As regards the above ,no road should be built if it damages this World Heritage Site and risks it losing this status, which will do our international reputation harm and possibly reduce income from tourism.

This site is priceless and we need to think very carefully before irreversible damage is caused.

Our international reputation has already been damaged by the continuing sewage debacle and we need to show we can respect the environment and our heritage and set an example to others. We are becoming a laughing stock.

Please ensure we act in a sensible way

Thank you.

Mark R. Willett
