For the attention of the Manston Airport Case Team.

Please find below my representation for the purposes of the re-determination of the Manston Airport application.

I strongly object to the reopening of an airport at Manston on climate change grounds.

As the CCC points out the UK is way off track for meeting existing carbon budgets.

Allowing airport expansion is only going to exacerbate this failing.

My view is that we should be exercising a precautionary approach to meeting our Paris Agreement obligations and be cutting emissions as deep and fast as possible. This would include no expansion of airports such as Manston.

Kind Regards

Sue Sullivan
