Subject: Objection to the planned tunnel scheme
Date: 23 September 2022 21:31:45

This scheme makes no sense in it's current form. It is damagingly close to the world heritage site and would destroy the archaeology along it's route.

Competent authorities have rejected the scheme and objections have been upheld in court.

It is also a waste of public money and damagingly polluting. We don't need more roads. We need an effective public transport and goods transport strategy to protect our future and preserve the treasures of our past.

Sincerely

Robert MacCall
