I wish to add my total support for the building of Manston Airport.

Reasons to develop the airport have already been well documented by many other supporters, but I agree with all of those positive points.

Thanet and East Kent is in a dire state for jobs, training opportunities, and modern successful businesses, on these points alone construction should be already underway.

Environmentally aviation is moving on, developing new planes, engines and power sources, all of which have been pledged to be developed and expanded using the new cutting edges of technology.

How can this huge investment opportunity be turned away, that would be a criminal action in my view.

Thank you.

Sandra Taylor
