Dear Planning Inspector,

As persons directly affected by this road improvement we would like to ask that it be approved as published and that work starts as soon as is possible.

The improvements to the lives of the majority of those living in Norfolk, especially those adjacent to the site, and the increase in the prosperity of the district are impossible to overstate plus, because of re-alignments improved bus route opportunities with new footpaths, cycle ways and other environmental inclusions it will also in fact help the 'greening' of this area, this will also be enhanced when the associated Western Link is completed.

(one example of many is that we will be able to cycle the entire way from this village to central Norwich {13m} along byways and dedicated cycleways, taking in major present and proposed developments including the Food Hub, the Science Park, the University, the Hospital complex plus then along linking paths into South Norfolk and almost to the coast in North Norfolk)

We fully support the proposals.

Best regards,
Gordon Bambridge
Jacqueline Bambridge
