Address:

Dear Secretary of State,

**RE: Submission of Formal Objection to the RiverOak Strategic Partners (ROSP)
Proposal for Manston Airport**

We are writing as local residents to formally register our strong and unequivocal opposition to the Development Consent Order (DCO) application and any subsequent requests for extensions of time submitted by RiverOak Strategic Partners regarding Manston Airport.

We expressly request that the applicant **not** be granted any further time or extensions.

Our objection is grounded in the severe negative impacts this development will introduce to our community, specifically regarding our property at 95 Windermere Avenue. The property sits directly beneath the designated flight path. Low-altitude flights will directly compromise our health, well-being, and daily lives through:

- **Acoustic Disturbance & Noise Pollution:** Continuous low-flying aircraft will cause unacceptable levels of noise pollution, severely disrupting the peace and habitability of our home.
- **Environmental & Air Pollution:** The emissions and fuel pollution from these aircraft present a direct risk to local air quality and public health.
- **Loss of Residential Amenity & Material Injury:** The combined environmental factors will severely diminish the residential amenity of our neighborhood, making it an undesirable environment to live in and causing tangible long-term blight to our property.

For the reasons outlined above, we urge the Secretary of State to reject any requests for further time and to refuse the application.

Kindly acknowledge receipt of this formal representation and ensure it is placed on the public register.

Yours sincerely,

Miss Anne Frewin & Mrs. Christine Normanton
