**Subject:** Support for the Construction of a New Road for the Kent Thames Crossing

Dear Louise Haigh

I am writing to express my strong support for the construction of a new road for the Kent Thames Crossing. The current situation at the Dartford Tunnel is unsustainable and has significant negative impacts on both the environment and the quality of life for commuters.

As it stands, the Dartford Tunnel experiences heavy traffic congestion from Monday to Sunday, with vehicles often stuck in traffic for hours. This not only causes immense frustration and stress for drivers but also leads to increased fuel consumption and higher emissions of greenhouse gases. By constructing a new road, we can alleviate this congestion, thereby reducing the amount of time vehicles spend idling and cutting down on harmful emissions. This would be a significant step towards protecting our planet and improving air quality in the region.

I urge you to personally experience the current traffic conditions at the Dartford Tunnel. Spend just one week, from Monday to Friday, attempting to cross during peak hours, and you will witness firsthand the severity of the traffic nightmare. This experience will undoubtedly underscore the urgent need for a new road to facilitate smoother and more efficient travel across the Thames.

The benefits of a new road for the Kent Thames Crossing are clear. It will not only enhance the daily commute for thousands of drivers but also contribute to environmental sustainability by reducing traffic-related emissions. I strongly believe that this project is essential for the well-being of our community and the health of our planet.

Thank you for considering my perspective. I hope you will support the construction of a new road for the Kent Thames Crossing and take the necessary steps to make this project a reality.

Sincerely,

Farayi Muzvuzvu
