---

In a country committed to reducing air pollution we would find it difficult to support a further runway being built at Gatwick. By doing this there will be increased use of air traffic.

Companies should be using technology (eg Zoom) to conduct meetings thereby decreasing the use of air travel.

The impact of increased noise levels is also not good for our planet, for humans and animals.

Please let us not increase the damage already done to our planet.

Kind regards

Cherryl and Trevor Stone
