Subject: Redetermination of DCO re proposed Manston Cargo Hub
Date: 02 December 2021 13:29:22

I write once more to express my total disbelief that this debacle continues.

No fewer than sixteen reports including the latest by OA robustly prove that this proposal is flawed and is not a viable plan. More importantly, it does not meet the vital component in awarding a DCO which is NEED.

If this DCO is awarded it will run a coach and horses through NSIP conditions to be met and encourage others like RSP to submit proposals which risk not only towns close by but void the climate targets set by the Government.

This proposal dwarfs Chris Grayling's catastrophic attempts re ferries and would highlight the current SOS partiality towards airfields being protected from housing developments. If awarded, the spotlight will be on this decision and RSP will not bear such scrutiny without damage to the SOS.

Yours faithfully

Margaret Mabey
