## 21

00:06

Okay, the time is now 1222 Thank you for your patience. Mr. Scriven will take us through the hearing actions. These actions will be published on the project webpage on the planning Inspectorate website as soon as possible. No later than Monday next week. Mr. Scriven.

00:23

Okay, can I just check because we've had some problems with the camera? Everybody can see and hear me can?

00:29

I can Okay, thank

00:30

you. So action. The first action is the applicant to consider rewording paragraphs, one point 1.1 And one point 1.2 and provide reference to controls over the pre commenced and plan of remains including that discussed today such as closer alignment to the EMP mitigation measures for each activity to be set out in the documents. further detail requested to also include dealing with contaminated land traffic management measures, road space booking and likely HGV flows and that's the applicant a deadline six second action local authorities to provide any further comments on the pre commencement plan for deadlines six. Action three applicants provide agreed detail of the discussion and any agreed actions. The recent meeting with the NFU particularly regarding the types and distances of the referred to surveys. That's deadline six. For faction, applicants consider whether specific surveys could be referred to in terms of the meaning of access required to adjacent land that's deadline 6/5 action, applicants confirm whether increase the notice period of 28 days in article 40 and 23 will impact the construction programme and any other part of the IES assessment if so in what way and also tied into that action is for the NFU and any other interested parties to explain with reasoning what the operational benefits would be to landowners have increased in the notice period from 14 to 28 days. That's accepting that some already have provided that information. That's deadline six. So action six updates in relation to D Trunk. And agreement to be provided in the next stick Cypress statement a common ground with Cambridgeshire Council authorities, and the timetable for agreement of the D trunking. agreement to also be provided sort of a bit clunky there. That's deadline six for the action number seven provision of the current version of the D trunking. Plan and associated side agreement, that's the applicant at deadline six action eight an update to be provided by the applicant on de trunking agreements, as well as the statement of common grounds. So this would follow it deadlines seven so we want an updated deadline six and then also an updated deadline seven and then the final action number nine clarification as to why the second version of the environmental master plan was provided and that's from the applicants ideally at the compulsory acquisition hearing, but possibly in deadlines six and that's the end of those actions. Nice. Is there any questions on that?

03:23

Yes, Mr. Scriven polities re entry for the applicant. I wondered if I could clarify just a couple of points from the actions to action point one reference to paragraphs, one point 1.1 And one point 1.2. In the pre commencement plan, I wondered if you were referring instead to one point 2.1 And one point 2.2 And one point 2.3. under that section of limitation.

03:55

You all right. Yes. Apologies for that.

03:57

That's, that's great. The other thing I just wanted to clarify is in relation to providing the current draft of the the legal agreement and the documents within that is that I was hoping to be able to get instructions as to whether we would be able to release that publicly. Understood. Yep. Okay, perfect. And then the final thing, which I have, in the in the break, managed to seek initial instructions as to why we've submitted the updated environmental master plan. And that was because we were requested by Natural England to provide under Part the names of the bat mitigation, underpasses specifically. So the change to the environmental master plan was to reflect that request from Natural England. I will obviously confirm that it is a an action point and and if there are any other changes, but that those are my initial instructions on that on as to why we submitted that deadline for Great, thank you. Thanks Thank you Mr. Scriven. I will now proceed to close this hearing. Thank you very much for participating today.

05:19

Excuse me. Excuse me, ma'am. Yeah, I just had a question on the action point six, update on de trunking and timetable for Cambridge. Did you want an update from Bedford borough as well? Yes. Yeah. Thank you.

05:37

So don't make a note. Yeah. Yeah. Thank you. Yeah. Yeah, we'll change that to local highway authorities. Apologies. Yeah. Okay. Thank you. Thank you, Miss MacLeod. Anybody else have questions? Okay. All right. So I'm going to proceed to close this hearing. Thank you very much for participating today.

06:04

I've already asked this before but I'll ask it again. Any other questions before I close the sixth issue specific hearing on the draft development consent order? Okay, time now is 28 minutes past 12 And I will close this issue specific hearing. Have a very good afternoon.
