3rd February 2025

Dear Ms Harvey

**Re: EN0710003 Humber Carbon Capture Pipeline - Located in Eastern England within the Yorkshire
and the Humber Region**

Thank you for your notification of the 3rd January 2005 seeking the views of the Coal Authority on the above. Please accept my sincere apologies for the delay in responding and the previous correspondence issued.

Our records do not indicate the presence of any coal mining features at surface or shallow depth, which may pose a risk to surface stability and public safety, along the route identified. The site is however in the defined Development Low Risk Area, where coal mining features may be present but at depths that do no impact on surface stability.

On the basis of the above potential risk posed by coal mining legacy do not need to be considered as part of the Environmental Statement.

If you would like to discuss this matter further, please contact me on the above number.

Yours sincerely

Melanie Lindsley BA (Hons), DipEH, DipURP, MA, PGCertUD, PGCertSP, MRTPI
Principal Planning & Development Manager

Disclaimer

The above consultation response is provided by the Coal Authority as a statutory consultee and is based upon the latest available data and the electronic consultation records held by the Coal Authority since 1 April 2013. The comments made are also based on the information provided to the Coal Authority by the Local Planning Authority and/or information that has been published on the Council's website for consultation purposed in relation to this specific planning application. The views and conclusions contained in this response may be subject to review and amendment by the Coal Authority if additional or new data/information (such as a revised Coal Mining Risk Assessment) is provided by the Local Planning Authority or the applicant for consultation purposes.
