---

Dear Sirs/Madams

Without surprise I read that the commissioned Ove Arup report agreed with the previously disregarded the ExA recommendation that Manston would not meet any requirements attributed to a successful operation of a Cargo Hub.

It would be an outrage should the procedure for the DCO application by RSP be further prolonged. RSP's submissions supporting the application have been time and again and again..... shown to be at best incompetent and generally nonsensical fantasy to the point of incomprehension. Many aviation expert reports have contradicted RSP's assertions and shown them to be misguided.

The populace of Ramsgate and surrounding areas have had to live with the possibility of polluting cargo flights, day and night, fuel tankers and transporters using over burdened highways, and the damage to Ramsgate's local commerce i.e. the unique Royal Harbour and Port, architecture, and beaches all of which stand to be enhanced by future investment.

May common sense prevail,

Yours sincerely,

C.W.Whitley
