## We need Manston Airport open again

I live in Folkestone and support the re-opening of Manston Airport.

Personally I have used the airport many times before and look forward to any future passenger flights should they become available.

Some of my family live in Thanet and I know the location of Manston trumps that of any of the London airports, along with the injection of money and jobs that the airport will bring to the local area.

The history of the site as an airfield is important to me and I understand there will be an area at the airport celebrating this which I am sure schools and people of all generations will be interested in.

Links to Europe and the rest of the world post-brexite is especially vital and the location of Manston is perfect for relieving the burden in London and also for receiving COVID vaccinations, for example.

There are such strong social, historic, economic and logistical reasons to re-open Manston airport.

I look forward to celebrating the day it can become part of our nations pride again.

Yours sincerely

Kathryn Thomas-Emans
