Subject: A585 Windy Harbour to Skippool Improvement Scheme – (TR010035)

Fleetwood Renewable Energy Enterprise 2007 - Our Reference : 20021754

Dear Sir

Further to our telephone conversation yesterday I confirm that Mr Jeff Draper will make an Oral Representation at the Open Floor Hearing on the afternoon of Tuesday 9 April 2019 at Wyre Civic Centre.

Our concerns are:-

The Scheme is of questionable value because for most commuters congestion will move nearer to Fleetwood and be of increase duration.

The Remit for the Scheme does include improving the A585 beyond Skippool

At peak periods the Scheme will transform the present queues from Norcross Junction to Shard Road Junction into longer queues from Victoria Road Junction to Skippool

Blackpool has good road access and there is a proposal Government support to address the deprivation. In Fleetwood all the Wards are deprived areas and it needs better road access and Government support to address the deprivation and flood prevention.

Instead of building the bypass the money saved could be used to contribute a more cost effective wide ranging road improvements.

Yours sincerely

Edward Greenwood
