Subject: STOP the Highways Proposal for wrecking a World Heritage Site with their Cheapskate Short Tunnel Plan
Date: 28 September 2022 20:05:19

Dear Secretary of State,

I strongly oppose the continued Plan to ruin a World Heritage Site with the short tunnel A303 Scheme.

Even Grant Shapps admitted that adverse effects will be suffered – you bet there will be if this crazy and vandalizing project proceeds

UNESCO and many other authoritative bodies including your own Advisory panel have rejected it.

How come it is still being proposed – I am becoming more and more ashamed of being a UK citizen with a government intent on demolishing any civilized values of protecting our priceless World Class Archaeological Heritage!!

I just cannot believe what is happening to this once great country.

Sincerely

Dr A R GREENWAY

PS I was born and brought up in Salisbury only a short bike ride from Stonehenge and what you are proposing distresses me deeply since in the future others will not be able to enjoy the place for the roar of traffic instead of the peace I experienced.

Sadly this means NOTHING to those who are devoted to doing things on the cheap, irrespective of the damage caused.
