

In response to the Examining Authority's Questions, United Utilities Water Limited (Uuw) wishes to confirm that it is seeking agreement of protective provisions in the form of a side agreement.

Uuw can confirm that it is not aware of any disagreement at the current point in time in respect of the wording that is proposed within the draft side agreement.

We have confirmed to the applicant that the wording within the side agreement relating to the 'Discharge of Water, foul and surface Water' is extracted from Schedule 10 Part 12 of Statutory Instrument 2024 no.436 Infrastructure Planning The Hynet Carbon Dioxide Pipeline Order 2024.

If you have any queries regarding the above matter, please contact Andrew Leyssens by email at
