

# Southampton to London Pipeline Project

## Deadline 2

Appendix 10.2 Schedule of Notable Trees  
Application Document: 6.4

Planning Inspectorate Reference Number: EN070005

APFP Regulation No. 5(2)(a)

Revision No. 2.0

November 2019

**Contents**

**Appendix 10.2 Schedule of Notable Trees ..... 2**

## Appendix 10.2 Schedule of Notable Trees

**Table 1.1: Key for Notable Tree Schedules**

| Column Header       | Explanation                                                                                                                                                                                                                                                                                                                                                                                                |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Tree Ref No         | T – Tree<br>G – Group of trees<br>W – Woodland                                                                                                                                                                                                                                                                                                                                                             |
| Life stage          | Semi Mature (SM) – A tree in the latter stages of its first quarter, well established.<br>Early Mature (EM) – A tree halfway through its life span with significant further growth potential.<br>Mature (M) – A tree at or near its potential maximum size which is still growing vigorously in its third quarter of life span.<br>Over Mature (OM) – A tree in decline in its final quarter of life span. |
| DBH                 | Diameter at Breast Height -Tree stem diameter in mm measured at 'breast height' (1.5m from the ground at the high point around the bottom of the stem).                                                                                                                                                                                                                                                    |
| X and Y coordinates | Geo-location coordinates (eastings and northings) for individual tree positions and centre points of tree groups/woodlands                                                                                                                                                                                                                                                                                 |

**Table 1.2: Individually Surveyed Trees**

| Tree Ref. No. | Species     | DBH (single stem or combined multi-stemmed) | Life Stage | Quality Category Grading (based on BS5837) | X Coordinate | Y Coordinate |
|---------------|-------------|---------------------------------------------|------------|--------------------------------------------|--------------|--------------|
| T1            | Oak         | 1120                                        | M          | A                                          | 451492.5     | 114551.7     |
| T2            | Oak         | 950                                         | M          | A                                          | 451725.8     | 115216.1     |
| T3            | Oak         | 1800                                        | M          | A                                          | 452657.8     | 116788.4     |
| T4            | Oak         | 2000                                        | M          | A                                          | 452671.2     | 116806.2     |
| T5            | Oak         | 1200                                        | M          | A                                          | 452648.4     | 116874.5     |
| T6            | Oak         | 804                                         | M          | B                                          | 453559.5     | 117959.9     |
| T7            | Oak         | 1320                                        | M          | A                                          | 453560       | 118194.48    |
