visits. Where land was unregistered or interests were unknown, further investigations were done on-site and notices placed on the land requesting information. Full details of the diligent inquiry process used to identify land interests are described in the **Application Document 5.1 Consultation Report Appendix I Land Referencing Methodology**.

6.6.3 All interests within the Order Limits were identified, including owners, lessees, tenants and occupiers, as well as persons who are interested in the land or have power to sell and convey, or to release the land. These were recorded as Category 1 and 2 persons.

6.6.4 In order to identify potential Category 3 persons who may have a claim pursuant to s10 of the Compulsory Purchase Act 1965 or s152(3) of the PA 2008, an initial buffer of 75 metres was applied to the Order Limits to ensure adjacent landowners, frontage interests and potential relevant claims under s10 of the Compulsory Purchase Act 1965 and s152(3) of the PA 2008 were included, as well as carrying out a desk-based assessment to identify properties outside the buffer with a potential relevant claim.

6.6.5 Potential claims under Part 1 of the Land Compensation Act 1973 were also identified using the outcomes of environmental assessment to identify those properties that may have a claim as a result of physical factors which are noise, vibration, smell, fumes, smoke, artificial lighting and discharge or solid or liquid substances on the land.

6.6.6 The project has also identified any parties that would be potentially affected by temporary road closures that are proposed to facilitate the construction of the project. There are a number of roads that are proposed to be temporarily closed to allow for road widening, DNO asset alteration and access route construction. All roads that are to be closed for a period greater than one day have been assessed for their affected users. The parties identified through a combination of desktop referencing and contact referencing include those whose sole access to their owned, occupied or tenanted land is significantly affected by the road closure. Disrupted access for a period greater than one day has been evaluated to potentially give rise to a section 10 claim.

6.6.7 Ongoing updates to the land referencing information, through further checks of desktop sources and correspondence with landowners ensured diligent inquiry was completed, and any new persons with an interest in land were recorded, notified and consulted.

6.7 Negotiations To Acquire by Agreement

6.7.1 It is necessary to seek powers of compulsory acquisition in the draft DCO in order to ensure that, in the event that voluntary negotiations to acquire land and rights by agreement are unsuccessful in relation to any part of the land, the Project is not precluded from being delivered.

6.7.2 National Grid has a publicly available document titled the Land Rights Strategy and Payment Schedule for Assets developed in 2010 and kept under regular review sets out a consistent methodology for acquiring land and rights for NGET's infrastructure projects, in particular aimed at securing permanent rights to protect the long- term lifespan of the infrastructure.

6.7.3 National Grid's preference is always to secure land rights on a voluntary basis. National Grid's strategy is to engage with interested parties as early as possible, to explain the requirements of the project and the rights sought; seek understanding of the landowner's particular concerns; and provide sufficient opportunity for questions and feedback, before making fair offers for the land and rights required.

6.7.4 To help facilitate this strategy, National Grid's Land Rights Strategy, developed in 2010 (updated in 2024) (National Grid, 2024), provides a consistent methodology for acquiring rights for infrastructure projects, both for DCOs as well as Town and Country Planning Act/Compulsory Purchase Order schemes. The strategy is used for all such projects and is under continuous review to ensure that it is still fit for purpose, treats people fairly, and meets the expectations of third-party landowners and occupiers.

6.7.5 Since the start of the Project and through the statutory consultation period, National Grid has endeavoured to engage with all owners and occupiers of the land required for or affected by the Project. The engagement formed part of the consultation process to obtain feedback on the proposals and, where appropriate, discussions have been held about the potential implications of the Project.

6.7.6 National Grid will continue to seek to acquire all interests in the land through private land agreements.

6.7.7 Formal agreements issued to persons with a freehold interest in the land take the form of Heads of Terms negotiations for an Option agreement in respect of the land or rights sought. Where land is subject to an occupier with security of tenure and exclusive possession, National Grid may negotiate tripartite agreements or occupiers' consent agreements direct with the occupier, where appropriate.

6.7.8 For land over which freehold acquisition is required, Heads of Terms for an Option to acquire that land will be issued.

6.7.9 Appendix B of this Statement outlines the ongoing negotiations to date for all voluntary agreements sought for the Project.

6.8 Utilities

6.8.1 National Grid is engaging and will continue to engage with all identified utility providers. Section 8.3 of this Statement entitled: 'Statutory Undertakers and Utilities' provides more information on the compulsory acquisition of land and rights required from various statutory undertakers.

6.9 Highways Subsoil Interests

6.9.1 Where the **Application Document 2.3 Land Plans** include land within the lateral extent of the public highway (i.e. highway subsoil which is not within the designation as highway) and there is an adjoining owner, then these subsoil rights will be included in the voluntary agreement sought from the adjoining landowner, in so far as they are able to grant.

6.9.2 Where the owner of highway subsoil is unknown and National Grid is unable to seek voluntary agreements, it will therefore need to rely on the compulsory land powers in respect of subsoil not subject to the designation as highway.

6.9.3 Where the **Application Document 2.3 Land Plans** include surface rights to undertake works within the highway, National Grid does not need subsoil rights and hence does not propose to seek a voluntary agreement with the owners of the highway subsoil.

7. Justification for Powers of Compulsory Acquisition

7.1 Sections 120 and 122 of the Planning Act 2008

7.1.1 S120 of the PA 2008 (HM Government, 2008) prescribes those matters which may be provided for in a DCO. In particular, an Order may impose requirements in connection with the development for which consent is granted. S120(3) and s120(4) go on to provide that an Order may make provision relating to, or to matters ancillary to, the development for which consent is granted. The matters in respect of which provision may be made include (but are not expressly limited to) the matters listed in Schedule 5 to the PA 2008, for example:

- The acquisition of land, compulsorily or by agreement;
- The creation, suspension or extinguishment of, or interference with, interests in or rights over land, compulsorily or by agreement; and
- The payment of compensation.

7.1.2 Those matters are listed in Part 1 of Schedule 5 to the PA 2008 and they include the acquisition of land and '*the creation, suspension or extinguishment of, or interference with, interests in or rights over land (including rights of navigation over water), compulsorily or by agreement*'.

7.1.3 S122 of the PA 2008 provides that an Order granting development consent may include provisions authorising compulsory acquisition of land, only if the decision maker is satisfied that two conditions are met.

7.1.4 The first condition (s122(2)) requires that one of three criteria are met, as follows:

- The land is required for the development to which the development consent relates; or
- The land is required to facilitate or is incidental to that development; or
- The land is replacement land to be given in exchange for land which is open space or common land.

7.1.5 The second condition (s122(3)) is that there is a compelling case in the public interest for the inclusion of powers of compulsory acquisition in the Order.

7.1.6 Paragraph 7 of the Guidance (Department for Communities and Local Government, 2013) expands on s122 of the PA 2008 and makes it clear that applicants must be prepared to justify their proposals for compulsory acquisition to the satisfaction of the Secretary of State.

7.1.7 Paragraphs 8 to 22 of the Guidance provide a number of general considerations that applicants should demonstrate to the satisfaction of the decision maker:

- All reasonable alternatives to compulsory acquisition (including modifications to the Project) have been explored (paragraph 8);

- The development is of legitimate purpose, necessary and proportionate (paragraph 8);
- How the land is intended to be used and that there is no doubt as to the particular purposes for which any land is to be compulsorily acquired (paragraph 9);
- There is a reasonable prospect of the requisite funds becoming available (paragraph 9);
- There is justification for interfering with the human rights of those with an interest in the land affected (paragraph 10);
- There is a compelling case for the compulsory acquisition (paragraph 12);
- The public benefit will outweigh the private loss (paragraph 13); and
- Any risks or impediment to the Project have been properly managed (paragraph 19).

7.1.8 In respect of paragraph 19, section 7.6 of this Statement sets out that funding is available to complete the Project and should be read in conjunction with the **Application Document 4.2 Funding Statement**.

7.1.9 In addition, section 8.4 of this Statement sets out the need for other consents from bodies such as the Environment Agency, to allow certain elements of the development to proceed, but this does not therefore present any obstacle to the implementation of the Project. Further reference should be made to the **Application Document 5.5 Planning Statement** which addresses Other Consents and also the **Application Document 5.4 Consents and Licences Required Under Other Legislation**.

7.1.10 There are therefore no known impediments to the delivery of the Project.

7.1.11 The following paragraphs explain how the pre-conditions to the grant of powers of compulsory acquisition are met in this case.

7.2 Tests Under Section 122(2)

7.2.1 Condition 1: The land and rights in the land are '*required for the development to which the consent relates,* or the land and rights *'are required to facilitate or is incidental to that development*'.

7.2.2 Chapter 2 of this Statement describes the national need for the provision of new energy infrastructure.

7.2.3 Chapter 3 of this Statement sets out the works comprised in the Project (including NPG, NGED and BT related works) for which the powers of compulsory acquisition are required.

7.2.4 Chapter 5 of this Statement sets out the powers of compulsory acquisition being sought.

7.2.5 The **Application Document 4.3 Book of Reference** sets out the classes of rights sought in respect of each plot. The **Application Document 2.3 Land Plans** and **Application Document 2.4 Works Plans** show the land that falls within the Order Limits and the works proposed on such land. The Land Plans and Book of Reference together detail the land and the rights required as well as the extent of the land and rights in land that would be affected.

7.2.6 National Grid require permanent acquisition of land (Class 1) to carry out works in private land adjacent to the public highway to widen the highway extent to facilitate safe access, and for some environmental enhancement and mitigation works (including mitigation for loss of Functionally Linked Land). This cannot be achieved by rights alone.

7.2.7 National Grid is also seeking permanent rights for overhead line (Class 2), access (Class 3), and environmental mitigation (Class 4). In each case the acquisition of rights is necessary to deliver the proposed Project and is proportionate to the degree of interference with any private rights.

7.2.8 National Grid is also seeking temporary rights for temporary use of land required to deliver the Project which are set out in Classes 5 and 6.

7.3 Tests Under Section 122(3)

7.3.1 Condition 2: '*There is a compelling case in the public interest for compulsory acquisition.*'

7.3.2 With regard to the condition set out in s122(3), Chapter 2 of this Statement, Chapter 3: Need for the Project in the **Application Document 5.5 Planning Statement** and the **Application Document 7.17 Strategic Options Report including Needs Case** explain how there is a national need for the provision of new energy infrastructure. The Project provides critical transmission capacity necessary for safe and secure connections. The requirement for compulsory acquisition powers will ensure timely acquisition of the necessary land and rights needed to construct and maintain the Project.

7.3.3 Chapter 3 within this Statement and section 7.4 below also describe the multistage process that National Grid has followed in developing the Project, which is required to transmit electricity to businesses and homes. This involved an iterative process involving appropriate environmental appraisal, consultation, consideration of alternatives and engineering design which has resulted in a Project which balances the relevant matters including National Grid's duties and government guidance.

7.3.4 The compulsory acquisition powers would ensure timely acquisition of the necessary land and rights needed to construct and maintain the Project. Without such powers, the delivery of the Project cannot be guaranteed, and there is a risk that the national need will not be met.

7.3.5 The land and rights sought are therefore necessary to facilitate the Project. National Grid has sought to ensure that a proportionate approach has been taken in identifying the permanent acquisition powers and temporary use powers required to achieve its delivery.

7.3.6 There is therefore a very clear need for the Project to be granted development consent and associated compelling case in the public interest for compulsory acquisition powers.

7.4 Alternative to Compulsory Acquisition

7.4.1 The need for the Project is established in Chapter 3: Need for the Project of **Application Document 5.5 Planning Statement**. The various purposes for which the interests in the land are required are set out in this Statement of Reasons; and in

the project description, project evolution and design development sections of **Application Document 5.5 Planning Statement**, which further explains how the evolution of the Project has followed an iterative design process.

7.4.2 **Application Document 6.3 Environmental Statement Chapter 3 Main Alternatives Considered** also provides further details on the alternatives considered throughout the development process for the Project.

7.4.3 In order to construct, operate and maintain the proposed Project, land and rights in the ownership of parties other than National Grid would need to be acquired. Any practicable alternative location for the proposed Project would similarly require the acquisition and/or use of third-party land. This means that acquisition and/or use of third-party land cannot be avoided. The **Application Document 4.3 Book of Reference**, the **Application Document 2.3 Land Plans**, and Appendix A of this Statement, show the land and rights in land that are required and for what purpose. In each case the rights sought are necessary to deliver the proposed Project and are proportionate to the degree of interference with the interests and rights of landowners.

7.4.4 National Grid have also sought powers of temporary possession, where appropriate, rather than compulsory acquisition of land or rights, as the temporary possession of land is more proportionate where the permanent acquisition of land or rights is not required.

7.4.5 Consultations have been conducted with both the public and those affected persons with an interest in land and further detail is provided in the **Application Document 5.1 Consultation Report**.

7.4.6 There has been ongoing engagement directly with all affected landowners, interests and occupiers since the launch of the Project. All have had opportunities to feedback on the routeing and siting of the Project as it affects them, in order to inform optimum route alignment and to try and minimise the land required. Engagement and negotiations have been ongoing throughout the consultation and design process to try to avoid the need for compulsory acquisition. The design of the freeholder locations and new pylons have, where possible, been designed to mitigate the impact on the landowners through placing near boundaries and reducing land-take around the design.

7.4.7 It is in the public interest to obtain the appropriate security for the electricity supply network through the grant of permanent land rights and not temporary land rights. For major infrastructure projects undertaken by National Grid, longevity and security of rights is essential in the context of National Grid's ability to create new and upgrade existing infrastructure networks and to support major power generation infrastructure projects. Therefore, National Grid considers it essential to secure the grant of permanent easements rather than wayleaves whether by negotiation or through powers of compulsion.

7.4.8 As stated in Chapter 5 of this document, it is the preference of National Grid that all land and rights can be acquired through negotiation and agreement.

7.4.9 Compulsory acquisition powers will only be exercised where it appears that negotiations are unlikely to be completed or to be completed in time. However, without the fall-back of compulsory purchase powers, there is a risk that the urgent national need for the Project could not be met because the land and rights required in the Order Limits may not be capable of being assembled, either within an appropriate timeframe or at all.

7.5 The Proposed Interest in the Land Is Legitimate, Necessary, and Proportionate

7.5.1 As noted above, National Grid will continue to seek to negotiate the acquisition of land and rights where this is possible in the context of the timely delivery of the Project.

7.5.2 The need for the Project is set out in Chapter 3: Need for the Project of the **Application Document 5.5 Planning Statement** and **Application Document 7.17 Strategic Options Report including Needs Case** and is underpinned by NPS EN-1 (Department for Energy Security and Net Zero, 2025) and NPS EN-5 (Department for Energy Security and Net Zero, 2025).

7.5.3 The compulsory acquisition of land and rights in land is necessary to deliver this connection.

7.5.4 Without the compulsory acquisition of the necessary interests in land, the delivery of the Project cannot be guaranteed. This means that the acquisition and/or use of third-party land cannot be avoided.

7.5.5 Steps have been taken to ensure that the land and interests acquired in each case are necessary to deliver the Project and proportionate to the degree of interference with the interests and rights of landowners, including the following:

- As set out in **Application Document 6.3 Environmental Statement Chapter 3 Main Alternatives Considered**, National Grid assessed alternative options to deliver the Project with more limited land-take, but the acquisition of third-party interests cannot be avoided to deliver the Project.
- The Order Limits are drawn tightly to avoid any unnecessary interference with or extinguishments of third-party rights but have regard to the need for flexibility to ensure Project deliverability.
- Where appropriate, National Grid has sought to take powers to temporarily use land, rather than permanent acquisition of land or rights.
- Wherever possible, National Grid is seeking rights in land rather than outright acquisition.

7.5.6 Compensation is payable for the compulsory acquisition of land or rights. Compensation is also payable for loss or damage caused by the exercise of any power of temporary use of land. Any dispute in respect of the compensation payable is to be determined by the Lands Chamber of the Upper Tribunal.

7.6 Funding for Compensation

7.6.1 The Guidance indicates that an applicant '*should be able to demonstrate that adequate funding is likely to be available to enable the compulsory acquisition*' within the relevant period.

7.6.2 The **Application Document 4.2 Funding Statement** sets out how the proposed Project and the acquisition of land and rights over land necessary to build the Project would be funded. It demonstrates that there is a reasonable prospect of the requisite funds being available to fund all aspects of the Project.

8. Special Considerations

8.1 Crown Land

8.1.1 S135 of the PA 2008 (HM Government, 2008) provides that a DCO may authorise, with the consent of the appropriate Crown authority, the compulsory acquisition of an interest held in Crown land which, for the time being, is held otherwise than by or on behalf of the Crown.

8.1.2 National Grid has made provision in the **Application Document 3.1 Draft Development Consent Order** for the acquisition of those land interests which are not held by the Crown, but which exist in Crown land and are comprised in plots as shown in Part 4 of the **Application Document 4.3 Book of Reference** and the **Application Document 2.15 Crown Land Plans**.

8.1.3 The consent of the appropriate Crown authorities listed below, in relation to the Crown land included in the Project, is required to authorise the compulsory acquisition of these land interests:

- The King's Most Excellent Majesty In Right Of His Crown care of The Crown Estate Commissioners.

8.1.4 National Grid has entered into discussions with the aforementioned Crown authority.

8.2 Special Category Land

8.2.1 This section addresses the issue of Special Category Land in respect of the Project. Special Category Land is afforded special protection by the legislation.

8.2.2 Special Category Land is defined in Regulation 2 of the APFP Regulations as '*land identified as forming part of a common, open space, National Trust land or fuel or field garden allotment*'. The definition goes on to indicate that Special Category Land is shown on the Land Plans that accompany the application for development consent. In this case, Special Category Land is shown on the **Application Document 2.14 Special Category Land Plans**. For clarity of affected categories, the only Special Category Land identified within the Project is common land.

8.2.3 S131 and s132 of the PA 2008 make provision for Special Parliamentary Procedure (SPP) to apply where a DCO authorises the compulsory acquisition of land, or rights over land forming part of a common, open space or fuel or field garden allotments.

8.2.4 SPP requires that powers of compulsory acquisition relating to the Special Category Land be subject to further scrutiny by Parliament, before the DCO covering the compulsory acquisition can come into effect. A DCO is exempt from SPP where the Secretary of State is satisfied that one of the exemptions in s131 or, as the case may be, s132 of the PA 2008 apply.

8.2.5 This Statement sets out the justification for seeking compulsory acquisition powers within the draft DCO.

8.2.6 For each example of common land cited within Appendix C of this Statement, in each case, the Secretary of State can be satisfied that the exemptions explored against

each are applicable, and hence the Secretary of State may confirm by certificate that SPP would not apply in relation to the compulsory acquisition of permanent rights over such land.

8.2.7 For the reasons explained in this chapter and Appendix C of this Statement, National Grid seeks to rely on the statutory exemptions in s132(3), (4A), and (5) of the PA 2008, and accordingly the Secretary of State may confirm by certificate that SPP would not apply in relation to the compulsory acquisition of permanent rights over such land.

8.3 Statutory Undertakers and Utilities

Engagement

8.3.1 National Grid first undertook direct and substantive engagement with potentially affected statutory undertakers in 2023, from the commencement of non-statutory consultation. At this stage, the Project presented an emerging preferred corridor and graduated swathe to seek feedback for the siting of the proposed electricity transmission infrastructure, allowing early discussions to take place regarding site specific crossing locations, and associated construction and operational requirements.

8.3.2 National Grid continued to engage with the statutory undertakers into and throughout 2024, including during a localised non-statutory consultation between South Wheatley to High Marnham. A proposed alignment and Project design was developed, informed by non-statutory consultation feedback, survey findings and further technical assessment work. This was consulted on during statutory consultation in 2025. All statutory consultation feedback was reviewed and considered as the Project design underwent further refinement, including consultation feedback received from the statutory undertakers, persons with interest in land and the wider community. Engagement broadened to include asset information supplied by statutory undertakers, Alternating current (AC) interference, and agreeing the methodologies for AC studies scheduled to be conducted by National Grid. Initial discussions also commenced regarding bespoke protective provisions.

8.3.3 In 2025, National Grid undertook statutory consultation and continued to engage with the statutory undertakers regarding the proposed Project alignment, and associated crossing schedules.

8.3.4 National Grid's preference is to pursue mutually agreeable solutions through ongoing constructive dialogue and engagement with all affected statutory undertakers.

8.3.5 National Grid remains in discussions with affected statutory undertakers as regards the likely impact of the Project on their statutory undertaking and is committed to agreeing appropriate mitigation. National Grid will seek to capture this engagement in the respective **Application Document 5.8 Statements of Common Ground** as appropriate.

Sections 127 and 138 of the Planning Act 2008

8.3.6 The draft DCO, if made, would authorise the compulsory acquisition of rights over statutory undertakers' land as described in the **Application Document 4.3 Book of Reference**, the Compulsory Acquisition Schedule within this Statement (Appendix A), the Schedule of Negotiations within this Statement (Appendix B), and as shown on

the **Application Document 2.3 Land Plans**, and Table 8.1. However, it should be noted that National Grid is only seeking to acquire permanent rights over land or exercise temporary possession powers over land owned by statutory undertakers; no compulsory acquisition of statutory undertaker land is proposed.

Table 8.1 – Plots owned by statutory undertaker(s)

Plots owned by statutory undertakers over which compulsory acquisition of land and/or rights are required	Owned by statutory undertaker
E8-053, E8-056, E8-062, E8-063, E8-065	Anglian Water Services Limited

C1-013, D6-047, D6-048, D6-049, D6-050, D6-051, D6-052, D6-053, D6-054, D6-055, D6-056, D6-057, D6-058	The Isle Of Axholme and North Nottinghamshire Water Level Management Board
A12-037, A12-041	The Ouse & Humber Drainage Board

8.3.7 In the event that any of the affected statutory undertakers objects to the proposed compulsory acquisition of rights in land held for the purpose of their statutory undertaking, s127(6) of the PA 2008 provides that a DCO may only authorise the compulsory acquisition of rights over statutory undertakers' land where the Secretary of State is satisfied that:

- The rights can be acquired without serious detriment to the carrying on of the undertaking; or
- Any consequential detriment to the carrying on of the undertaking can be made good by the undertaker by the use of other land belonging to or available for acquisition by the undertaker.

8.3.8 S138 of the PA 2008 is engaged by Article 44 of the **Application Document 3.1 Draft Development Consent Order**. This article would permit National Grid to extinguish or relocate the rights or apparatus of statutory undertakers. Such power may only be included in the DCO if the Secretary of State is satisfied the extinguishment or removal is necessary for the authorised development. The construction of the Project will require interference with statutory undertakers' land and the possible relocation of their apparatus. However, the exercise of such powers will be carried out in accordance with the protective provisions which set out constraints on their exercise with a view to safeguarding the statutory apparatus owners' interests.

8.3.9 The protective provisions are set out in detail in Schedule 14 of the **Application Document 3.1 Draft Development Consent Order**. Part 1 of Schedule 14 includes provisions to protect electricity, gas, water and sewage undertakers and include provisions for alternative apparatus which allows the undertaker(s) to fulfil their statutory functions in a manner not less efficient than previously.

8.3.10 Part 2 of Schedule 14 provides protection for operators of electronic communications code networks whereby if the Project causes damage to that network, the undertaker shall bear and pay the costs reasonably and properly incurred and make such damage good.

8.3.11 The draft DCO contains further protective provisions for the benefit of other named parties, including highways and drainage authorities. As negotiations progress with other statutory undertakers and interested parties, it is anticipated that further sets of protective provisions will be added to Schedule 14 of the **Application Document 3.1 Draft Development Consent Order**.

8.3.12 National Grid therefore considers that the tests set out in s127 and s138 of the PA 2008 are, or are capable of being, satisfied.

8.4 Other Consents

8.4.1 The DCO would be the principal consent required to allow the Project to proceed.

8.4.2 In addition, there are other consents, licences and permissions that National Grid would require from authorities such as the Environment Agency and Natural England to allow certain elements of the development to proceed. Further detail is located in the **Application Document 5.5 Planning Statement** and in the **Application Document 5.4 Consents and Licences Required Under Other Legislation**.

8.4.3 National Grid is in discussion with all relevant bodies and is not aware of anything that is likely to prevent the grant of consent.

8.4.4 The need for these other consents does not therefore present any obstacle to the implementation of the Project.

9. Human Rights and Equalities

9.1 The Protected Rights

9.1.1 The European Convention on Human Rights (the Convention) was applied within UK domestic law by the Human Rights Act 1998 (HM Government, 1998).

9.1.2 The articles of the Convention that are relevant when determining whether a DCO should be made which includes powers of compulsory acquisition are Article 1 of the First Protocol to the Convention, Article 6 and Article 8.

9.1.3 Article 1 of the First Protocol to the Convention protects the right of everyone to the peaceful enjoyment of possessions. No one can be deprived of possessions except in the public interest and subject to the relevant national and international laws and principles.

9.1.4 Article 6 entitles those affected by powers sought for the Project to a fair, public hearing.

9.1.5 Article 8 protects private and family life, home and correspondence. No public authority can interfere with these interests except if it is in accordance with the law and is necessary in the interest of national security, public safety, or the economic wellbeing of the country. As with Article 1 of the First Protocol to the Convention, any interference if justified, must be proportionate.

9.1.6 The Project has the potential to infringe the human rights of persons who hold interests in the Order land. Such infringement can be authorised by law provided the appropriate statutory procedures for making the DCO are followed and a compelling case in the public interest is made for the compulsory acquisition and the interference with the convention right is proportionate. On the basis of decisions of the courts, the test of proportionality is satisfied if the DCO strikes a fair balance between the public benefit sought and the interference with the rights in question.

9.1.7 Appropriate consultation has taken place for the Project, as summarised below:

- The non-statutory consultation was held between 1 June 2023 and 27 July 2023.
- A localised non-statutory consultation was held between 9 July 2024 and 6 August 2024.
- A statutory consultation was held between 18 February 2025 and 15 April 2025.
- Further Persons with an Interest in Land (PIL) consultation was held between June 2025 and September 2026.
- In accordance with paragraphs 5.21 and 5.22 of the PA 2008: Guidance on the pre-application stage for Nationally Significant Infrastructure Projects (Ministry of Housing, Communities and Local Government, 2026) Persons with an Interest in Land identified immediately before submission were written to separately. This letter included details about the Project, where further information could be found, how to get in touch with National Grid and to explain how there would be an opportunity to provide comments to the Planning Inspectorate once the DCO application has been submitted.

9.1.8 The opportunity for those holding interests in the Order land to make representations during the Examination will allow representations and objections to be made which may be considered by the Secretary of State if not resolved. Furthermore, those directly affected by the Order (i.e. landowners and those with interests in the land required for the Project) will, in principle, be entitled to statutory compensation in accordance with the Compensation Code.

9.1.9 The need for the Project is well established and is of national importance, as detailed in the Need Case section of the **Application Document 5.5 Planning Statement**. Second, those affected by the exercise of compulsory acquisition or temporary use powers will be entitled to compensation and National Grid has the resources to provide such compensation. National Grid has weighed the potential infringement of convention rights in consequence of the inclusion of compulsory powers within the draft DCO with the potential public benefits if the draft DCO is made. National Grid has concluded that the significant public benefits outweigh the effects of the draft DCO upon persons who own property in the Order Limits such that there would not be a disproportionate interference with their Article 8 and Article 1 First Protocol rights.

9.1.10 As for Article 6, third parties have been able to make representations on the application for development consent while it is being prepared. In accordance with Part 5 of the PA 2008 (HM Government, 2008), National Grid consulted persons set out in the categories contained in s44 of the PA 2008. This included the known owners and occupiers of land within the Order Limits and those who might be able to make claims either under s10 of the Compulsory Purchase Act 1965 (HM Government, 1965) in respect of injurious affection, or under Part 1 of the Land Compensation Act 1973 (HM Government, 1973). The beneficiaries of restrictive covenants and other rights that would be overridden by the exercise of powers in the draft DCO would be capable of making claims under s10 of the Compulsory Purchase Act 1965.

9.1.11 Furthermore, representations can be made by way of objections to the application in response to any notice given under s56 (Notifying persons of accepted application) of the PA 2008. The PA 2008 provides for a detailed examination of any application for development consent by an independent Examining Authority. The Examination includes careful scrutiny of any powers of compulsory acquisition or other compulsory powers, to ensure that they are justified and proportionate. Although the Examination is a process mainly conducted in writing, where the Examining Authority receives one or more requests for a compulsory acquisition hearing from affected persons within the date specified, it must cause a hearing to be held. All affected persons are invited to these compulsory acquisition hearings and have the opportunity to make oral representations about the compulsory acquisition requests.

9.1.12 Should the DCO be made, a person aggrieved may challenge the DCO by judicial review in the High Court if they consider that the grounds for doing so are made out. In relation to disputes about compensation, affected persons have the right to apply to the Upper Tribunal (Lands Chamber), an independent tribunal.

9.1.13 For the above reasons, National Grid considers that the inclusion of powers of compulsory acquisition in the draft DCO would not constitute any unlawful interference with Convention Rights and further that it would be appropriate and proportionate to make the DCO, including the grant of powers of compulsory acquisition.

9.2 Consideration of Duties Under the Equality Act 2010

9.2.1 National Grid has undertaken an **Application Document 7.21 Equality Impact Assessment** ('the EqIA') which assesses the potential impacts of the Project on protected characteristic groups, as defined under the Equality Act 2010. The EqIA has considered how the consultation, construction, operation, and decommissioning phases of the Project may differentially or disproportionately affect these groups.

9.2.2 The EqIA demonstrates that due regard has been given to the aims of the Public Sector Equality Duty (PSED) and s149 of the Equality Act 2010.

9.2.3 Although National Grid is not itself subject to the PSED, the Secretary of State is, and must have regard to these requirements in determining the outcome of the application for development consent.

9.2.4 The EqIA demonstrates that National Grid has paid due regard to the needs of protected characteristic groups. This has included having proactively seeking input from affected persons. It provides the Secretary of State with the necessary information to have regard to the requirements of the Equality Act 2010 and the PSED when determining the application for development consent.

9.2.5 A number of negative equality impacts have been identified during construction and decommissioning. However, these impacts are not expected to be substantial in nature and are largely mitigated through embedded design measures, good practice construction management, and additional mitigation where required arising from engagement with affected persons. During operation, equality impacts are expected to be minimal.

9.2.6 The Project will also deliver wider societal benefits, including improved energy security and support for renewable energy integration, which may positively affect all communities, including those with protected characteristics.

10. Conclusions

10.1.1 This Statement explains why it is necessary and justifiable for the draft DCO to contain the powers of compulsory acquisition sought in order to construct, operate and maintain the Project and why, in National Grid's opinion, there is a compelling case in the public interest for the authorisation of the same.

10.1.2 The matters addressed in this Statement may be summarised as follows:

10.1.3 **Chapter 1** provides an overview of why the Project is a NSIP, under s14(1)(b) and s16 of the PA 2008 (HM Government, 2008).

10.1.4 **Chapter 2** provides a summary of the need case for the Project, including an overview of the legislative and national policy framework for the Project with reference to both EN-1 and EN-5. It explains how the Project will make a vital contribution to a secure, diverse, reliable and affordable electricity transmission network, and also why there is a national need for the Project to be delivered at pace in order to achieve Clean Power 2030 targets.

10.1.5 **Chapter 3** provides a description of the Project, and the proposed infrastructure associated with National Grid's proposal to upgrade the electricity transmission system between the Birkhill Wood and High Marnham substations.

10.1.6 **Chapter 4** identifies the environmental measures required to enable National Grid to construct, operate and maintain the Project in line with National Grid's corporate policy and relevant government guidance.

10.1.7 **Chapter 5** explains why it is necessary for National Grid to pursue compulsory acquisition and temporary powers in respect of certain land interests. A detailed description of the nature of the powers sought is also provided. The Statement explains how National Grid proposes to adopt a proportionate approach as regards the potential future exercise of powers of compulsory acquisition, including in order to minimise disruption and impact on land.

10.1.8 **Chapter 6** describes the land referencing process undertaken to identify persons with an interest in land in Categories 1, 2 and 3 as prescribed by s44 and s57 of the PA 2008. This chapter reiterates that, where possible, National Grid will continue to seek to acquire, voluntarily, the land and/or rights over land required in order to construct, operate and maintain the Project. In that context, Appendix B of this Statement summarises the engagement which has taken place to date.

10.1.9 **Chapter 7** provides National Grid's justification for the powers of compulsory acquisition sought in respect of the Project. With reference to the statutory tests set out in s122 of the PA 2008, Chapter 7 explains that there is a compelling case in the public interest for the inclusion of compulsory acquisition powers within the draft DCO to ensure the timely delivery of the Project, for which there is a critical national need. In doing so, Chapter 7 also demonstrates that reasonable alternatives to compulsory acquisition have been explored and, further, why National Grid considers that the powers sought in the draft DCO are reasonable, proportionate and necessary. The chapter concludes that the **Application Document 4.2 Funding Statement** demonstrates that there is a reasonable prospect of the requisite funds being available to fund all aspects of the Project.

10.1.10 **Chapter 8** addresses what this Statement broadly refers to as Special Considerations, namely the likely impact of the Project on Special Category Land and land designated as Open Access Land pursuant to the Countryside and Rights of Way Act 2000 (HM Government, 2000). In particular, the Special Category Land Report (Appendix C of this Statement) provides a detailed summary of the rights sought to be acquired over the Special Category Land within the Order Limits, which is comprised of common land, and the relevant exemptions which National Grid seeks to rely upon pursuant to s132 of the PA 2008. Chapter 8 also explains that the Project would affect land held by the Crown and/or Crown Bodies and, in addition, outlines the steps which National Grid is taking to ensure that any statutory undertakers are not detrimentally affected by the Project, including as a result of any potential acquisition of permanent rights over land owned by those statutory undertakers or in which they already hold an interest for the purposes of their undertaking.

10.1.11 **Chapter 9** sets out the legislation that the Project has considered in relation to the rights of the public and duties of National Grid and the Secretary of State in making, granting, constructing, operating and maintaining the Project. This chapter reiterates that the significant public benefits of the Project outweigh the effects of the draft DCO upon persons who own and/or have an interest in land in the Order Limits, such that there would not be a disproportionate interference with their Article 8 and Article 1 First Protocol rights. National Grid has also taken into account duties under s149 of the Equality Act 2010 (HM Government, 2010) and has carried out activities such as undertaking substantive consultation exercises with stakeholders.

10.1.12 Therefore, and for the reasons set out in this Statement, the inclusion of powers of compulsory acquisition within the **Application Document 3.1 Draft Development Consent Order** in respect of the land and rights as set out in the **Application Document 4.3 Book of Reference** and as shown on the **Application Document 2.3 Land Plans** is justified, and the draft DCO should be granted containing the powers sought.

Appendix A. Details of Purpose for Which Compulsory Acquisition and Temporary Possession Powers are Sought

nationalgrid

Appendix A
Details of Purpose for Which Compulsory Acquisition and Temporary Possession Powers are Sought

A.1.1 The specific purposes for which each plot of land subject to compulsory acquisition or temporary use powers is required are set out in the tables in this appendix. The first column of each table identifies the plot number (as shown on **Application Document 2.3 Land Plans** and use in **Application Document 4.3 Book of Reference**). Plots may be grouped in each row to the extent that they will be required for the same purpose. The second column of each table sets out the corresponding works numbers as shown on **Application Document 2.4 Works Plans**. The third column of each table sets out in broad terms the uses for which the plot in question is required. The fourth column of each table sets out the interest, right or power to be acquired by National Grid Electricity Transmission (NGET), Northern Powergrid (NPG), National Grid Electricity Distribution (NGED) and British Telecommunications (BT) as explained in the **Application Document 4.3 Book of Reference**.

A.1.2 As stated in Section 5.4 of this Statement, temporary use powers are being sought over all of the land within the Order Limits. Table A.3 sets out those parts of the land where only temporary use powers are being sought.

A.1.3 The tables in this appendix should be read in conjunction with and by reference to the following:

- **Application Document 2.3 Land Plans**
- **Application Document 2.4 Works Plans**
- **Application Document 3.1 Draft Development Consent Order**
- **Application Document 4.3 Book of Reference**

Table A.1 – Acquisition of land – by plot number.

Land Plan sheet – Plot No.	DCO Work No.	Purpose for which the land is required	Class of rights sought

Appendix B. Schedule of Negotiations with Land Interests

nationalgrid

Appendix B
Schedule of Negotiations with Land Interests

B.1 Overview

B.1.1 This Appendix identifies, with reference to the principal Work Numbers included in Schedule 1 to the **Application Document 3.1 Draft Development Consent Order** and shown on the **Application Document 2.4 Works Plans** the affected persons and land they have an interest in, for which powers of compulsory acquisition and/or temporary possession are sought over each plot of land comprised within the Order land (being the land shown on the **Application Document 2.3 Land Plans**, and described in the **Application Document 4.3 Book of Reference**, and the progress of negotiations with the affected persons for the acquisition of land and/or rights sought.

B.2 Using the Document

B.2.1 The Project is divided into six geographical sections, based largely on Local Authority boundaries for ease of reference. They are presented in the **Application Document 6.1.F1 Environmental Statement Figure 1.1 Project Location and Route Sections** and comprise:

1) Section A between the proposed Birkhill Wood Substation and the River Ouse
2) Section B between the River Ouse and Crowle
3) Section C between Crowle and North Moor (M180)
4) Section D between North Moor (M180) and the River Idle
5) Section E between the River Idle and Darlton
6) Section F between Darlton to the proposed High Marnham Substation

B.2.2 For consistency and ease of reference, the tables in Appendix B have been divided into the same, six geographical sections, as summarised above.

B.2.3 For ease of use of the document the status of negotiations is broken down into stages as follows.

B.2.4 Stage 1 means heads of terms have been issued. These were accompanied by the following supplementary documentation:

- **National Grid – Land Rights Strategy and Payment Schedule for Assets (V1)**
- **Guidance on Land Rights for New Electricity Transmission Assets (England & Wales)**

B.2.5 Stage 2 means heads of terms are in negotiation and will include any relevant narrative.

B.2.6 Stage 3 means heads of terms are signed.

B.2.7 Stage 4 means solicitors have been instructed.

B.2.8 Stage 5 means draft documents have been issued.

B.2.9 Stage 6 means Option Completed.

B.3 Section A - between the proposed Birkhill Wood Substation and the River Ouse

Appendix C. Special Category Land Report

nationalgrid

Appendix C
Special Category Land Report

C.1 Introduction

Project Description

C.1.1 The Project is a new 400 kilovolt (kV) electricity transmission connection of approximately 90 kilometres (km) in overall length between two proposed new substations: the 400 kV Birkhill Wood Substation and 400 kV High Marnham Substation.

C.1.2 The proposed new substations are subject to separate planning applications. For more information, see **Application Document 5.4 Consents and Licences Required Under Other Legislation**.

C.1.3 The Project comprises:

- Approximately 90 km of new overhead line (Route Code 4AF) between the proposed new 400 kV Birkhill Wood Substation and 400 kV High Marnham Substations;
- Replacement and re-alignment of a section of the existing 400 kV overhead line (Route Code 4ZQ) between Brantingham and east of Broomfleet;
- Replacement and re-alignment of a section of the existing 400 kV overhead line (Route Code ZDA) between Ealand and west of Keadby;
- Line entry connections to a proposed new 400 kV Birkhill Wood Substation;
- Line entry connections to a proposed new 400 kV High Marnham Substation; and
- The Project would include other required works, for example, temporary diversions for works on existing overhead line routes, temporary access roads, highway works, temporary works compounds, work sites and ancillary works. The Project would also include utility diversions and drainage works. There would also be land required for environmental mitigation, offsetting, compensation and Biodiversity Net Gain (BNG).

C.1.4 A full description of the Project is provided in **Application Document 6.4 Environmental Statement Chapter 4 Description of the Project**.

C.2 Purpose of the Report

C.2.1 This report addresses the issue of special category land in respect of the Project. Special Category Land (SCL) is afforded special protection by the Planning Act 2008 (the Act).

C.2.2 This report outlines the requirements of the Act in respect of Special Category Land and describes the existing areas of Common Land affected by the proposed powers of compulsory acquisition of rights over such land.

C.2.3 Furthermore, this report explains the basis for National Grid's view that the areas of Common Land affected would be no less advantageous (see section 132(3) of

the Act), as a consequence of the exercise of the proposed powers of compulsory acquisition of rights over that land, than it is at the present time.

C.2.4 National Grid, through its land referencing and due diligence processes, has not identified any open space, fuel or field garden allotments, nor land held inalienably by the National Trust.

C.3 The Planning Act 2008

Sections 131 and 132 of the Planning Act 2008

C.3.1 Sections 131 and 132 of the Act make provision for Special Parliamentary Procedure (SPP) to apply where a development consent order ('DCO') authorises the compulsory acquisition of land, or rights over land, forming part of a Common, Open Space, or fuel or field garden allotment.

C.3.2 Of these categories, only land forming part of a Common is affected by the powers of compulsory acquisition sought for the Project, hence this report solely addresses Common Land.

C.3.3 In this case only powers of compulsory acquisition of rights are being sought over areas of land within the Order Limits which are identified as Special Category Land, hence the relevant statutory provision which applies is s132 of the Act.

C.3.4 SPP would be engaged unless the Secretary of State (SoS) is satisfied that one of a number of exemptions can be shown to apply. The potential applicable exemption in summary is (as defined in section 132 of the Act): that the land, when burdened with the Order right, will be no less advantageous than it was before (Subsection 3).

C.3.5 The following guidance has also been taken into account, where applicable: The Planning Act 2008: Guidance related to procedures for the compulsory acquisition of land, September 2013, Annex A: Special Categories of Land.

C.3.6 Section 132 of the Act is concerned with compulsory acquisition of permanent rights over areas of Special Category Land within the Order Limits. In the detailed plot analysis which follows in this report, we explain the Project requirement for each plot of Special Category Land. In respect of a large number of the plots of land identified in this report in addition to seeking permanent rights, the project requirement will also include exercising powers of temporary possession in order to construct various works on the land to deliver the Project. These works and taking temporary possession of the land in order to undertake construction of the Project is explained in this report for completeness, however it should be noted that the provisions of s132 of the Act and the conclusions reached in respect to satisfying the exemptions applied under s132 relate solely to the permanent rights which are intended to burden the area of special category land post construction of the Project.

C.3.7 Section 132(3) requires that land within the Order Limits, when burdened with the Order rights, be no less advantageous than it was before, to the following persons: (1) the persons in whom it is vested, (2) other persons, if any, entitled to rights of common or other rights and (3) the public.

C.3.8 Section 132(4A) requires that there is no suitable land available to be given in exchange for the Order Limits (or only available at a prohibitive cost) and it is strongly in the public interest for the development to be capable of being begun sooner than is likely to be possible if the Order were to be subject to SPP.

C.3.9 Section 132(5) requires that the (a) Order Limits burdened with the Order rights, does not exceed 200sqm in extent, or the Order right is required in connection with the widening or drainage of an existing highway or in connection partly with the widening and partly with the drainage of such a highway, and (b) the giving of other land in exchange for the Order rights is unnecessary, whether in the interests of the persons, if any, entitled to rights of Common or other rights or in the interests of the public.

C.4 Areas of Common Land

Common Land

C.4.1 Common land within the Order Limits and in respect of which powers of compulsory acquisition are sought, is shown on **Application Document 2.14 Special Category Land Plans** and listed in Table C.1 below.

C.4.2 Land described as common, fuel or field garden allotment and open space have the same meanings as in section 19 of the Acquisition of Land Act 1981, which states:

'"common" includes any land subject to be enclosed under the Inclosure Acts 1845 to 1882, and any town or village green,

"fuel or field garden allotment" means any allotment set out as a fuel allotment, or a field garden allotment, under an Inclosure Act,

"open space" means any land laid out as a public garden, or used for the purposes of public recreation, or land being a disused burial ground.'

C.4.3 In this case only powers of compulsory acquisition of rights are being sought over land identified as Common land. The exemption upon which National Grid proposes to rely is that set out in section 132(3).

C.4.4 Section 132(3) requires that the Order Limits, when burdened with the Order rights, be no less advantageous than it was before, to the following persons: (1) the persons in whom it is vested, (2) other persons, if any, entitled to rights of common or other rights and (3) the public.

C.4.5 The SoS can be satisfied that this Project would not cause the land to be less advantageous to the persons aforementioned, and hence the SoS may confirm that SPP would not apply in relation to the compulsory acquisition of permanent rights over such land.

C.4.6 Section 132(5) requires that the (a) Order Limits burdened with the Order rights, does not exceed 200sqm in extent, and (b) the giving of other land in exchange for the Order rights is unnecessary, whether in the interests of the persons, if any, entitled to rights of Common or other rights or in the interests of the public.

C.4.7 There are two areas of Common land where the area over which the acquisition of permanent rights are sought. The area required amounts to approximately 19013sqm of the Commons. Furthermore, replacement land is not necessary given that the acquisition of the rights required will not affect the persons entitled to the rights of common, and therefore exemption applies as per s132(5).

C.5 Assessment of powers of compulsory acquisition of permanent rights sought in respect of Common Land

Common Land

Ousefleet Cow Gaits

C.5.1 Table C.1 includes the land plots related to the Common, the permanent rights sought, and principle relevant DCO articles.

C.5.2 The common rights over this land are that of pasture grazing.

C.5.3 The Common comprises land located to the south of Ousefleet. The Common is limited to track, verge, hedgerow and a treeline at the northern most extent.

C.5.4 National Grid has identified no evidence of public use of either of the area of common land, other than being used as a navigable road and field verge, the areas of common land do not appear to have any other notable function for landowners, other persons (if any) entitled to rights of common, or members of the public.

C.5.5 The proposed Project requirement for this area of common land is for it to be used for the following:

- Construction of temporary bellmouth junction serving a temporary haul road
- Class 2 Compulsory Acquisition of Rights: Overhead Line
  - Permanent oversail over a narrow section by a new overhead line
  - Permanent rights for operational access and maintenance of the overhead line

C.5.6 The construction works for the haul road will be temporary in nature and would have no permanent impact on the use or function of the land as, and no permanent rights will be sought in respect of these works

C.5.7 The ‘no less advantageous exemption’ is applicable as the overhead line oversail, the permanent right of access for maintenance of the overhead line will have no impact on the use or function of this land.

C.5.8 The land will be no less advantageous when burdened with the rights sought.

Cow Lane

C.5.9 Table C.1 includes the land plots related to the Common, the permanent rights sought, and principle relevant DCO articles.

C.5.10 The Common rights over this land are that of pasture grazing.

C.5.11 Cow Lane is a Common comprised of one area of land located west of Addlingfleet.

C.5.12 The land itself is comprised of agricultural land and Cow Lane which is a private road.

C.5.13 The proposed Project requirement for this area of common land is for it to be used for the following:

- Class 2 Compulsory Acquisition of Rights: Overhead Line
  - Permanent oversail of the overhead line

C.5.14 With the permanent rights sought over this area of Cow Lane for oversailing with the overhead line, there will be no impact upon the function or use of the Common as worked agricultural land.

C.5.15 The ‘no less advantageous exemption’ is applicable, as the permanent rights associated with the new overhead line will not impact the use or function of the Common as worked agricultural land and the land will be no less advantageous when burdened with the rights sought.

C.5.16 Furthermore, the works will not impact the use or function of the Common as worked agricultural land. Replacement land is not necessary given that the acquisition of the rights required will not affect the persons entitled to the rights of common, and therefore exemption under section 132(5) also applies.

C.6 Conclusion

C.6.1 The proposed development by National Grid is seeking powers for the compulsory acquisition of rights for both Common Land.

C.6.2 In respect of Common Land, the rights sought will not impact the use or function of the common land when compared to its current use, and therefore the land is no less advantageous when burdened with these rights and it is noted that in respect of certain areas of common land and open space other exemptions also apply.

C.6.3 In respect of the Common Land areas at both Ousefleet Cow Gaits and Cow Lane, acquisition of rights and the works will not impact the current use or function of the Common.

C.6.4 Replacement land is not necessary given that the acquisition of the rights required will not affect the persons entitled to the rights of common or other rights or the public.

C.6.5 It has therefore been concluded that there is no requirement for the **Application Document 3.1 Draft Development Consent Order** to be subject to the Special Parliamentary Procedure (SPP) because the Secretary of State can be satisfied that the requirements of section 132 of the Act has been met and this statement has been included in the draft DCO for the Secretary of State's confirmation.
