1 INTRODUCTION

1.1 Purpose of this Document

- 1.1.1 This Statement of Common Ground (SOCG) relates to an application made by National Highways (“the Applicant”) to the Planning Inspectorate (“PINS”) under Section 37 of the Planning Act 2008 (“PA 2008”) for a Development Consent Order (a “DCO”). If made the DCO would grant consent for the Applicant to undertake the A47 Blofield to North Burlingham Scheme (“the Scheme”). A detailed description of the Scheme can be found in the ES Chapter 2 The Proposed Scheme (**REP4-017**).
- 1.1.2 This SoCG does not seek to replicate information which is available elsewhere within the Application documents. All documents are available on the Planning Inspectorate website.

- 1.1.3 The SoCG has been produced to confirm to the Examining Authority where agreement has been reached between the parties to it, and where agreement has not (yet) been reached. SoCGs are an established means in the planning process of allowing all parties to identify and so focus on specific issues that may need to be addressed during the examination

1.2 Parties to this Statement of Common Ground

- 1.2.1 This SoCG has been prepared by (1) National Highways as the Applicant and (2) Blofield Parish Council.
- 1.2.2 National Highways (then named Highways England Company Limited) became the Government-owned Strategic Highways Company on 1 April 2015. It is the highway authority in England for the strategic road network and has the necessary powers and duties to operate, manage, maintain and enhance the network. Regulatory powers remain with the Secretary of State. The legislation establishing National Highways made provision for all legal rights and obligations of the Highways Agency, including in respect of the Application, to be conferred upon or assumed by National Highways.
- 1.2.3 Blofield Parish Council serves the Parish of Blofield which comprises the villages of Blofield and Blofield Heath.

1.3 Terminology

1.3.1 In the tables in Section 3 'Issues' of this SoCG the following terminology is used:

- "Agreed" indicates where the issue has been resolved
- "Not Agreed" indicates a final position
- "Under discussion" where these points will be the subject of on-going discussion wherever possible to resolve, or refine, the extent of disagreement between the parties

1.3.2 It can be taken that any matters not specifically referred to in the Issues chapter of this SoCG are not of material interest or relevance to Blofield Parish Council, and therefore have not been the subject of any discussions between the parties. As such, those matters can be read as agreed, only to the extent that they are either not of material interest or relevance to Blofield Parish Council.

2 RECORD OF ENGAGEMENT

- 2.1.1 A summary of the meetings and correspondence that has taken place between National Highways and Blofield Parish Council (BPC) in relation to the Application is outlined in Table 2-1.

Table 2-1 : Record of Engagement

Date	Form of correspondence	Key topics discussed and key outcomes (the topics should align with the Issues tables)
21/06/18	Email	Email from Jon Donlevy re Designated Funds
27/12/18	Letter	Scheme update from HE (Lizzie Cooper)
01/19	Email	Email from Charlotte Youngs (HE) re compensation for allotment plots
11/04/19	Meeting	Site visit to allotments
06/19	Email	Email from Rob Simpson
28/06/19	Email	Email from Charlotte Youngs
05/02/20	Meeting	Discussed replacement of trees to north of Allotments
24/02/20	Meeting	Public meeting at Blofield Courthouse
29/09/20	Meeting	Discussed carpark
20/10/20	Meeting	Discussed the new School and assistance with chickens when access is restricted.
15/02/21	Letter from BPC to MP & HE (Appendix A)	Requesting update on Cucumber Lane roundabout, traffic through Blofield, Blofield Allotments, Closure/redirection of Blofield FP7, Designated fund applications
12/03/21	Meeting & Minutes (Appendix B)	Scheme update discussed issues raised in letter. Meeting minutes issued on 17/03/21
26/03/21	Letter from BPC to HE (Appendix C)	Comments on the DCO received from BPC
11/06/21	Letter to BPC from HE (Appendix D)	Addressing points on the car park, water tank, impact on mature trees, fences and access points, disturbance issues.
28/06/21	Email from BPC to HE (Appendix F)	Requesting further clarification on points above.
01/07/21	Email from BPC to HE (Appendix G)	Requesting further clarification on points above.
03/08/21	Email	SoCG issued in draft to Blofield Parish Council for review

Date	Form of correspondence	Key topics discussed and key outcomes (the topics should align with the Issues tables)
09/09/21	Email from BPC to HE (Appendix H)	Feedback on SoCG
10/21	Meeting	Meeting to discuss Designated Funds feasibility study
11/11/21	Meeting	Meeting to discuss the points raised in latest correspondence for agreement in SoCG
02/12/21	Email	Updated SoCG shared with Blofield Parish Council
10/12/21	Email from BPC to HE (Appendix I)	Response to draft SoCG from Blofield Parish Council
14/12/21	Email	Updated SoCG shared with Blofield Parish Council

- 2.1.2 It is agreed that this is an accurate record of the key meetings and consultation undertaken between (1) National Highways and (2) Blofield Parish Council in relation to the issues addressed in this SoCG.

3 ISSUES

Table 3-1 : Issues

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
Cucumber Lane Roundabout	Letter from BPC in Appendix A, Letter from BPC in Appendix H & Letter from BPC in Appendix I	With increased existing and approved residential developments in the villages of Blofield, Blofield Heath and Brundall increased pressure on the village infrastructure continues to mount. Access West towards Norwich from these villages relies, in the main, on access to the A47 dual carriageway at the roundabout at the Cucumber Lane (from Brundall) / Yarmouth Road (from Blofield) junction. Traffic routes (as indicated on the map) show traffic emanating from Blofield Heath, Brundall and Blofield itself all concentrating on this junction. Already traffic on the A47 approaching from the East (Acle / Gt. Yarmouth) approaches the junction at high speed and volume causing congesting at the roundabout for traffic joining from the villages, causing tailbacks at peak times. Both Highways England and Norfolk Highways refuse to perceive this as a problem either now or in the future and have resisted taking a proactive approach to the problem by planning ahead instead positioning themselves on a "wait and see" approach. Local knowledge already sees this as a problem waiting to happen, but no authority will take responsibility for resolving in advance. All that has been tabled are, on the building of a further residential development towards said roundabout, minor changes to the roundabout layout and some minimal road widening on the approaches. Insufficient in the opinion of the local Parish Councils.	The traffic modelling takes into consideration future developments as set out in the uncertainty log, as agreed with the local authority. The Transport Assessment (REP1-044), Table 4-1 and Figure 4-1, provides details of the planned developments which have been included in the uncertainty log. As stated in the Transport Assessment section 9.6.5 (REP1-044) the Applicant acknowledges that congestion is forecasted to increase at the A47/Brundall roundabout. However, the roundabout has existing traffic congestion issues in the 2015 base year scenario. These base year traffic congestion operational issues will be exacerbated by forecasted traffic growth. Therefore, the implementation of the Scheme is not the underlying reason for the capacity related operational issues at the junction. National Highways Operations Directorate are investigating minor safety improvement works to Cucumber Lane Roundabout, which could include such things as additional road markings and signage. These works are independent of the A47 Blofield to North Burlingham Scheme. As part of the Scheme a Road Safety Audit will be completed 6 months after opening and approximately after a further 18 months. The outcome of these will be communicated to National Highways to determine if any further work is required.	Under discussion	

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
Cucumber Lane Roundabout	Letter from BPC in Appendix C & Letter from BPC in Appendix H	As the proposal for the A47 junction will close off the gap in the central reservation, it is our view that traffic will be forced to enter Blofield and encounter the already congested road network in the vicinity of the current school site, doctors surgery and proposed new school site for onward travel to the A47 Cucumber Lane roundabout for onward travel to Norwich. Proposed development in the parish and beyond our boundary will further compound the traffic flow issues being encountered at the A47 Cucumber Lane roundabout. Traffic routes shown on the indication above demonstrate that flows from Brundall, Blofield and Blofield Heath concentrate at the A47 Cucumber Lane roundabout which is already causing congestion before the additional development proposals for housing have been built out. Both Highways England and Norfolk County Council refuse to perceive this as a problem either now or in the future and have resisted taking a proactive approach to the problem by planning, instead positioning themselves on a wait and see basis. Local knowledge already sees this as a problem waiting to happen, but no authority will take responsibility for resolving this in advance. It is with this knowledge why we proposed an alternative layout to the junction that could be achieved with minor alterations to the plans which, in our view, would alleviate the traffic flow issues demonstrated above.	See response above in relation to Cucumber Lane Roundabout and below in relation to Yarmouth Road Junction.	Not agreed	11-Nov-21
Yarmouth Road Junction	Letter from BPC in Appendix A &	During Consultation with Highways England on the proposed plans for dualling from Blofield to North Burlingham it became apparent that a reasonable number of Blofield Heath residents were travelling south out of their village towards Blofield, using the slip road to join the A47 East towards Acle and using	The modified junction, as proposed by BPC, is not a technically viable solution. The standards set out in the Design Manual for Roads and Bridges, for example, would not allow the proposed 'East' slip road to have direct access from properties and High Noon Lane.	Not agreed	11-Nov-21

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
	Letter from BPC in Appendix H	the gap in the central reservation (access to east end of Blofield) to execute a U-turn at this junction to join the A47 WEST towards Norwich. As part of the dualling scheme Highways England plan to close this break in the central reservation therefore closing off this access route towards Norwich. The consequence of this is to force all of the traffic from Blofield Heath through the already congested village of Blofield and along Yarmouth Road to the Cucumber lane roundabout (see 1a above). (<i>Refer to Appendix A</i>) Norfolk County Council also plan to build a new primary school in the next 2-3 years at the location shown on the map that is at least DOUBLE the size of the existing school thus creating even more traffic along a typical village road. As NCC had, at the point of the consultation with Highways England, not yet submitted planning applications, HE were unaware of this until advised by the Parish Council. They committed to consider this in their planning. During the consultation both the School and Blofield resident representation regarding the access route to Norwich were discussed at length. Following the meeting Blofield Parish Council proposed the alternate junction (see below) at the eastern end of Blofield that would potential alleviate both of the issues above.	The technically viable solutions similar to this are Options B and C as set out in section 4.5 of the Scheme Design Report (REP1-046). These options were discounted due to the additional cost of the grade separated options against an at-grade option as well as the low use of the existing junction arrangement in the forecast future years do-minimum scenario within the strategic traffic model. The traffic modelling for the scheme uses a strategic model which does not model the schools.		
Yarmouth Road Junction	Letter from BPC in Appendix A & Letter from BPC in Appendix H	The Parish Council, with its local knowledge, also suggested to HE an alternative road layout to improve traffic flow within the village, especially with the increasing traffic with the potential new school, which has been ignored.	See response above in relation to Yarmouth Road Junction.	Not agreed	11-Nov-21

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
Yarmouth Road Junction	Letter from BPC in Appendix C & Letter from BPC in Appendix H	2.3 Works Plans Blofield Parish Council is disappointed that the suggested alternative junction layout has been completely disregarded by Highways England. This was proposed to Highways England due to the following concerns which have been ignored. Traffic flow from Blofield Heath suggests that a high number of parishioners are exiting Blofield Heath, travelling south towards Blofield, using the slip road to join the A47 East towards Acle and then using the gap in the central reservation to execute a U turn to then travel to towards Norwich on the westbound A47, as indicated below.	See response above in relation to Yarmouth Road Junction.	Not agreed	11-Nov-21
Yarmouth Road Junction	Letter from BPC in Appendix C & Letter from BPC in Appendix H	6.1 Chapter 3- Assessment of Alternatives Junction option B detailed in 3.1.12 is pretty close to what the Parish Council wanted to see. Discounted purely on costs and what a computer has predicted as traffic flow, without seeking any local knowledge or insights. Again very disappointing to see this desirable option discounted or even a willingness to work with the Parish Council to see what is best for the local community.	See response above in relation to Yarmouth Road Junction.	Not agreed	11-Nov-21
Blofield Allotments - Land	Letter from BPC in Appendix A & Letter from BPC in Appendix H	We desperately need to know which area of land HE will require. HE submitted the Development Consent Order in December 2020 but it takes over a year for a decision. HE have said that we will lose the present carpark and some of the top plots but at the moment we don't know how many. We renew leases at the beginning of April and we need to know who will lose plots, we also have a waiting list but are unable to offer any spaces until present plot holders have been relocated. Allotments take time, planning and money and the plot holders now need to know if they have to move. HE are hoping to do a site visit to mark the area required but no date has been arranged. HE	The Applicant has now confirmed how the scheme affects the allotment plots. The scheme extents have been overlayed onto aerial imagery to confirm which plots are to be affected (see Appendix E). This has also been agreed with the Allotment society. It has now been agreed between the Applicant and BPC that provision of additional land adjacent to the A47 is not a suitable option and therefore will no longer be progressed.	Agreed	11-Nov-21

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
		have indicated that they may be able to provide some plots on an adjacent site, but it may be between the two trunk roads which isn't particularly environmental to be growing veg in the middle of exhaust fumes – If extra land is made available – who will own that in the future?	The Applicant will arrange for the extent of works to be marked out at the Allotments.		
Blofield Allotments – Gas Main	Letter from BPC in Appendix A, Appendix H & Appendix I	A main gas line has had to be diverted and may require restricted access to the site – unsure of timings.	The gas main is now planned to be installed late Autumn/Winter 2022/23 with a 6-month construction period. As this now falls within the winter this should minimise the impact on the allotments.	Under discussion	
Blofield Allotments – Gas Main	Email from BPC in Appendix E & Letter from BPC in Appendix H & Appendix I	Carparking - during the two weeks of construction there will be no access to the current carpark - HE were going to discuss with the land owner of the neighbouring field the possibility of a temporary carpark/ access point - any update? It is thought HE were also going to try and reduce this car park closure to just a few days - especially if it will happen during the Summer months.	As the diversion works now fall within the winter this should minimise the impact on the allotments. There will be a 2-week period within this with no access to the current carpark. This will be kept to the shortest duration possible, to minimise the impact on the Allotments. Pedestrian access will be maintained to the area south the works, outside the DCO boundary, to ensure that the chickens remain accessible. If for any reason access cannot be maintained then alternative arrangements will be made to ensure the chickens are looked after.	Under discussion	
Blofield Allotments - Carpark	Letter from BPC in Appendix A, Appendix H & Appendix I	The present carpark will be required by HE and is now in a very poor state of repair, with large potholes, flooding and mud with many cars getting stuck. We have tried temporary repairs, but we can't warrant spending large sums of money on a temporary solution. We have asked for assistance from HE for a temporary fix but to no avail. HE have indicated a new smaller car park will be provided but we don't know to what standard and what long term costs may impact the PC.	The Applicant is unable to assist in repairs to the existing carpark. However, the Applicant can confirm that road drainage will be provided on the re-aligned Yarmouth Road to capture road surface water and prevent run-off into the carpark. This drainage will be maintained. Drainage will not be provided within the carpark itself. The new carpark will be created from compacted stone. The new carpark will provide at least an equivalent area of parking for users of the Allotments. Further	Under discussion	

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
			details will be provided during the Detailed Design phase.		
Blofield Allotments - Carpark	Letter from BPC in Appendix C	2.7 Drainage and Surface Water Plans The allotment car park seems to be vastly reduced compared to what is currently serving the allotment gardens. Will this new reduced size be sufficient to cater for peak growing season capacity?	See response above in relation to size of the carpark.	Agreed	11-Nov-21
Blofield Allotments - Carpark	Letter from BPC in Appendix C	Will the proposed concrete ditched channel be sufficient to cope with surface water run off to prevent the allotment car park from being flooded (as is the current issue) and water creating channels down the half plot side of the allotment gardens.	See response above in relation to drainage.	Agreed	11-Nov-21
Blofield Allotments - Carpark	Email from BPC in Appendix E	We need to see the new plans of the carpark entrance. The allotment carpark is shown as the small, hatched area - but looking again I can't see any drainage on the road to prevent the run off, the same problem we have at present. We know Michael Andrews was also very concerned about the proposed entry to the new car park being banked - and thus effectively preventing vehicle access to the allotments bordering Nick Crane's field - and possibly even to the main haulage way. This all needs to be clarified quickly.	The Applicant held a meeting with Mr Andrews, the landowner on 25 June 2021 to clarify the proposals and to discuss the updated plan, included in the General Arrangement Plans (REP7-005), which remove the 'banking'. A filter drain is proposed along the edge of the re-aligned Yarmouth Road to capture the surface water run-off, as shown on the Drainage and Surface Water Plans (APP-010).	Agreed	11-Nov-21
Blofield Allotments - Carpark	Email from BPC in Appendix F	The car park plans do not show provision of an area near the entrance which will be needed to store woodchip deliveries to site.	The exact location of the area for the woodchip area will be confirmed during detailed design. The Applicant is aware of the requirement to provide this area and will liaise with BPC to agree the location.	Agreed	11-Nov-21
Blofield Allotments - Carpark	Email from BPC in Appendix F	Also can HE confirm the vehicle capacity of the new car park.	The new carpark will provide at least an equivalent area of parking for users of the Allotments as provided by the existing car park. The exact dimensions will be confirmed during the detailed design phase.	Under discussion	

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
Blofield Allotments - Trees	Letter from BPC in Appendix A & Appendix I	Most of the mature trees along the northern edge that act as a wind break will be lost, this will change the growing conditions on site.	The Applicant confirms that the existing mature trees will be lost due to the re-alignment of Yarmouth Road, however new extra heavy standard trees will be planted alongside the new carpark boundary as shown on the Masterplan (REP7-011).	Under discussion	
Blofield Allotments - Trees	Letter from BPC in Appendix C & Letter from BPC in Appendix H	6.8 MasterPlan Replacement trees along the A47 by Plantation Park and the Allotment site are also welcomed but these ought to be of mature status to offer the same level of shielding the to be removed trees currently provide.	The mitigation principles embedded in the planting design (which address strategic and policy derived objectives and location specific screening and integration functions) are detailed in section 7.9 of ES Chapter 7: Landscape and Visual (APP-045). The Masterplan (REP7-011) shows the resulting planting design. This includes extra heavy standard trees in the vicinity of the allotment site. More detail will be provided in the detailed design phase of the scheme.	Agreed	11-Nov-21
Blofield Allotments - Trees	Email from BPC in Appendix E & Appendix I	Mature trees - We are pleased that mature trees will be replaced along the Northern Alignment but we need to know who is responsible for the management of those trees - especially watering in the first year. Gemma was to check if it will be HE or NCC. No mention from HE of how many trees they are proposing to plant - will they run all along the Northern border of the allotments?	This is still being discussed between the Applicant and Norfolk County Council and will be confirmed to Blofield Parish Council. In either case there is a requirement that the trees need to be maintained.	Under discussion	
Blofield Allotments – Water tank	Letter from BPC in Appendix A, Appendix H & Appendix I	The water supply will need to be moved	The Applicant is aware the water supply will need to be relocated and raised, however is not yet able to confirm the proposed location. If when moving the water tank it becomes damaged the Applicant will replace with a new tank, as required. The exact location of the area for the water supply will be confirmed during detailed design. The Applicant is aware of the requirement to provide this and will liaise with BPC to agree the location. The Applicant will also ensure that the water supply is maintained, even if via a temporary source, whilst the works are ongoing.	Under discussion	

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
Blofield Allotments – Water tank	Email from BPC in Appendix F	Unless a new water tank is being provided by HE, the existing one will need to be moved and operational within 48 hours if the move takes place between 1 April and 30 September, when the water supply is turned on and therefore in regular use. Outside these dates there is more flexibility.	See response above in relation to the water tank	Agreed	11-Nov-21
Blofield Allotments – Fencing	Letter from BPC in Appendix A & Letter from BPC in Appendix H	New rabbit proof fencing installed etc. and although these seem minor issues the plot holders are concerned.	The fencing design has been amended to reflect the concerns of the plot holders, as shown on the General Arrangement Plans (REP7-005).	Agreed	11-Nov-21
Blofield Allotments – Fencing	Letter from BPC in Appendix C	Will there be sufficient space to facilitate access to the two haulage ways on the main allotment plots?	The layout of the carpark and fencing has been amended to ensure access to the haulage ways on the main allotment plots, as shown on the General Arrangement Plans (REP7-005).	Agreed	11-Nov-21
Blofield Allotments – Fencing	Email from BPC in Appendix E & Letter from BPC in Appendix H & Appendix I	Also, we think HE need to clarify what type of fence they will put beside the new Lingwood road, as this Northern fence will also hopefully provide security for the allotment car park (and terminate at the new gates).	The fence is proposed to be 6' chain link fence along the northern boundary of the carpark to the gate. The Entrance Sign/Notice Board will be relocated to the new access and will be replaced, if required.	Under discussion	
Blofield Allotments – Fencing	Email from BPC in Appendix E	Wildlife fencing - just to clarify it is deer and rabbit proof and will it be 6' high.	The Applicant can confirm the fence will be "rabbit and deer fencing" 1.9m (6') high.	Agreed	11-Nov-21
Blofield Allotments – Disturbance	Email from BPC in Appendix E	Disturbance issues - At present - There are four mature heritage apple trees that need to be moved, this can't be done until the site has been marked out as we are hoping to move them by the new gates at the top of the allotments and a tree spade will be required during the	The Applicant will arrange for these trees to be relocated. As the trees needs to be relocated before the new access and gate are constructed the Applicant will liaise with BPC to determine the proposed location for the trees.	Agreed	11-Nov-21

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
		winter season. Please can this be discussed and confirmed.			
Blofield Allotments – Disturbance	Email from BPC in Appendix E & Letter from BPC in Appendix H	Obviously, there may be other issues when works commence. Can we ask that they nominate an onsite contact when work begins, to resolve day to day issues?	The Applicant has confirmed that Robert Norman (from Galliford Try) will be the point of contact.	Agreed	11-Nov-21
Closure / redirection of FP7	Letter from BPC in Appendix A & Letter from BPC in Appendix H	An existing Public Footpath exists across the busy A47 behind what is now a new residential development. Blofield Parish Council has attempted to have this footpath redirected to negate the risk but to no avail. (See Appendix A for further information)	FP7 is outside the boundary of the scheme and is unaffected by the scheme.	Agreed	11-Nov-21
Designated Funds	Letter from BPC in Appendix A & Letter from BPC in Appendix H	At the start of the proposal to widen the A47 we were informed that a Designated Fund would be available for the local area to apply to. This seems to have disappeared as no local council seems to have benefitted. We have submitted a revised application after we were told the criteria had changed, which hasn't been yet been acknowledged.	The Applicant has recently appointed a resource to progress designated funds on the A47. Funding is available for biodiversity schemes. The Applicant has been in contact with Blofield Parish Council to confirm a feasibility study has been funded. A further meeting will be arranged.	Agreed	11-Nov-21
FP4	Letter from BPC in Appendix C, Appendix H & Appendix I	2.4 Rights of Way and Access Plans It would appear that FP4 is going to be diverted through the back of what would be the new school site. Currently FP4 borders the top of the bank running adjacent to the A47 and through the small section of woodland before turning to the south to join up with Yarmouth Road adjacent to Turret House. The Council would urge that you consult with NCC Childrens Services and NPS who are evolving plans	FP4 is outside the boundary of the scheme and is unaffected by the scheme. However, the Applicant will discuss this with the Designated Funds team to determine if a feasibility study could be progressed to provide a fence.	Under discussion	

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
		for the new school site to ascertain if a redirected footpath is relevant.			
WCH	Letter from BPC in Appendix C	2.4 Rights of Way and Access Plans It would appear that only a cycle track is being provided over the new overbridge whereas the Council understood that this was going to be a footpath as well to facilitate safer pedestrian access to Blofield from the residents on the northern side of the A47 (and on which a housing proposal was passed for a sub division on the premise there would be footpath connectivity – which doesn't appear to be the case)	As is confirmed in Applicant's Response to the Rule 9 Letter dated 5 th February 2021 (AS-001) the term "cycle track" refers to shared use highways (available for use by pedestrians and cyclists).	Agreed	11-Nov-21
WCH	Letter from BPC in Appendix C, Appendix H & Appendix I	6.8 MasterPlan The Council welcomes the addition of what seems to be proper footpaths connecting the allotment site to Norwich Camping and also the footpath to the north of Waterlow, the new bridge and to join up with the "old" A47 path. It is a shame that this seems to contradict the maps detailed in 2.4 and so the Council would appreciate confirmation that these footpaths will be delivered. It also notes a lack of crossing points which would be welcomed to facilitate slower traffic entering Blofield or some other form of physical speed restraint.	The Applicant can confirm that the footpaths will be provided as shown on the Masterplan (REP7-011). As referenced above the term "cycle track" refers to shared use highways (available for use by pedestrians and cyclists). The Applicant will discuss with Norfolk County Council as to whether a crossing point could be provided on Yarmouth Road.	Under discussion	
WCH	Email from BPC in Appendix E	Gemma was also going to speak to her colleagues with regard to the footpath crossing the A47 from Yarmouth Road to Shack Lane.	See response above regarding the footpath.	Agreed	11-Nov-21
Waterflow flooding	Letter from BPC in Appendix C & Letter from BPC in Appendix H	2.4 Rights of Way and Access Plans Will the proposed soakaways be sufficient to protect the properties at Waterlow from surface water flooding?	The Applicant has responded in the 'Applicant's Response to Relevant Representations (REP1-060) to RR-053. <i>In response to the potential flooding impact anticipated in the representation at Waterlow Cottage, Waterlow, Blofield. NR13 4LJ, it is recognised that all of the surface water from</i>	Agreed	11-Nov-21

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
			<i>the natural catchment including the existing A47 impermeable carriageway comes down the field at the back of the property and pools on the road outside Waterlow Cottage as this is the lowest point in the area. This has been confirmed from surface flow mapping of the hydrological regime as part of the development of the Proposed Scheme. It is for this reason that the drainage of the Proposed Scheme has been developed to drain by infiltration and in addition the design has sought to reduce the incidence of existing surface water flooding by routing the overland flows through clean water soakaways to slow down the natural overland flows.</i> The drainage, including soakaways, will be maintained by the Applicant. The A47 Blofield to North Burlingham Scheme is however not a flood relief scheme. The Applicant is obligated not to increase flood risk as a result of the Scheme and that is what the drainage design is designed to achieve.		
Road Lighting	Letter from BPC in Appendix C, Appendix H & Appendix I	2.6 General Arrangement Plans The proposed 20 lighting columns would be in contradiction of the Blofield Neighbourhood Plan Environment 5 Policy regarding Dark Skies. If the proposed junction was amended as per our suggestion at the beginning of this document, then the junction lighting would not be in contradiction to our local plan policy.	As described in the Scheme Design Report (REP1-046) lighting is proposed at the Yarmouth Road as road safety mitigation. The lighting will be LED and include back shields, where appropriate, to limit light spill. The modified junction arrangement as proposed by Blofield Parish Council is not a technically viable solution. Whilst Option B, considered in the Scheme Design Report (REP1-046) may not require lighting, it would have other environmental impacts resulting from the increased land take and additional construction.	Under discussion	

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
			The provision and assessment of lighting in the ES Chapter 7 (APP-045) and the Lighting Assessment contained in Appendix 7.8 (APP-085) assume the worst-case scenario and if alternative solutions can be found to improve the visibility of the junction without the need for lighting the lighting may be removed during detailed design.		
Road Lighting	Email from BPC in Appendix E	There are also a lot of street lighting columns which is against the dark skies policy of the council.	See response above regarding street lighting.	Agreed	11-Nov-21
Hedgerows	Letter from BPC in Appendix C	2.9 Hedgerow Plans The Council is disappointed that there appears to be limited new hedging being planted to offset the hedging being removed.	The hedgerows to be provided are shown on the Masterplan (REP7-011). The scheme results in a biodiversity net gain of greater than 40%.	Agreed	11-Nov-21
Speed limits	Letter from BPC in Appendix C	2.11 Traffic Regulation Plans Could the proposed 30MPH limit be extended to cover the entrance to the allotment gardens carpark thus enabling safer access to the allotments, considering a footway is going to be provided to encourage walking to the allotments it would be beneficial to have the opportunity for speeding cars to be reduced.	Provision of the footway enables safer access to the allotments. The speed limits proposed are appropriate for the road.	Agreed	11-Nov-21
Speed limits	Letter from BPC in Appendix C	Considering the A47 will now be national speed limit, is the slip road off the Westbound side to enter Blofield sufficient to slow drivers down from the 70MPH limit into a tight turn off for either Waterlow or Yarmouth Road restricted at 30MPH? The Council can foresee accidents occurring and would really encourage Highways England to reconsider the junction plans as mentioned at the start of this document.	The diverge taper from A47 to Yarmouth Road has been increased in length, when compared to the existing layout, to give vehicles more time to slow down. This along with the provision lighting and the dual carriageway itself will improve the safety at this junction.	Agreed	11-Nov-21
Landscape	Letter from BPC in Appendix C	6.1 Chapter 7 – Landscape and Visual Effects 7.9.2 mentions providing an appropriate Blofield gateway semi ornamental landscape treatment at the	Requirement 5 'Landscaping' to the dDCO (REP7-007) includes for consultation with the relevant	Agreed	11-Nov-21

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
		junction of the A47 with the Yarmouth Road. The parish council would like to be consulted over this gateway. 7.9.2 also mentions retaining or replacing and reinforcing existing vegetation where this contributes to the distinctive qualities of the landscape, including a notable line of poplar trees on the north-eastern edge of Blofield. Presumably this excludes the line of Poplar trees on the allotment site as they will be destroyed for the realignment of Waterlow, but we would appreciate clarity over the tree treatments for works alongside the A47 and what is proposed to provide security for the allotments as the current line of poplar trees prevents open access to the allotment site. However section 7.10.4 seems to contradict the above, stating :- The Proposed Scheme would result in the loss of a line of mature shelterbelt trees on the southern edge of Waterlow, adjacent to the allotments on the north eastern edge of Blofield. A line of mature trees along the northern edge of the A47 to the west of the Yarmouth Road junction at Blofield would also be removed by construction.	planning authority prior to approval by the Secretary of State. The Applicant considers that this is appropriate. The Applicant will however provide the details of the proposals to the Parish Council.		
Arboriculture	Letter from BPC in Appendix C & Letter from BPC in Appendix H	6.2 Appendix 7.7 Arboricultural Impact Assessment. This document seems to show that the line of trees adjacent to Plantation Park will be removed along with all the trees adjacent to the allotment site and those adjacent to the A47. This is a devastating loss of mature trees with seemingly limited plans to replace said mature trees.	As part of the best-practice precautionary approach, the Arboricultural Impact Assessment shows a worst case scenario of vegetation clearance as a result of the Scheme. The design principles embedded in the Scheme to avoid environmental constraints (including tree loss) are detailed in section 7.9 of ES Chapter 7: Landscape and Visual (APP-045). The Masterplan (REP7-011) shows the resulting planting design and maps both trees to be retained and proposed planting. This includes the mitigation proposed as part of the arboricultural and landscape		

Issue	Document Reference	Blofield Parish Council Comment	Applicant's Response	Status	Date
			and visual impact assessments. The Scheme has a positive Biodiversity Net Gain.		
Noise Pollution	Letter from BPC in Appendix H	It is also noted that permanent noise barriers will be erected next to properties - 3m high by 265m in length as 37 properties in the vicinity of Yarmouth Road (A47 to the Dansbower Lane junction) are predicted to have significant adverse traffic noise effects. Will these be screened with any planting?	A large proportion of the existing vegetation will be retained between the properties and the proposed Noise Barriers, see Masterplan (REP7-011)	Agreed	11-Nov-21
Land	Letter from BPC in Appendix H	Permanent land take is required from the allotment gardens car park in Blofield, and it is noted that land will be required temporarily from 4 properties on Yarmouth Road and we would like confirmation that the property holders will be involved in decisions etc.	The Applicant has liaised with each of the property owners affected.	Agreed	11-Nov-21

APPENDIX A - LETTER FROM BLOFIELD PARISH COUNCIL, 15 FEBRUARY 2021

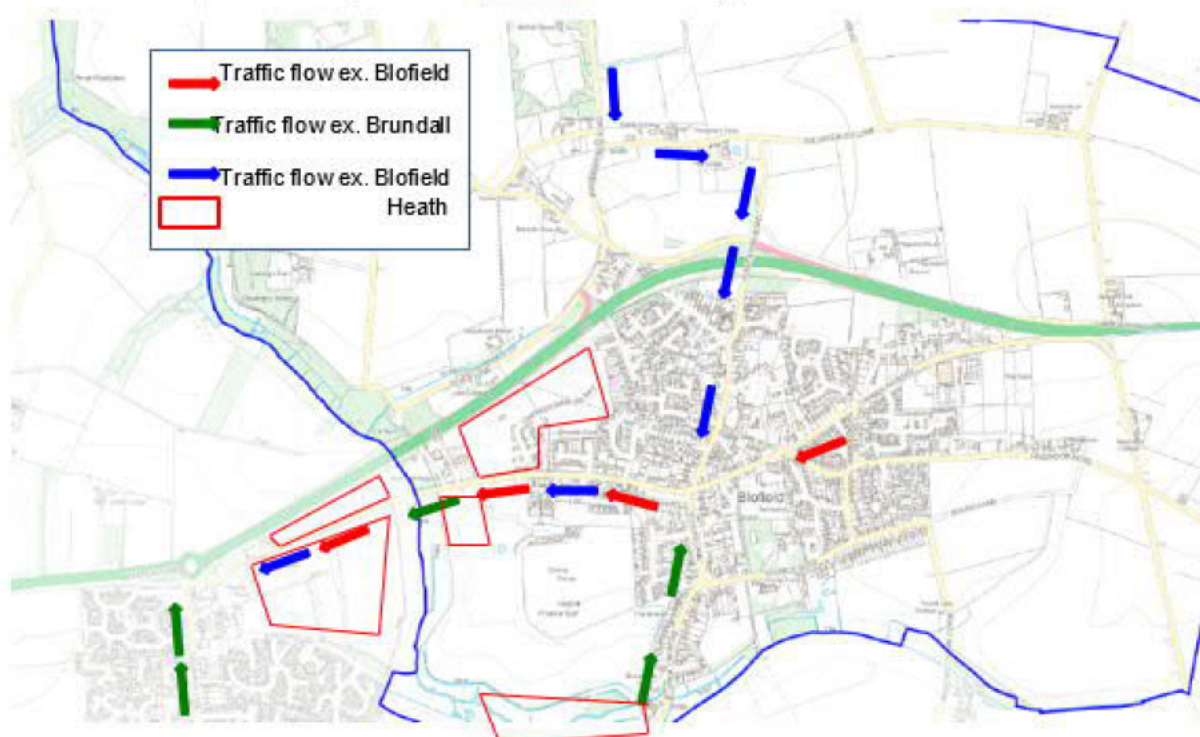

Blofield Parish Council

Blofield Parish Council, 19 Willow Close, Brundall,
Norwich, NR13 5PZ Tel: [REDACTED] @gmail.com

1. Highways England a. Cucumber Lane Roundabout

With increased existing and approved residential developments in the villages of Blofield, Blofield Heath and Brundall increased pressure on the village infrastructure continues to mount. Access West towards Norwich from these villages relies, in the main, on access to the A47 dual carriageway at the roundabout at the Cucumber Lane (from Brundall) / Yarmouth Road (from Blofield) junction.

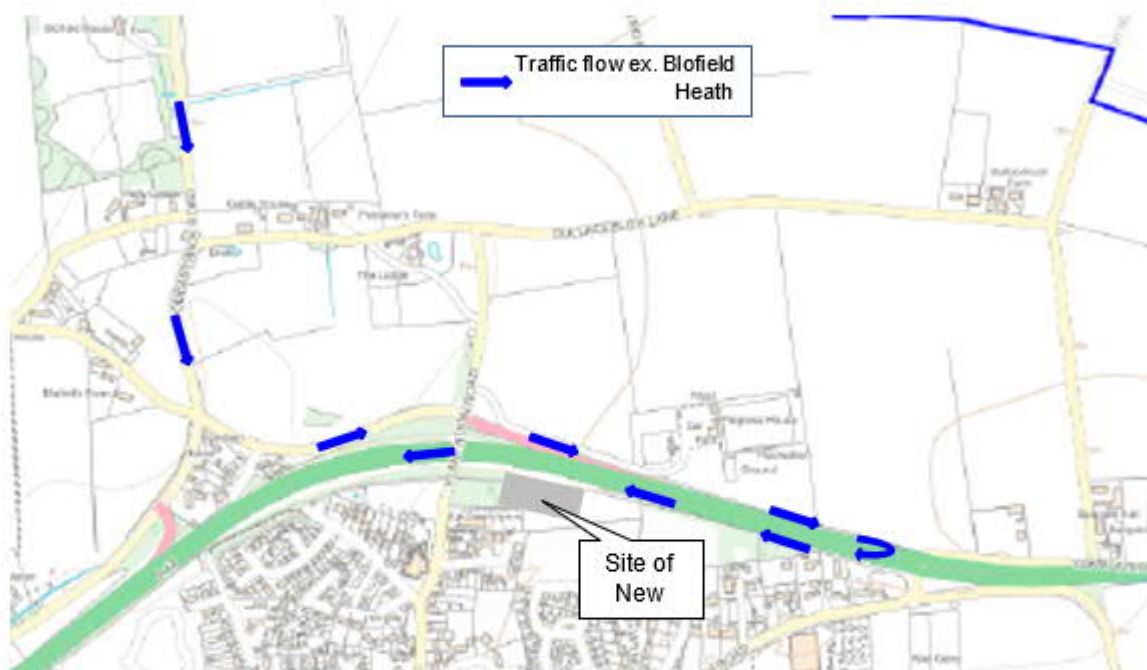

Traffic routes (as indicated on the map) show traffic emanating from Blofield Heath, Brundall and Blofield itself all concentrating on this junction. Already traffic on the A47 approaching from the East (Acle / Gt. Yarmouth) approaches the junction at high speed and volume causing congesting at the roundabout for traffic joining from the villages, causing tailbacks at peak times.

Both Highways England and Norfolk Highways refuse to perceive this as a problem either now or in the future and have resisted taking a proactive approach to the problem by planning ahead instead positioning themselves on a "wait and see" approach.

Local knowledge already sees this as a problem waiting to happen but no authority will take responsibility for resolving in advance. All that has been tabled are, on the building of a further residential development towards said roundabout, minor changes to the roundabout layout and some minimal road widening on the approaches. Insufficient in the opinion of the local Parish Councils.

b. Traffic flow through the village

During Consultation with Highways England on the proposed plans for dualling from Blofield to North Burlingham it became apparent that a reasonable number of Blofield Heath residents were travelling south out of their village towards Blofield, using the slip road to join the A47 East towards Acle and using the gap in the central reservation (access to east end of Blofield) to execute a U-turn at this junction to join the A47 WEST towards Norwich.

As part of the dualling scheme Highways England plan to close this break in the central reservation therefore closing off this access route towards Norwich. The consequence of this is to force all of the traffic from Blofield Heath through the already congested village of Blofield and along Yarmouth Road to the Cucumber lane roundabout (see 1a above).

Norfolk County Council also plan to build a new primary school in the next 2-3 years at the location shown on the map that is at least DOUBLE the size of the existing school thus creating even more traffic along a typical village road. As NCC had, at the point of the consultation with Highways England, not yet submitted planning applications, HE were unaware of this until advised by the Parish Council. They committed to consider this in their planning.

During the consultation both the School and Blofield resident representation regarding the access route to Norwich were discussed at length.

Following the meeting Blofield Parish Council proposed the alternate junction (see below) at the eastern end of Blofield that would potential alleviate both of the issues above.

-  - A47 Dualling
-  - Local Roads
-  - Farm Access Track

Blofield East Modified A47 Junction Suggestion

Access West towards Norwich from Blofield Heath:

- Down existing down slip to A47 Eastbound
- Off new slip towards Overbridge
- Over bridge to Blofield
- Join A47 Westbound at existing on slip

Access Eastbound from Norwich to Blofield Heath

- Existing off slip on A47 to Shack Lane

Access to Blofield Westbound from Acle

- Off new slip road Westbound
- Enter Blofield at existing junction

Access from Blofield Westbound to Norwich

- From existing junction now designated Westbound only
- No traffic entering from East

Note

- New Farm access track from new Westbound slip road

This was submitted to Highways England for consideration (as it was felt only minor changes were required) but has been completely ignored and discounted in the final plans and submission of the DCO.

2. Assistance with Highways England

Update on the A47 Improvements and the impact to Blofield Allotments.

Background

Since 2013 Blofield Parish Council has leased two adjoining areas of land to provide allotment space for the Parish of Blofield. We currently have approximately 50 plots ranging in size from a quarter to full size plots. We also have a community plot and community orchard. The site lies just south of the Old Yarmouth Road and very close to the exit from the A47 into the Village of Blofield.

Impact by A47 Improvements

Part of this land will be required by Highways England (HE) for the dualling scheme of the A47 from Blofield towards Acle. As a Parish Council we have been working closely with the team from Highways England but as we are only lease holders we don't really have much influence. Our main difficulties at the moment are:

- We desperately need to know which area of land HE will require. HE submitted the Development Consent Order in December 2020 but it takes over a year for a decision. HE have said that we will lose the present carpark and some of the top plots but at the moment we don't know how many. We renew leases at the beginning of April and we need to know who will lose plots, we also have a waiting list but are unable to offer any spaces until present plot holders have been relocated. Allotments take time, planning and money and the plot holders now need to know if they have to move. HE are hoping to do a site visit to mark the area required but no date has been arranged. HE have indicated that they may be able to provide some plots on an adjacent site, but it may be between the two trunk roads which isn't particularly environmental to be growing veg in the middle of exhaust fumes – If extra land is made available – who will own that in the future?
- A main gas line has had to be diverted and may require restricted access to the site – unsure of timings.
- The present carpark will be required by HE and is now in a very poor state of repair, with large pot holes, flooding and mud with many cars getting stuck. We have tried temporary repairs, but we can't warrant spending large sums of money on a temporary solution. We have asked for assistance from HE for a temporary fix but to no avail. HE have indicated a new smaller car park will be provided but we don't know to what standard and what long term costs may impact the PC.
- At the start of the proposal to widen the A47 we were informed that a Designated Fund would be available for the local area to apply to. This seems to have disappeared as no local council seems to have benefitted. We have submitted a revised application after we were told the criteria had changed, which hasn't been yet been acknowledged.
- Most of the mature trees along the northern edge that act as a wind break will be lost, this will change the growing conditions on site.
- The water supply will need to be moved, new rabbit proof fencing installed etc and although these seem minor issues the plot holders are concerned.
- The Parish Council, with its local knowledge, also suggested to HE an alternative road layout to improve traffic flow within the village, especially with the increasing traffic with the potential new school, which has been ignored.

3. **Footpath across A47**

An existing Public Footpath exists across the busy A47 behind what is now a new residential development. Blofield Parish Council has attempted to have this footpath redirected to negate the risk but to no avail. A copy of their representation to the Open Spaces Society, outlining the issue, is copied below.

Dear Sirs,

Blofield Parish Council is writing to you to seek your comments, recommendations and hopefully canvas your support in relation to a proposed redirection of a footpath within our village for the reasons stated below.

Whilst we recognise that your organisation primarily has the interests of maintaining accessibility and maintenance of existing footpaths, and fully supporting this as a Parish Council, we have the unenviable task of balancing this commendable remit against risks to, and the safety of, our Parishioners.

History

As you will see from the map in Figure 1 below Footpaths 5 and 7 (FP5 , FP7) traversed what historically was an agricultural cultivated field and converged at the northern boundary of the field before traversing the busy A47 dual carriageway and continuing on as Footpath 3 to the north. These footpaths were used frequently by adult walkers, with or without dogs.

In 2015 this field was sold and planning permission granted for the residential development of 167 new homes with provision for greenspace and a children's play area along the northern boundary of the site, adjacent to the A47, between that road and the housing development.

Since 2017 the Council has been lobbying the local planning authority, Broadland District Council, and Norfolk County Council, to highlight what the PC identifies as a consequent increased potential risk and safeguarding issue with the Children's play areas so close to the footpath and its access to the A47. No method of restricting and securing access to the A47 has been forthcoming from either Council to mitigate the risk the PC identified nor an acceptance of responsibility for the risk and therefore liability. The PC has major concerns that children may use this route to retrieve play equipment e.g. balls that go over the development boundary or indeed in extreme cases think it fun to play "chicken" on the A47 or use the access to play hide and seek. The traffic on this stretch of the A47 regularly is travelling at 70 mph, often beyond, and visibility on the carriageway as you approach the crossing point is limited. With residential developments in our own and other local parishes the traffic flows can but continue to increase. When the crossing point was created there were no houses adjacent to it.

To date the developer has only proposed a 6 foot close boarded fence along the northern boundary, staggered at the footpath access to "obscure" the opening.

Figure 1

FP5 and FP7 access will be maintained by the developer across the residential site.

Proposal

As a consequence of the above the Council is proposing to seek redirection of the footpath as outlined in Figure 2 below.

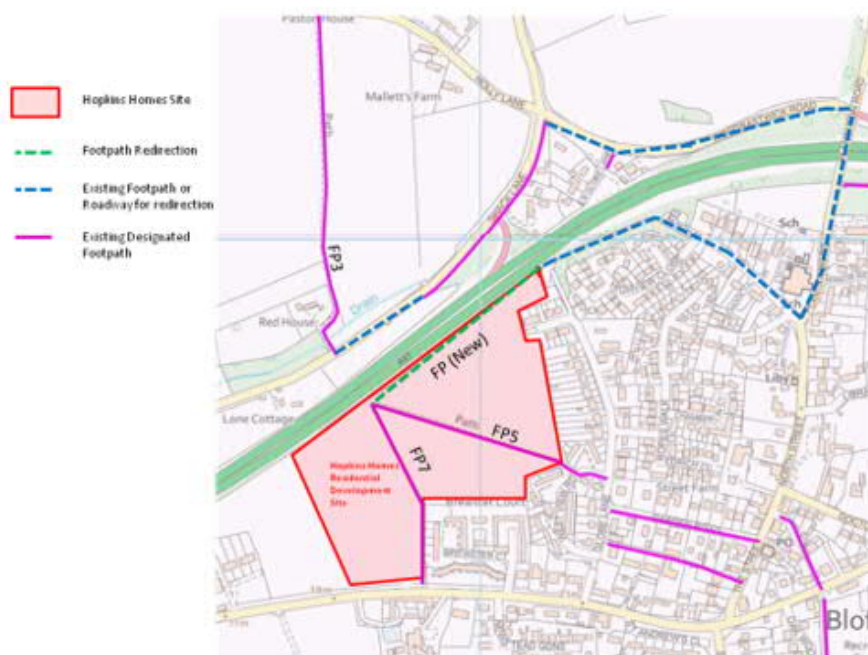

Figure 2

Due to limited crossing points of the A47 the redirection would be as follows :

- Establishment of new recognised footpath along the Northern Boundary going north-east to join existing footpath to North Street.
- South-east along pavement to Plantation Road
- North along Plantation Road, crossing A47 over roadway bridge
- West on Woodbastwick Road
- South-west on Shack Lane to rejoin FP3 at existing point

Whilst this redirection involves a much greater distance the PC feels that this is the only option to eliminate the risk and safeguarding issues identified.

Again the Parish Council wishes to re emphasise support for your organisation and the principles you hold dear but hopefully you can appreciate the position in which we are placed and our desire to protect our Parishioners. We seek your guidance, advice and support in lobbying for the required change.

For reference Appendix A includes some photographs of the existing crossing point viewed towards the residential development in progress. You can see how close the site boundary is to the A47 and how easy it will be for children or adults to access the roadway.

Yours etc.

Existing crossing point on A47 showing central refuge
(Foot path access arrowed)

View looking East on A47 from the northern side of the A47 at the crossing point

Designated Funds

As Jerome asked for a few details, I have had a bit of a dig and found some emails. I have tried to put them in chronological order starting with the original email from Jon Donlevy, which says play equipment etc is included and telling us to be bold with ideas. Melanie, I have highlighted an email from you as it notes an email from Charlotte. I also have one from Charlotte asking for more details on play equipment -it just shows what a waste of time it all was. I have attached the final version that I submitted in October if you want to send it on to Jerome for info.

Hi Nikki,

At our meeting last week, after some investigation you said our Designated Fund Application for Marty's Marsh was unacceptable as it would have paid a third party for the purchase of the land. Since that application was submitted, we have now purchased the land and wondered if the attached application for development works could be considered. Do we need to we resubmit via the formal route or are you able to pass it to the relevant person, any guidance would be greatly appreciated? I have sent it directly as Melanie, our parish clerk is away at present, but please contact her - [REDACTED]@gmail.com or myself if you need any further clarification.

On another note - any news on revised plans surrounding the allotments? Also, just to update you, Melanie has emailed all allotment holders again to try and get more consents to share names and addresses and she will update you on her return.

Many thanks for your help.
Kind regards,
Sarah

3rd September 2020 Stuart forwarded the original applications to Nikki Rowley

Blofield Parish Council
Fri 31/05/2019 09:33
Good morning all,

Having a read through regarding the Designated Funds I am both surprised and frustrated. At a meeting I had attended with Paul when I was pregnant, Jonathan Donlevy, stated that new playground equipment would be funded. With regard to the original applications I had an email from a lady called Charlotte stating that our applications had gone to committee and were not successful but would go into the next ballot. When asked when would this be and if there was anything I could change to make the bid stronger I was ignored.

After re-working both applications and sending them to HE I have subsequently been ignored and even when chased and asked for HE to just confirm they had received the applications I have still been ignored.

Anyway rant over...for now.

See you tonight.

Kindest regards
Mrs Melanie Eversfield

Dear Sarah

In the original email regarding the multi-generational playground you mentioned that you already had three quotes for the work. We're preparing the initial application for this **designated** fund submission and it would be helpful if we could include the quotes you already have. Would you be able to send them to me please.

If you can send them over as soon as possible that would be great as we're preparing to submit the application by the end of this month.

Let me know if you have any questions.

Kind regards
Charlotte

Hi Sarah

Thanks a lot for your email regarding the playground for all generations in Blofield.

Can you give me a bit more information on the plans for the playground. It would be helpful to know the background of this project and how it came about. Also, any information you have regarding the demand for the playground for all generations and who it will benefit specifically. Please can you let me know the proposed location and the apparatus you are considering installing.

Please can you also send me the quotes you have received.

We will then prepare an application to our Designated Funds department.

Let me know if you have any questions.

Kind regards
Charlotte

+3 others

Good morning all,

I have now heard from Highways England regarding our bids for **Designated Funds**.

- Marty's Marsh Bid - this has been to their board and on this occasion has been unsuccessful - they are hoping to put it in the next round of bids. I have asked if there is anything we can change to the bid to make it more appealing - I am yet to hear anything back.

- Play Area Bid for MHH and Heathlands - this has been submitted.

Highways England have confirmed that its next round of looking at bids received is likely to be toward the end of this financial year.

Slightly frustrated!!!!

Kindest regards

Dear Ms Dhesi

Thank you for your email of 29 October regarding Designated Funds.

If you would be able to kindly supply some more details about the funding you would be interested in, we would be very happy to pass your details on to the relevant department. Our Designated Funding is separated into workstreams dependent upon the area of work, so we would then ensure you are put in touch with the right people.

Thank you again for contacting us. If there's anything else we can help you with please email or telephone our contact centre, [REDACTED] or email info@highwaysengland.co.uk.

To help us identify and make improvements to our responses, I'd be very grateful if you could please take our feedback survey by [clicking here](#).

Kind regards

Subject: Designated Funds Opportunity

Date: Thu, 21 Jun 2018 10:30:26 +0000

From: Donlevy, Jonathan [REDACTED]@highwaysengland.co.uk>

To: Blofield Parish Clerk [REDACTED]@gmail.com>, Blofield Parish Council [REDACTED]@gmail.com>

Dear Blofield Parish Council

As we are refining our design for the new A47 Blofield to North Burlingham improvements we would like to draw the Parish councils attention to the opportunity to provide ideas to the A47 team for improvements that could be made to the local area.

Designated funds are a series of ring fenced funds for Highways England to address a range of issues beyond the traditional focus of road investment. I have provided an email link here that provides more information [REDACTED]

As you know the communities and areas better than anybody and we would like ideas from the Parish Council that benefits the community. We would then be happy to take forward any suitable ideas to our decision committee to apply for funding. We are not able to guarantee the funding as there is criteria to be met but there is strong appetite to spend this money on the local communities. The designated funds are not tied in to our scheme funds so your ideas to improve the community can be realised very quickly.

Some examples of funding that has been improved but not exclusive to are:

- New play parks
- Improvements to a rugby pitch.
- Clean up of significantly poor land areas.
- New and or improvements to footpaths and cycleway
- Improvements and repairs to community buildings

Plan going forward:

We would like you to have a short discussion within the Parish Council members to generate any ideas and send these to us, (the more the merrier). We don't need a lot of detail at this point just the idea and how it benefits the community.

We will then review these and arrange to come and talk to you about these in more detail so that we can submit the application to our decision committee.

Please be bold with your ideas and if you need any assistance then let me know and I'll be happy to help.

Kind regards

Jonathan Donlevy

APPENDIX B - MEETING MINUTES, 12 MARCH 2021

Blofield Parish Council Meeting

Date	Friday 12 March 2021
Time	11:00am – 12:00pm
Venue	Microsoft Teams
Chair	[REDACTED]
Attendees	[REDACTED]

Topic	Discussion
Update on scheme	GM - Application for DCO end of December. Currently in representation period until end of April followed by hearing to finish June 202. Works to start Autumn 2022. Traffic open spring 2024.
Government climates strategy	SS – Is there an issue that the schemes does not adhere to the Government Climate Strategy? This was written in the local press. NR – Not aware of any issues aware
Talk through letter	GM has spoken to the Norfolk County Council regarding the letter
Increase in traffic between Blofield heath from Brundall	GM – The area is not a part of the scheme. Sweco has carried out design modelling, the results show that in the first year, there is not a significant increase in traffic flow. HE will aim to set up a monitoring regime once opened for any other future amendments.

	SM – Other development plans have been spoken to about the increase in traffic. Cucumber lane is an issue without the scheme. NR to recommend to Operations about the roundabout speed and turns.
Flow through the village	GM – HE to carry out analysis to find out type of junction. JB - Send a copy of traffic flow plan with and without the scheme to the Parish Council. SD – What is the Traffic flow when the school opens? SM – School is not a part of the development plan. The school will have a responsibility to look at the impact when open.
Allotments	The plot on the far right will be used for the gas main diversion. SM - Need to make adjustment to red line, top half will be lost. SD asked about the location of the water tank. SM - No location for the water tank yet. Gas Mains Location NR – Gas mainline will not be tunnelled under. It will be through the car park, North of the blue line on the plans. GM – times for gas main installation is estimated to be Spring / summer 22 with a 6-month construction period. SB – For the Gas mains construction, there will be a 2-week period with no access to the current car park. Below the red line, locals will have access by foot to the allotments. 6-month period will be the full construction time.
Repairs to Car Park	GM - Not in HE plans.
Impact on Mature Trees	SM confirms that the mature trees will be removed. Planning to plant new trees along the northern alignment of the allotments.

Drainage	SM- There will be no drainage in the car park, only on the road.
Footpath across A47	GM – This is outside of the scheme scope. Norfolk council to raise this with their own projects team.
Designated funds	GM - HE has recruited a resource for designated funds on the A47. HE does have funding for Bio-diversity on the Blofield Scheme. The HE designated funds resource will be in contact with Blofield Parish Council to arrange a meeting.
AOB	SM – A statement of common grounds to be created by Sweco for the inspector.

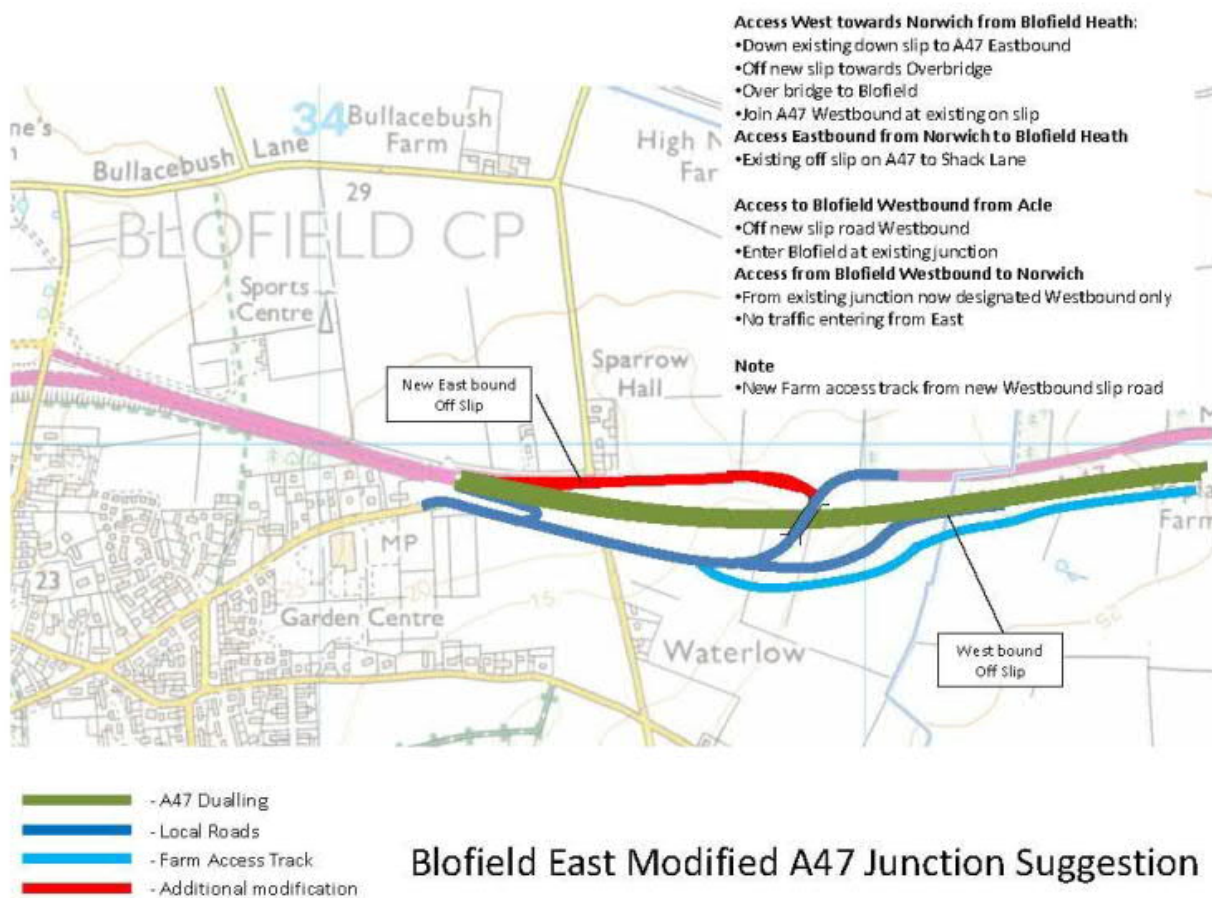

Owner	Actions	Date
NR	NR to recommend to Operations about the roundabout speed and turns.	
JB	Send a copy traffic flow plan with and without the scheme to the parish	
GM	Designated funds meeting set up in few weeks	

APPENDIX C - LETTER FROM BLOFIELD PARISH COUNCIL, 26 MARCH 2021

Blofield Parish Council comments on Highways England A47 Blofield to North Burlingham DCO

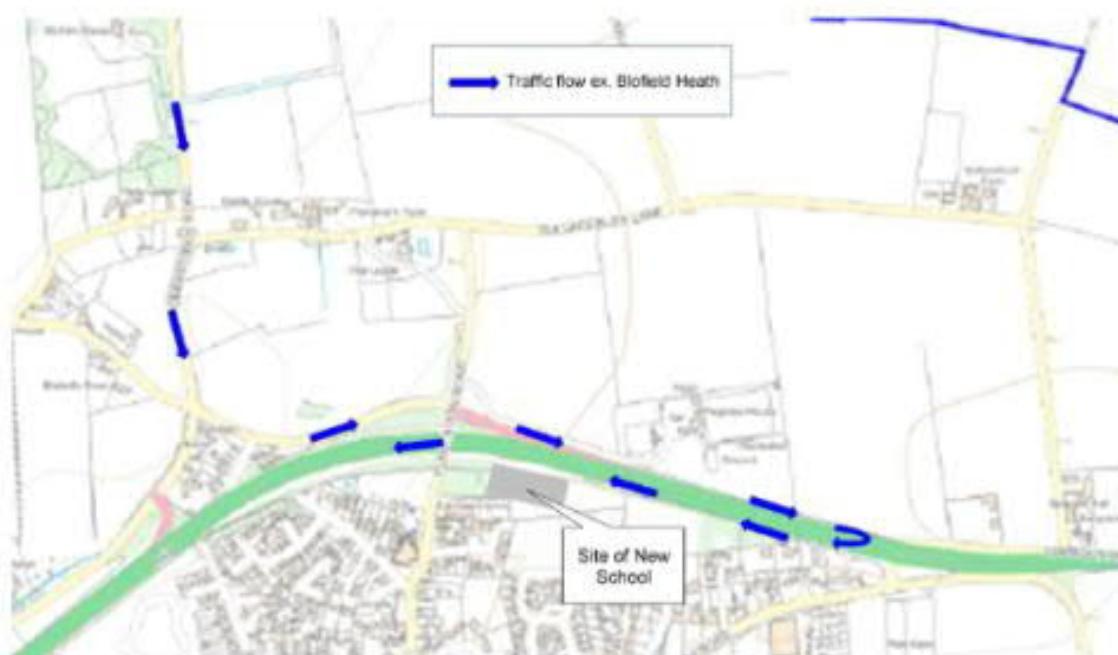

2.3 Works Plans

Blofield Parish Council is disappointed that the suggested alternative junction layout has been completely disregarded by Highways England.

This was proposed to Highways England due to the following concerns which have been ignored.

Traffic flow from Blofield Heath suggests that a high number of parishioners are exiting Blofield Heath, travelling south towards Blofield, using the slip road to join the A47 East towards Acle and then using the gap in the central reservation to execute a U turn to then travel to towards Norwich on the westbound A47, as indicated below.

As the proposal for the A47 junction will close off the gap in the central reservation, it is our view that traffic will be forced to enter Blofield and encounter the already congested road network in the vicinity of the current school site, doctors surgery and proposed new school site for onward travel to the A47 Cucumber Lane roundabout for onward travel to Norwich.

Proposed development in the parish and beyond our boundary will further compound the traffic flow issues being encountered at the A47 Cucumber Lane roundabout.

Traffic routes shown on the indication above demonstrate that flows from Brundall, Blofield and Blofield Heath concentrate at the A47 Cucumber Lane roundabout which is already causing congestion before the additional development proposals for housing have been built out.

Both Highways England and Norfolk County Council refuse to perceive this as a problem either now or in the future and have resisted taking a proactive approach to the problem by planning, instead positioning themselves on a wait and see basis. Local knowledge already sees this as a problem waiting to happen, but no authority will take responsibility for resolving this in advance.

It is with this knowledge why we proposed an alternative layout to the junction that could be achieved with minor alterations to the plans which, in our view, would alleviate the traffic flow issues demonstrated above.

2.4 Rights of Way and Access Plans

It would appear that FP4 is going to be diverted through the back of what would be the new school site. Currently FP4 borders the top of the bank running adjacent to the A47 and through the small section of woodland before turning to the south to join up with Yarmouth Road adjacent to Turret House.

The Council would urge that you consult with NCC Childrens Services and NPS who are evolving plans for the new school site to ascertain if a redirected footpath is relevant.

It would appear that only a cycle track is being provided over the new overbridge whereas the Council understood that this was going to be a footpath as well to facilitate safer pedestrian access to Blofield from the residents on the northern side of the A47 (and on which a housing proposal was passed for a sub division on the premise there would be footpath connectivity – which doesn't appear to be the case) Will the proposed soakaways be sufficient to protect the properties at Waterlow from surface water flooding?

2.6 General Arrangement Plans

The proposed 20 lighting columns would be in contradiction of the Blofield Neighbourhood Plan Environment 5 Policy regarding Dark Skies. If the proposed junction was amended as per our suggestion at the beginning of this document, then the junction lighting would not be in contradiction to our local plan policy.

2.7 Drainage and Surface Water Plans

The allotment car park seems to be vastly reduced compared to what is currently serving the allotment gardens. Will this new reduced size be sufficient to cater for peak growing season capacity? Will there be sufficient space to facilitate access to the two haulage ways on the main allotment plots?

Will the proposed concrete dished channel be sufficient to cope with surface water run off to prevent the allotment car park from being flooded (as is the current issue) and water creating channels down the half plot side of the allotment gardens.

2.9 Hedgerow Plans

The Council is disappointed that there appears to be limited new hedging being planted to offset the hedging being removed.

2.11 Traffic Regulation Plans

Could the proposed 30MPH limit be extended to cover the entrance to the allotment gardens carpark thus enabling safer access to the allotments, considering a footway is going to be provided to encourage walking to the allotments it would be beneficial to have the opportunity for speeding cars to be reduced.

Considering the A47 will now be national speed limit, is the slip road off the Westbound side to enter Blofield sufficient to slow drivers down from the 70MPH limit into a tight turn off for either Waterlow or Yarmouth Road restricted at 30MPH? The Council can foresee accidents occurring and would really encourage Highways England to reconsider the junction plans as mentioned at the start of this document.

6.1 Chapter 3- Assessment of Alternatives

Junction option B detailed in 3.1.12 is pretty close to what the Parish Council wanted to see. Discounted purely on costs and what a computer has predicted as traffic flow, without seeking any local knowledge or insights. Again very disappointing to see this desirable option discounted or even a willingness to work with the Parish Council to see what is best for the local community.

6.1 Chapter 7 – Landscape and Visual Effects

7.9.2 mentions providing an appropriate Blofield gateway semi ornamental landscape treatment at the junction of the A47 with the Yarmouth Road. The parish council would like to be consulted over this gateway.

7.9.2 also mentions retaining or replacing and reinforcing existing vegetation where this contributes to the distinctive qualities of the landscape, including a notable line of poplar trees on the north-eastern edge of Blofield. Presumably this excludes the line of Poplar trees on the allotment site as they will be destroyed for the realignment of Waterlow, but we would appreciate clarity over the tree treatments for works alongside the A47 and what is proposed to provide security for the allotments as the current line of poplar trees prevents open access to the allotment site.

However section 7.10.4 seems to contradict the above, stating :- The Proposed Scheme would result in the loss of a line of mature shelterbelt trees on the southern edge of Waterlow, adjacent to the allotments on the north eastern edge of Blofield. A line of mature trees along the northern edge of the A47 to the west of the Yarmouth Road junction at Blofield would also be removed by construction.

6.2 Appendix 7.7 Arboricultural Impact Assessment.

This document seems to show that the line of trees adjacent to Plantation Park will be removed along with all the trees adjacent to the allotment site and those adjacent to the A47. This is a devastating loss of mature trees with seemingly limited plans to replace said mature trees.

6.8 MasterPlan

The Council welcomes the addition of what seems to be proper footpaths connecting the allotment site to Norwich Camping and also the footpath to the north of Waterlow, the new bridge and to join up with the "old" A47 path. It is a shame that this seems to contradict the maps detailed in 2.4 and so the Council would appreciate confirmation that these footpaths will be delivered. It also notes a lack of crossing points which would be welcomed to facilitate slower traffic entering Blofield or some other form of physical speed restraint.

Replacement trees along the A47 by Plantation Park and the Allotment site are also welcomed but these ought to be of mature status to offer the same level of shielding the to be removed trees currently provide.

APPENDIX D - LETTER FROM HIGHWAYS ENGLAND TO BLOFIELD PARISH COUNCIL, 11 JUNE 2021

Blofield Parish Council
19 Willow Close
Brundall
Norwich
NR13 5PZ

Friday 11 June 2021

Dear Blofield Parish Council,

I am writing to you today to outline and confirm the details that were discussed in the Allotment meeting held on 17th March 2021.

New Car Park

The plan attached shows the proposed new car park for the allotments, which is directly next to the allotment gardens highlighted in light blue strips. It was agreed that the new car park surface will be laid with stone.

The new gas main will run through the middle of the existing car park. The gas main installation is due to commence Spring to Summer 2022, and this will be a 6-month construction period. For two weeks during construction there will be no access to the current car park.

There will be continued access as before as required by the landlord Mr Andrews to the track running from the entrance alongside the eastern edge of the allotments to the land to the south (not yet shown on plans, a new plan will be sent as soon as details added).

Water Tank

During installation of the gas main, the current water tank will be relocated which will be accessible to all plot owners. At this current stage, we do not know the exact location to where the water tank will be moved however, to minimise disruption to the plot owners, a temporary water supply will be provided until the permanent water tank has been positioned.

Impact on Mature Trees

The mature trees along the northern edge of the existing car park will be removed for construction. Once the construction has finished in the area, new mature trees will be planted alongside the Northern Alignment of the allotments.

Fences and access point.

There will be a double gate for vehicles and a side pedestrian gate at the entrance of the allotment car park.

In regard to the allotments, wildlife fencing will be positioned at the top of the allotments with two vehicle gates and a pedestrian gate to allow access to the gardens.

Disturbance issues.

If any costs are incurred during the works to any effected allotment holders i.e., say shed relocation or any damage to existing assets, then these must be evidenced, and fair and reasonable re-imbursement will be considered through discussion with our appointed lands valuer.

Please can you respond to this letter as confirmation on details that Highways England are providing and that the Parish Council remain happy with the proposed solutions and construction to the allotments.

Should you have any queries about this correspondence please don't hesitate to contact me using our Scheme inbox address which is:
A47BlofieldtoNorthBurlinghamRIS@highwaysengland.co.uk

Yours sincerely,

Gemma Malone

Highways England Senior Project Manager

APPENDIX E – AERIAL IMAGERY AT ALLOTMENTS

(Blue line = DCO Boundary)

APPENDIX F – EMAIL FROM BLOFIELD PARISH COUNCIL, 28 JUNE 2021

Good afternoon,

I can confirm that I have received the meeting notes and plan and the Parish Council would like to make the following comments: -

- Carparking - during the two weeks of construction there will be no access to the current carpark - HE were going to discuss with the land owner of the neighbouring field the possibility of a temporary carpark/ access point - any update? It is thought HE were also going to try and reduce this car park closure to just a few days - especially if it will happen during the Summer months.
- We need to see the new plans of the carpark entrance. The allotment carpark is shown as the small, hatched area - but looking again I can't see any drainage on the road to prevent the run off, the same problem we have at present. We know Michael Andrews was also very concerned about the proposed entry to the new car park being banked - and thus effectively preventing vehicle access to the allotments bordering Nick Crane's field - and possibly even to the main haulage way. This all needs to be clarified quickly.
- Mature trees - We are pleased that mature trees will be replaced along the Northern Alignment but we need to know who is responsible for the management of those trees - especially watering in the first year. Gemma was to check if it will be HE or NCC. No mention from HE of how many trees they are proposing to plant - will they run all along the Northern border of the allotments? Also, we think HE need to clarify what type of fence they will put beside the new Lingwood road, as this Northern fence will also hopefully provide security for the allotment car park (and terminate at the new gates).
- Wildlife fencing - just to clarify it is deer and rabbit proof and will it be 6' high.
- Disturbance issues - At present - There are four mature heritage apple trees that need to be moved, this can't be done until the site has been marked out as we are hoping to move them by the new gates at the top of the allotments and a tree spade will be required during the winter season. Please can this be discussed and confirmed.
- Obviously, there may be other issues when works commence. Can we ask that they nominate an onsite contact when work begins, to resolve day to day issues?
- There are also a lot of street lighting columns which is against the dark skies policy of the council.
- Gemma was also going to speak to her colleagues with regard to the footpath crossing the A47 from Yarmouth Road to Shack Lane.

We look forward to hearing from you.

Kindest regards

APPENDIX G – EMAIL FROM BLOFIELD PARISH COUNCIL, 01 JULY 2021

Good afternoon,

Further to my email on Monday there are two further points that need to be made and these are as follows: -

- Unless a new water tank is being provided by HE, the existing one will need to be moved and operational within 48 hours if the move takes place between 1 April and 30 September, when the water supply is turned on and therefore in regular use. Outside these dates there is more flexibility.
- The car park plans do not show provision of an area near the entrance which will be needed to store woodchip deliveries to site. Also can HE confirm the vehicle capacity of the new car park.

I look forward to hearing from you.

Kindest regards

APPENDIX H – Response to SoCG from Blofield Parish Council, 9 September 2021

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 19 Willow Close, Brundall, Norwich,
Norfolk, NR13 5PZ T [REDACTED] @gmail.com

5th September 2021

2.1.2 This doesn't take into account all the previous meetings that we have had with HE

- Noted that meetings were taking place in the minutes of the BAA 15th April 2018, Reply from Jon Donlevy 1st May 2018.
- 21 June 2018 – email from Jon Donlevy – designated funds including play equipment. Please be bold with ideas.
- Consultation at Court house September 2018.
- Written update received from HE (Lizzie Cooper 27.12.2018)
- Email from Charlotte Youngs, Jan 2019 Offering compensation for plots which are blocked.
- 11th April 2019 - site visit at Allotments new carpark to have 27 spaces - an increase from present. Secured with a new aluminium gate secured with padlock and chain. The new carpark would be assessed by District Valuer and offered for sale to Allotments or PCC on completion, and a commuted sum for future maintenance.
- The BAA asked if the new water tank could be raised to increase pressure.
- Email from Rob Simpson June 2019.
- Email from Charlotte Young 28 June 2019.
- October 2019 - Article in EDP that the scheme had been put back to 2022.
- Zoom meeting 5th February 2020 Mark Casey confirmed that trees would be replaced with reasonable sized trees (not just whips)
- HE attended Public Meeting at Blofield Courthouse 24th February 2020
- Zoom (or equivalent) meeting 29th September 2020. (25 spaces for carpark – drawing number HE551490-GTY-HGN-000-DR-CH-30005 revision P01.01)
- Zoom (or equivalent) meeting 20th October 2020 New School has not been taken into account, assistance may be required for chickens when there is no access to site.
- 17th March 2021 (First time we have received minutes from HE for any meeting). Trees will be replaced with Mature Trees
- 26th March comments from Blofield Parish Council re DCO Document.
- 11 June Correspondence re: comments from 17th March meeting.

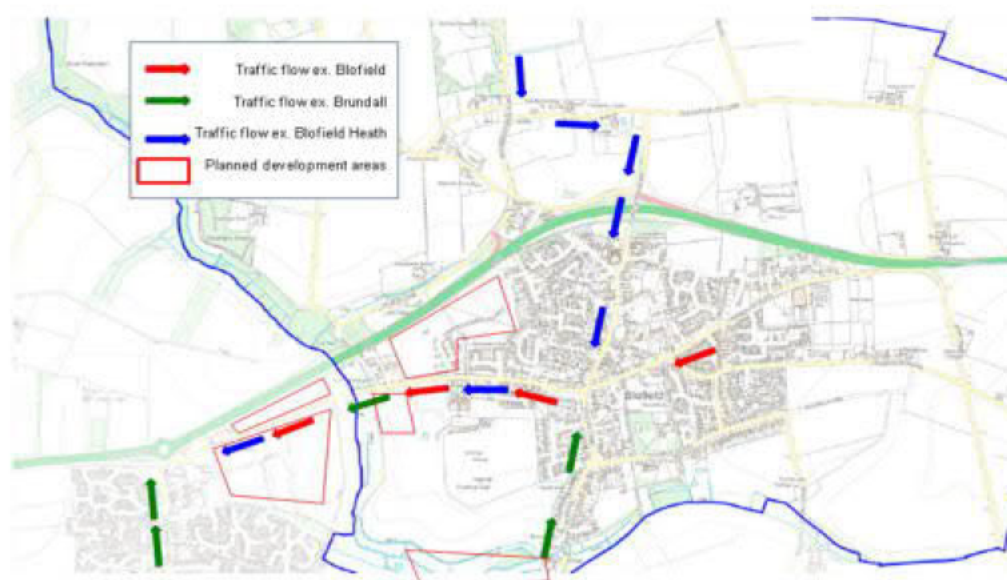

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 19 Willow Close, Brundall, Norwich,
Norfolk, NR13 5PZ Te [REDACTED] @gmail.com

Page 3 : Cucumber Lane Roundabout: Therefore, the implementation of the Scheme is not the underlying reason for the capacity related operational issues at the junction. **It may not be the underlying reason but shouldn't a scheme also try to resolve a recognised problem**

With increased existing and approved residential developments in the villages of Blofield, Blofield Heath and Brundall increased pressure on the village infrastructure continues to mount. Access West towards Norwich from these villages relies, in the main, on access to the A47 dual carriageway at the roundabout at the Cucumber Lane (from Brundall) / Yarmouth Road (from Blofield) junction.

Traffic routes (as indicated on the map) show traffic emanating from Blofield Heath, Brundall and Blofield itself all concentrating on this junction. Already traffic on the A47 approaching from the East (Acle / Gt. Yarmouth) approaches the junction at high speed and volume causing congesting at the roundabout for traffic joining from the villages, causing tailbacks at peak times.

Both Highways England and Norfolk Highways refuse to perceive this as a problem either now or in the future and have resisted taking a proactive approach to the problem by planning ahead instead positioning themselves on a "wait and see" approach.

Local knowledge already sees this as a problem waiting to happen but no authority will take responsibility for resolving in advance. All that has been tabled are, on the building of a further residential development towards said roundabout, **minor** changes to the roundabout layout and some minimal road widening on the approaches. Insufficient in the opinion of the local Parish Councils.

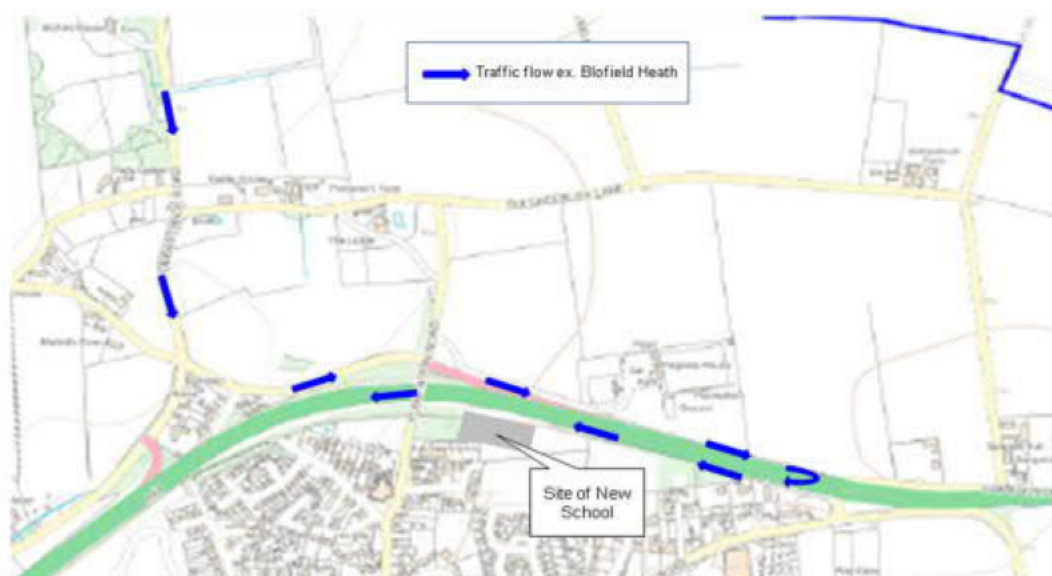

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 18 Willow Close, Roundell, Norwich,
Norfolk, NR13 5PZ Tel: [REDACTED] @gmail.com

Page 5: As the proposal for the A47 junction will close off the gap in the central reservation..... traffic will be forced to enter Blofield and encounter the already congested road network in the vicinity of the current school site, Drs Surgery and the proposed new school site for onward travel to Norwich. **This has missed the point of bringing extra traffic onto The Street and the new enlarged school which has not been taken into consideration. It is not just to do with Cucumber Lane Roundabout. We are aware that the cucumber lane roundabout is outside the development boundary for this scheme.**

During Consultation with Highways England on the proposed plans for dualling from Blofield to North Burlingham it became apparent that a reasonable number of Blofield Heath residents were travelling south out of their village towards Blofield, using the slip road to join the A47 East towards Acle and using the gap in the central reservation (access to east end of Blofield) to execute a U-turn at this junction to join the A47 WEST towards Norwich.

As part of the dualling scheme Highways England plan to close this break in the central reservation therefore closing off this access route towards Norwich. The consequence of this is to force all of the traffic from Blofield Heath through the already congested village of Blofield and along Yarmouth Road to the Cucumbers lane roundabout (see 1a above).

Norfolk County Council also plan to build a new primary school in the next 2-3 years at the location shown on the map that is at least DOUBLE the size of the existing school thus creating even more traffic along a typical village road. As NCC had, at the point of the consultation with Highways England, not yet submitted planning applications, HE were unaware of this until advised by the Parish Council. They committed to consider this in their planning.

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 19 Willow Close, Brundall, Norwich,
Norfolk, NR13 5PZ Tel: [REDACTED] @gmail.com

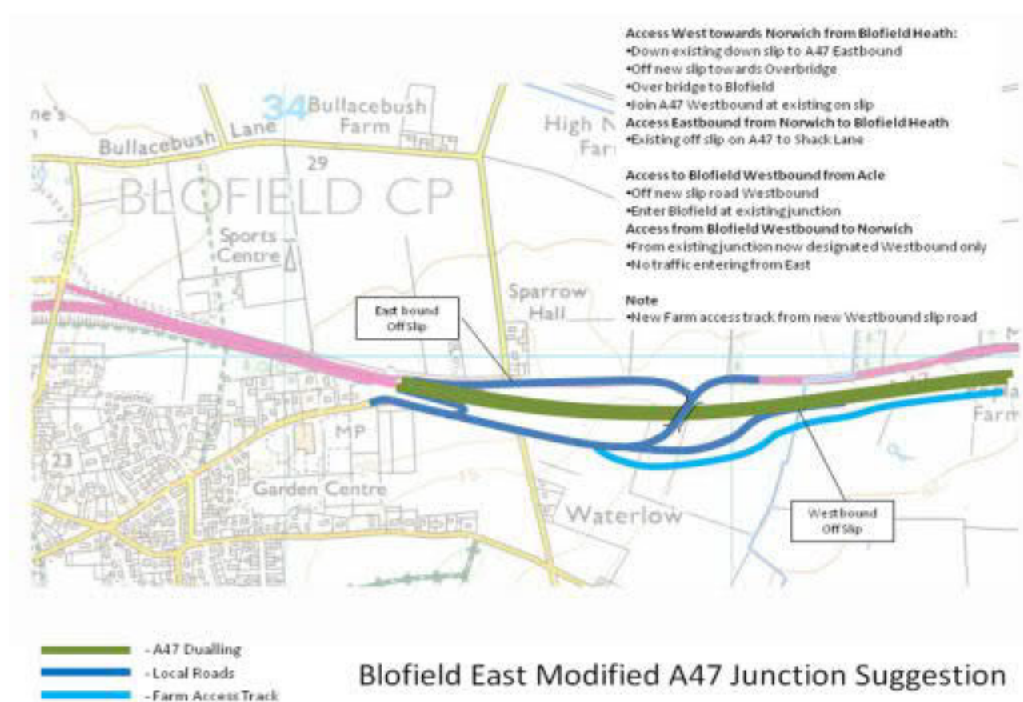

During the consultation both the School and Blofield resident representation regarding the access route to Norwich were discussed at length.

Page 6: The Traffic modelling does not model the schools – This seems crazy when school safety should be taken into consideration with all schemes.

Page 7: Yarmouth Road Junction It is still disappointing that the alternative option has been discounted with no discussion with anyone with local knowledge. We will probably have to “agree to disagree”.

Following the meeting Blofield Parish Council proposed the alternate junction (see below) at the eastern end of Blofield that would potential alleviate both of the issues above.

This was submitted to Highways England for consideration (as it was felt only minor changes were required) but has been completely ignored and discounted in the final plans and submission of the DCO.

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 19 Willow Close, Brundell, Norwich,
Norfolk, NR13 5P2 Tel: [REDACTED] Email: [REDACTED]@gmail.com

Blofield Allotments Land: The scheme extents have been overlayed onto aerial imagery to confirm which plots are to be affected. Many times HE promised to attend the allotment site and peg out the area of land HE required. We understand due to the pandemic that this wasn't possible but it is now and it would be really useful to confirm the site.

Page 8: Blofield Allotments -Gas Main Diversion and carparking: Now that it seems likely the gas main will be moved Spring/Summer 2022 at the height of the growing season, we urgently need clarification on the following points. It is gratefully acknowledged that pedestrian access will be maintained during the gas main installation, but where will the access be to the site, south of the DCO boundary as in HE's reply will be someone's allotment. Access needs to be maintained at all times, as among other things the chickens need twice daily attention including feeding.

Can the car park closure be reduced from two weeks? Has HE been able to arrange any temporary car parking? Some of the allotment holders live in Blofield Heath or are elderly and rely on their cars so the ongoing discussions for temporary parking are essential. Can HE confirm that the new car park will be provided immediately after the gas main has been laid? If not, can HE guarantee that whatever interim surface on the existing car park is left after the gas main works, it will be suitable for vehicles to use even after heavy summer downpours?

Page 9 Blofield Allotment Carpark – The General Arrangement plans show proposed earth works to remove the 'banking' but it is difficult to see the finished layout, so We would appreciate if HE could provide a large scale and detailed plan of the car park, to show that the banking shown on earlier drawings has been removed, thus allowing vehicle access to all the haulage ways and the ongoing issue of where to store woodchip deliveries.

We also request that the dimensions are shown, so that it can be confirmed as the same vehicle capacity or greater than the existing car park as per our meeting on 11th April 2019, when 27 spaces per planned. This was reduced to 25 spaces on 29th September 2020. At that same meeting we were told the new carpark would be assessed by District Valuer and offered for sale to Allotments or PC on completion (we accept that this is when the new carpark was to be sited to the east of the allotments on land that had been purchased by HE) but please clarify if the carpark land will be returned to the current landowner and if not will it be available to purchase by the BAA or Parish Council. It was also stated at that meeting that a commuted sum for future maintenance of the carpark would be available.

The General Arrangement also says that a filter drain is proposed to capture the surface water run-off. This is a current problem and is a filter drain sufficient. (On these technical details we will have to accept that it will work – do we have any comeback if we have issues in the future?)

Page 9/10: Blofield Allotment trees: Please provide the number and location of mature trees (as per letter 11.6.21) to be planted along the northern boundary of the allotment car park, to replace those removed during the works. Could these be marked on the large scale plan of the new car park which we have requested. Also, HE need to confirm who will be

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 19 Willow Close, Brundell, Norwich,
Norfolk, NR13 5PZ Tel: [REDACTED] gmail.com

responsible for looking after these trees in the first year after planting, and if there is any maintenance funding available.

6.8 Masterplan – Replacement trees Along A47 by Plantation Park: The Master plan shows a general planting design which includes extra heavy standard trees in the vicinity of the allotment site – not sure what extra heavy standard trees are. Utility constraints limit the potential for more extensive planting.

The Applicant will confirm who is responsible for the future maintenance of these trees and if there is any maintenance funding available.

Page 10 The Water Tank –and wood chip storage: At an earlier meeting HE undertook to raise the height of the water tank when it is moved, to increase water pressure. BAA's suggested location for both the water tank and the woodchip storage area would be at the eastern end of the allotments (on Plot 1A or the Community Plot if either still remains), outside the new fencing at the boundary between the allotments and new car park and therefore effectively within the entrance area.

Page 10 Allotment Fencing –Whilst we are very grateful that HE have agreed to provide new 6' high rabbit and deer proof fencing along the boundary between the new car park and the allotments but the Position of the rabbit proof fence on is in the wrong position in the General Arrangement Plan (north of the carpark rather than north of the allotment plots.) Gates at haulage ways entrance are not shown and also need to be wildlife proof.

BAA are very concerned by HE's proposals for post and three rail fence between the car park and the Lingwood road. At present, the trees provide security equivalent to a high fence - not only will this be removed, but there will be clear visibility of everything in the car park from the road. Accordingly, for security reasons, the BAA requests that HE also installs a 6' high chainlink fence or similar along the road boundary and the site will be secured with a new aluminium gate secured with padlock and chain. As per the meeting 11th April 2019.

It would be really appreciated if HE could provide a new Entrance Sign/Notice board for the Allotments.

Page 11 Blofield Allotments Disturbance – The ongoing issue of the moving of 4 heritage apple trees. Ideally these need to be moved during the winter months. Depending on the car park fence exact location, (another reason for a site visit to mark the area) the BAA suggests a small move to plots 31A & B and 35A might be the best solution - can HE confirm whether this is possible, and that they will be responsible for moving the trees?

Blofield Parish Council

Chair – Stuart Smith Clerks to the Council – Sarah Osbaldeston and Melanie Eversfield
Blofield Parish Council, 19 Willow Close, Brundall, Norwich,
Norfolk, NR13 5PZ Tel: [REDACTED] @gmail.com

The PC will wait for the contact details of the on-site manager

Closure / redirection of FP7: We are aware that FP7 is outside the boundary of the scheme and is unaffected by the scheme, but the PC was hoping for some support in its attempt to improve the safety of the A47 as a main Trunk Road with direct access from a children's play area.

Designated Funds: We have had a zoom meeting with Tarvinder Gohel, and are pleased a feasibility study has been funded to identifying biodiversity improvements around Blofield, and we are awaiting a meeting in due course.

Page 12 FP4 - It appears that some of FP4 abuts the site as it borders the A47 and for safety this could be improved and would again ask that HE meet with NCC Children's services to liaise on the position with the new school.

Page 12 WCH – It's a shame that there is no provision for a pedestrian crossing point at the end of the new footpath to cross the Old Yarmouth Road on to the existing footpath to Blofield as this would be safer and facilitate slower traffic entering the village.

Page 13 Waterlow flooding – The PC appreciates that there has been a great deal of work on protecting the properties at Waterlow from surface water flooding - but we are concerned with the wording "The scheme is not a flood relief scheme. The applicant is obligated not to increase flood risk as a result of the scheme and that is what the drainage design is designed to achieve". This is concerning when they recognise that all surface water from the natural catchment including the existing A47 impermeable carriageway comes down the field at the back of the property and pools on the road outside Waterlow cottage as this is the lowest point in the area. In the Environmental Statement; Non -Technical Summary it states that the proposed Scheme will be maintained to allow natural overland drainage through the construction of 'dry culverts' or cross drains designed to a 1 in a 100-year event – Who will be responsible for this maintenance and how often.

Page 14 Road Lighting – if we have to have lighting columns are they eco-friendly and positioned to reduce light pollution.

Page 14/15 Landscape The PC will look forward to receiving the details of the proposals.

Noise pollution - It is also noted that permanent noise barriers will be erected next to properties - 3m high by 265m in length as 37 properties in the vicinity of Yarmouth Road (A47 to the Dansbower Lane junction) are predicted to have significant adverse traffic noise effects. Will these be screened with any planting?

Permanent land take is required from the allotment gardens car park in Blofield, and it is noted that land will be required temporarily from 4 properties on Yarmouth Road and we would like confirmation that the property holders will be involved in decisions etc.

We would also like bring to your attention that several documents were referenced which we have been unable to locate e.g REP1-005, APP-045, REP1-041, APP-010.

APPENDIX I – Response to SoCG from Blofield Parish Council, 10 December 2021

Blofield Parish Council

Chair: Stuart Smith Clerks to the Council: Sarah Osbaldeston & Eleanor Bannister
Blofield Parish Council, 35 Church Plain, Loddon, NR14 6EX

Sophie May
SWECO

10th Dec. 2021

Dear Sophie,

Thank you for your email and for the opportunity to review the next draft of the "Statement of Common Ground (S of CG)" document. Following our teams meeting on 11th November, we appreciate that many of our concerns have been addressed, but the document does not seem to incorporate some other changes agreed then. These are as follows:

Cucumber Lane roundabout – It was stated at our meeting that although this is outside of the scheme, extra signage would be included. It had been looked at as part of future works but as it would be classed a major project it was agreed that it would be added to the S of CG, that a road safety audit would be performed 6 weeks after the completion of the scheme and another at 18 months, to see if the scheme had impacted on road safety.

Blofield Allotments - Gas main: At the teams meeting it was discussed that the works would be carried out between October 2022 and March 2023, whilst the SCG draft says "late Summer/Winter 2022/3" – surely this should be "Autumn/Winter 2022/3"? The S of CG also states that there will be a 2-week period within this with no access to the current carpark, but pedestrian access will be maintained. At the meeting on 11th Nov, it was agreed that this closure would be kept as short as possible, as the chickens still require twice daily visits by an elderly couple. It was also agreed that the chickens could be looked after offsite if required.

Blofield Allotments - Car Park: At the meeting we were told that the current car park is 500 sqm. and the new one will be 800sqm. However, the S of CG draft says "*The new car park will provide an equivalent area of parking for users of the allotments*". But the proposed area is 60% bigger than at present, not an "equivalent area". Please can this be clarified?

Blofield Allotments – Trees: In the response, existing mature trees will be lost and "*new trees will be planted alongside the new carpark boundary as shown on the master plan*". Please can it be confirmed that they will be mature trees as per your letter 11th June (your appendix D) and as detailed on the master plan as LE 5.1.3 individual trees supplied size 16 – 18 cm extra heavy standard trees, as in your response further down the S of CG. Differing terminology is confusing (new trees, mature trees, extra heavy standard trees, large trees have all been used at some point). Although at the teams meeting a maintenance plan for all new trees was discussed and is down to The Applicant (Highways England/National Highways) or Norfolk County Council to fulfil, we request confirmation on who is responsible and the length of the maintenance agreement. Could this please be passed to the Parish Council as soon as it is available, and form part of S of CG agreement.

Blofield Allotments - Water tank: At the teams meeting we discussed that the water tank will be repositioned, raised and "be replaced with a new tank if required", yet in the S of CG document it just says "*The Applicant is aware the water supply will need to be relocated however is not able to confirm the proposed location*". We are aware that the DCO is the preliminary design phase and the detailed design phase is to follow, but we would like it

Blofield Parish Council

Chair: Stuart Smith Clerks to the Council: Sarah Osbaldeston & Eleanor Bannister
Blofield Parish Council, 35 Church Plain, Loddon, NR14 6EX
M: [REDACTED] email.com

added to the S of CG "that the tank will be raised and a new one provided if necessary. (The size of the tank has been supplied as requested following the teams meeting; it is 7000L.)

Blofield Allotments - Fencing: The SCG document still states that "*the fence is proposed to be post and three rail along the northern boundary of the car park to the gate*", we see that this is still ongoing, for confirmation. At the teams meeting HE agreed to look to see if this can be changed to a "6 ft. chain link". We hope that this can be agreed. It was also discussed if a new noticeboard could be supplied as per letter from BPC in September 2021 (your appendix H).

FP 4 - Is outside the boundary of the scheme – At our teams meeting, as this path is directly adjacent to the scheme, having fencing installed along the top of the bank was to be discussed with Designated funds department, as the usage of this path will increase with the relocation of the new school and there is nothing to stop children slipping down the bank onto the A47.

WCH – We appreciate that you have confirmed that the footpaths will be provided from the allotments towards the village, but at our meeting on 11th Nov it was agreed that you would discuss with Norfolk County Council a crossing point on Yarmouth Road to aid pedestrians but also to help slow traffic entering the village. Can this be actioned please.

Road Lighting – We appreciate that the lighting will be LED and include back shields to limit light spill at the junction from the A47, but at our meeting you were hoping that these could be removed and replaced with solar powered cat's eyes and a VAS warning sign. Please could this be clarified.

The Council looks forward to hearing back from you and trusts the above can be addressed.

With thanks & best wishes, Eleanor

On behalf of Blofield Parish Council

Eleanor Bannister
Blofield Council deputy clerk

M: [REDACTED]
E: [REDACTED]@gmail.com
