NON-MATERIAL CHANGE TRO50006

I am writing this complaint on behalf of myself & my husband as he is very unwell & cannot write for himself. We have lived in Blisworth for the past 44 years. & in that time we have watched it change from a thriving beautiful safe close knit village with a wonderful caring community into a village being used as a short cut by commuters & heavy goods lorries going to Milton Keynes. It is especially bad when there is a problem on the M1 Motorway. The roads are a nightmare from 7-30 - 9 AM & 3-30 - 6 PM. It is very dangerous for all the older people & children.

Now you wish to encourage the **SE420** proposal which is ridiculous on so many levels. Initially the proposal amendment would create a much higher level of vehicles for all of us, and disruption of road closures around the construction site. Longer term - very dangerous, road pollution & noise among a lot of other things.

There are a number of elderly villagers who will not be able to cope with all this upheaval. They will find it unmanageable frightening & very confusing.

"Why" is this amendment being allowed to be treated as a non material amendment when it is blatantly obvious that it is material.

We feel that the feeling of the villagers and our strong views should be discussed and taken into account ~~Before~~ before any decision is made.

We feel the consequences of this amendment being passed will be catastrophic to the whole well being of Blisworth community in many many ways.
