Table 21.11 – Other Developments for Newark and Sherwood District Council considered in Stage 1 and Stage 2 inter-project Cumulative Effects Assessment 2

1. Long List of other Developments Long List Newark and Sherwood District Council

1.1 Overview

1.1.1 This Appendix presents an overview of the long list of planning applications for Newark and Sherwood District Council within the Zone of Influence (ZoI) identified for inter-project cumulative effects. The long list is shown in Tables 21.11 and is illustrated in **Application Document 6.21.F1 Figure 21.1**.

1.1.2 During Scoping an overall cumulative assessment ZoI of 20 km was proposed. This was based upon the largest topic study area, ecology and biodiversity, being identified as 10 km; therefore, a ZoI of 20 km from the draft Order Limits was established to identify the initial long list of other developments. This ZoI has been identified during Environmental Impact Assessment scoping and has been reviewed as part of the development of the Preliminary Environmental Information Report and Environmental Statement to take account of any changes in the draft Order Limits since Scoping. The list has a cut-off date of 01 August 2026 to allow assessment to be undertaken.

1.1.3 The establishment of the long list of other existing and, or approved development has been based on the best available information at the time of authoring. The level of information available for the other developments varies in detail from Tier 1 (most certain) to Tier 3 (least certain). As a result, for some developments (typically Tier 1 and 2) it has been possible to accurately measure the distance from their proposed planning application boundary to the Project's Order Limits, but for some others (typically Tier 3) there has not been a proposed project application boundary, meaning it has been necessary to use a centre point to measure distance from the Project Order Limits.

1.1.4 The Long list is categorised into the three tiers that assign certainty to other existing and/or approved developments following the Planning Inspectorate's Nationally Significant Infrastructure Projects - Cumulative effects guidance (HM Government, 2026), which provides guidance for NSIPs.

1.1.5 The Long list of developments for Newark and Sherwood District Council is provided below:

1.2 Other Developments for Newark and Sherwood District Council

Table 21.11 – Other Developments for Newark and Sherwood District Council considered in Stage 1 and Stage 2 inter-project Cumulative Effects Assessment

Other developments details						Stage 1			Stage 2			
ID	**Application Reference**	**Applicant for 'other development' and brief description**	**Distance from Project (km)**	**Status**	**Tier**	**Technical Discipline**	**Within Technical Discipline cumulative ZOI?**	**Progress in Stage 2**	**Overlap in temporal scope?**	**Scale and nature of development likely to have a significant cumulative effect?** **Relevant Shared receptors and/or pathways?**	**Other factors**	**Progress to Stage 3/4**
379	21/01577/FULM	Tuxford Solar - Land Off Hawbush Road Weston Tuxford road solar farm Installation of a solar farm and battery storage facility with associated infrastructure.	0	Approved	1	Landscape	Yes	Yes	Yes	No - The location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Visual	Yes	Yes	Yes	No - The location of this development is unlikely to result in significant cumulative effects.	N/A	No
						Ecology	Yes	Yes	Yes	Yes- Likely shared ecological receptors, such as designated sites, and protected species due to the distance between this development and the Project.	N/A	Yes
						Ornithology	Yes	Yes	Yes	This development overlaps habitat suitable for breeding and non-breeding birds and therefore cumulative effects cannot be ruled out at the screening stage	N/A	Yes
						Cultural Heritage	Yes	Yes	Yes	Spatial extent of development overlaps with Project but development's overlapping components relate to access routes only. Therefore, no potential for cumulative impacts to buried archaeological is receptors. Main solar PV site is within ZoI for heritage but development would not result in additional setting change to heritage receptors assessed for the Project. No potential for cumulative effects.	N/A	No
						Water Environment	Yes	Yes	Yes	The scale and nature of this development is such that, despite the presence of shared water environment receptors, significant cumulative effects are not anticipated.	N/A	No
						Geology and Hydrogeology	Yes	Yes	Yes	The nature of this development is such that significant effects on geology and hydrogeology are not anticipated and significant contamination sources have not been identified within the relevant	N/A	No

Other developments details						Stage 1			Stage 2			
ID	Application Reference	Applicant for 'other development' and brief description	Distance from Project (km)	Status	Tier	Technical Discipline	Within Technical Discipline cumulative ZOI?	Progress in Stage 2	Overlap in temporal scope?	Scale and nature of development likely to have a significant cumulative effect? Relevant Shared receptors and/or pathways?	Other factors	Progress to Stage 3/4
										areas of land occupied by this project and by the Project. In addition, legislation and planning requires that for new development, risks to human health and controlled waters from potential contamination are appropriately mitigated. Therefore, cumulative adverse effects in relation to geology and hydrogeology are unlikely. Furthermore, each development will be bound by its own Code of Construction Practice (CoCP) and / or a Construction Environmental Management Plan (CEMP). It is assumed each development will apply best practice construction methods so as to minimise impacts from contamination on ground conditions and groundwater.		
						Agriculture and Soils	Yes	Yes	Yes	This development has the potential for cumulative impacts on agriculture and soils as it is within the ZOI and could result in the temporary and/or permanent loss/disturbance of Best and Most Versatile land and/or soil ecosystem functions.	N/A	Yes
						Traffic and Transport	Yes	Yes	No	The scheme does not have a temporal overlap with the peak construction year, therefore there are unlikely to be significant cumulative effects.	N/A	No
						Air Quality	Yes	Yes	Yes	Whilst the development is located within the air quality ZOI, it is anticipated that the peak construction year would not overlap with the Project's. In addition, it is assumed that the development would be constructed in accordance with an appropriate Construction Environmental Management Plan (CEMP), Code of Construction Practice (CoCP) or equivalent good practice measures. As such, significant cumulative air quality effects are considered unlikely.	N/A	No
