Dear Secretary of State fir Transport

Having looked at the National Highways Agency (NHA) 's response to the views of the Advisory Mission, I still have grave concerns about the effect of bulldozing a unique Neolithic Site. NHA make no concessions tp the judgements of specialists in their fields and have failed to consider less-damaging options like a southern bypass. The former S of S for Transport observed that the scheme would be "significantly adverse overall".

Financial concerns can of course be addressed by the simplest and best course of action i,e, cancelling the whole idea,

yours

Richard Stead
