---

Dear Sir,

I am a current resident of Ramsgate and have been since the COVID pandemic started in March 2021, when I moved in rented accommodation [REDACTED]. I have however been a resident of Kent most of my life, having grown up in Dover.

The independent report by ARUP has clearly concluded that any plans to utilise Manston airport as a cargo hub is unnecessary and would have a detrimental impact on the local populous. Therefore, I wish to add my own voice to the chorus of people against this development.

I am in the process of purchasing a property on [REDACTED], a beautiful Georgian period terraced house overlooking the Main Sands. This would be immediately beneath the flight path of these noisy and heavily polluting cargo planes which would cause inconsolable damage to the health and well-being of residents and as a listed building, I would be powerless to dampen the detrimental impact as a result.

Please ensure common sense prevails and scrap the proposed plans to develop Manston into a cargo airport.

Yours faithfully,  
Joseph Hurling
