

PINS RECEIVED

18 JAN 2019

Your Ref. TR020002
My Ref. MAN 038

Dear Mr. Alfred,

Thank you for giving me the opportunity to express my views since I was unable to speak at the Open Meeting held at The Winter Gardens, Margate on 11th January 2019.

I would like to make the following points:

i During the application process regarding Manston Airport please walk around Central Ramsgate and talk to people about their past experiences of 747 freight planes landing at the airport.

However, do not just accept people's ad hoc personal stories

ii During your walkabout hire a light aircraft to give you an actual visual experience of the height of planes, landing at Manston, over Central Ramsgate.

iii Visit an aeronautical research centre to experience the sound levels of 60 and 100 decibels recorded over Central Ramsgate.

iv Stand outside Clarendon House Grammar School and witness how planes use the structure of the building as a marker for the airfield.

v Read the numerous World Health Organization research papers on the negative aspects of living under a flight-path.

vi Finally why, when diesel cars are being phased out should Central Ramsgate suffer more air and noise pollution. The death of Ella Kissi-Dehral highlights the potential danger.

In conclusion, thank you for reading my letter and I look forward to hearing from you soon.

Yours Sincerely

(JOHN DAVISON)
