Good morning

I am writing on behalf of the Growing Gatwick Facebook Group

[REDACTED] an group of over 4,000 local people who support the plans to bring the use of the existing Northern Runway into scheduled operations.

I've reviewed the response from Gatwick Airport to the PINS objections & they seem to be a reasonable way to resolve those.

Comments from members of the group relate to forecourt access charges & so we welcome further investment in public transport, particularly for 'out of hours' travel & the provision of alternative methods of accessing the airport for local people, especially staff. It also makes sense that responsibility for the 54% public transport use is shared with the providers of that transport.

Speaking on behalf of the Growing Gatwick Group we look forward to the Secretary of State granting permission for the Northern Runway to be used in routine operations.

Kind regards
Jeremy Taylor
