

APPENDIX C1 – Examination Library

This examination library contains a list of representations and documents that were put to the ExA during its consideration of the application. Each entry has a unique reference and a link to the document on the Planning Inspectorate website.

To aid navigation the submissions have been arranged in a loose chronological order, and listed under sub-headings relating to events that occurred between the submission of the application and the end of the examination. Some submissions contain information relevant to more than one event and sub-heading. Where this is the case they have only been listed once.

Readers should therefore be aware that, in the instances noted above, each sub-category may not contain a comprehensive list of every submission made in relation to that particular event and that other relevant submissions may be listed under another sub-heading.
