Subject: West Midlands Interchange re Application 26/00671 WMI Reg 35(b)
Date: 14 September 2026 12:41:52

Sirs,

With regard to the recent application from the developers, I strongly object to the Secretary of State to grant any diversion from the original agreement regarding the time scale to the Rail Terminal Works completion.

The application statement for Non Material Change, is lengthy and complicated for the layman to easily comprehend, and it all reads to be very commendable and over and above many of the requirements asked for. However that does not detract from the fact that it would appear that the developer could again "move the goalpost" regarding the build.

I note that other infrastructures have a higher percentage of warehouse occupation to rail link completion, but that does not give automatic approval for this particular project to increase the warehouse occupation.

The disruption and upset this project caused local residents was a devastating blow, and to find that we may still not get the original plan for the Rail Link is frankly unacceptable.

I urge you to stand by your principles and not let developers worm their way into making alterations away from the original application just to suit their needs and pockets, and that the original conditions that were approved, be kept in place.

Yours sincerely
Mary Jones
