## Objection to A303 Stonehenge Road Tunnel - Aug 2022

Further consultation on proposed Amesbury to Berwick Down construction

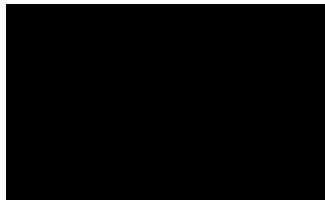

I have objected previously and fundamentally to this misguided and damaging intention.

The proposed enlargement of the A303 will cause overall road vehicle traffic to increase. It is incompetent to accept this as inevitable or beneficial... oh for goodness sake!

I believe it to be unaffordable due to consequent worsening of adverse climate change.

It is also unaffordable as it will take funding which is now desperately needed to change our processing and use of energy all of the way through, before it is too late.

John Bowley
